## STATE LANDS DIVISION

The State Lands Division administers policies established by the Legislature and the State Lands Commission in the management and supervision of all statutory lands which the State has received from the Federal Government. Statutory lands include the beds of all naturally navigable waterways such as major rivers, streams and lakes; tide and submerged lands in the Pacific Ocean which extend from the mean high tide line seaward to the three-mile limit; swamp and overflow lands; vacant school lands; and granted lands.

The primary objectives established by the Legislature and implemented by the State Lands Commission are:

- a. Comprehensive land use planning which encourages compatible multiuse development of state lands while conserving, preserving and protecting irreplaceable resources.
- b. Location of the precise boundaries of tide, submerged and other land areas which are increasingly critical to protection of the state's interests.
- c. The effective development of oil, gas, geothermal and other mineral resources through the administration of policies and programs designed to assure protection of the environment and which will also facilitate the generation of vitally needed revenues.
- d. Surveillance necessary for effective management and title protection of these lands, and if necessary, litigation in the courts, to protect the state's sovereign interests.
- e. Maintenance of records on the acquisition and disposition of the lands and on uses of the lands, and maintenance of an environmental inventory of the lands.

The State Lands Division land management program is accomplished through the efforts of three basic program elements: extractive development, state leases; extractive development, Long Beach operations; and land operations. The division also has a program for executive and administrative services.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Land management .....	\$5,356,787	\$6,029,127	\$6,448,858

II.	Legal support for land operations .....	3	62,440
II.	Legal research for litigation .....	5	(100,058)

## I. LAND MANAGEMENT

### Program Objectives and Description

California's growing population continues to make increasing demands upon the state's land resources. The State Lands Commission is responsible for comprehensive land management activities involving more than 4,000,000 acres of state lands. To meet the demonstrable need for land, the State Lands Commission authorizes the use of land subject to reasonable rules and regulations for fair and adequate compensation. Their decisions are reached at public hearings and are based upon environmental and public benefit considerations.

The specific objectives of the Land Management Program of the State Lands Division are:

To plan for and control the use of state lands in a manner which will increase and protect the state's interest. To maintain a program of land use which will meet orderly land use planning requirements and provide for adequate compensation. To maximize the public benefit, environmental protection, and economic use of these lands. To minimize the rapidly escalating number of commercial and recreational trespasses on state lands. To oversee, from an economic standpoint, the development and operations of the Long Beach tidelands. To perfect title to land the state owns. To plan for and implement the extractive development of mineral resources located on state-owned lands.

### Authority

Division 6, Public Resources Code; Chapter 29, Statutes of 1956 (1st Ex. Sess.); Chapter 138, Statutes of 1964 (1st Ex. Sess.)

### a. Extractive Development—State Leases

The management of extractive development operations involves leasing of land for mineral extraction purposes, and royalty and operational surveillance to assure that the lessee adheres to the terms of the lease. Proper management of operations also insures the preservation of environmental and property values. As required by the Public Resources Code, environmental impact reports are made available to all interested federal, state and local governmental agencies and the public prior to leasing.

### Oil and Gas Leasing and Development

During the productive life of a mineral property it is necessary to perform continuing engineering and geological studies. This insures that the lessee develops the resource to the maximum benefit of the State. In the case of oil and gas properties, the required studies include evaluation of productive limits, reserves, unit equities and secondary recovery. The Commission also has an interest in Federal regulation of the Outer Continental Shelf and has assumed an active part in urging the adoption of regulations containing adequate safety and pollution controls consistent with those of the State.

STATE LANDS DIVISION—*Continued***Geothermal Leasing and Development**

Geothermal resources are recognized as an important clean-energy source. These resources are necessary to help meet California's energy requirements. The State Lands Commission issues permits to prospect for geothermal resources and negotiates geothermal leases on all lands owned by the State. Field inspections during drilling, testing, and subsequent production operations are necessary to ensure that such operations are conducted consistent with public safety and environmental concern.

**Mineral Leasing and Development**

Mineral leasing and development covers processing and issuance of mineral extraction leases, mineral prospecting permits, and dredging permits by private interests and public entities. Field investigations covering extractive operations, permits, and trespass indications are integral features of the resource management program.

<sup>1</sup> Geothermal royalties of \$3,367,810 held in trust pending litigation.

<sup>2</sup> Includes \$2,631,989 ad valorem tax settlement, Tract 2, Long Beach Unit.

**b. Extractive Development—Long Beach Operations**

The tidelands along the Long Beach shoreline are granted in trust to the City of Long Beach. Chapter 29, Statutes of 1956 (1st E.S.), defined the position of the State relative to the oil and gas development of these tidelands. The passage of Chapter 138, Statutes of 1964 (1st E.S.), gave to the State a more active and prominent role in this tidelands oil and gas development. It also increased substantially the State's economic interests. Under this statute, the State has control over the plan and budget of the field contractor that develops and operates the oilfield.

The operations of the tideland portions of the Long Beach Unit and the previously developed productive areas of the Long Beach tidelands are conducted under individual net profits agreements. For the 1976-77 fiscal year the State oil and gas revenue attributable to Long Beach tidelands is estimated to be \$66,000,000.

Of primary importance within the State's objective is the prevention of land subsidence from causes other than natural phenomena and the application of proper measures to protect the environment and ecology.

**Workload Information**

The Long Beach operations staff has the responsibility for maintaining economic control, as charged under Chapter 138, over the Long Beach Unit plan of operations and development and budget which is \$67,009,000 for 1976-77. Average daily production of the Long Beach Unit is 90,000 barrels of oil and 17 million cubic feet of gas. The staff also reviews and evaluates programs for the conduct of production and water injection operations in the prior tidelands development. Average daily production in the prior tidelands development is currently 23,000 barrels per day.

**Output**

One major responsibility of Long Beach operations is performing economic analyses of the development and operation activities of the Long Beach tidelands. Output includes economic control of intended expenditures through the plan and budget of the Long Beach Unit. This control is exercised by itemizing and monitoring the use of budget funds and by the implementing of approvals for new wells and redrills, budget-fund transfers and augmentations. The plan and budget is prepared jointly by the City of Long Beach and the staff of the State Lands Division and is subject to the approval of the State Lands Commission.

Another important activity is the determination of equity area assignments for the Long Beach Unit. Equity assignments determine the actual allocation of profits from the field among the participants. Other functions are to monitor surface elevations to detect any evidence of subsidence, and to monitor seismic activity.

Emphasis is placed on analysis of existing and proposed Federal and State legislation and regulations to determine the economic and operational impact on present operations and future development of State mineral interests. Sales prices of crude oil are regulated by the Federal Energy Administration under a complex two-tier price control system. Projections of the price of crude oil are a major factor in protecting the State's economic interest.

Budgetary and revenue data for the extractive development Long Beach Operations element are shown on Table II.

1977-78	61.4	1,754,296	56,000,000	Estimated

## c. Other Land Operations

The basic nonmineral management program has two fundamental areas; ownership determination (including exchanges, boundary line agreements and litigation) and land management (including appraisals, leasing, indemnity selections, sales, inventory and classification, and title information).

Chapter 706, Statutes of 1975, authorized the Division to undertake an ungranted tidelands inventory and boundary mapping program. This study is currently funded at \$325,000 per year, with the first phase of the inventory to be completed by 1981. A significant portion of the total boundary determination program involves the application of accurate tidal datum measurements along the State's tidal shoreline. A joint Federal/State cost-sharing program of making accurate tidal measurements is currently underway. The State's share in this venture is \$210,000 per year until the study is completed in approximately 3 years.

An augmentation of \$112,433 is included to provide engineering support for the Division's increased emphasis in litigation. An additional \$38,256 is included in this element to fund two limited-term positions in order to reduce the current backlog of lease and permit applications.

## Ownership Determination

Effective management of state-owned tide and submerged lands requires that real property be identified and located. Accordingly, ownership determination is essential. This usually involves extensive engineering, title and legal research studies. In general, boundary claim lines are identified and located by surveying and mapping, and settled by land exchange, boundary line agreement, or litigation.

1. Exchange. The exchange requires an identification of the title conditions of both the parcel currently owned by the State and the parcel to be received in the exchange. An appraisal of both parcels to be exchanged is required to determine that the value to be received is as great or greater than the value relinquished.

2. Boundary Line Agreement. When the location of the common boundary between the State and a private owner cannot be determined, the State, acting by and through the State Lands Commission, is empowered to enter into a negotiated settlement of the boundary.

3. Litigation. Case preparation includes the search for, identification of, and analyses of facts for the consideration of and presentation into evidence by the Attorney General. Court appearances by staff members to present testimony are occasionally required.

## Output

	1975-76	1976-77	1977-78
Boundary Determinations:			
Number of miles claimed	121	96	105
Number of miles settled	1.2	10.5	30
Land titled responses to:			
Public inquiries	500	500	500
Staff requests	510	500	600
Other governmental inquiries	500	500	600

## Land Management

The land management operations of the section include:

1. Appraisal. Appraisals are essential in settlements of litigation of title and boundary agreements in which exchanges are involved. Lands being received must be at least of equal value to the interest being given up. Sales and leases also require appraisal to determine the consideration to be received.

2. Leases. Leases for commercial, industrial and recreational purposes and rights-of-way to accommodate public utility and various types of pipelines which involve tide and submerged lands are subject to Commission review. Following an appraisal and an investigation to determine if an existing use of the land to be leased is compatible with the proposed use, the Division derives a rental rate for the property. All leases must be reviewed on each fifth anniversary to determine if changes in market value indicate that a new rental should be set.

3. Indemnity Selections. The State is indemnified for loss to the school land grant by selection of desirable Federal land. This activity will increase after completion of the inventory and classification of school land, and as the Commission land management program develops.

4. Sales. A land sale requires an identification of the title conditions and an appraisal of the land authorized to be sold. Whether a parcel of land is susceptible to sale depends upon the policies adopted as a result of a completed environmental inventory. Only those lands unsuitable for public retention are considered for potential sale.

5. Inventory, Classifications and Management Plan. In April 1970, the Commission directed the Division to inventory, classify and plan prudent management for its 600,000 acres of school land. In that year the Legislature required an inventory of all lands under commission jurisdiction and an identification of those lands having significant environmental values of statewide interest. More than 3 million acres of this is coastal tide and submerged land. The Commission and Division are participating with the California Coastal Commission in planning uses of this land.

6. Land Title Information. This program provides all information required by law to be kept by the Commission, as well as the working data necessary to properly administer, manage and protect the lands under its jurisdiction. Input consists of:

- Land acquisition and disposition information;
- Land use (encumbrances, leases, permits, etc.) information;
- Official actions of the Commission;
- Maps, judgments, agreements, title reports and other land title records;
- Correspondence;
- Historical and engineering research data and documents;
- Cession and retrocession of jurisdiction.

II. ADMINISTRATION

The administrative staff of the State Lands Division operates under the general direction of the Executive Officer of the State Lands Commission. The program is composed of two major sections: executive and administrative and technical services. The executive section includes the executive staff, the Division's legal staff, and an overall planning and environmental unit. The administrative and technical services section is comprised of six program units, four of which, budgeting, personnel and training, accounting and office services, and data processing, systems analysis, and records, provide direct staff support to the line programs, and two of which, auditing and management analysis, emphasize improving the State's fiscal position and ascertaining that the individual Division programs are operating efficiently and economically.

An augmentation of \$62,440 is included to provide legal support for the Division's increased litigation workload in land operations. Reimbursements have also been increased by \$100,058 in order to fund legal research for other litigation.

## SEISMIC SAFETY COMMISSION

## Program Objectives and Description

The purpose of the Seismic Safety Commission is to strengthen earthquake safety in California by improving public policy, especially that related to reducing hazards and mitigating the effects of potentially damaging earthquakes.

The Commission is responsible for: setting goals and priorities; requesting State agencies to devise criteria to promote seismic safety; recommending program changes to State agencies, local agencies, and the private sector where such changes would reduce the earthquake hazards; reviewing reconstruction efforts after damaging earthquakes; gathering, analyzing, and disseminating information; encouraging research; sponsoring training; and coordinating the seismic safety activities of government at all levels.

The Commission performs policy studies, reviews programs, and conducts hearings on subjects important to earthquake safety. It issues special reports and findings, and it reports annually to the Governor and the Legislature on its findings, progress, and recommendations. The Commission advises the Governor on executive actions needed to improve programs, advises the Legislature on legislation affecting seismic safety, and negotiates directly with the responsible agencies regarding necessary changes in programs and standards. The Commission also advises various Federal agencies on the scope, impacts, and priorities of national earthquake research and hazard reduction programs. The Commission provides technical assistance to State and local agencies and program advice to the Division of Mines and Geology, Department of Conservation, in regard to the Alquist-Priolo Special Studies Zones Act. *Under Chapter 1243, Statutes of 1976, the Commission will advise the Division of Mines and Geology in regard to the installation and maintenance of Strong Motion instruments throughout the State.*

Fiscal year 1976-77 accomplishments include: implementation of the findings of the Commission on the performance of the Hospital Act of 1973 and the Seismic Safety Element program, completion of a policy study on State buildings for the Legislative Analyst and Department of Finance, a review for the Public Utilities Commission of siting and design standards for proposed liquified natural gas facilities, implementation of improved procedures for evaluating earthquake damage in California and continued work on long-term State seismic safety policies, the policy impacts of earthquake prediction, and the policy issues associated with hazardous structures abatement.

*Fiscal year 1977-78 planned objectives include: completion of a seismic safety policies statement, implementation of the procedures for evaluating hazards in State-owned structures, continued work on hazardous structures, examination of selected existing programs related to land use planning and zoning in hazardous areas, the continued monitoring of potential policy impacts of earthquake prediction, and the continued furnishing of technical advice and assistance to State and local governments. A net staff increase of 1.5 positions is proposed to assist in this work and other activities in the work plan.*

## DEPARTMENT OF FISH AND GAME

The program objectives of the Department of Fish and Game are to insure that fish and wildlife are preserved to be used and enjoyed by the people in the State, now and in the future.

More specifically, the objectives of the Department are:

1. To maintain all species of fish and wildlife for their natural and ecological values as well as for their direct benefits to man. The objective, "to maintain," is a basic necessity if any species is to be used in the future, and this includes the principle that fish and wildlife should be preserved as a human environmental necessity. The present generation must assume the obligation to pass on to future generations all of the species that now exist, whether or not they are now used and enjoyed. The present contribution that each species makes to the ecological balance is not always known and may well change in the future. We should not tamper with this balance without understanding fully the eventual result. The restoration of native species that no longer exist in California but still exist in other areas; the introduction of desirable new species compatible with existing species; and the exclusion of undesirable species are part of this objective.
2. To provide for varied recreational use of fish and wildlife. The objective, "recreational use," embraces all the ways that people may enjoy fish and wildlife. This variety of recreational opportunity will enable each individual to select the type of recreation most rewarding to himself. Single uses will not predominate merely because they might attract the greatest number of users. This objective sees the maintenance of fish and wildlife "game" populations at levels that will provide harvestable surpluses so that hunting and fishing will continue to be enjoyed as two of California's traditional and leading forms of recreation.
3. To provide for an economic contribution of fish and wildlife in the best interests of the people of the State. The third objective, "economic contribution," covers several distinct interests concerned with the utilization of fish and wildlife resources. These include the commercial harvesters of these resources, and the people who provide goods and services to all. The objective is to provide the maximum economic benefits to the people of the State within the limits of the resources and other objectives.
4. To provide for scientific and educational use of fish and wildlife. The fourth objective, "scientific and educational use," proposes to insure the availability of fish and wildlife for study and research by both scientists and students.

All of the programs of the Department are directed towards the accomplishment of these objectives through the conservation, enhancement, and restoration of fish and wildlife resources and habitats and regulation of resources use.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Enforcement of laws and regulations .....	\$10,291,408	\$11,214,755	\$11,695,608

### SIGNIFICANT PROGRAM CHANGES

Description	Dollars
1. Update the Wildlife Element of the California Fish and Wildlife Plan of 1966 ( <i>Environmental Protection Program Fund</i> ) .....	\$200,000
2. Sea Otter Management Study ( <i>General Fund</i> ) .....	100,000
3. Expand study of threatened salmonids (Trout) as part of Dingell-Johnson program ( <i>Federal funds</i> ) .....	66,736
4. Extend threatened, rare, and endangered species program established administratively in the current year ( <i>Federal funds</i> ) .....	250,000
5. Increase funds budgeted for workmen's compensation costs to reflect current experience ( <i>Fish and Game Preservation Fund</i> ) .....	143,600
6. Provide initial staff for Bolsa Chica Ecological Reserve management ( <i>Fish and Game Preservation Fund</i> ) .....	27,100
7. Research vessel Scofield was taken out of service. Reduction 8.8 person-years ( <i>Fish and Game Preservation Fund</i> ) .....	-163,000

### I. ENFORCEMENT OF LAWS AND REGULATIONS

#### Program Objectives and Description

To insure that the provisions of the Fish and Game Code and regulations made pursuant thereto are enforced within an acceptable degree of compliance; to insure that the wildlife resources are managed for optimum, sustained yield, utilization and enjoyment by all people appropriate to the general public welfare.

In order to accomplish the objectives of this program, the following must be accomplished:

1. Insure that consumptive use of the wildlife resources is properly licensed;
2. Protect game and nongame wildlife resources and their habitat from willful or negligent destruction and otherwise enforce and administer the laws and regulations relating to game and nongame wildlife species;
3. Promote hunting and fishing access for the public;
4. Disseminate knowledge and information about fish and wildlife resources and their regulation and management to increase public understanding and cooperation in the sound utilization and conservation of these resources through our conservation education program;
5. Recognize the interest of those who derive their livelihood, pleasure or recreation from the wildlife resources;
6. Cooperate with and encourage cooperation among agencies, groups and individuals concerned with laws protecting the wildlife resources;
7. Conduct a hunter safety program to provide instructions for safe handling of firearms and in the principles of conservation and sportsmanship for all hunting license applicants regardless of age;
8. Regulate the importation, transportation, and possession of exotic nongame animals to insure the welfare of wild animal pets and also to protect native wildlife habitat from the inadvertent introduction of competitive species and also to protect the agricultural interests and public health of this state;
9. Plan for the most efficient and effective use of wildlife protection manpower; and,
10. Protect nongame fish and wildlife resources and their habitat from willful or negligent destruction through enforcement and administration of laws and regulations.

For list of standard (lettered) footnotes, see the end of the Governor's Budget.

c. Hunter safety .....	8.1	7.8	7.9	\$93,509	\$93,980	\$98,971
d. Conservation education .....	21.7	20.7	21	\$270,894	\$320,021	\$341,006

## a. Protection and Use Regulation of Fish and Wildlife

Enforcement is accomplished by a staff of fish and game wardens whose activities include patrolling to prevent infractions of game and nongame wildlife bag limits, seasons, closed areas, and license requirements by individual hunters and fishermen as well as the commercial fishing industry. Protection of habitat includes the enforcement of restrictions on pollution, stream or lake alterations as well as the entry of exotic wild animals which, if they become established in the wild, would compete with and possibly replace more desirable native wildlife species or are a menace to the agricultural interests or the public health of this state. Violators are apprehended and prosecuted through court processes. Also, administration of the licensed pheasant and other hunting club programs is a warden function accomplished by license application approval and regulation enforcement through club inspections at regular intervals. Additional protection of wildlife and habitat is accomplished by the issuance of permits for special purposes such as scientific collections, research, suction dredges, and the related followup inspection to assure compliance of permit terms. Preventive enforcement is accomplished through personal appearances before civic sportsmen organizations and in field talks to sportsmen and potential sportsmen.

Output	1975-76	1976-77	1977-78
Resource user days.....	39,333,200	42,392,200	43,460,000
Violation arrests .....	19,434	19,626	20,822

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	324.4	310.5	314.7	\$8,533,937	\$9,318,618	\$9,732,157

## b. Licensing

Those who wish to take advantage of the recreational, educational and economical benefits provided by California's fish and wildlife resources are required to contribute to the conservation and management of these resources through the purchase of licenses. The licensing program makes nearly 60 different types of fish and game licenses available to applicants. The license fees provide the major support of California's fish and wildlife conservation programs.

Between seven and eight million licenses, tags, and permits will be sold through approximately 3,600 private firms functioning as fish and game license agents.

This program also provides the mechanics for determining which of the applicants will receive special big game permits and reservations of state-operated waterfowl areas.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	25.8	23.6	23.9	\$548,068	\$592,136	\$632,474

## c. Hunter Safety

Approximately 3,100 volunteer instructors are used by the department annually in teaching firearms safety to an estimated 65,000 California residents. Since the inception of the program on July 1, 1954, a total of 848,773 California residents have been trained. The estimated total casualties reduced since the program became effective is 1,425. All resident hunting license applicants who cannot document their possession of a hunting license in a previous year are now required to participate in this program.

Output	1975-76	1976-77	1977-78
New instructors certified .....	700	700	700
Residents trained in firearms safety .....	64,000	65,000	65,000

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	8.1	7.8	7.9	\$938,509	\$983,980	\$989,971

## d. Conservation Education

The Conservation Education Program satisfies the need to inform the public about its property—fish and wildlife; the need to assist the public in properly utilizing fish and wildlife; and the need to conserve and enhance fish and wildlife and its habitat for future generations.

The workload is divided into the following activities; news releases, liaison work, speeches and statements, photography, formal reports, motion pictures, a news magazine, booklets on laws and regulations and general interest and scientific pamphlets, youth conservation education, intra- and inter-departmental information, exhibits, library, and the servicing of a large volume of individual information requests.

## DEPARTMENT OF FISH AND GAME—Continued

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	21.7	20.7	21	\$270,894	\$320,021	\$341,006

## II. WILDLIFE

## Program Objectives and Description

The program objectives are: (1) to maintain all species of wildlife in the State, and (2) to provide optimum wildlife oriented recreational and educational use.

Population growth with associated commercial, agriculture and industrial activities continue to place inroads on wildlife and their habitats. Wildlife programs are designed to inventory, study, plan, develop and manage wildlife resources. These programs include: studies aimed at management needs including big game, upland game, waterfowl, disease and pesticides; habitat development and management on State-owned wildlife areas and other public lands; coastal wetland preservation and developing public hunting opportunity. The management of nongame, wildlife and the protection of their environment will be continued. *Development of the Upper Newport Bay funded from Chapter 1304, Statutes of 1976, will start in 1976 and be completed in the 1977-78 fiscal year. Development will include marsh restoration, an island protection program, construction of a nature interpretive center and construction of a trail system for visitors. The 1977-78 Budget proposes \$200,000 from the Environmental Protection Program Fund for the updating of the California Wildlife Plan. The program for the plan revision includes an additional Senior Wildlife Management Biologist.*

d. Nongame .....	20.4	25.6	30.2	1,502,411	1,716,443	1,944,660

## a. Waterfowl

The most intensive management of habitat occurs on our wildlife areas. On these areas both natural and cultivated waterfowl food plants are grown; levees, canals, ponds, water controls, and roads are developed and maintained; noxious vegetation is controlled; and in general the area is made attractive to waterfowl and other wildlife, including nongame species.

To develop the most efficient and economical methods for management of both public and private marshlands, investigations are being made that include: using irrigation drain water for creating and maintaining habitat; determining the proper balance of livestock grazing and production of waterfowl feed; cooperative plant testing with the soil conservation service for improved land use and increased waterfowl food production; and determining the limits of salinity or alkalinity that can be tolerated by various food plants.

The managed habitat is not only providing for the well-being of waterfowl, but the adequate supply of food also keeps these birds from depredating agricultural crops.

To encourage private landowners to improve their holdings for waterfowl, the department provides them with the proper management techniques. Service to landowners is also provided through cooperative efforts with local soil conservation districts.

To keep track of waterfowl populations and determine their numbers, migration patterns, mortality rates and population turnover, waterfowl are being banded at four representative sites throughout the state. Nine waterfowl surveys are flown to determine populations during the breeding season, the crop depredation period, the hunting season and in the winter.

To prevent untoward effects of pesticides on waterfowl and their habitat, appropriate controls on the use of pesticides will be implemented. Investigations will be made of waterfowl losses due to disease so as to determine the cause and initiate field control measures that will eliminate or minimize such losses. Research will be conducted to develop improved techniques for controlling avian botulism and cholera.

To provide for public enjoyment of the waterfowl resources, public hunting opportunities and visitor facilities are provided.

To better manage the resource, cooperative efforts are carried on through the Pacific Flyway Council and the Technical Committee, and with the U.S. Fish and Wildlife Service.

Output	1975-76	1976-77	1977-78
Waterfowl hunters .....	242,200	245,000	245,000

DEPARTMENT OF FISH AND GAME—*Continued*

## b. Upland Game

Surveys are conducted to determine the population status for all the upland game species that are found in California. Evaluations of field surveys and hunting conditions are made to determine recommendations for changes in hunting regulations.

Wild trapped resident game birds are released in areas where it has been determined these birds may survive and multiply to offer future hunting possibilities. In addition, some 15,000 to 20,000 month-old ring-necked pheasant chicks are purchased under contract and distributed to sportsmen clubs to rear and release for public hunting. In addition, 19,500 pheasants are also purchased each year under contract for release in southern California for public hunting.

Investigations are made of pesticide and disease factors as they affect upland game populations. Technical assistance in upland game management is provided to private landowners. Research in developing and evaluating habitat improvement practices is conducted.

Prepare and update plans for selected species of upland game. Assist private landowners and individuals in managing their lands for upland game species through technical advice and publications. Mourning dove population surveys are conducted to determine prenesting populations and to determine mortality and distribution of doves through band return. Wild turkey and bandtailed pigeon investigations to gather information on distribution density, production, population trends, life history information and evaluation of wild turkey stocking areas are being conducted. Experimental ground cover and food plants will be tested. Over 2,000 artificial watering devices will be maintained. Surveillance and research activities will be conducted to assess the impact of pesticides on upland game and to develop needed controls over the use of these chemicals.

Output				1975-76	1976-77	1977-78
Hunter-days.....				3,999,900	4,500,000	4,900,000
Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	46.1	44.3	43.5	\$1,071,917	\$1,180,754	\$1,253,803

## c. Big Game

The State is divided into 42 wildlife management units, each of which has a unit manager. These unit managers work with public and private groups to improve conditions for big game. With assistance from staff specialists, they gather field data on herd composition, hunter kill, disease and pesticide problems, food habits, nonhunter mortality, and range condition. They prepare recommendations for season, special hunts, preservation and enhancement of big game habitat, operate special hunts and public shooting areas, and provide advice to public and private land managers interested in managing big game.

The proposed 1977-78 program will be carried on at the same level as 1976-77 with increased emphasis on deer management. It is anticipated there will be special antelope and elk hunts as well as special deer hunts. Intensive studies will continue. Plans for selected species of big game will be prepared and updated.

Output				1975-76	1976-77	1977-78
Hunter-days on State-operated areas.....				7,500	7,500	7,500
Total big game hunter-days.....				2,680,400	3,000,000	3,000,000

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	47.5	42.3	44.1	\$1,211,456	\$1,295,426	\$1,399,258

## d. Nongame

The project will conduct surveys and develop management programs for California's endangered and rare wildlife in compliance with the California Species Preservation and Endangered Species Acts of 1970 and the Federal Endangered Species Act of 1973. In addition, it will be responsible for research and development of management programs for nongame wildlife including their habitat.

In 1977-78 the project will continue the 1976-77 investigations with emphasis to determine the current status of selected species. These investigations will include: (1) continued assessment of the problems and needs of nongame wildlife, (2) surveys of California's threatened wildlife declared to be endangered and rare by the Fish and Game Commission and Secretary of the Interior, (3) raptor populations, and (4) preparation and updating of knowledge and management plans for selected species of nongame wildlife, including the coyote, bobcat, and furbearers.

Basic investigation of pesticide contamination, pollution, disease, and food habitats of nongame wildlife will be made. Particular attention will be directed to the food chain effects of environmental contaminants on the reproduction of raptors and water-associated wildlife, particularly marine birds and mammals. Federal funds, under the Federal Endangered Species Act of 1973, in the amount of \$304,320 will be provided in 1976-77 of which \$200,000 is for ecological reserve acquisition and the balance for the expansion of the rare and endangered program. The 1977-78 program will be continued at a \$178,840 level. In the 1976-77 fiscal year, \$20,000 was appropriated for a Feral Dog Study by Chapter 1020, Statutes of 1976.

Output				1975-76	1976-77	1977-78
Fur take (number of animals).....				70,292	71,000	72,000

## III. INLAND FISHERIES

## Program Objectives and Description

To provide diversified and satisfactory fishing for California anglers while insuring the perpetuation of the State's native fish fauna.

To meet these objectives, the Department operates 15 fish hatcheries which will produce 30 million fish in 1977-78, including 4 million catchable-sized trout for planting in State Water Project reservoirs. The management of the nongame, rare and endangered, fish amphibians, and reptiles, and the protection of their environment will be continued. Other management activities include fish population and habitat inventories, habitat acquisition, improvement, utilization measurement, fish population manipulation to increase yield, fish salvage, disease control, determining adverse impacts and recommending measures to counteract such impacts.

## Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

DEPARTMENT OF FISH AND GAME—*Continued*

## Program Elements

a. Trout .....	226.6	219.1	223	\$5,896,802	\$6,504,063	\$6,960,249
b. Warmwater game fish .....	47.5	47.4	46.2	1,241,988	1,444,600	1,502,924
c. Nongame, rare and endangered .....	5.4	7.5	11	313,693	382,003	422,159

## a. Trout

Trout angling is highly popular in California. Natural production of trout is large but insufficient to meet demand. Accordingly, the Department will propagate and stock 12.5 million catchable-sized trout, 1.5 million subcatchables, and 14 million fingerlings in suitable lakes and streams. Several species, subspecies and strains are produced to provide diversity and to utilize different habitat niches. Wild trout management consists primarily of resource monitoring activities to protect and improve habitat. Certain native trout species, such as Piute, Kern River golden, and Lahontan cutthroat are threatened by hybridization with more common trout varieties. Special efforts are underway to maintain and expand the range of these unique fishes.

Output	1975-76	1976-77	1977-78
Angler days.....	12,300,000	12,600,000	12,900,000
Input	75-76	76-77	77-78
Expenditures.....	226.6	219.1	223
	\$5,896,802	\$6,504,063	\$6,960,249

## b. Warmwater Game Fish

Warmwater game species include black bass, crappie, sunfish, catfish, and bullfrogs. The habitat for these fishes has increased greatly due to reservoir construction and angler demand has also grown, especially for black bass. Fortunately, these species usually maintain adequate populations without annual stocking so that management is relatively inexpensive. Common management activities are population and utilization inventories, habitat protection and improvement and angling regulations. Hatchery production is limited to channel catfish for planting in Southern California and other suitable waters and experimental work with black bass and striped bass to improve reservoir angling.

Output	1975-76	1976-77	1977-78
Angler-days.....	8,400,000	8,600,000	8,800,000
Input	75-76	76-77	77-78
Expenditures.....	47.5	47.4	46.2
	\$1,241,988	\$1,444,600	\$1,502,924

## c. Nongame, Rare and Endangered

Maintaining healthy populations of native fishes, amphibians, reptiles and invertebrates is accomplished by conducting necessary surveys and inventories, protecting or enhancing their habitat and excluding or controlling harmful exotic species. These actions assure native species of food, shelter, and a satisfactory place to reproduce and to rear their young. A number of native fishes, amphibians, reptiles, and invertebrates are in danger of extinction. Efforts to prevent their disappearance include population and habitat surveys, life history studies, land acquisition, recommendations to avoid adverse impacts of land and water development projects on critical habitat, and control of exotic species. *In 1976-77, Federal funds under the Federal Endangered Species Act of 1973, were provided in the amount of \$40,540 for expansion of the rare and endangered program. The 1977-78 program will be continued at a level of \$77,160.*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	5.4	7.5	11	\$313,693	\$382,003	\$422,159

## IV. ANADROMOUS FISHERIES

## Program Objectives and Description

It is the objective of the anadromous fisheries program to (1) maintain, restore and improve anadromous fish populations, (2) obtain an optimum harvest of these resources, and (3) provide for their scientific and educational use.

Anadromous fisheries is responsible for programs involving salmon, steelhead, striped bass, shad and sturgeon. These species are under one program because these resources have many of the same environmental requirements and they have many common problems.

Anadromous fisheries resources support an estimated 3 million angler days of recreational fishing annually in marine and inland waters. In addition, the salmon resource provides a commercial catch averaging 8 million pounds annually with a current net worth of over \$13 million. The contribution of these resources to the economy of the State and the well-being of its citizens justifies research and management activities to maintain and improve the existing populations.

## Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## DEPARTMENT OF FISH AND GAME—Continued

Program Elements	75-76	76-77	77-78	1975-76	1976-77	1977-78
a. Salmon and Steelhead.....	123.5	119	120.4	\$3,409,419	\$3,800,826	\$3,950,491
b. Sturgeon, Striped Bass, and Shad.....	27.1	26.5	26.8	385,409	427,026	456,481
c. Delta studies.....	28.5	28.5	28.7	601,660	683,990	700,389

## a. Salmon and Steelhead

Salmon and steelhead activities are directed at artificially maintaining population of these fish whose habitat has been destroyed by water development and augmenting natural production, preservation and improvement of habitat, inventory and utilization, and determining better ways to accomplish these activities.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	123.5	119	120.4	\$3,409,419	\$3,800,826	\$3,950,491

## b. Sturgeon, Striped Bass, and Shad

Major activities are directed at inventorying population sizes, determining utilization, and analyzing responses of striped bass and sturgeon to environmental factors.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	27.1	26.5	26.8	\$385,409	\$427,026	\$456,481

## c. Delta Studies

Activities of this study are directed at determining best ways to protect fish and wildlife of the Sacramento-San Joaquin Estuary from the effects of water development.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	28.5	28.5	28.7	\$601,660	\$683,990	\$700,389

## V. MARINE RESOURCES

## Program Objectives and Description

The objectives of the Marine Resources Program are to perpetuate and enhance the marine fish, plant and animal resources and to develop an optimum harvest of these resources by sport and commercial endeavor. To achieve this, it is necessary to gather data on populations and harvest and to develop life histories of the various species. *The Federal Fishery Conservation Act of 1976 extended the fishery jurisdiction of the United States from 12 to 200 miles and established the Pacific Fisheries Management Council on the west coast. Members include Directors of Wildlife Departments of the coastal states and Idaho. In 1977-78 the Department will maintain its work on those species that may fall under Council jurisdiction at the same level as 1976-77. No significant additional costs to the Department are anticipated in 1977-78. If additional work is required, activities of less priority will be deferred.*

## Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

## a. Big Game Fisheries

Big game species of prime importance include albacore, bluefin tuna, Pacific bonito, the billfishes, California barracuda, white seabass, and California yellowtail. These species support important sport fisheries in addition to contributing significantly to California's commercial landings.

This element provides factual information for scientific management of the big game fishery resources for an optimum sustained yield of benefits year after year. Population identification and dynamics studies of the various species will continue. Efforts to locate migration routes and to trace the seasonal migrations along the coast will continue. Emphasis also will be placed on monitoring the sport and commercial catches of albacore, bluefin tuna, Pacific bonito, billfishes, California barracuda, white seabass, and California yellowtail to determine their abundance and mortality rates.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	9.5	9.3	7.3	\$254,808	\$282,885	\$263,509

DEPARTMENT OF FISH AND GAME—*Continued*

## b. Coastal Fisheries

This element combines all activities of the nearshore environment. These include sportfishing, the special studies of the inshore fish, animals, and plants and their relation to each other, their environment, and the activities of man upon these organisms and their environment. Element activities will consist of: (1) increased emphasis on determination of sportfishing intensity, species taken and numbers caught for all sportfishing activities; (2) studies of the behavior and life history of the flora and fauna of the inshore areas; (3) monitoring and special studies of marine mammals; (4) ecological surveys to assess nearshore flora and fauna relative to natural and man-caused impacts on the marine environments; (5) kelp bed development aimed at increasing sportfish populations; (6) studies to provide technical advice on the construction and location of artificial reefs; and (7) activities to increase sport fish opportunities through the introduction of native and non-native species determined to possess characteristics compatible with existing marine environment with emphasis on evaluation of results of past planting program.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	46.2	55.4	57.3	\$1,067,768	\$1,240,795	\$1,270,833

## c. Bottomfisheries

Within this element biological and statistical data regarding fish species living on or near the ocean bottom of the coast of California are gathered and analyzed. These species represent the most important source of fresh market fish in California.

Logbook data from over 7,000 commercial fishing trips will be collected and prepared for processing by the biostatistical element on total catch, fishing effort, and catch localities for all species in trawl landings. Biological data at five major trawl ports will be collected to estimate the age, size, and sex composition of the Dover, English and petrale sole catches, three species which comprise over half the total trawl landings.

Species composition of the multispecies rockfish fishery will be determined from catch sampling. Studies of important round fish in trawl landings will be conducted with emphasis on rockfish, sablefish and lingcod. Also, studies of the ecology of nearshore bottomfish will continue. These studies will provide information of fishery trends and on the conditions of bottomfish stocks from which meaningful management recommendations can be made.

Input will be provided to the Pacific Fisheries Management Council as regards foreign fishing activities under extended jurisdiction.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	17.6	16.8	16.5	\$263,427	\$291,862	\$300,418

## d. Pelagic Fisheries

The pelagic fisheries element plans to sample 20 percent of the commercial landings of jack mackerel and northern anchovy for size and age. These samples include otoliths (fish earbones) which must be read for age. The program will collect, process, and analyze over 3,000 fishing logs and interviews for the anchovy and mackerel fishery. Pacific mackerel will be tagged as well as other fish which may be encountered, and previous tag returns on other pelagic species will be analyzed. The research vessel "Alaska" will be utilized in conducting surveys of the pelagic species in the California current system. Population estimates will be made for Pacific mackerel, northern anchovies, Pacific herring, and Pacific sardines. Acoustical equipment and midwater trawls will be used to count and identify fish schools. Sardine and Pacific mackerel management regulations necessitate monitoring the relative abundance of these species by sea surveys. Work will continue on developing techniques for using sonar in purse seine fishing operations, and to analyze and publish data for all species under investigation by the pelagic fish elements.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	36.6	34.3	30.5	\$979,899	\$1,068,282	\$1,053,797

## e. Shellfisheries

The shellfish element conduct research on the crab, shrimp, lobster, abalone, oysters, sea urchins and clam resources and make management recommendations concerning their utilization. Monthly sampling will be conducted at sea to determine population structure of the Dungeness crab population. Investigations into the factors responsible for the decline of the Dungeness crab in the San Francisco area will continue. Differential survival of larval and juvenile crabs will be investigated under a variety of environmental conditions, both in the field and in the laboratory.

Market samples of shrimp will be collected at Eureka-Crescent City, Fort Bragg and Bodega Bay to determine composition of the commercial catch. Spiny lobster research will entail an assessment of the commercial and sport fisheries including market sampling, interviews, logbooks, and sampling at sea.

Catch records including species composition and effort will be collected and maintained for commercial and sport abalone.

Administration of mariculture and oyster leases on State lands and technical assistance to growers will be provided. Surveys of sport clam beds are made annually to assess recruitment and survival, determine abundance and use. Annual inspection of shellfish shipments destined for planting in California waters will continue.

The mariculture research and development program will conduct research in developing larvae culture techniques that will enable a more detailed study of marine shellfish larvae and in developing rearing techniques that may have commercial application. Spawning habits of native oysters, clams, abalone, scallops, shrimp, crab and other marine animals will be studied to understand the physiological and culture requirements.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	35.3	35.7	33.8	\$869,908	\$924,077	\$920,410

## f. Marine Fisheries Statistics

The marine fisheries statistics element will compile and publish catch information on commercial fishing effort, and disseminate information to various public and private agencies, in addition to providing technical assistance and biometrical analysis to other marine elements.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditure .....	28.5	26.4	27	\$682,990	\$731,040	\$759,454

## g. Pacific Marine Fisheries Commission

The Pacific Marine Fisheries Commission, in accordance with the Pacific Marine Compact, promotes the better utilization of marine, shell and anadromous fishes of the Pacific Ocean.

Input	1975-76	1976-77	1977-78
Continuing costs.....	\$21,600	\$21,600	\$21,600

DEPARTMENT OF FISH AND GAME—*Continued*

## h. Marine Research Committee

Objectives of the Marine Research Committee are the development of the commercial fisheries of the California current system and of the marine products for the people of this State. Research is financed from a privilege tax of 5 cents per 100 pounds of sardine, Pacific and jack mackerel, squid, herring and anchovies. Programs during the budget year will include: (1) mackerel tagging studies; (2) stock assessment studies; (3) food habits of pelagic species; (4) processing of egg and larvae samples; (5) Atlas of biological, physical and chemical observations in the California current; (6) publication of sea survey data from State, Federal and Mexican surveys; (7) anchovy spawning rate; and (8) monitoring of Monterey Bay oceanographic conditions.

Input	1975-76	1976-77	1977-78
Continuing costs.....	\$170,951	\$169,935	\$200,000

## VI. ENVIRONMENTAL SERVICES

## Program Objectives and Description

The purpose of the environmental services program is to prevent adverse impacts on fish and wildlife from projects affecting the land, waters, and water quality of California.

The Federal Fish and Wildlife Coordination Act, Water Projects Recreation Act, and National Environmental Policy Act require review by this department of projects proposed by or permitted by federal agencies. The California Environmental Quality Act requires review by the department of many local and state projects. The review of all these projects and the protection of water quality mandated by the Fish and Game Code is accomplished by the environmental services unit.

## Authority

State level: Fish and Game Code, State Water Code, Government Code, Forest Practices Act of 1973, and the Environmental Quality Act of 1970.

Federal level: Fish and Wildlife Coordination Act, the Water Projects Recreation Act, the Federal Power Act (and associated rules, adopted by the Federal Power Commission), the National Environmental Policy Act of 1969, and the intergovernmental Cooperative Act of 1968.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

b. Water quality .....	43.4	52.3	51	1,470,397	1,676,328	1,621,296

## a. Land and Water Projects

Plans for federal, state, and local land and water projects, Federal Power Commission projects, state water rights and dam permits and rural subdivision developments are reviewed to provide maximum protection of fish and wildlife. Each project review results in recommendations for measures to protect or enhance fish and wildlife. An evaluation of the effectiveness and adequacy of the departments environmental review procedure will be conducted in the current year.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	48.9	41.7	42.4	\$1,210,758	\$1,303,334	\$1,181,164

## b. Water Quality

To maintain water quality suitable for fish and wildlife and their utilization, the Department will investigate pollution problems, enforce pollution control laws which are within the Fish and Game Code, gather basic water quality data including applied research on specific problems, and provide technical assistance to the regional and state water quality control agencies, California Coastal Zone Conservation Commission and State Energy Resources Conservation and Development Commission.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	43.4	52.3	51	\$1,470,397	\$1,676,328	\$1,621,296

## VII. ADMINISTRATION

## Program Objectives and Description

General policy direction is provided by the Fish and Game Commission, who also regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons, bag and possession limits, and areas for the taking of fish and game. The director, with the assistance of regional managers, provides executive direction to the programs which implement the policies of the Legislature and the Fish and Game Commission.

The administrative services staff provides centralized administrative support necessary to management, program managers, and their staff.

## Department of Fish and Game WILDLIFE CONSERVATION BOARD

### Program Objectives and Description

The Wildlife Conservation Board is involved in conserving, developing, improving, and providing access to our natural resources to accommodate the needs of sportsmen and others who utilize outdoor recreation resources.

The board is composed of the Director of Finance, the Director of the Department of Fish and Game, and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of three Members of the Senate and three Members of the Assembly. Annually \$750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horseraces. The board is charged with the administration of this fund.

Through its staff, the board conducts necessary investigations and studies to determine the areas within the state most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies, the board determines which lands or rights in lands or waters should be acquired by the state to effectuate the wildlife conservation and recreation program. The Wildlife Conservation Board constructs fishing piers on the ocean, and develops fishing access sites at lakes and along the state's waterways and aqueducts. Development includes, as necessary, features such as boat ramps, parking areas, water supply, and sanitary facilities.

Through purchase of key land parcels and development of roads, the board is trying to meet the demand for hunting access to public lands. Protection and improvement of the resource is accomplished by saving marsh areas, building fish screens, fish ladders, fish hatcheries, and preservation of wildlife or ecological areas.

In November of 1970, the voters passed the Recreation and Fish and Wildlife Enhancement Bond Act, providing \$6,000,000 to the Department of Fish and Game and the Wildlife Conservation Board for design and construction of fish and wildlife enhancement and fishing access sites in connection with state water projects.

In June of 1974, the voters approved Proposition 1, the State Beach, Park, Recreational and Historical Facilities Bond Act of 1974 providing \$10,000,000 to the Wildlife Conservation Board for expenditures in accordance with the Wildlife Conservation Law. *The State, Urban, and Coastal Park Bond Act approved by the voters in November, 1976, makes an additional \$15,000,000 available to the Board for acquisition and development. This budget appropriates \$100,000 from this source to be used for project planning purposes.*

For the 1977-78 fiscal year a total of \$1,153,500 in acquisition and improvement projects are proposed with funding as shown in the capital outlay section which follows.

It is estimated that 10 percent of Wildlife Conservation Board support expenditures are related to the preparation and review of environmental impact studies. *A land agent position is added in the budget year to assist in the extensive land acquisition program funded for the Board in recent bond acts and other special legislation including the Suisun Marsh program.*

State, Urban, and Coastal Park Fund .....	-	-	100,000
Federal funds—Land and Water Conservation Fund .....	1,690,145	502,676	-
<b>TOTALS, EXPENDITURES, MAJOR PROJECTS .....</b>	<b>\$2,890,898</b>	<b>\$12,597,296</b>	<b>\$1,153,500</b>

Continuation of the acquisition and improvement of wildlife conservation projects is planned. The revenue of \$750,000 each fiscal year as provided by legislation—Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959—has been or will be allocated to projects by the Wildlife Conservation Board. The schedule reflects the estimated expenditures, based on anticipated allocations by the Wildlife Conservation Board.

In addition to the Wildlife Conservation Board's regular funding, it is expected that federal funds will become available on a reimbursable basis for qualifying projects, and such funds will be reported annually as received. In fiscal year 1975-76 \$1,690,145 was received as project reimbursement.

**MAJOR PROJECTS**

Fish hatchery and stocking projects .....	\$1,522	\$50,000	\$100,000
For construction and equipment of facilities for hatching and stocking.			
Fish habitat development and improvement projects .....	1,069	200,000	85,000
For acquisition and development of warmwater lakes; for reservoir construction and improvement; for stream improvement; for fish screen construction; for making habitat improvements.			
Fishing access projects.....	345,302	400,000	450,000
For the acquisition and development of coastal access; river, stream and bay access; lake and reservoir access; pier construction.			
Wildlife habitat.....	6,005	85,000	100,000
For the acquisition and development of wildlife areas.			
Special projects.....	3,636	7,500	7,500
For project evaluation, preliminary land acquisition costs, and engineering studies of potential projects.			
Miscellaneous projects.....	4,605	7,500	7,500
<b>TOTALS, EXPENDITURES (Wildlife Conservation Program) .....</b>	<b>\$362,139</b>	<b>\$750,000</b>	<b>\$750,000</b>

**KLAMATH RIVER COMPACT COMMISSION**

**Program Objectives and Description**

The purpose of the Klamath River Compact Commission is to ensure compliance with the terms of the Compact. Essentially, the Compact allocates water to both the State of Oregon and the State of California for irrigation purposes.

The Commission has no staff of its own and relies on contracts with public agencies and private entities for required services. In compliance with Compact provisions, the work program anticipated for the budget year includes conducting a land use survey to determine irrigated acreage in the Klamath Basin area. The last land use survey was completed in fiscal year 1959-60.

The Commission is jointly funded by both the State of Oregon and the State of California. No appropriations have been made to the Commission for the past two fiscal years. The Commission has not held any meeting during this period, consequently no work has been performed. Funds available from prior year appropriations will be used to perform anticipated work in the budget year. Resources available at the beginning of fiscal year 1976-77 amounted to \$73,600. During fiscal year 1977-78 available resources are estimated to be \$63,200.

## DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT

The Department of Navigation and Ocean Development was created by the Governor's Reorganization Plan No. 2 of 1969. In addition to assuming the responsibilities of the Department of Harbors and Watercraft, it made this Department responsible for the development of boating facilities in state recreation areas. The state's shoreline protection program was also made a function of the Department.

The Department makes loans for recreational harbor development and grants for boat launching facilities, plans and provides funding for Capital Outlay projects, licenses yacht and ship brokers and for-hire vessel operators, and conducts a program of boating safety and regulation. It participates with the Corps of Engineers and local agencies in the construction of beach erosion control projects, assists local jurisdictions in obtaining the greatest benefits available from federal beach erosion programs.

The Department has a seven-man commission appointed by the Governor.

The program objectives and responsibilities of the Department are: to develop and improve boating facilities throughout the state, to promote safety of persons and property connected with the operation of vessels on state waters and promote uniformity of law relating thereto, and to conduct a beach erosion program in cooperation with the federal government and local governmental agencies.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Boating facilities.....	\$8,278,641	\$12,568,765	\$10,666,522
II. Boating operations.....	1,583,991	2,333,093	2,718,184

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel Years	Dollars
I	Additional staff for boating facilities program for increased workload and project monitoring.....	3	\$50,120
I and III	Establish first phase of statewide wave gaging system.....	-	50,000
II	Additional staff for comprehensive studies into water recreation problems, navigability studies, and masterplan development.....	3	64,410
III	Provide assistance to local governments in the investigation of shoreline erosion problems.....	-	50,000
IV	Funds provided to contract for legal assistance on legislation, regulations, and contracts.....	-	20,000

### I. BOATING FACILITIES

#### Program Objectives and Description

According to statewide studies, boating facility deficiencies exist throughout the State and are expected to continue in the future. The objective of this program is to continue to plan, develop, and construct environmentally sound boating facilities in areas of demonstrated need so that California's boating and navigational needs might be satisfied.

To accomplish this objective, the Department functions as a central source of boating information by conducting special studies, assembling and compiling existing data, and disseminating the information to both public and private groups; contacts and meets with local governmental planning agencies to plan local boating facilities projects; provides financial assistance to local governments in the form of loans for small craft harbors and grants for boat launching facilities; and ensures that proper environmental safeguards are met in developing all boating facility projects.

The Department also plans, designs, and constructs boating facilities throughout the State Park System and State Water Project Reservoirs. These projects are planned and coordinated in order to ensure proper recreational and environmental utilization. In addition, as marina-related concessions contribute to the financial feasibility of Department-financed projects, the Department of Navigation and Ocean Development reviews and approves concession proposals to ensure compatibility with Departmental policies and objectives.

Finally, coordination with Federal, State, and local governmental agencies and private concerns is maintained on all matters affecting navigation, boating, and boating's relationship with the environment in the State.

Three positions (two boating facilities managers and one clerical position) are proposed in the boating facilities program. These positions are needed to meet the increased workload and to monitor completed projects to ensure their proper operation and maintenance.

A total of \$50,000 is provided for an additional phase in establishing a statewide wave gaging, recording and analysis program, one-half of which is funded under this program and one-half funded under the Beach Erosion Control program.

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—*Continued*

## a. Grant Program

The grant program provides grants to local governments and funds for joint state/federal projects in an effort to alleviate the shortage of safe and convenient boat launching facilities. The "Boating Resources Development Planning Study" conducted in 1973 shows that by 1980 there will be a need for 246 additional launching lanes in California.

In addition to funding the construction of launching lanes, grant expenditures are also used to fund various ancillary boating facilities. These support facilities typically include rest rooms, lighting, car-trailer parking, ramp extensions, drinking fountains, utilities, boarding floats, safety signs, erosion protection, environmental enhancement and landscaping.

The effectiveness of this program element can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, and the number of boat launching lanes constructed.

Grant program expenditures indicate the level of funding to local governmental jurisdictions. The number of projects includes the construction of boat launching lanes and ancillary boating facilities. The number of boat launching lanes constructed is the clearest indication of grant output. As new launching lanes become available to the boating public, there is a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters.

## Output

	1975-76	1976-77	1977-78
Expenditures for completed projects .....	\$2,444,000	\$3,020,000	\$2,041,000
Number of completed projects .....	15	14	19
Number of launching lanes constructed .....	26	27	16

## Input

Expenditures .....	\$2,055,292	\$2,236,625	\$2,983,345
Personnel years .....	7.5	8	9.5

## b. Loan Program

The loan program provides loans to local governments in an effort to alleviate the shortage of safe and convenient small craft harbor facilities. California continues to experience increases in the boating population with its attendant demand for berthing spaces in small craft harbors throughout the state, especially in the south coastal area. The "Boating Resources Development Planning Study" conservatively estimates that a minimum of 4,200 berths are required to meet the present demand. By 1980, this deficiency will be increased to nearly 12,000 berths.

In addition to developing new small craft harbors, the Department places a high priority on the expansion of existing berthing facilities. The expansion of existing small craft harbors assures both the optimal use of boating resources and the environmental protection of the coast.

The effectiveness of this program can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, and the number of berths constructed.

Loan program expenditures indicate the level of funding to local governmental jurisdictions. A harbor development project may include dredging, excavation, erosion control, environmental enhancement, landscaping and irrigation, plus the construction of breakwaters, harbor master offices, rest rooms, boarding floats, fuel docks, sewage pumpout stations, mooring buoys, berths, public access areas and utilities.

## Output

	1975-76	1976-77	1977-78
Expenditures for completed projects .....	\$2,450,000	\$4,080,000	\$6,541,000
Number of completed projects .....	2	5	5
Number of berths constructed .....	562	400	1,011

## Input

Expenditures .....	\$5,557,816	\$9,840,077	\$7,494,040
Personnel years .....	8.8	9	10.5

## c. Capital Outlay Administration

The capital outlay program consists of boating facilities development in the State Park System, on State Water Project reservoirs, and in other state lands. The Department is responsible for the project location, scope, planning, and design of environmentally sound boating facilities within units of the State Park System and at State Water Project reservoirs.

Surveys of boating facility needs throughout the State Park System and the State Water Project reservoirs are conducted and priorities established by the Department in cooperation with the Departments of Parks and Recreation and Water Resources. The Department schedules the construction of boating facilities to meet the needs of the boating population in the various areas of the state.

The effectiveness of this program can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, the number of boat launching lanes constructed, and the number of moorings, berths, boat-in sites, and ancillary boating facilities.

The number of boat launching lanes, moorings, berths, and boat-in sites constructed is the clearest indication of capital outlay output. As these new boating facilities become available to the boating public, there is a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters.

## DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—Continued

Output	1975-76	1976-77	1977-78
Expenditures for completed projects .....	\$1,032,000	\$1,544,000	\$1,508,000
Number of completed projects .....	10	16	13
Number of launching lanes constructed .....	4	4	2
Number of moorings, berths, and boat-in sites constructed .....	14	136	110
<b>Input</b>			
Expenditures .....	\$633,286	\$453,834	\$151,310
Personnel years .....	4	4	4

## d. Concession Review

The repayment of state loans made to local governments under Section 71.4 of the Harbors and Navigation Code depends, to a large extent, on the proper development of concessions within the project area and the payment of a reasonable annual rent to the lessor, which, in turn, is used to repay the state.

Therefore, there is a continuing need to review the terms and conditions of new lease proposals. Concession revenues are a major collateral for loans and a high degree of expertise in this area of activity is vital to the state's interest. Sections 72 and 72.2 of the Harbors and Navigation Code require that the Department of Navigation and Ocean Development approve the terms and conditions of all leases. By virtue of the fact that the Department has been and is involved in concessions work throughout the state, it has the expertise which is invaluable to local government in the negotiation and execution of lease contracts.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$32,247	\$38,229	\$37,827
Personnel years .....	1	1	1

## II. BOATING OPERATIONS

## Program Objectives and Description

The primary objective of the Boating Operations Program is to reduce the incidence of loss of life, personal injury and property damage resulting from boating accidents.

Activity in this program involves correlative efforts in uniform boating law enforcement, boater education and boating safety. It requires the continual alignment of safety programs to meet new problems, e.g., whitewater fatalities, and to meet the wide variety of needs of an increasing number of boats and boaters. Associated problems of increased boating activity necessitate study and recommendations in river use and management practices. Aspects of the program involve gathering of statistical information concerning boating accidents to enable the department to monitor accident trends, problem areas, and research causal factors in such mishaps. Additionally, the Department develops and implements programs for the eliminating of boating hazards. Boating safety literature is published and distributed to prevent problems before they occur. Coordination of educational programs in boating is of major importance in reducing accidents. Continuous coordination with over 700 municipal and justice courts and over 100 enforcing agencies ensures an acceptable level of uniformity in boating law enforcement. Although it is not known how many boaters were saved or accidents prevented, improving the boaters' knowledge of safety practices, prudent recreational area use practices, and boating regulations through education and uniform enforcement will help to achieve the desired objective.

## Authority

Division 1, Chapter 4 of the Harbors and Navigation Code.

d. Yacht and ship brokers licensing .....	4	4.5	4.5	112,530	121,020	133,962

## a. Boating Safety

Work in the boating safety element includes analysis and investigation of boating accidents, recommending changes in law and regulations, marking or removing boating hazards, helping local agencies warn boaters of hazardous conditions, and recommending improvement in boating equipment. Presentations on boating safety are given to boating clubs, public service organizations and others interested in boating. Surveys of existing pumpout facilities to accommodate waste discharge from vessels are conducted, in addition to a study of the requirements for installation of pump-out facilities at new state-sponsored projects. Boat shows are attended to answer questions regarding boating safety, operation and equipment. Safety literature is disseminated statewide. New projects are inspected for compliance with state laws, and local entities are assisted in proper zoning and marking of waterways. Although changes in national accident reporting procedures have caused an overall increase in raw accident statistics for the past two years, California's total fatalities have increased at a much slower pace than the national rate. If fatalities related to whitewater are removed from total boating fatalities, California has experienced an overall decrease of 1 percent over the previous reporting year.

Due to the rapid increase in whitewater boating activity, the element is becoming increasingly involved in river use problems and studies to develop prudent river management practices.

The Department proposes three positions, two boating administrators and one clerical. The positions will be used to institute more comprehensive studies into water recreation problems, navigability studies, and to develop a master plan applicable on a statewide basis. These positions will supplement existing personnel that have been required to shift emphasis away from ongoing administrative tasks in favor of individual river use studies.

DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—*Continued***Output**

	1975-76	1976-77 <sup>1</sup>	1977-78
1. Total number of boating accidents .....	740	740	740

Expenditures .....	\$268,773	\$341,376	\$448,524
Personnel years .....	6.5	8.1	11.1

**b. Boating Regulation**

This element administers the state and federal aid programs which provide funds to qualifying local agencies involved in boating safety and enforcement. Additionally, it monitors local programs for effectiveness. To ensure uniform law enforcement statewide, annual training is provided for enforcement officers. Local boating ordinances are reviewed to ensure conformity with state law. This element maintains liaison with appropriate federal agencies as it relates to regulation and enforcement of boating statutes. Additionally, the for-hire vessel operator licensing program is administered by this element.

**Output**

	1975-76	1976-77	1977-78
Increase number of patrol boats (estimated) .....	200	215	225

Expenditures .....	\$1,099,313	\$1,759,750	\$2,016,122
Personnel years .....	7.5	9.5	9.5

**c. Boating Education**

Work in the boating education element includes developing boating safety leaflets, posters and various other boating educational material for distribution to the general public. The boating education element also produces and issues press releases, radio and television spot announcements, and also coordinates with the State Department of Education, United States Coast Guard Auxiliary, United States Power Squadrons, and other boating organizations to promote better boating safety education through publicity of free boating instruction. The element is responsible for implementing the state's new high school boating course "Adventure Afloat" similar to driver training courses.

**Output**

Expenditures .....	\$103,375	\$110,947	\$119,576
Personnel years .....	2.5	2.5	2.5

**d. Yacht and Ship Brokers Licensing**

The objectives of this program are to protect the public from fraudulent acts by persons engaged in the sale or resale of used vessels, and to provide a minimum level of competence among such brokers and their salesmen. These objectives were set forth as a continuing program reflective of the intent of the Legislature by passage of the Yacht and Ship Brokers Act. Activity in the examination level includes licensing of yacht brokers and salesmen to assure uniform competency throughout the state. The activity at the investigative level handles complaints through arbitration or legal action.

**Authority**

Article 5 of Chapter 2, Division 1 of the Harbors and Navigation Code.

## DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT—Continued

## III. BEACH EROSION CONTROL

## Program Objective and Description

Eighty-six percent of California's marine shoreline is undergoing erosion. Twenty-one miles are so critical that erosion is likely to endanger life and public safety within the next few years. Corrective measures to preserve recreational beaches and protect existing shoreline developments will require the cooperative participation of federal, state, local, and private agencies.

The objective of the beach erosion control program is to mitigate coastal erosion and develop shoreline protection measures to preserve and enhance the beach and shoreline developments of the state. The department is responsible for advising local, state and federal governments on the need to protect critical areas of erosion and cooperate with all levels of government in programs to provide protection.

The program involves cooperative efforts with the federal government and/or local agencies to study and report on problems of beach erosion and prepare plans and construct works necessary to stabilize and replenish beach and shoreline areas. All major beach erosion projects are constructed by the U.S. Corps of Engineers in cooperation with the state and local agencies. Small beach erosion projects are constructed by federal or local agencies with state cooperation.

Through cooperative research programs with government agencies, colleges and universities and independent state investigations, the department is working toward a long-term plan for the preservation of California's valuable shoreline. The department is directing its major effort in developing regional solutions for those sections of the coastline with serious erosion problems.

The budget provides \$50,000 to work with local governments in investigating shoreline erosion problems. These major studies will provide the necessary information to formulate an environmentally compatible means of shoreline preservation and protection with minimal use of massive coastal shore protection structures. Also funded under this program is one-half the cost of an additional phase (\$50,000) for the statewide wave climate gathering network previously referred to under the Boating Facilities Program.

## Authority

## IV. LOAN TO STATE COMPENSATION INSURANCE FUND

Chapter 444, Statutes of 1976, appropriated two million dollars (\$2,000,000) from the Harbors and Watercraft Revolving Fund as a loan to the State Compensation Insurance Fund. The loan is to provide security to enable the State Compensation Insurance Fund to provide insurance coverage required under the Federal Longshoremen's and Harbor Worker's Compensation Act. The loan is to be for a period not to exceed five years from the date of the appropriation.

Expenditures (Harbors and Watercraft Revolving Fund) .....	—	\$2,000,000	—

## V. GENERAL MANAGEMENT

## Program Objectives and Descriptions

The general management activity consists of executive direction and administrative services essential to the operation of the line programs.

The executive direction provides policy formulation, administrative direction and guidance in policy implementation, overall planning and program management, coordination of line programs and evaluations of program results.

The administrative services provides accounting, budgeting, personnel, business management services to the line programs, and financial audits of expenditures for small craft harbor planning and construction loans, launching facility grants, and boating law enforcement subventions.

The 1977-78 budget provides \$20,000 for contracting of legal services from the Department of Water Resources. This will provide needed assistance in the review and development of legislation to protect the boating public from unnecessary restrictions and insure that proper legislation is enacted to help in reducing the loss of property and lives from boating activities; develop state boating regulations to conform with federal regulations; and ensure that all contracts executed are according to law and written to protect the department and the state.

# CALIFORNIA COASTAL ZONE CONSERVATION COMMISSION

## Program Objectives and Description

The California Coastal Zone Conservation Act of 1972 was added to the Public Resources Code by vote of the people on November 7, 1972. This act created a State Coastal Zone Conservation Commission and six regional commissions. Under the initiative measure the Commission was required to adopt a coastal zone plan and submit it to the Legislature on or before December 1, 1975. Subsequently the Legislature provided for a permanent coastal zone management program to be effective January 1, 1976. The Commission created by Proposition 20 terminated on December 31, 1976 and was succeeded by the California Coastal Commission reported elsewhere in this budget.

## SUMMARY OF PROGRAM REQUIREMENTS

# CALIFORNIA COASTAL COMMISSION

## Program Objectives and Description

The California Coastal Act of 1976 will continue the State's coastal management program started in 1972 by the passage of Proposition 20, but the 1976 coastal law differs in many respects from the 1972 law.

The 1976 act establishes policies on which coastal conservation and development decisions are to be made. These policies deal with public access to the coast, coastal recreation, the California marine environment, coastal land resources, and coastal development of various types, including power plant and other energy installations.

Under the 1976 Coastal Act, the "coastal zone" is defined on maps incorporated in the law and on file with the Secretary of State (and available in many places). The coastal zone extends three miles seaward and inland generally 1,000 yards but in particularly important areas, ones generally undeveloped and where there can be a considerable impact from development, the boundary extends up to five miles. In developed urban areas, the boundary line may be less than 1,000 yards inland. The area under the jurisdiction of the San Francisco Bay Conservation and Development Commission is excluded from the coastal zone.

The Coastal Act of 1976 creates a 15-person State Coastal Commission that will consist of: three ex-officio nonvoting members (the Secretaries of the Resources Agency and Business and Transportation Agency, and the Chairperson of the State Lands Commission); six public members appointed by the Governor and Legislature; and six members of the regional commissions appointed by regional commissions from their membership. After expiration of the regional commission's these six are to be replaced with locally-elected officials.

Under the provisions of the Coastal Act, after the Regional Commissions appoint their regional representative to the State Commission, they are not authorized to do anything further until the State Commission finds that the projected workload warrants their continuation; the Regional Commissions are to go out of existence in 2½ years.

The Regional Commission will consist of 12-16 members in each of the six regions, half of which are public members appointed by the Governor and Legislature and the other half of which are locally-elected officials. There is a total of 78 regional commissioners.

## LOCAL COASTAL PROGRAMS

Local governments within the coastal zone are to prepare a local coastal program for that part of their jurisdiction within the coastal zone, and these plans are to be submitted to the Coastal Commissions for approval by no later than January 1, 1980.

The Commission is to adopt procedures for the preparation, approval, certification, and amendment of local coastal programs, but in general, these programs will include relevant portions of the local general plan, zoning ordinances, and zoning district maps necessary to implement the Coastal Act at the local level.

The policies outlined in the Coastal Act are the standards by which the local coastal programs will be judged for their adequacy.

Under the provisions of the new law, zoning ordinances, zoning district maps and other implementing actions may be submitted at the same time as the land use plan or in a second stage after the land use plan has been certified. Both are reviewed primarily at the Regional Commission level but are subject to appeal or to review on its own motion by the State Commission. Where the Regional Commissions are not in existence or are not able to review local plans expeditiously, the local programs may be brought directly to the State Commission.

If the local coastal programs are not certified and all implementing devices effective by January 1, 1981, the Commission may:

1. Prohibit or restrict the affected local government from issuing a permit; or
2. Require a permit from the Commission for any development within all or part of the coastal zone of the affected jurisdiction.

Regional Commissions are dissolved within 30 days after the last local program is certified or on June 30, 1979, whichever is earlier.

## INTERIM DEVELOPMENT CONTROLS

Prior to certification of the local coastal programs, any development within the coastal zone (other than those under the jurisdiction of the Energy Commission or otherwise exempted) will require a coastal development permit. A local government may choose to issue such permits, except for development in a limited area, generally between the oceanfront and the first public road, or 300 feet inland, whichever is greater. In this area, permits are to be obtained from the Commission. All local permits are subject to appeal to the Commissions. In any area where a local government does not choose to assume the permit responsibility, the permit responsibility will remain with the Regional Commissions, subject to appeals to the State Commission.

After certification of the local programs, coastal development permits will be issued by local governments (except on tidelands, submerged land or public trust lands), subject to a limited appeals procedure.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## CALIFORNIA COASTAL COMMISSION—Continued

## STATE COASTAL PLANNING

In addition to its responsibilities for reviewing local programs and development permits, the Commissions were assigned other important responsibilities under the law:

**Sensitive Coastal Areas.** The Commission is to designate sensitive coastal resource areas based on a separate report adopted by the Commission, with a specified determination that each area is of regional or statewide significance and requires special protection. These designations must be approved by the Legislature before the end of 2 years or they lose their special designation.

**Urban Exclusions.** Prior to certification of their local plans, local governments may request and the Commission shall exclude certain developed urban areas. These exclusions, which are not subject to reconsideration, require certain findings and a majority vote of the Commission.

**Other Exclusions.** The Commission, by a two-thirds vote may also exclude other types of development. Such designations also require findings by the Commission.

**Power Plant Siting Study.** The Coastal Commissions will be required to map all areas of the coast where power plants are not to be allowed. The initial report must be completed by January 1, 1978, and updated each two years thereafter.

**Port Planning.** The Coastal Commission must adopt a map of the legal boundaries of the four major commercial ports referred to in the legislation wherein special port planning procedures are to be applied. Ports may start filing notice of completion for port master plans as early as January 2, 1977, and the Commission will review and certify such plans in a manner similar to local coastal programs.

**BCDC Study.** The San Francisco Bay Conservation and Development Commission and the Coastal Commission must study the best means of providing a single unified management program and submit that study and recommendations to the Legislature by June 30, 1978.

**Special Treatment Areas.** The new coastal law also requires the Commission to identify forested areas within the coastal zone that are especially significant for habitat or scenic values or where logging activities would adversely affect public recreation or biological productivity of a wetland, estuary or stream. These areas and recommendations for special logging controls must be submitted to the Board of Forestry by June 30, 1977.

**Public Works and State University Plans.** The Commission may, prior to or after certification of local coastal plans, review and certify long-range development plans for major public works and state university or colleges.

## Summary of Program Requirements

	1975-76	1976-77	1977-78
I. California Coastal Zone Planning and Management Program:			
a. Operation of State and Regional Commissions .....	-	\$2,578,501	\$5,729,611
b. Assistance to Local Governments .....	-	200,000 <sup>1</sup>	1,681,250
II. Legislative Mandate .....	-	-	400,000
<b>TOTALS, EXPENDITURE, ALL FUNDS PROGRAMS .....</b>	-	\$2,778,501	\$7,810,861
General Fund .....	-	2,111,933	5,120,861
Federal funds .....	-	666,568	2,690,000

The initial budget proposed for the new California Coastal Commission reflects operation of the Commission for the last half of the 1976-77 fiscal year. The budget proposed for the 1977-78 fiscal year is an interim proposal based on an extension of the workload experience of the predecessor commission and on an assessment of the demands facing the new commission in the immediate future. The opening statement of this budget presentation outlines the various tasks facing the State Commission and the six Regional Commissions as they proceed to implement the California Coastal Act of 1976. A definitive outline of the staffing proposed for the new commission and the related operating costs will be presented to the Legislature in a supplementary budget submission.

Continuing program costs (expenditures) .....	-	\$2,778,501	\$5,729,611
---	---	-------------	-------------

<sup>1</sup> Reported in state operations budget in 1976-77 fiscal year.

## DEPARTMENT OF PARKS AND RECREATION

The Department of Parks and Recreation acquires, designs, develops, operates and maintains units of the State Park System. The Department also has the responsibility to administer both federal and state local assistance programs. These activities are directed toward the accomplishment of seven principal objectives:

1. To secure and preserve elements of the state's outstanding landscape, cultural, and historical features.
2. To provide the facilities and resources which are required to fulfill the recreational demands of the people of California.
3. To provide a meaningful environment in which the people of California are given the opportunity to understand and appreciate the state's cultural, historical, and natural heritage.
4. To maintain and improve the quality of California's environment.
5. To prepare and maintain a statewide recreational plan that includes an analysis of the continuing need for recreational areas and facilities, and a determination of the levels of public and private responsibility required to meet those needs.
6. To encourage all levels of government and private enterprise throughout the state to participate in the planning, development and operation of recreational facilities.
7. To meet the recreational demands of a highly accelerated, urban-centered population growth, through the acquisition, development, and operation of urban parks.

An ever-increasing population in California has resulted in accelerated urbanization which necessitates the establishment of park units and recreation areas accessible to the major population centers of the state. Technological advances have created a more affluent society with additional leisure time spent increasingly in pursuit of various forms of recreation. It is necessary to provide for the wise and constructive use of the state's natural resources for recreational uses and to preserve the state's cultural, historical, and natural heritage for future generations to enjoy.

## I. Statewide Parks and Recreation Planning

## Program Objectives and Description

The objective of this program is to provide the basic planning framework for the maximum use of state resources devoted to recreation. Its goal is to establish needs and priorities on a statewide basis to facilitate distribution of resources into areas of maximum benefit. Primary responsibility for this program is vested in the Department's Planning Division.

In July 1976, the Department organized the Statewide Parks and Recreation Planning Program. Its purpose was to strengthen both statewide planning and State Park System planning. Three major considerations prompted the organization of this program. First, a large number of reports are being produced, including the California Outdoor Recreation Resources Plan, a State History Preservation Plan, and Landscape Province Studies, which will have significant impact on the operation and development of the State Park System. It has become necessary to relate the implications of these studies to a State Park System plan. Secondly, the success of the \$200 million Department program for acquisition and development depends on the optimum use of available resources which can only be achieved within an effective planning framework. Finally, an updating of the 1968 official State Park System plan is needed to reflect the effects that drastic changes in population growth, population distribution, pleasure travel patterns, and energy conservation factors have had or should have on the Department's efforts to meet the recreational needs of our citizens.

In the current year six positions were established to conduct a needs assessment and develop grant allocation criteria for the Urban Parks program. These positions are proposed for continuation in the budget year to complete the needs assessment and to update the information base as input to the revised State Park System Plan. Four additional positions are proposed for preacquisition planning in order to optimize the use of acquisition and development resources. One person year is distributed to this program from Management and Administration.

## DEPARTMENT OF PARKS AND RECREATION—Continued

## II. Development of the State Park System

## Program Objectives and Description

The objective of this program is to meet the demand for additional state lands and facilities through its efforts in acquisition of lands and development of facilities. This program also provides the technical assistance for accomplishing maintenance of State Park System facilities. It is also the goal of this program to develop effective interpretive programs for all State Park System units. The program is the joint responsibility of the Acquisition and Development Division and the Resource Interpretive Service Section of the Resource Preservation and Interpretive Division.

In the current year one position was established for trails planning pursuant to Chapter 1014, Statutes of 1975 and 8.1 person years of temporary help was established to carry out capital outlay funded interpretive development. As reflected in the budget of the Employment Development Department, Public Employment Act funds (Title II) will be made available beginning in the current year for railroad car restoration at Old Sacramento S.H.P. (\$400,000 and 21 positions) and for artifacts cataloging (\$150,000 and 9 positions). Continued railroad car restoration, as needed, will be carried out in the capital outlay funded Railroad Museum project.

b. Facilities development .....	99.4	101	122.6	2,216,719	2,783,976	3,527,045
c. Interpretive development .....	25.9	26.5	22.6	476,754	474,790	472,548

## a. Acquisition

This element involves the preparation of budget requests, negotiations, condemnation and liaison necessary to acquire lands for the State Park System. It requires the administration the Department's acquisition program including funded acquisition projects, gifts, exchanges, transfers and leases.

Continuous liaison is maintained with the Real Estate Services Division of the Department of General Services as well as various State and Federal agencies to insure a well coordinated acquisition program.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	24.5	22.1	21.6	\$437,369	\$483,839	\$450,991

## b. Facilities Development

This element includes all efforts culminating in a completed recreational facility or major modification or repair to an existing facility. Such efforts include the refinement of plans as required to support reliable cost estimating, budget preparation for approved projects, production of general development plans for control of design in working drawing development, production of working drawings and specifications, coordinating project bid and contracting program, construction inspection and necessary liaison with State, Federal and private agencies. A net increase of seven new positions is proposed for the budget year to handle capital outlay funded project development. Fourteen positions are proposed to accomplish general development plans which are prerequisite to new facility project undertakings. Three person years are distributed to this program from Management and Administration.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	99.4	101	122.6	\$2,216,719	\$2,783,976	\$3,527,045

## c. Interpretive Development

This element combines all activities necessary to conduct research for effective interpretation of the natural, historical and recreational resources. It is responsible for designing and developing exhibits, museums, programs, tours, and publications needed to enhance the State Park System interpretive experience.

The Department has been acquiring interpretive objects over the last 50 years and approximately 101,500 items of interpretive significance are now in the Department's inventory. Development of interpretive research and programs will be carried out in 50 State Park units which are in varying stages of development.

Four positions are proposed new for the budget year to carry out interpretive planning for capital outlay funded development projects. No increase in level of service is contemplated. One new position is proposed to coordinate the restoration of railroad rolling stock for the Old Sacramento Railroad Museum project.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	25.9	26.5	22.6	\$476,754	\$474,790	\$472,548

## DEPARTMENT OF PARKS AND RECREATION—Continued

## III. STATE PARK SYSTEM OPERATIONS

## Program Objectives and Description

It is the responsibility of this program to provide such services as protection, interpretation, and public information to the users of the State Park System. It is also the responsibility of this program to preserve and maintain all features of the State Park System. Its primary goal is to insure a significant recreational experience for the public at each park unit. The activities of this program can be grouped into three major elements: park unit services, public information and concession services.

In the current year 28.4 person years of temporary help was established for public and resource protection pursuant to agreements with the federal government at Mt. Tamalpais and at the Auburn-Folsom Recreation Project, and to carry out the road maintenance program as well as the capital outlay funded sign installation at new park developments. The balance of workload adjustments shown reflect a distribution of job training positions established in administration pursuant to agreements with the State Personnel Board.

This budget reflects the reestablishment of the Federal Youth Conservation Corps program in this department. In the current year funds are budgeted under the California Conservation Corps for this Parks and Recreation managed program. A total of 39 personnel years equivalents are proposed to be established to continue this program here. Approximately 400 youths will be provided summer jobs in this program.

## Program Elements

a. Park unit services .....	1,897.5	2,050	2,177.1	\$38,434,370	\$45,970,676	\$48,623,030
b. Public information .....	15.1	17.7	19.1	519,736	598,983	704,604
c. Concession services .....	7	6.5	6.5	172,648	176,154	181,101

## a. Park Unit Services

It is the purpose of this element to maintain park unit facilities for public use and insure a significant recreational experience at each park unit within the State Park System. This is accomplished by providing a wide range of visitor services such as law enforcement and interpretation of the various resources within the system. Also contributing to the accomplishment of this goal are a wide range of maintenance services including resource management, housekeeping, and maintenance to preserve the facilities and resources of the system.

The 1977-78 fiscal year budget proposes the addition of 147.4 positions and related operational expenses to handle workload resulting from the acquisition of extensive acreage and ocean frontage (18.5 positions) the development of new facilities (86.8 positions), and the relief of maintenance and security needs (42.1 positions). A conversion of operating expenses to one position is proposed to more efficiently maintain the Department's statewide radio system. The balance of workload adjustments include a reduction of twenty person years to reflect an adjustment in the Department's salary savings commitment, and the distribution of 12 person years to this program from Management and Administration.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	1,897.5	2,050	2,177.1	\$38,434,370	\$45,970,676	\$48,623,030

## b. Public Information

This element includes all efforts necessary to communicate to the public and to departmental personnel meaningful information on the Department's program and on the environmental, historical, archeological, natural, recreational and scientific resources of the State Park System. It also includes coordination of the Department's publication program and assistance on public relations and public information matters. The program also encompasses the production of park publications, brochures and folders as well as coordination with the various news media. One and one-half personnel years are proposed to coordinate the efforts of such programs as Outward Bound Adventures, PROBE and E.C.O. in the use of state parks for urban youth activities.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	15.1	17.7	19.1	\$519,736	\$598,983	\$704,604

## c. Concessions Services

It is the responsibility of this element to coordinate and direct the work of the Department relating to concessions, special use permits, and certain agreements issued to and received from federal and local agencies. This element encompasses the administration of concession contracts including analysis of bid contracts and the planning and supervising of concession operations. It is the goal of this element to provide adequate concession services which are reasonable, clean, and add to the enjoyment of the State Park System.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	7	6.5	6.5	\$172,648	\$176,154	\$181,101

# DEPARTMENT OF PARKS AND RECREATION—Continued

## IV. RESOURCE PRESERVATION

### Program Objectives and Description

This program provides protection for the natural, culture and historic resources of the State Park System. Preservation efforts are directed toward two major types of resources—natural and cultural, which includes archeological and historical resources.

In July 1976, the Department reorganized in order to emphasize the importance of resource preservation and facilitate the direction of resources toward that effort. The Natural Heritage and Cultural Heritage Sections and the Office of Historic Preservation were combined in one Division to encourage communication.

*In the current year 14.3 person years of temporary help was established to carry out capital outlay funded archeological investigations. The balance of workload adjustments shown reflect a distribution of job training positions established in Administration pursuant to agreements with the State Personnel Board.*

*Seven and one tenth person years are proposed for continuation for capital outlay funded archeological and historical research. Two and eight tenths person years are proposed new for workload associated with the cultural review of environmental impact reports on construction projects proposed in California. A total of sixteen positions are proposed new for the National Historic Preservation Act funded program. One position is proposed new to identify and install signs at Native American sites within the State Park System. One person year is distributed to this program from Management and Administration.*

### Authority

Division 5, Chapter 1, Article 1 of the Public Resources Code.  
National Historical Preservation Act of 1966 (Public Law 89-665).

### Program Elements

a. Cultural resources .....	24.4	36.1	41.2	\$513,873	\$651,819	\$890,333
b. Natural resources .....	7.2	18.3	26	179,131	404,441	674,610

#### a. Cultural Resources

This element is directly responsible for the Department's participation in the preservation of the State's cultural resources. These include archaeological and historical features over which the State has jurisdiction and all of the State's historic resources as outlined by the Department's participation in the National Historic Preservation Act of 1966. Responsibility for this program rests with the Cultural Heritage, Archeological and Historical Services, and Office of Historic Preservation units in the Resource Preservation and Interpretation Division.

Preservation responsibility for State Park System cultural resources includes providing professional expertise to identify and monitor the status of cultural resources. The collection of basic resource data, in the form of park unit cultural inventories, provides the data required to complete the Resource Management Plan. This is the principal resource document for general development planning. This element includes the mitigation of development and public use on the archeological/historical resources.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	24.4	36.1	41.2	\$513,873	\$651,819	\$890,333

#### b. Natural Resources

This element concentrates its preservation and protection efforts in areas of environmental importance within the State Park System. Field reconnaissance, studies, and consultations related to identification, analysis and formulation of management and protection programs for vegetative, wildlife and scenic resources are major activities included within this program. Review of Environmental Impact Reports and the maintenance of hazard review programs are included as major components of this effort.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	7.2	18.3	26	\$179,131	\$404,441	\$674,610

## V. ASSISTANCE TO PUBLIC AND PRIVATE RECREATIONAL AGENCIES

This program is the sole responsibility of the Grants and Local Assistance Office. Its main objective is to administer State and federal programs for financial assistance to local jurisdictions and State agencies for outdoor recreation. It also seeks federal, State, and private funds, gifts, lands and other donations for use in the Department's park and recreation related programs. A second main objective of this program is to meet statewide recreational deficiencies by qualifying the State of California as a recipient of grants from the Federal Land and Water Conservation Fund. The costs of providing additional recreational facilities often exceed the financial capability of local government agencies, and the federally sponsored Land and Water Conservation Fund along with the 1974 State Beach, Park, Recreational and Historical Facilities Bond Fund help to alleviate this deficiency.

*In the current year six positions were established for grants administration in the Urban Parks Local Assistance Program. Seven positions are proposed new in the budget year for administration of this grant program. Three positions are proposed new to handle workload associated with the Federally funded Land and Water Conservation Fund grant program. Three person years are distributed to this program from Management and Administration.*

### Authority

b. Grants to local agencies.....	-	-	-	38,124,659	24,805,849	6,190,121
c. California Urban Open Space and Recreation local grants .....	-	-	-	-	24,316,826	24,726,037

## a. Grants Administration

This element includes those efforts needed to administer the requirements of federal and state grant programs which provide financial assistance to local agencies for recreational development and developing and coordinating the means by which individuals, organizations and federal agencies can contribute money and gifts to enhance the State Park System. It also provides planning and technical-informational services to local governmental agencies, non-governmental entities and individuals as needed to maximize their involvement in helping to meet public recreational needs.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	13	23.5	29.3	\$532,518	\$745,282	\$784,192

## b. Grants to Local Agencies

This element consists of the estimated amount of grants to be allocated by the Department of Parks and Recreation to local recreational agencies throughout California from all sources not including the California Urban Open Space and Recreation Local Grants Program or the Federal Land and Water Conservation Fund.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	-	-	-	\$38,124,659	\$24,805,849	\$6,190,121

## c. California Urban Open Space and Recreation Local Grants Program

This element consists of the amount of grants to be allocated by the department to local recreational agencies pursuant to the goals of the California Urban Open Space and Recreation Program: to provide assistance to cities, counties, and other local jurisdictions in the acquisition and development of parks and other public recreation areas in or near the urban areas of California.

This element is designed to meet the demand for more outdoor recreation opportunities in the urban areas of the state where 90 percent of the population reside but where a 30 percent deficiency in open space and recreation areas exists.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	-	-	-	-	\$24,316,826	\$24,726,037

## VI. MANAGEMENT AND ADMINISTRATION

## Program Objectives and Description

This program provides the necessary leadership, regulation, and policy determination to ensure that the Department's goals and objectives are satisfactorily met. This program is also responsible for providing necessary administrative services for the proper functioning of all departmental programs. All resources of this program are distributed on a prorata basis to the department's other programs. Twenty-two positions are proposed new for the budget year. This amount includes ten clerical positions related to new professional positions proposed in other programs, two positions for procurement and stockroom workload, two positions for Urban Grant program accounting workload, two positions for Personnel Section workload, two positions for 1974 Bond Act and Land and Water Conservation Fund (affirmative action) grant audits, two positions for Legislative coordination/bill analysis and one professional and one clerical position for improvements in the legal review functions. Two personnel years of temporary help are reduced for a net adjustment of 20 personnel years.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	168.3	172.8	171.9	\$5,079,665	\$5,613,201	\$5,803,947
Workload adjustments.....	-	11.1	20	-	141,109	504,805
Totals, Management and Administration .....	168.3	183.9	191.9	\$5,079,665	\$5,754,310	\$6,308,752
Less amount distributed to other programs: ....	-168.3	-183.9	-191.9	-\$5,079,665	-\$5,754,310	-\$6,308,752
Net totals, Management and Administration .....	-	-	-	-	-	-

## a. Management

It is the purpose of this element to consider recommendations and guidance from the State Park and Recreation Commission, the California Recreational Trails Committee, the California Historical Landmarks Advisory Committee, and the Advisory Board on Underwater Parks and Reserves and to formulate departmental policy, establish departmental organization, direct operating organizational units, review and draft legislation, and represent the Department in all operational functions.

To use Department resources efficiently toward the accomplishment of the Department's principal objectives, this element is responsible for analyzing, formulating and reviewing policy. The use of Department resources toward common goals is also monitored within this element to ensure the setting of project and program schedules and priorities to realistically reflect the Department's policies.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	(57)	(58.3)	(60.8)	(\$3,060,833)	(\$3,410,386)	(\$3,595,569)

## DEPARTMENT OF PARKS AND RECREATION—Continued

## b. Administration

This element provides the necessary business and administrative functions for the proper operation of all departmental programs. Activities include those involving human resources—personnel, affirmative action, and training; fiscal support—auditing and accounting; and business management including departmentwide clerical, distribution, reproduction and office management services.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78

## Department of Parks and Recreation

### DIVISION OF EXPOSITION AND STATE FAIR

The objective of the Division of Exposition and State Fair, Department of Parks and Recreation, is to provide a medium for the education, commercial interaction, personal interaction, and recreation of the citizens of California by providing a forum for the competitive and noncompetitive exhibition of the State's industrial and agricultural accomplishments.

#### PROGRAM REQUIREMENTS

Spring fair .....	2	45,000

### CALIFORNIA EXPOSITION AND STATE FAIR

#### Program Objectives and Description

Fairs traditionally provide an arena for the presentation of new ideas and information for the education of the visitor, as well as providing a market place for the demonstration, advertisement, and sale of goods and services. Sponsors from the governmental and commercial section can present promotional information to the public. Fairs stimulate achievement through awards and prizes for excellence in the fields of agriculture and industry, and create a festive atmosphere with events and attractions for the amusement and recreation of its participants.

The Division, through the operation of the California Exposition and State Fair provides a showcase for the agricultural, recreational and industrial resources of California for both its residents and non-residents. It provides a forum for State Government to present its achievements to its constituency, and establishes programs of public participation to encourage the interchange of information regarding agriculture, industry and government. The State Fair also provides conventional youth programs for Scouting, 4-H and FFA, and provides a recreational outlet for the citizens of California.

The appropriation of increased operating revenues is proposed to continue the program of State Fair and interim activity improvements at Cal Expo. Five new positions are proposed to improve the management of Cal Expo, as authorized by Chapter 1217, Statutes of 1976. Three were established in the current year. Six new positions are proposed to maintain concessions facilities purchased from ANCORP. Fifteen and one-half new positions are proposed to improve security, grounds maintenance and to assist interim users in setting up special events. An increase in funding is proposed for publicity and entertainment for the State Fair. Finally, a new Spring Fair is proposed featuring health and outdoor recreation as its main theme.

Concessions facilities maintenance, grounds maintenance, security and special events staff will be increased beginning in the current year through Public Employment Act (Title II) funding. These expenditures (\$462,000) are reflected in the Employment Development Department Budget.

#### Authority

Food and Agricultural Code, Part 2 of Division 3.

**RECLAMATION BOARD**

**Program Objectives and Description**

The objective of the Reclamation Board's program is to secure and maintain, through cooperation with federal, state and local agencies, an adequate level of flood protection for the population and lands within the Sacramento and San Joaquin River Basins, at a minimum overall cost to the State.

The Reclamation Board, since 1911, has participated with the Corps of Engineers in the construction of major flood control project works in the central valley. The Board's primary activity is the acquisition of right of way for federally constructed levee and channel projects. The Board assures the corps the works will be operated and maintained and passes these costs on to a local entity.

In addition to participation in the federal program, the Board is also responsible for the control of encroachments on completed projects or in the area of an adopted plan, for the supervision of local maintenance and operation of completed project works, and for the management of acquired property.

At the beginning of the 1976-77 fiscal year, the Reclamation Board support staff and functions were transferred to the Department of Water Resources. Narrative description of the work involved is contained within the budget of the Department of Water Resources.

# SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION

The San Francisco Bay Conservation and Development Commission, headquartered at San Francisco, was created by the Legislature in 1965 with objectives to provide a regional approach to protecting the public interest in San Francisco Bay; to insure its beneficial use as the most valuable single natural resource of the entire region; and to provide a democratic and politically responsive process by which the bay and its shoreline can be analyzed, planned, and regulated as a single unit.

## SUMMARY OF PROGRAM REQUIREMENTS

## I. BAY CONSERVATION AND DEVELOPMENT

### Program Objectives and Description

The San Francisco Bay Conservation and Development Commission is charged with: maintaining the bay plan in an up-to-date manner based on current information and projections in order to serve as a guide for the conservation of San Francisco Bay and the development of its shoreline; carrying out provisions of law by issuing or denying permits for all filling or dredging in the bay; for change in use of salt ponds or other "managed wetlands" adjacent to the bay; and for substantial change in use of property within 100 feet of the bay.

Comprehensive regional planning studies are conducted by staff and consultants to provide the basic information and planning data for granting or denying permits and to strengthen or revise specific parts of the San Francisco Bay Plan. This requires continuing and extensive cooperation and coordination with federal, state, regional, local, and private agencies.

The budget for 1977-78 restores an enforcement investigator position that was abolished under the provisions of Section 20, Budget Act of 1976. In addition provision is made for the reprinting of the San Francisco Bay Plan in a revised format requiring the services of a graphic artist funded from temporary help as well as additional funds for printing. Permit fee revenues previously considered as reimbursements are to be budgeted as revenue to the General Fund. Provision is made for the services of a marine consultant, and two planner positions proposed from federal funds in the 1976 budget are to be funded from the General Fund.

The Commission has estimated it will be unable to fund all of its activities in 1976-77 without additional money and therefore has requested an Emergency Fund Allocation of \$46,759 to increase general expense, communications, facilities operations, equipment and staff benefits.

## II. ADMINISTRATION

### Program Objectives and Description

Commission activities require managerial, fiscal and supervisory functions to provide general administrative services to the commission and staff and to carry out commission policies and directives. Specific activities include interpretation, dissemination, and implementation of commission policies and directives, budgeting, procurement and expenditures control, business services, administrative support of commission meetings, clerical support and public information activities.

## DEPARTMENT OF WATER RESOURCES

The Department of Water Resources has three primary objectives. These are to (1) provide the necessary framework for the effective management of the state's water resources, (2) assure public safety and prevent property damage from water related causes, and (3) furnish technical services as the need arises.

The basic goal is to ensure that California's needs for water supplies, water-related recreation, fish and wildlife enhancement, hydroelectric power, prevention of damage and loss of life from floods and dam failures, and water-related environmental enhancement, are effectively and economically fulfilled, and to ensure that the manner in which these needs are fulfilled is consistent with public desires and attitudes concerning environmental and social considerations.

California's water resources management framework is provided through two major programs: (a) continuing formulation of the California Water Plan, and (b) implementation of the State Water Resources Development Systems.

Public safety and prevention of property damage are achieved through the programs of (a) flood control operations and subventions, (b) supervision of safety of dams, and (c) safe drinking water projects.

Specialized professional and technical services are provided under contract to local, state, and federal agencies, as appropriate.

Detailed program descriptions of all activities discussed in this budget are contained in the Program, Element and Component Statements. These statements are published in a separate volume and are available upon request from the Department of Water Resources.

### Authority

California Water Code, Division 1, Chapter 2, Article 1.

### I. CONTINUING FORMULATION OF THE CALIFORNIA WATER PLAN

#### Program Objectives and Description

The basic objective of this program is to prepare and maintain on a current basis a coordinated statewide framework for the economic and environmentally sound management of California's water resources by local, state and federal agencies.

Demands on California's water resources to satisfy peoples needs for goods and services, security and protection, and enhancement of the quality of life continue to enlarge. Water requirements necessary to sustain the State's rich agricultural production and meet its domestic and industrial needs are increasing. Augmentation of instream flows is needed at some locations, especially during the dry summer months, to meet growing demands for recreation, aesthetic, fisheries, water quality, salinity repulsion, and navigation. With the exception of the emerging requirement for a substantial supply of water for power plant cooling, the traditional surface and ground water supplies are adequate for the foreseeable needs of the State. However growing public concern for the protection of the environment requires that alternatives to these sources be evaluated and used where possible. Therefore more effective use of existing water supplies involving conservation and revised water management practices, alternative sources such as reclaimed waste water and other nonstructural measures such as pricing policies, require study and development as a means of supplementing basic water supplies.

In the last few years the Department has redirected its activities in this program for the studying of alternative sources of supplemental water supply, enhancement of natural environmental resources through water management, development of criteria for assessing the impact of water projects on the environment, and the improvement of the quality of water of the State. These new emphases are continuing in the 1976-77 and 1977-78 fiscal years. The Water Management element of the California Water Plan (Bulletin No. 4) is proposed as a specific design or road map for the future and will be published in 1977.

## a. Water Management Planning

The California Water Plan serves as a general guide for all water management activities throughout the State. The Phase II water quality basin plans by the SWRCB provide the water quality objectives which are being incorporated into the water management concepts of the California Water Plan. Plans for water development or management proposed by other government agencies are reviewed and the State's position on interstate and federal-state water resources planning are developed within the context of the California Water Plan.

Significant water issues facing California are receiving a fresh look to determine specific ways of resolving them in line with today's social and environmental goals. Traditional methods of determining water demands are being critically examined to determine realistic needs, achievable through both reduced water use and more effective use, including the influence of water pricing policies on demands. Studies are also giving attention to instream water requirements for fish, wildlife, recreation, esthetics and preservation of the riparian habitat. Other major subjects being studied or reviewed are the redefinition of existing water supplies through assessment of dry year criteria; service area allocations and water supplies; improved water management and conservation; water exchanges among systems; reuse of waste water; effects of water quality regulations; energy impacts; surface water development; drainage; and conjunctive use of surface and ground water supplies.

In addition, studies which are primarily of local concern but which contribute to the California Water Plan, are conducted. Further development of standards for and the review of environmental impact studies and reports are conducted, studies and activities, including public education, related to the conservation and efficient use of water are being expanded, and studies of specific water quality problems are coordinated with the State Water Resources Control Board. The feasibility of utilizing waste water for cooling power plants is also being evaluated in cooperation with the Electrical Power Research Institute and several Electrical Utilities.

## Output

The primary scheduled output is Bulletin No. 4, "The Water Management Element of the California Water Plan".

Secondary outputs are reports which will detail recommended plans and alternatives for managing California's water resources and a limited pilot program designed to enhance conservative water use.

## b. New Sources of Water

About 37 million acre-feet of water are provided annually to meet the State's overall need. Although this is only about one-half of the average annual runoff, additional development of surface water resources to meet future demands will be difficult because of environmental concerns. Therefore nontraditional sources such as waste water reclamation and saline water conversion, become increasingly important as new or supplemental supplies of fresh water. Technical information, cost data, and the environmental impact of these supply sources are being developed to plan for the day they may be required.

Under this program element the magnitude, developmental processes, and attendant costs of nontraditional sources of water are investigated and reported. These studies include a broad range of activities concerned with the reclamation of existing waste water supplies and weather modification.

Beginning in 1975-76 the Waste Water Reclamation Activities have undergone a substantial redirection by reducing the waste water inventory and the area overview studies of waste water reclamation projects and increasing work efforts with local districts to develop specific waste water reclamation projects to the point where the local districts can apply to the State Water Resources Control Board for Clean Water Grant dollars. Waste water activities and saline water conversion are being restructured and in 1977-78 will be carried out as Reclamation of Water Supplies.

## Output

Reports are to be prepared for the studies to be conducted on saline water conversion, and waste water reclamation.

## c. Data Collection, Evaluation, and Use

The source of all water supplies, precipitation, varies over a considerable range both in time and location. Therefore, projections and estimates of future water supplies from streams and ground must be statistically developed. The reliability of these projections is dependent upon the number of data sources, the distribution of their locations, and the length of their record.

Under this program element time-related data on the quantity and quality of surface and ground water resources are collected, analyzed, and distributed. A limited activity for the collection and dissemination of climatological data is also maintained. A machine computer retrieval file of historic data has been developed, and is being refined for access to more detailed information covering the full period of record at specific locations. The State Water Resources Control Board, the Department of Health, the Department of Transportation, and Department of Fish and Game are cooperating with the Department of Water Resources for data input, storage, and the computer retrieval system.

The cooperative snow surveys component coordinates and standardizes the collection of snow survey data by about 40 cooperators and uses the data to provide forecasts of spring snowmelt runoff and general water conditions for project operators and water users throughout the State.

The Land Resources and Use component monitors those characteristics relating to water utilization required for long-range management of the state's water resources. Data collected are used by the Department, the State Water Resources Control Board, the Office of Planning and Research, and other agencies.

## Output

A one-year summary of basic data on streamflow, ground water levels, precipitation, and water quality parameters, is published annually in the Bulletin No. 130 series. Data on snowpack conditions are published from February through May each year in the Bulletin No. 120 series. A summary edition of Bulletin No. 120 is published annually to present the status and trends of the water resources inventory of the State.

## II. IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM

## Program Objectives and Description

This program has three objectives. The first is to provide physical facilities to furnish water supplies for people as needed and not otherwise provided. The second objective is to carry out the operation, maintenance and management of these facilities in an efficient, economic and timely manner to meet the annual and long-term commitments of the state to all its water and power contractors.

The third objective is to further the development of essential and economically justified local projects to help fulfill the above needs through financial assistance to local public agencies for construction of water projects in which there is statewide interest.

Planning for conservation and development of water resources is a responsibility of many levels of government. Where local agencies cannot provide for the water development demands, they should be met by a complementary program of state and federal facilities. The state facilities would be a part of the state water resources development system.

The State Water Project is made up of physical facilities to meet a portion of the increasing water needs in state service areas from Plumas County in the north to the Metropolitan Water District of Southern California, which extends to the Mexican border, in the south. By 1973, this program provided the initial phases of the State Water Project in operational readiness. Other features already approved will be planned, designed and constructed as needed, during the ensuing years.

a. Planning and Investigations for the State Water Resources Development System

Although the construction of the initial stage of the State Water Project is complete, much planning and management work remains to be done to provide for the protection of: (1) The physical, legal, and fiscal integrity of the project; (2) The environment of regions adjacent to or served by project facilities, or of regions which may in the future be a source of additional water supply; (3) The quality of the water to be supplied to the Project, and to be supplied from the Delta to non-Project users in and adjacent to the Delta; and (4) Land resources in agricultural areas served by the project from salt build-up, and in areas adjacent to project canals from possible seepage damage.

The growing public concern for protection of fish and wildlife and for recreation emphasizes the necessity for the planning and development of project lands and waterways for these purposes where possible.

Under this Program Element comprehensive evaluation of all phases of project development is conducted including geologic studies, cost estimates, economic analyses, flood control studies, fish and wildlife and recreation resources development studies, water quality studies, environmental studies, and determination of land acquisition requirements.

Detailed planning studies are conducted to select and size the remaining project features to satisfy both local and export water requirements while protecting and enhancing the environment to the greatest extent possible. These studies include consideration of fish and wildlife habitat, reservoir sedimentation and turbidity, landslide hazards, and water quality.

A new program activity was initiated in 1975-76 to study possible alternatives to the Peripheral Canal and to recommend an action plan, including timing and staging of such project facilities as may be recommended and will terminate with a report at the end of 1976.

A portion of the Statewide Planning Program is being established in 1976-77 as a separate activity to identify future water supplies for the State Water Project. Other special investigations will continue to contribute to the activity.

Water rights considerations in connection with the State Water Project are investigated, and project effects on present physical and environmental conditions are monitored and evaluated.

Specific plans for recreation development at State Water Project facilities are prepared to ensure that water project recreation resources including fish and wildlife and water project public facilities are adequately developed. Additionally, in 1976-77 a survey of all water diversions on the Sacramento River will be conducted.

A cooperative study involving the California Departments of Water Resources and Fish and Game, U. S. Bureau of Reclamation, and the U. S. Bureau of Sports Fishery and Wildlife is underway to develop proper design and joint operating criteria for the State Water Project and Central Valley Project for the protection and enhancement of the Bay-Delta fish and wildlife resources. This activity includes striped bass ecological studies, general water quality studies, and studies concerned with evaluation and development of fish screening facilities.

A power planning study is being conducted to, first, identify the generating resources currently available on which to develop plans for meeting all of the Department's long-range electrical energy needs and, secondly, to evaluate alternative future types of generation and the associated cooling water requirements and sources.

A program "San Joaquin Valley Interagency Drainage Study" to provide guidance to local agencies in the San Joaquin Valley leading to the development of an overall drainage system for the Valley was initiated in 1975-76. The best combination of physical solutions will be determined and solutions to associated legal and financial problems will be recommended. This program is being conducted by the Department of Water Resources, State Water Resources Control Board and the U. S. Bureau of Reclamation. Drainage Monitoring and the Master Drain Implementation Study have been combined into technical support for the interagency study.

Output

Output from this element consists of reports on proposed features of the State Water Facilities.

## b. Design, Right-of-Way, and Construction of the State Water Resources Development System

Design, right-of-way, and construction activities will continue until the construction of the State Water Facilities have been completed. The magnitude of the activities, however, has decreased since the peak workload occurred in 1967.

Minimum preconstruction engineering of the Delta Facilities is proceeding while alternatives are being evaluated.

Design is underway on the four additional units at Delta Pumping Plant which are scheduled for operation in 1982.

Design and construction activities for the three A. D. Edmonston Pumping Plant units scheduled for operation in 1982, will be initiated in 1976-77. Additionally, Phase II construction on the Mojave Division which includes additional units at Pearblossom Pumping Plant, is underway and scheduled for completion in 1977. Design of the Cottonwood Power Plant started in 1975-76 with construction scheduled for completion in 1981.

Phase II construction on the Devil Canyon Powerplant is underway and scheduled for completion in 1976. Work on the Pyramid Power Facilities, which will replace the temporary Gorman Creek Improvement is underway and scheduled for completion in 1982.

## Output

Initial water deliveries were made in the Feather River area, in the North Bay area and the San Joaquin area in 1968. Water deliveries were first made to the South Bay area in 1962 and to Southern California in 1972. The flood control benefits of Oroville Dam have been substantial since the first flood operation action in December 1964. The recreation facilities provided throughout the project have received use measured in the millions of visitor-days. Electrical energy is now being generated at all project power plants, except Pyramid, Cottonwood, and San Luis Obispo.

## c. Operation and Maintenance of the State Water Resources Development System

Operations and Maintenance of completed facilities of the State Water Project is provided through two activity groupings: operations development and facilities operations and maintenance.

Operations development activities are concerned with the continued development of an operations plan, integrated with federal and other agencies which will meet the future contractual water commitments and power needs of the State Water Project.

Facilities operations and maintenance activities are the actual operations of the State Water Project facilities and maintenance of these facilities in accordance with prescribed standards. Water and power is scheduled and dispatched to meet all project commitments. Recreation, flood control, and fish and wildlife mitigation facilities are operated. Routine and extraordinary maintenance is performed to insure capability to deliver water and produce power. Also included in facilities operations and maintenance are activities such as specialized testing and maintenance; specialized technical inspections; surveillance of dams and structures through system instrumentation; coordination of maintenance and repair work; electrical relay testing; corrosion control; water and power operating techniques; training, safety, and management of project real property.

## d. State Financial Assistance for Local Projects

This program element provides loans for feasibility studies, reservoir site acquisition, and the construction costs of local projects. Grants are provided for certain recreation, fish and wildlife enhancement, and initial water supply and sanitary facilities cost. The state may also participate with an applicant as a partner under certain circumstances.

Projects approved for assistance must be found by the department to be in substantial conformance with the California Water Plan, be engineeringly feasible, economically justified, and, if a loan is proposed, there must be reasonable assurance that the public agency can repay it. Loans may be made only for that portion of the project cost which is beyond the reasonable ability of the public agency to obtain from other sources. The department must impose such terms and conditions as are necessary to protect the state's investment and carry out the objectives of the program. Also included in this element is the program component for loans to local agencies for water distribution systems as authorized by Chapter 1610, Statutes of 1967.

## Output

A report of findings is made to the Legislature on each local agency's formal application, making findings on engineering, economic, and financial analyses and recommendations on approval of loans or grants for proposed projects. Following contractual arrangements with eligible applicants, funds are disbursed and projects are inspected for conformance with contract terms.

## e. Financial and Contract Management of the State Water Resources Development System

The State Water Resources Development System is financed from a variety of sources: general obligation bonds authorized by the Burns-Porter Act, revenue bonds backed by the production and sale of power, federal funds appropriated for flood control, state appropriated funds for recreation and fish and wildlife enhancement, and miscellaneous funds earned from investments and sale of property. The public agencies contracting for project water are required to repay with interest the bonds used to construct the project and to pay the cost of operating and maintaining the water supply features. The utilities contracting for project power make payments to retire the Oroville revenue bonds sold, and pay the costs of operation and maintenance of the project power facilities. The public agencies that contracted for the power made available from the Devil Canyon Facilities and the Castaic Facilities make payments to retire the Devil Canyon-Castaic revenue bonds and to pay the cost of operation and maintenance of the facilities. The people, through governmental appropriations, repay the costs of constructing, operating and maintaining recreation and fish and wildlife enhancement facilities.

Projections must be made of future financial conditions. The water contractors must be notified of future costs for them to adjust taxing and water toll rates. Power contracts for both the generation and consumption of power must be negotiated, reviewed and updated as necessary to provide for economical and reliable sources of power consumed, and to provide for the optimum use of the Project's power resources. Water contractors and utilities must be billed for water delivered and power generated. Bond counsel, financial institutions and other governmental agencies must be retained to market and administer bonds in the department's behalf. Finally, the principal and interest of the bonds outstanding must be repaid. The above activities devoted to maintaining the financial integrity of the State Water Resources Development System are contained within the program element.

## DEPARTMENT OF WATER RESOURCES—Continued

## Output

The output of this program element is the maintenance of the financial integrity of the State Water Resources Development System. Specific qualitative outputs are accurate billing records, repayment of bond principal and interest on time, and power and water contractual agreements negotiated to best meet the mutual needs of the department, water contractors, utilities and the people of California.

## III. PUBLIC SAFETY AND PREVENTION OF DAMAGE

## Program Objectives and Description

The objective of this program is to protect life and property from damage or destruction by floods or dam failures and to make loans for construction improvement or rehabilitation of domestic water systems to bring them up to State standards for safe drinking water.

Experience demonstrates that the people of California, their property, and their resources, are vulnerable to the destructive effects of floods. To prevent or minimize such damage, protection is provided by a comprehensive approach. In cooperation with the National Weather Service, weather and river forecasts are issued. From these, the department's Flood Control Center issues flood warnings to alert the public when flooding is probable, and flood control facilities are operated to minimize damage. Levees and flood channels are maintained and supervision and coordination for flood fighting is provided. Technical information is provided to local agencies to assist them in the regulation of development on floodplains. Such regulations, if adopted, serve to meet one of the requirements for the national flood insurance program. Lands easements, and rights-of-way are provided for federal flood control projects. The safety of the public is also protected through departmental review of proposed plans for the construction of new dams and inspection of all nonfederal dams for proper construction and maintenance.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

d. Safe Drinking Water Projects .....	—	7.9	6.7	—	30,565,000	60,597,000

## a. Flood Control

Within the activities of this program element local agencies are assisted in developing regulations for management of floodplain areas and in conducting flood hazard investigations; storm and high water conditions are continuously monitored during the flood season; a Flood Center is activated during potentially dangerous periods to provide a focal point for coordination of flood emergency operations, collection and dissemination of flood data; the Sacramento River Flood Control Project and flood control facilities are operated and maintained, and flood control works in the Central Valley are inspected periodically. Beginning in 1976-77 the activities of the Reclamation Board are included in this element under the component "Reclamation Board Activities", their function is to cooperate with the Corps of Engineers and local agencies in constructing and maintaining flood protection projects in the Central Valley; assist local agencies in estimating flood damages and repairs required; to evaluate accomplishments of past flood control measures and to identify alternative future policies and programs for flood damage prevention.

## Output

Plans and recommendations are produced for solution of flood problems and safe development of floodplains; information regarding floodflows is collected and disseminated; flood forecasts are prepared and furnished to interested agencies; technical direction and assistance is provided during flood emergencies; and the Central Valley is afforded a high degree of flood protection by the maintenance and operation of the Sacramento River Flood Control Project.

Reimbursements .....				705,246	1,138,000	1,070,000

## b. Flood Control Subventions

The primary purpose of this element is to reimburse local agencies for the costs of rights-of-way and relocations. This is accomplished through the review and processing of claims submitted by the local agencies. These claims are tested against the provisions of the authorizing legislation and guidelines published by the department and the amounts eligible from the state are determined. Approximately 100 claims in connection with about 45 active projects will be processed and paid each fiscal year.

Secondary activities include the review of proposed federal flood control projects to determine potential state costs, analysis of local agency requests for inclusion of project funds in the state budget, continuous review and revision (if necessary) of program policies and procedures, and preparation of final reports on completed projects.

## Output

1. Engineering reports and reallocation orders to pay flood control claims, and reports on reimbursement for rights-of-way and relocation costs.
2. Determination of future state costs in connection with proposed projects and determination of adequacy of floodplain regulations.

## c. Safety of Dams

The safety of dams program provides for independent analysis and evaluation of proposed designs, plans, and specifications, investigation of dam sites both structurally and geologically, supervision during construction of new dams, and of the enlargement, repair, and alteration of operational dams and reservoirs, surveillance, inspection and evaluation of operational dams and reservoirs, determination of need for the installation of instrumentation, and the investigation and analysis of dams constructed illegally, together with the activity necessary to terminate these violations by removal, alteration or repair.

Activities include independent analysis and evaluation of about 50 applications for new construction, enlargement, alteration, and repair of dams, and supervision during the resulting construction. About 1,400 systematic examinations and evaluations of nearly 1,100 operational dams will be made; about 450 surveillance and instrumentation reports will be analyzed; and dams allegedly constructed in violation of the code will be investigated and the violations terminated. The structural reevaluation program for seismic stability of about 15 critical dams will be performed. Flood hydrology will be reevaluated for spillways suspected to be inadequate. *The Budget year will be the second of a four year Cooperative Study to evaluate the seismological activity of the Foothill Fault System along the western edge of the Sierra Nevada.*

## Output

This program element provides important benefits to the people of California through the protection of life and property. These benefits result from the prevention of failures similar to those which occurred at St. Francis Dam and Baldwin Hills reservoir. A catastrophe similar to the St. Francis Dam disaster today would cause \$100 million in damage to property and immeasurable loss in human life.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78

Reimbursements .....				—	—	206,600

## d. Safe Drinking Water Projects

*This element is a new activity to implement the "California Safe Drinking Water Bond Law of 1976" and will be a joint effort with the Department of Health. The Department of Health is responsible for the development of a priority list of substandard domestic water systems for which loans to water suppliers could be made. The Department of Water Resources is to adopt regulations necessary to carry out the Act, to process applications, and to negotiate contracts for loans with domestic water suppliers.*

## Output

In the current year the objective is to develop and adopt regulations in the first quarter and loan \$30,000,000 during the remainder of the year. The budget year objective is to loan \$60,000,000.

## IV. SERVICES

## Program Objectives and Description

The objectives of this program are to provide technical support to the department's activities and to make this expertise, as well as the specialized engineering experience of the department available to other agencies.

The department has developed a significant capability for providing specialized skills and experience in the field of water resources planning, development and management. Support activities involving laboratories, electronic data processing, mapping and surveying have also been developed over the years. Occasionally, this expertise is found helpful by certain other agencies in assisting them in their missions. The department's own operations must be supported by certain technical functions that can best be furnished on a centralized as-needed basis.

This program also provides the capital improvements, other than those associated with the State Water Project, necessary to allow the department to carry out its assigned functions.

## a. Services to Other Agencies

1. The U. S. Geological Survey compiles topographic maps under a cooperative agreement, wherein the state and federal government each contributes half the cost. Areas to be mapped, scales of mapping, and priorities are mutually decided upon, with the department coordinating the needs of state agencies.

2. The department, as watermaster, measures streamflow and distributes it in accordance with decreed rights; checks and records ground water extractions in accordance with stipulated agreements; and conducts hydrologic studies of watermaster service areas.

3. The department conducts engineering investigations requested by other agencies; among these are studies of water supply drainage, flood hazards, sewage disposal, water quality, water rights, engineering feasibility, and project cost estimates.

4. The department serves as the Electronic Data Processing Center for the Resources Agency and provides services to other departments and agencies as well as laboratory and graphic services on a reimbursable basis.

## Output

1. About 50 topographic maps, covering 6,000 square miles and showing updated topographical and cultural features, are completed and published annually by the U. S. Geological Survey in cooperation with the department.

2. Water allocation is provided on about 50 streams in 22 service areas, of which four are ground water basins. This service involves a total of about 1,800 parties. These activities are reported in Bulletin Nos. 177, 178, and 179, which are published annually.

3. Reports are prepared on investigations and services conducted for other agencies as requested.

## b. Technical Services

Technical services are provided by specialty units to all divisions, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the program, except for additional equipment related to data processing, mobile equipment and graphic services which is initially financed from reserve funds.

## Output

The accomplishment of their program purposes by user programs within and outside the department, in the most efficient and economical manner available.

## c. State Building Program

Major Capital Outlay projects are formulated as required to support the Department's general activities or are authorized as a result of legislation. Such projects may include new construction or substantial alterations, purchase of equipment related to the projects, and associated land costs.

Projects for 1976-77 are a maintenance shop at the Sutter yard, improvements to the flood control warning system and a recreation project along the Feather River as authorized by Chapter 1023, Statutes of 1976.

General funded projects for 1977-78 include the next phase of improvements to the flood control warning system and partial funding of the replacement of Pumping Plant #3 on the Sutter Bypass. Requested funds are for 80 percent of the total \$1,030,000 projected cost. The balance is to be funded from local resources.

## V. MANAGEMENT AND ADMINISTRATION

## Program Objectives and Description

The objective of this program is to provide sufficient managerial and administrative services to insure that the overall missions and goals of the department are accomplished.

Without the proper level of executive leadership and its staff support, the Department of Water Resources would not be able to function in an efficient and effective manner. The benefits to be derived from all of the various other programs carried out by the department as described elsewhere in this budget, would not be realized. Therefore, a program of management and administration has been developed as, and continues to be, an integral feature of the total program activity.

## a. General Management

Most of the functions included in the department's executive and administrative headquarters organization comprise this program element. Included are the Director and his immediate staff, the legal staff, public information, program analysis, internal audits, budgeting and accounting, business and office services, personnel, training, management analysis, and safety. The costs of general management are distributed to all of the department's directly funded programs through an indirect cost structure on the basis of direct labor costs.

## Output

The accomplishment of the programs of the department are indicative of the effectiveness of the managerial supervision and administrative services that were provided.

<sup>2</sup> Beginning in 1977-78, Graphic Services costs are budgeted in the user component.

## b. Line Management

This indirect cost program element represents the supervisory administrative and housekeeping costs of a major organization. These costs are distributed to all programs which the organizations personnel participate in on the basis of direct labor costs.

## Output

Each major organization's supervisory and related clerical support are provided through the program element.

## DEPARTMENT OF WATER RESOURCES—Capital Outlay

STATE BUILDING PROGRAM  
EXPENDITURESActual  
1975-76Estimated  
1976-77Proposed  
1977-78

The capital outlay schedule summarizes expenditures and projections for the implementation of the State Water Resources Development System Program, the Public Safety Program and the State Building Program. A general explanation of the state projects under the California Water Development Program is presented in the support budget with a description of the significant units of each project as well as detailed expenditure information.

IMPLEMENTATION OF THE STATE WATER RESOURCES  
DEVELOPMENT SYSTEM PROGRAM

State Operations (For Detail, See Program Expenditure Section):

Water management planning .....	\$527,265	\$408,500	\$452,900
New sources of water .....	136,264	246,500	173,100
Planning and investigations .....	4,693,505	6,384,000	5,891,300
Design .....	4,528,782	6,252,400	6,777,400
Right-of-way acquisition and relocations .....	1,315,882	1,168,100	936,500
Construction supervision .....	3,648,658	2,791,800	3,336,600
Operation during construction .....	1,074,079	723,000	97,700
Operations and maintenance .....	25,805,243	28,317,000	28,889,500
State financial assistance for local projects (administration) .....	421,161	255,300	267,800
Financial and contract administration .....	2,110,761	2,809,400	2,937,900
Totals, State Operations .....	\$44,261,600	\$49,356,000	\$49,760,700

## STATE WATER RESOURCES CONTROL BOARD

The objectives and responsibilities of the State Water Resources Control Board and the nine Regional Water Quality Control Boards are to preserve and enhance the quality of California's water resources and to assure their conservation and effective utilization. These objectives are achieved through two action programs: water quality and water rights.

## SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Water quality .....	\$59,293,127	\$84,114,257	\$120,581,727
II. Water rights .....	1,721,575	2,469,718	2,925,241
III. General support:			
Distributed .....	(1,949,553)	(2,237,375)	(2,228,695)

For the list of standard (lettered) footnotes, see the end of the Governor's Budget totals.

## STATE WATER RESOURCES CONTROL BOARD—Continued

## SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel Years	Dollars
Ia.	Strengthen Water Pollution Control Effort .....	9.3	\$256,000
Ib.	Increased Emphasis on Non-Point Pollution .....	27.8	1,244,000
Ic.	Continued Acceleration and Increased Monitoring of Wastewater Treatment Plant Construction .....	15.5	35,372,000
Id.	Increased Technical Assistance .....	4.7	283,000
Ila.	Continued Emphasis on the Water Right Permit Application Process and Strengthened Surveillance Activity .....	5.8	471,000
III.	Increased Administrative Support .....	11.1	(234,688)

## I. WATER QUALITY

## Program Objectives and Description

The broad objective of the Water Quality program is to achieve and maintain the highest possible quality of the waters of the state consistent with their use. Specific objectives are:

1. To monitor the quality of the waters of the state in order to develop an understanding of the quality, causes and effects of such quality, and for the purpose of supporting all state pollution control activities.
2. To formulate, adopt, and update water quality control plans and policies for guidance in water management decisions.
3. To monitor the quality of the waters of the state in order to determine compliance with control plans, permit terms, conditions and receiving water standards; report such quality, its causes and effects; and assess the effectiveness of the state's water pollution control program.
4. To initiate effective control of toxic wastes through implementation of State/Federal pretreatment and toxic standards.
5. To require of waste dischargers those actions necessary to prevent and abate water pollution, inspect dischargers to determine compliance with requirements, and carry out enforcement actions to obtain full compliance with waste discharge requirements.
6. To ensure that federally licensed projects or facilities requiring federal permits are constructed and operated in a manner which conforms with all applicable water quality standards. To ensure that private treatment facilities granted tax relief incentives are designed, constructed, and operated to achieve compliance with applicable water quality standards.
7. To assist local entities in the construction of wastewater treatment facilities needed to comply with discharge requirements and achieve receiving water standards.
8. To evaluate new problems, specialized techniques, and concepts in water quality control; define and develop solutions to unique water quality problems in the State; conduct a waste treatment plant operator training program to provide the skills necessary in operating today's complicated facilities.

California faces serious challenges in water management, pollution control, and water quality enhancement. Growth of population and expansion of industry and agriculture demand abundant clean water; at the same time they threaten its quality and availability. An effective, comprehensive program for managing California's waters is essential to balance these conflicting pressures on one of the State's most precious resources.

## Authority

Porter-Cologne Water Quality Control Act, California Water Code Sections 13000 et seq. provides general legislative authority for the State's Water Quality Control Program. This code also authorizes the State Board to exercise those powers delegated to the state by the Federal Water Pollution Control Act, P. L. 92-500.

## a. Regulation

The Regional Water Quality Control Boards regulate waste discharges with four closely related activities: adoption of waste discharge requirements, certification and licensing, surveillance and monitoring, and enforcement.

Waste discharge orders are the cornerstone of regulation. These orders specify limits on the quality and quantity of an effluent and time schedules for achievement of compliance. For discharges to surface waters, discharge requirements are included in permits of the National Pollutant Discharge Elimination System (NPDES) established by Federal law and delegated to the State by the Environmental Protection Agency. Regional Boards formulate discharge requirements or NPDES permits for each new discharge and periodically reevaluate and upgrade these to conform to current technology and water quality conditions.

The State Board is also required by law to issue various types of certifications or registrations for other agencies or individuals. These certifications include:

1. Registration of liquid waste haulers
2. Certification of water quality laboratories
3. Licensing of oil spill cleanup agents
4. Certification for federal tax purposes
5. Certification to the California Pollution Control Financing Authority
6. Certification of compliance with water quality standards
7. Certification of wastewater treatment plant operators

Certification and licensing activities supplement pollution control through activities including development and review of local source control ordinances for implementation of State/Federal pretreatment and toxic standards, and monitoring of liquid waste hauler activities to prevent illegal and unsafe disposal of hazardous wastes.

## STATE WATER RESOURCES CONTROL BOARD—Continued

Waste discharge orders are ineffective without surveillance and monitoring and enforcement to assure compliance. Surveillance and monitoring activities include collection, interpretation, and storage of water quality and quantity data. Regional Boards use these data to measure compliance with discharge requirements and achievement of water quality standards, to identify sources of pollution, and to identify waters requiring special studies. These data are also essential for establishing and reviewing water quality standards, an important activity of the planning element.

Whenever surveillance and monitoring activities uncover a violation of discharge requirements, the Regional Board attempts to gain compliance through voluntary action by the discharger. If this fails, administrative enforcement, cleanup and abatement orders, cease and desist orders and finally, judicial enforcement remedies are sought.

The State Board must consider all appeals by aggrieved persons of any Regional Board action and may review a Regional Board action even though an appeal has not been filed. The appeals process provides a final opportunity for administrative review of a Regional Board action and is particularly important when actions may later be subject to judicial scrutiny.

Staffing increases of 9.3 positions in certifications, surveillance and monitoring, and enforcement activities will permit the Board to initiate an effective control program for toxic wastes. The activities of waste discharge haulers and Class I disposal sites will be monitored and local source control ordinances will be developed to allow 89 municipalities to regulate toxic discharges into their systems.

**Output**

	1975-76	1976-77	1977-78
Waste discharge requirements.....	1,344	1,053	1,219
NPDES permits .....	876	931	954

Expenditures.....	181	194.3	199	\$5,465,337	\$6,590,195	\$6,713,871

**b. Planning**

Section 208 of the Federal Water Pollution Control Act requires the development of Areawide Waste Treatment Management Plans for designated areas to control all point and non-point sources of pollution and the establishment of regulatory programs and management agencies. With federal funding, these agencies are expected to complete plans for their areas in time to be combined with the State Board planning effort for nondesignated areas. These plans will form the basis for amendment to the Basin Plans. The State Board is required to review and certify the completed plans for designated areas and therefore must maintain an overview role throughout the planning period.

Long-range planning for water quality control, including economic and environmental considerations, are essential for effective water quality control and wastewater management. The State and Regional Boards completed California's first major phase of water quality planning in 1975 when Water Quality Control Plans (Basin Plans) were adopted for the State's 16 hydrologic basins. In fiscal year 1976-77, the State Board will initiate annual revisions of the Basin Plans and embark on the second phase of water quality control planning. In fiscal year 1977-78, the Board will continue the second phase of water quality planning emphasizing the definition of best management practices to control non-point sources of pollution to meet the 1983 goal of the Federal Water Pollution Control Act (P.L. 92-500). The Basin Plans, when updated to include phase II plans, will conform to the combined requirements of Sections 208 and 303 of the federal act.

Additional staffing of 27.8 positions will enable the Board to develop plans for control of non-point sources of water pollution and develop policies relative to groundwater protection, reclamation and reuse, seawater intrusion and deep well injection. The State Board will make a detailed examination of the State Water and Federal Central Valley projects in order to develop an effective plan to insure protection of the Delta environment and prior water rights.

**c. Facility Development Assistance**

Inadequate wastewater treatment facilities and improper operation of those facilities are principal causes of water pollution in California. To help solve these problems the State Board administers programs for awarding wastewater facilities construction grants to public agencies and for training and certifying facility operators.

The wastewater facilities construction program is the largest public works program in effect in the State. In 1974, the State Board took steps to accelerate the wastewater facilities grant program for the purposes of producing substantial construction cost savings and more quickly upgrading the quality of California's waters. This acceleration was made possible by enactment of Chapter 804, Statutes of 1974, allowing the State Board to collect a processing fee from grantees. In fiscal year 1975-76, the augmented staff supported by this processing fee was able to review facilities plans and approve grants for \$800 million in new wastewater facilities, as opposed to \$500 million without the acceleration. The full impact of the acceleration will be felt in fiscal year 1977-78 when \$2 billion of project construction work will be underway. The Federal Government pays 75 percent of project costs while State and local agencies each pay 12.5 percent.

## STATE WATER RESOURCES CONTROL BOARD—Continued

The Environmental Protection Agency and the State have agreed that the effectiveness of the grant program would increase if principal program responsibility were with the State. As a result, 26 separate functional agreements have been signed, delegating almost total responsibility for administering this program to the State Board. These responsibilities include: (1) developing a statewide project needs list and establishing priorities for grant requests; (2) reviewing and evaluating facilities plans, including environmental impact reports, revenue programs and cost effectiveness analyses; (3) reviewing of design plans and specifications, certifying projects to the Environmental Protection Agency and executing contracts with local wastewater management agencies; (4) monitoring construction and approving progress payments; (5) performing final construction inspection and audits; and (6) performing annual inspections for three years following construction. The Board staff works closely with the local agencies and their consultants through the planning, design and construction phases to ensure compliance with all applicable federal and state regulations.

The most carefully planned and constructed wastewater treatment plants are ineffective unless operated properly by well trained personnel. Recognizing this, the State Board has established a program required by Chapter 1315, Statutes of 1972, whereby municipal treatment plants are classified according to their complexity and the level of competency needed by their operators. In addition, operators are tested and certified at these different levels according to their experience, education, and examination results. Approximately 700 plants and 3,000 operators have been classified and certified under this program.

Training is available to treatment plant operators through community college courses, for which the State Board provides advice on curricula, and through the State Board's San Marcos Training Center, a wastewater treatment plant that allows practical, problem-oriented training. A mobile classroom-laboratory is also available through the San Marcos Center which brings training to operators at their own facilities.

*Additional staffing of 15.5 personnel years will permit the Board to meet added workload resulting from new federal requirements and delegated responsibilities. Program integrity will be preserved through timely audits, construction inspections, and processing of change orders and progress payments.*

*As a result of continued acceleration of the wastewater treatment plant construction program, an increase of \$35 million will be obligated from the Clean Water Bond Fund for a total of \$100 million in 1977-78. This will exhaust the \$500 million as approved by the electorate in 1970 and 1974.*

Output	1975-76	1976-77	1977-78

## d. Program Support

An ongoing commitment of resources is necessary to develop new information, maintain technical staff capability in evolving and continuing activities, and for administrative support necessary to accomplish the goals and objectives of the Water Quality Program.

Policy decisions which will have profound effects on our environment must be made, and it is imperative that they be based on a foundation of sound data and reliable information. This requires research, coordination, appropriate assimilation, analysis and translation of data for effective water resources program management.

Coupled with the research effort, State Board technical specialists provide assistance to all water quality program activities of the Board in the following areas: soil water processes, economics, engineering geology, hydrogeology, aerial surveillance, and wastewater reclamation. This expertise is required for studies in the areas of groundwater hydrology, control of non-point sources of pollution and marine water quality.

The State Board is mandated to develop and implement a statewide water quality information storage and retrieval program. The primary emphasis of the data management program is on the Waste Discharger System which provides the data necessary to monitor dischargers throughout the State, the Water Quality Data System which provides the data necessary to monitor the quality of water in the State, and a continuing need to provide in-house capability to meet operational needs.

Also included in the program support element are those efforts necessary in planning, organizing, coordinating, budgeting and directing activities for accomplishment of the goals and objectives of the Water Quality Program and appropriate administrative services.

*Additional staffing of 4.7 positions will permit the Board to review Environmental Impact Reports and statements received from the State Clearinghouse in a timely manner (1.4), monitor additional research contracts (1.3) and provide EDP program maintenance capability (2).*

## II. WATER RIGHTS

## Program Objectives and Description

The objectives of this program are to obtain the greatest beneficial use of the waters of the state, to prevent its waste or unreasonable use, to give assistance to the courts in determination of water rights, and to maintain a record of water diversions and use throughout the state.

The Water Code declares that all water flowing in any natural channel not already appropriated or reasonably needed for beneficial uses on riparian lands is public water of the state and subject to appropriation. There is an established procedure by which applications are approved and permits are issued under which the appropriation is completed and a license is issued confirming the water right.

## Authority

Division 2 of the California Water Code and Title 23 of California Administrative Code provide authority and regulations for the state's water rights program.

General .....	10	11.7	12.8	238,442	308,227	307,110

## a. Water Appropriation

In order to obtain the right to take unappropriated water from surface streams, other surface bodies of water, or defined subterranean streams, an application to appropriate such water must be filed with this Board. In considering the application, the Board must weigh the relative benefit to be derived from all beneficial uses of the water concerned. It may subject such appropriations to terms and conditions that will best develop, conserve, and utilize the water sought to be appropriated.

Environmental impact assessments are made for all projects. These lead to the preparation or review of exempt declarations, negative declarations, or environmental impact reports. In the event an application is protested, the Board must hold hearings and conduct field investigations to determine whether the application should be approved or denied. In many cases, the Board retains jurisdiction for continuing study when a permit is issued under controversial conditions.

A backlog of about 800 applications to appropriate water are awaiting issuance of a permit. During fiscal year 1976-77 additional engineering staff was added to the initial application processing phase to reduce the level of unprocessed and pending applications to a working level. The bulk of these applications will advance to the environmental review and hearing phase during fiscal year 1977-78 and be issued a permit between 1978 and 1980 depending upon the complexity of the project.

The additional staffing of 5.5 positions will allow the Board to meet the ongoing workload for Environmental Impact Report review, prevent the current backlog of environmental reviews from increasing, and meet the Board's commitment to eliminate the water right permit application backlog over a three-year period (2.8). The additional staffing will also allow inspection of a portion of the existing licensed projects to assure compliance with the standard and special provisions of the licenses. The additional manpower will prevent the backlog of uninspected licenses from increasing (2.7).

## Output

## STATE WATER RESOURCES CONTROL BOARD—Continued

## b. Water Diversion

The Board is responsible for the administration of laws which require the collection of water diversion data pertaining specifically to water rights. In Southern California, the counties of Riverside, San Bernardino, Los Angeles, and Ventura have a severe groundwater shortage. The law requires that reports be filed by anyone from these counties who extracts more than 25 acre-feet of water from the ground and also requires that notices be filed for extractions from sources in lieu of groundwater. Also, any person who diverts water from a surface stream or body of water and does not have a permit or license issued by the Board, is required to file a statement of the diversion and use with the Board.

Output				1975-76	1976-77	1977-78

<b>Input</b>	<b>75-76</b>	<b>76-77</b>	<b>77-78</b>	<b>1975-76</b>	<b>1976-77</b>	<b>1977-78</b>
Expenditures .....	3.4	3	3	\$63,421	\$78,987	\$77,460

## c. Determination of Existing Rights

The Board and its predecessor agencies have been assisting the courts in adjudication of water disputes since passage of the Water Commission Act in 1914. The Board assists the courts either by: (1) court references under which the Board is appointed referee in actions before a court, or (2) statutory adjudications, wherein a determination is initiated through petition to the Board by the affected users. Both procedures culminate in a court decree defining the water rights involved.

Output				1975-76	1976-77	1977-78
Adjudication analyses .....				19	44	44
<b>Input</b>	<b>75-76</b>	<b>76-77</b>	<b>77-78</b>	<b>1975-76</b>	<b>1976-77</b>	<b>1977-78</b>
Expenditures .....	2.6	4.3	4.3	\$69,379	\$109,593	\$112,569

## d. Program Support

The Water Rights Program requires several support activities involving public information, legal assistance, data management, records maintenance and administration. Also included are those efforts necessary in planning, organizing, coordinating, budgeting and directing activities for accomplishment of the goals and objectives of the Water Rights Program.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	27.5	36.2	37.6	\$662,373	\$950,769	\$938,883

## III. GENERAL SUPPORT

## Program Objectives and Description

The objective of this program is to provide essential management and policy direction, legal and administrative services, public affairs activities, and coordination to the five divisions of the State Board and the nine Regional Water Quality Control Boards.

The five appointed State board members, each of whom represent specified areas of knowledge required by the Water Code, are responsible for establishing overall policy, providing direction to State Board staff and to the Regional Boards, approving Regional Boards' water quality control plans, considering appeals concerning other actions or inaction of the Regional Boards, and coordinating all water quality and water rights activities in the State.

Specialized staff services are provided to the State Board and Regional Boards in the functional areas of: public affairs, legal advice and assistance, program analysis, fiscal management, personnel management, training, business services, and management systems analysis.

The Board also provides reimbursed administrative services to the Air Resources Board and the Solid Waste Management Board.

*An additional 11.1 positions (3.2 are reimbursed by other agencies) will allow the Board to meet expanded program needs. The increased reimbursements are a result of a change in the allocation method for administrative services and increased workload.*

# **HEALTH AND WELFARE**

## OFFICE OF EDUCATIONAL LIAISON

The Office of Educational Liaison, within the Health and Welfare Agency, was established by the Child Development Act of 1972 (Chapter 670, Statutes of 1972), and was responsible for planning, development, and coordination with departments of state government concerned with child development services.

Legislative authority for the office expired December 31, 1975.

## DEPARTMENT OF AGING

The Department of Aging administers funds allocated to California under the federal Older Americans Act. The Department serves the aging population as a clearinghouse and center for information on aging; conducts public hearings on matters relating to the well-being of the elderly; cooperates with federal, state and local bodies to promulgate effective programs for the elderly; administers the more than \$30 million in federal moneys allocated to California under the Older Americans Act; provides consultative services for development and implementation of Community Planning and Nutrition Programs; advocates for appropriate shares of new resources; stimulates effective use of existing resources and supports all available services offered to the elderly at state and community levels.

### I. FIELD OPERATIONS

#### Program Objectives and Description

California's elderly, defined as those 60 years of age or older, number nearly 3 million. Of those, nearly 20 percent are in special need of one or more of a variety of services related to physical and mental well-being. The primary concerns are for low-cost, nutritionally sound meals; reduction of isolation; and an increase in mobility and accessibility to a broad spectrum of services, such as adequate low-cost housing, health care and insurance, income maintenance and protection, consumer education and recreation.

Federal funds for both nutrition projects and comprehensive service coordination projects are administered by the Department of Aging through application from, and local review of, community based public and private nonprofit groups. Moneys are earned on a matched-resource basis. Technical assistance and consultation to applying and funded groups are provided by division staff in areas such as resource development, proposal development, application preparation, program development and community planning and coordination.

The objectives of this program are: (1) to provide nutritionally sound, low-cost meals in attractive surroundings on a regular basis, with supportive social services, to elderly individuals, with emphasis on low-income individuals, and (2) to encourage development of systems of comprehensive, coordinated social services to the elderly, utilizing resources from all levels of the economy and avoiding duplication in some services at the expense of other necessary ones.

#### Authority

### II. PROGRAM SUPPORT

#### Program Objectives and Description

The objectives of this program are to provide technical support to the department's activities and to make this expertise, as well as specialized administrative and programmatic experience of the department, available to staff and others. This program is primarily divided between the Technical Support and Communications Sections. Program Support also administers federally funded training programs.

The Technical Support Section develops and maintains data or data sources from which requests for information can be met and responds to such requests in a full and timely manner. Technical Support staff develop expertise in such diverse but priority fields as health, residence renovation and repair, and legal counselling services. Technical Support staff are also responsible for monitoring the Information and Referral Program. *During the budget year, one new staff position is proposed for this section. This position will provide expertise in the housing and transportation fields.*

The Communications Section publishes and disseminates information regarding new and/or on-going activities and developments in the field of aging at federal, state and local levels.

## DEPARTMENT OF AGING—Continued

## III. ADMINISTRATION

## Program Objectives and Description

The administration of over \$30 million in federal moneys during 1977-78 fiscal year must include fiscal and program safeguards against misuse or misappropriation to ensure the most effective possible use of those funds. The objectives of administration are: (1) to insure that Department of Aging procedures and activities conform to the meaning and intent of existing legislation and the statutory and fiscal limits of federal and state rules, regulations and administrative policies, and (2) to insure that all special projects are handled to meet federal and state guidelines.

Administration provides supportive services in personnel, budgeting, accounting, management analysis, and business services. Centralization of the above functions provides Department of Aging Regional Offices with expertise in these areas with a minimum of staff. *An additional \$30,000 has been included in the budget year for contract services with the Program Evaluation Unit in the Department of Finance. The Department of Finance will provide technical consultation regarding the need to evaluate Aging programs, staffing requirements if appropriate, and possibly evaluation design.*

## IV. DIRECTOR'S OFFICE

## Program Objectives and Description

The objectives of the Director's Office are: (1) to provide planning, leadership and basic policy development and direction for the state's programs for the elderly, and (2) to analyze all legislation pertaining to the elderly.

The Director's Office provides leadership, direction and control to all functions of the programs being carried out by the Department of Aging. The director with assistance from the deputy director works with the Commission on Aging in setting goals, represents the Department and State at regional and national meetings, chairs public hearings, meets and confers with representatives of aging organizations throughout the State, and sets objectives for new programs. *One position has been administratively established in the current year and is proposed for continuation during the budget year. This position will serve as legislative liaison and coordinator.*

## V. COMMISSION ON AGING

## Program Objectives and Description

The Commission on Aging is charged with the responsibility of being the principal advocate on behalf of the elderly of California. The objectives are to insure that older persons in California are represented in all areas affecting such persons, and to advise the Director on basic policy priorities with respect to the development, operation, and implementation of programs.

The Commission on Aging ensures representation of California's elderly in governmental matters, stimulates the most effective use of resources and available services for the elderly, and advocates for the needs and wants of older consumers to the Department of Aging, the Governor, and the Legislature.

## OFFICE OF ALCOHOLISM

Prior to the enactment of Chapter 1128, Statutes of 1975 (SB 744), the State Alcoholism Program was administered by the Office of Alcohol Program Management within the Department of Health. Chapter 1128 transferred state funded alcoholism programs from the Department of Health to the newly created Office of Alcoholism. The Office of Alcoholism has the responsibility to oversee the county administration of state funded alcoholism programs; develop and implement a comprehensive plan for alcoholism prevention, treatment and rehabilitation; and encourage and assist county alcoholism administrators in the development of local programs. Further, the Office has the responsibility to conduct evaluation studies to measure the progress and the cost effectiveness of programs and services.

In January, 1976, the Office reported to the Legislature on the current status of the alcoholism program. Overall goals developed after consultation with various alcoholism representatives were determined to be (1) to assist Californians and their families impaired by alcoholism to attain adequate physical, social, economic and psychological functioning through programs which emphasize sobriety; and (2) to minimize the effects of alcoholism and alcohol abuse on the community and society as a whole.

A State Alcoholism Advisory Board and an Interdepartmental Coordinating Committee were also created by Chapter 1128. The Advisory Board advises the director on policies, goals and operations of the Office. The Interdepartmental Coordinating Committee serves as an information exchange and focal point for various departments and agencies engaged in activities affecting alcoholics and their families.

### I. PREVENTION

#### Program Objectives and Description

The long-term goals of the Prevention Program are to reduce the overall per capita consumption of alcohol, prevent alcoholism in persons not yet alcoholic, and to deter or control the excessive use of alcohol in situations likely to have a negative social impact. To carry out these goals, prevention activities are designated to increase awareness of the dangers of alcohol abuse and change attitudes to preclude excessive drinking. In addition, state law requires that alcohol education be provided to all students in public and private schools, of which approximately 2.8 million are at junior and senior high school levels.

The Office of Alcoholism coordinates the efforts of county prevention staff in carrying out local community prevention projects involving alcoholism awareness and alcohol education. Under contract with the office, the State Department of Education furnishes local school districts with curriculum planning, teacher orientation, and consultation on problems associated with alcohol education for students.

### II. IDENTIFICATION

#### Program Objectives and Description

The objective of the Identification Program is to inform individuals and communities of services available to assist alcoholics and their families and to encourage the early seeking of such services. The following descriptions indicate those types of activities that are an integral part of this program:

(a) Information and Referral. These activities include crisis intervention and specific contacts which result in dissemination of alcohol-related information and the referral of individuals to appropriate facilities;

(b) Pre-sentence Investigation and Driving While Intoxicated Programs. Pursuant to Chapter 1133, Statutes of 1975 (SB 330), a pilot drunk driving treatment program currently operational in four counties will be extended statewide effective January 1, 1978. This chapter permits the courts to enroll individuals arrested for driving while intoxicated in one-year treatment programs in lieu of mandatory license revocation;

(c) Occupational Alcoholism Programs. These programs assist employers to identify those employees with alcoholism problems and refer them to appropriate treatment facilities. Included are county-based efforts and a state-administered contract with a leading labor union for the training of alcoholism coordinators in union locals; and,

(d) Supplemental Security Income (SSI). These state-administered, county conducted services screen, refer to treatment, and monitor individuals with serious alcoholism problems who are receiving supplemental payments under Social Security.

## OFFICE OF ALCOHOLISM—Continued

## III. TREATMENT AND REHABILITATION

## Program Objectives and Description

Economic and personal losses resulting from alcoholism are excessive. The U.S. Department of Health, Education, and Welfare estimates that alcoholism costs over 25 billion dollars in employment losses, accidents and medical care per year. California's share in similar national totals usually approximates 12% or \$3 billion for alcoholism. Additionally, alcoholism contributes to higher rates of crime, suicides, family dissolutions, job losses, and early deaths. The objective of this program is to provide comprehensive care for the alcoholic or alcohol abuser through programs which emphasize sobriety and abstinence. This care is functionally divided into residential and non-residential services. Care is provided through county or state operated programs or through subcontracts with private treatment and rehabilitation facilities.

Residential services include: detoxification, which assists individuals to recover from the effects of intoxication and to plan for continued recovery in an "after-care" facility; residential treatment, in which food, shelter, professional treatment, and possibly medical services are furnished in a non-drinking, supportive environment; and recovery home services for the longer-term provision of food, shelter, and rehabilitation in a peer group oriented, community-based supportive environment.

Nonresidential services include a wide range of activities including diagnosis, individual, group and family counseling therapy, and social, occupational, and recreation therapy for those alcoholics not requiring the supportive environment of a residential facility. Nonresidential services may be provided through self-help groups, outpatient clinics, or day treatment programs.

State Hospitals Programs: Consistent with the Office of Alcoholism's policy to encourage local program development, the Metropolitan alcoholism program is being phased out in 1976-77. Alternative community-based alcoholism programs are being developed with corresponding savings. In fiscal year 1977-78, the Office will continue planning to phase out the remaining alcoholism program at Camarillo State Hospital and working to establish additional community-based programs.

Federal funds <sup>f</sup> .....	—	2,692,016	2,730,823

## IV. STATE ADMINISTRATION AND PROJECTS

## Program Objectives and Description

The Office of Alcoholism provides executive leadership, policy direction, and administrative services necessary to accomplish program goals and objectives. Specific services include: review and approval of community alcoholism program budgets; technical assistance to local alcoholism programs; interagency coordination among state, federal, and local entities; information and data services to management; public information and awareness about alcoholism in California; development of alcoholism program rules and regulations and a strong emphasis on evaluation. The cost of state administrative functions represent approximately 6% of the total budget for alcoholism. During fiscal year 1976-77 the Office of Alcoholism developed a uniform budgeting, payment, and cost reporting system to insure that state and federal funds which flow through the office do so with minimum delays and with adequate fiscal and program control.

State Projects: The following projects are administered statewide using federal funds, state funds, or a combination of both:

Research Centers: Under a contract with the university community the Office of Alcoholism is establishing research capacity to study the social and biomedical causes of alcoholism. This research is designed to bring new knowledge to practical areas of concern as jointly determined by the Office of Alcoholism, the alcoholism community, and the universities.

Prevention: In fiscal year 1977-78, the office will continue its public education pilot projects in a community of 200,000-750,000 persons. The program uses a combination of direct-contact approaches of various types plus media messages focusing on the problems and dangers associated with alcohol consumption. A strong evaluation component has been built into this program. Preliminary results should be available in July, 1978. Concurrently, the office's contract with the State Department of Education has been redirected to concentrate upon the school education aspects of prevention.

Public Inebriate Program: In accordance with provisions contained in fiscal year 1976-77 budget, the office is directing projects in demonstration counties in order to provide a continuum of services on a voluntary basis—and as an alternative to the criminal justice system—for the indigent alcoholic. The two million dollars made available for this purpose will fund demonstration projects over a two year period. Once completed, these projects will be phased out with the expectation that local programs will integrate successful results into county plans.

SB 330 Alcohol Traffic Safety Program: In order to ensure the development and implementation of quality programs that comply with SB 330 regulations, the OA will conduct a statewide certification program. Each program will be required to pay for certification.

Other Projects: The office is continuing its review and evaluation of recovery home programs statewide, providing technical assistance in developing minority alcoholism programs, and monitoring the training of labor-management alcoholism coordinators.

Five new positions are proposed for the budget year. One position will provide additional clerical support. The other four positions are professional, and were established for separate purposes. One position will maintain liaison with the public inebriate demonstration counties and monitor the new research centers. The remaining three will assist in the statewide expansion of the SB 330 drunk driving program, monitor and direct the prevention program, and conduct program evaluations, respectively.

The Office is also planning to expand its management information system into eight additional counties. Eight counties are currently part of the system. This expansion will be accomplished utilizing federal funds.

## V. COUNTY ADMINISTRATION

## Program Objectives and Description

Chapter 1128, Statutes of 1975, requires counties to administer and manage all county alcoholism programs funded by the California Office of Alcoholism. The county is accountable to the state for the effective implementation of these programs. Within standards and regulations established by the state, counties develop program priorities and reflect these in the county alcoholism program budget. Program budgets must be reviewed and evaluated by a county alcoholism advisory board prior to approval by the county board of supervisors and the state. In addition, counties are responsible for conducting evaluation studies on the effectiveness of programs and for reporting annually to the board of supervisors.

## SPECIAL ASSISTANCE FOR CHILDREN'S PROGRAMS

The administration of state-subsidized child care requires effective coordination between the Health and Welfare Agency and the State Department of Education. By means of an interagency agreement, funds administered by the Health and Welfare Agency are allocated to local child care agencies which operate under contract with the State Department of Education. Both Federal Title XX Social Services funds administered by the Department of Health and State funds originally appropriated pursuant to the Child Development Act of 1972 AB 99, now appropriated by Item 281, Budget Act of 1976, are used for child care services.

In 1976-77, the availability of Federal funds for child care offset \$3 million of the General Fund expenses (Item 281). This \$3 million in state fund will be used to provide on-going support for children added to local child care agencies in midyear of 1974-75, who were supported by local fund in 1975-76, but for whom local funds are no longer available. Of the \$3 million available, \$1 million will be used for this purpose in 1976-77 and \$2 million in 1977-78. These funds are being transferred to the budget of the Department of Education.

# STATE OFFICE OF NARCOTICS AND DRUG ABUSE

The State Office of Narcotics and Drug Abuse (SONDA) was established in 1970 in response to the drug abuse epidemic in California. Few prevention and treatment services were available at that time and no state agency existed to plan, develop, and coordinate the services needed to combat the problem. During the past six years SONDA has directed the creation of more than 450 community based drug abuse prevention and treatment programs throughout the state. A system consisting of a drug program coordinator in each county, a mechanism for local determination of drug program priorities, planning and program administration has also been established through legislation.

In view of the progress made in the past six years in the expansion of statewide drug abuse services and with the development of administrative systems within the Department of Health and in county government for their continued administration, the need for the Office of Narcotics and Drug Abuse has been considerably diminished. Better results can now be achieved by integrating the staff and functions of SONDA with those of the Substance Abuse program in the Department of Health. Merging the functions of these two units will eliminate the duplication of effort and overlapping responsibilities which now exist between them and permit the construction of a single organization with the capability of a greater impact on the drug problem than either is now able to mount independently. The merger of the two units has been recommended by both the Little Hoover Commission and the Legislative Analyst.

The Administration's reorganization plan merging SONDA with the Substance Abuse Program of Department of Health, will be submitted to the Legislature in accordance with provisions of the Government Code. The Health and Welfare Agency has designated a Coordinator of the drug efforts of the four departments within the Health and Welfare Agency (Corrections, Health, Rehabilitation, and Youth Authority) with the related functions in the Departments of Education and Justice.

## SUMMARY OF PROGRAM REQUIREMENTS

CUMULATIVE SUMMARY BY DEPARTMENT

## DEPARTMENT OF HEALTH

The objective of the Department of Health is to improve and sustain in a uniform manner the quality and quantity of services that affect the health of the people of California. Services currently include health protection and care through the following: prevention and control of disease and disability; control of environmental health hazards; assurance of high quality health services through inspection and licensing; comprehensive planning for optimum use of health resources; coordination of direct treatment programs for the developmentally disabled, the mentally ill, and substance abusers; provision of social services to economically and socially deprived citizens; administration of the Medical Assistance Program (Medi-Cal) so as to maximize the use of public funds to provide medical services to the economically deprived; and delivery of direct treatment services through the 11 hospitals in the state hospital system.

Emphasis is placed on providing needed services to particular groups of the State's residents who have been traditionally underserved, such as farmworkers, American Indians, children from low-income families, senior citizens, and persons affected by unique genetic diseases.

## SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Preventive Medical Services Program.....	\$19,818,593	\$27,289,088	\$29,018,785

## SIGNIFICANT PROGRAM CHANGES

Chapter 1196, Statutes of 1976 will increase the Rural Health Program by \$2.1 million in fiscal year 1977-78. This legislation will fund direct health services to residents in rural areas through a state administered Health Services Corps and locally administered health projects. (Program I)

The Carcinogens Control Act of 1976 (Chapter 1067, Statutes of 1976) mandated a program directed at controlling and eradicating exposure of workers to occupational carcinogens. An interagency agreement with the Department of Industrial Relations provides \$925,000 and 43 positions for this effort in 1976-77. In 1977-78, this increases by 3 positions to an annualized level of \$1,350,000 and 46 positions. (Program III)

Major initiatives to expand the level of service in the Child Health and Disability Prevention program are included in this budget. 38.6 positions in the CHDP unit and in administrative support are proposed in the current and budget year to give increased program leadership. An increase of \$1,060,546 in General Funds is included in local assistance for the budget year to match federal funds to increase local county welfare department efforts to comply with federal EPSDT requirements. (Program IV)

The Department of Health is proposing to establish a state funded two year research program to determine sources and effects of lead in blood. This program which will have resources of \$677,669 (15 positions) in 1977-78, will define the magnitude of the problem and steps necessary to eradicate lead poisoning as a threat to the health of Californians, particularly children. (Program IV)

Chapter 1212/76 appropriated \$228,400 for the last half of fiscal year 1976-77 for the purpose of providing health services to persons with genetically handicapping conditions. This budget proposes \$456,643 for fiscal year 1977-78 in order to maintain this level of program. (Program IV)

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## DEPARTMENT OF HEALTH—Continued

Chapter 297, Statutes of 1976, appropriated \$400,000 to the Department of Health for contracts with facilities to perform basic research on lupus erythematosus with the goal of finding a cure or satisfactory treatment for this disease. The Department is in the process of issuing the required research contracts. It is estimated \$150,000 will be expended during 1976-77 and \$250,000 during the 1977-78 fiscal year. (Program I)

Chapter 854, Statutes of 1976 created the State's Certificate of Need Program for construction of health facilities and development of new health services. This program increase will be funded through a health facilities assessment and application fees authorized under the Statutes. An additional \$500,000 was appropriated for contracts with Local Health Systems Agencies to perform planning, project review, and data collection activities under the statute. (Program VI)

The Budget includes a second increment of \$10 million toward equity of county allocations for Local Mental Health programs. These funds will be used to improve programs and move toward equitable funding in those counties where the indicated need is greatest, as determined by a set of 22 social indicators of need developed by the Conference of Local Mental Health Directors and the Department of Health. (Program VII)

Continued growth in developmentally disabled caseload in excess of the expectations included in last year's Budget requires a current year augmentation of \$7.8 million to the Regional Centers to expand services to 6,000 additional clients. These funds have been made available from Title II Public Works Employment Act funds allocated by the Department of Employment Development. In addition, the Budget for 1977-78 has been increased by \$23.85 million from the General Fund to provide services to an additional 8,500 clients and the increased costs of the clients added this year. In order to maintain fiscal and programmatic controls, service priorities will be instituted immediately in the Regional Centers. Six positions have been added to the Regional Center Program to provide increased management coordination of Regional Centers operations. In addition, caseload staff in Continuing Care Services will be increased by 48.5 positions in the Current Year and 47.5 in the Budget Year. (Program VIII)

In the budget year, the state hospitals will begin participating in the National School Lunch Program. The budget contains \$713,437 to bring the nutritional value of meals up to Federal Program requirements. Increased reimbursement from this program is estimated to be \$1,803,341 for a net savings of \$1,089,904. (Program VII, VIII)

During 1976-77, the Administration approved in principle the 1973 staffing standards. Recent assessments of the pilot studies indicate improvements in the functioning of developmentally disabled residents as a result of the increased staff. A separate study for programs serving acutely mentally ill persons indicates a need to increase staffing for the health and safety of state hospital patients and employees. The Department has administratively established from savings within the state hospitals budget, 597.9 new direct care and treatment positions in 1976-77, in addition to the 446 new positions authorized in the Budget Act of 1976. The 1977-78 budget includes \$14.7 million to continue the new positions approved in 1976-77. An additional \$6 million has also been proposed in 1977-78, for 587.5 additional new treatment positions towards the recommended level. (Program VII, VIII)

For the Budget Year, approximately \$21.3 million dollars has been proposed for correction of Fire, Life, Safety deficiencies within the State Hospital System. This amount will complete the funding of a program to meet current fire and life safety requirements for projected hospital populations. In addition, a Community Development Task Force is reviewing facility resources within the hospital system and the Community, and addressing the needs of both to best serve mentally and developmentally disabled clients. (Health Capital Outlay Program)

The Budget reflects the consolidation of the State Office of Narcotics and Drug Abuse with the Substance Abuse Division of the Department. A reorganization plan will be proposed to achieve this transfer. This reorganization will integrate the staff and functions of SONDA and the Substance Abuse Division and reduce the duplication of effort and overlapping responsibilities which now exists. (Program IX)

It is necessary that some state hospital work assignments, identified as posts, be staffed seven (7) days a week. In the past, those who have worked on state holidays were generally paid only at straight time. However, a recent California State Personnel Board rule change provides that those who work holidays be paid at a time-and-a-half rate. A deficiency bill to fund the rule change in the current year will be supported and \$631,073 is proposed for 1977-78. (Program VII, VIII)

Social Services Program administration has been expanded by 74 positions: 32 positions will be utilized to provide clear objectives, operating procedures and program/fiscal controls to the Homemaker/Chore Program, 14 positions will provide adoption services in a demonstration project to the 23 northern counties currently without state adoption service, and 28 positions will be utilized in a variety of program areas including children's services, adult services, and fiscal resources management and control with particular emphasis on field work and field evaluation. In addition, 4.5 positions have been added to administer Chapter 977/76 (SB 30), the "Family Protection Act of 1976", providing a limited term \$1,825,000/year demonstration program in two counties for family reunification and child protective services. The Homemaker Chore program has been increased by \$13.5 million from Federal funds in the current year to provide for the increased costs related to changes in the minimum wage and new legislation requiring worker's compensation. The budget proposes \$3.5 million from Federal funds and \$17.5 million from the General Fund to continue this cost in 1977-78. (Program X)

The Department of Health budget reflects the transfer of funds for state positions presently budgeted in local assistance items to the support item in the budget year. Transferring these funds causes a substantial increase in the General Fund appropriation for the support item, with a corresponding decrease for the local assistance items, with no net change in total expenditures. With this transfer, the support item will reflect the total General Fund appropriation for state staff. The total amount transferred in the budget year is \$7,031,122.

Federal legislation, HR 12455 (PL 94-401) has increased California's Social Service Federal grant by \$23.7 million for the period July 1977 through September 1978 (15 months). Although funds were intended to help all states meet Federal Interagency Day Care Requirements (FIDCR), California already meets or exceeds these standards. Since use of these funds to improve child care standards is not necessary, the funds will primarily be utilized to maintain existing child care programs. Through redirection of other Title XX funds, expansion has been approved or proposed for other social service programs. Some of the major expenditures from this source are: Child Care—\$3 million, Homemaker/Chore—\$17.5 million, Services to Developmentally Disabled and Mentally Ill—\$1.3 million and Other Activities—\$1.9 million. (Program X)

The Medi-Cal Program is establishing a new unit, Surveillance and Utilization Review, to identify and take corrective action in cases of provider fraud and abuse. This unit of 45 positions has been added administratively in the current year through Title II Public Works Employment Act funds. Budget year funding will be provided through an internal redirection of field services staff, and the new unit will absorb the current drug monitoring function and expand review activities into the areas of inpatient and outpatient hospitals, outpatient physician services, podiatry, psychology, optometry, laboratory services, and dentistry. (Program XI)

Additional efforts will be devoted to providing more effective and intensive review and management of the Medi-Cal claims processing contractors. A total of 9 positions also funded from Title II in the current year and, redirected from existing staff in the budget year, will perform this function. Five contract coordinators will be located on-site at the fiscal intermediaries in San Francisco, Oakland, and Los Angeles to identify claims processing problems. Three and one-half additional positions have been redirected from existing staff to perform in-depth investigations and problem resolution in Departmental internal operations. (Program XI)

Medical review teams comprising 62 positions are being transferred from Medi-Cal Division to the Licensing and Certification Division to facilitate a better coordinated and integrated approach to the quality of care review of Skilled Nursing Care Facilities and Intermediate Care Facilities and patients by eliminating the duplication of efforts stemming from the existing dual review system. (Program XIII)

Complying with Federal law, and with 100 percent Federal reimbursement, Professional Standards Review Organizations (PSRO's) will review a significant percentage of inpatient stays funded via Medi-Cal. To enable this review for the Medically Indigent Adult Category (not part of Medicaid and funded 100 percent General Fund), the Medi-Cal Program will provide funds in 1977-78 to contractually reimburse PSRO's providing these services. (Program XI)

## DEPARTMENT OF HEALTH—Continued

Effective January 1, 1978, 7 positions to administer the uniform accounting and reporting system for hospitals currently administered by the California Health Facilities Commission will be transferred to the Department of Health. The Department will also use this data to continue its ongoing responsibilities for evaluating California's health care systems. Enabling legislation to achieve this transfer will be supported by the Administration. (Program XV)

The Department of Health is appealing a Federal District Court ruling which invalidates the Department's Hospital Cost Containment Plan implemented in 1975. Pending final disposition of the appeal process, an estimated \$4.9 million will be expended in the current year for retroactive adjustment to hospitals. A General Fund deficiency of \$16.8 million may be required in the current year and an augmentation of \$56.8 million for the budget year is proposed in a contingency item for potential payments to hospitals covering the period retroactive to July 1, 1975. (Program XIX)

The Department proposes to develop a new rate setting methodology for control of hospital costs. Following legislative approval, this study, partially funded through a Federal grant, will commence in the current year. (Program XV)

The Investigation Element (75 positions) of the Licensing and Certification Division, which investigates alleged abuse of the Medi-Cal program, has been moved to the Medi-Cal Division. This transfer will allow integration of the investigation function with the new Surveillance, Utilization and Review functions, of the Medi-Cal Division. (Program XI)

A project team has been established in the Administration Division to develop a Competitive Procurement Process for the development and eventual selection of a Statewide Medi-Cal Fiscal Intermediary Claims Processing System. (Program XI)

Chapter 546, Statutes of 1974 provides that the healing arts board shall be transferred to the Department of Health on July 1, 1977. Urgency legislation will be supported to provide maintaining the healing arts boards in the Department of Consumer Affairs.

## I. PREVENTIVE MEDICAL SERVICES PROGRAM

## Program Objectives and Description

While a major portion of the State's health care resources are necessarily directed toward curative care, preventive health care is emerging as an important component in today's health care delivery system. As the public becomes better educated in how to care for its health through preventive measures and to recognize problems at an early stage of development, medical costs can be reduced. A health problem that has reached the crisis stage must be treated by highly trained specialists with expensive equipment and costly facilities. Often, preventive measures and early detection of disease can prevent an illness from reaching this crisis stage.

Greater attention is being focused on prevention of disease and promotion of health. This is a more desirable method of providing health services and an avenue to relieve the present overburdened health care delivery system. In contrast to the immediacy and costliness of curative care programs, preventive programs are planned and structured to provide ongoing health care in an effort to avoid major illnesses.

The program provides direct services in the contract counties health services program and in some areas of the infectious disease program. Other elements in the infectious disease program are provided through contracts with local health agencies or contract providers.

Special groups of the population and selected disease entities have been singled out for intensive preventive activities. Population groups at special risk include persons faced with emergency and disaster situations requiring medical care, the aged, certain minorities, and inhabitants of sparsely populated areas who have low incomes. Selected disease entities include heart disease, stroke, cancer, kidney disease, arthritis, dental disease, and other afflictions that cause disability and death. Individuals with these diseases require expensive medical care and are frequently unemployable.

The objectives of this program are to:

1. Search for, assemble and disseminate new and existing knowledge, technology, and skills to prevent, control and minimize the incidence, causes and effects of disease, reduce the extent and duration of illness and the number of deaths, and to improve the quality of life through the promotion of positive health.
2. Assist local agencies in developing and maintaining health programs.
3. Measure the effects of various conditions in the population so that successful disease control activities can be applied with maximum efficiency.

## DEPARTMENT OF HEALTH—Continued

## a. Chronic Disease Control

This element provides technical assistance in planning, developing, and operating local adult health programs; participates in departmental evaluation of local proposals for the use of subvention funds and project monies; develops new or improved and less costly methods of delivering health care; ensures that the quality of care provided by health services meets departmental standards and monitors subvention funds and contracts; and promotes the better utilization of medical, paramedical and allied manpower through training, demonstration, and experimentation. In addition, the work of the element includes specific programs in cancer control, cardiovascular disease, and kidney diseases control.

Seven renal dialysis centers have been established in the State: (1) four Adult Dialysis Renal Failure Centers and (2) three Pediatric Dialysis Renal Failure Centers. The regional dialysis centers are required to perform services of research and development, training of medical and nursing staff in other dialysis facilities, and consultant services to other dialysis facilities. The treatment methodology of the pediatric centers emphasizes pre-dialysis and post-transplant rehabilitation. The adult center generally provides maintenance care through dialysis.

As authorized in Chapter 1168, Statutes of 1975, a program of public health nursing services to the aged is conducted through financial and technical assistance to local county health departments. This budget contains \$787,500 to continue this program at the same level of service.

## b. Contract Counties Health Services

Fifteen California counties, each with a population of less than 40,000, presently contract with the State to provide basic public health services. This budget includes funds for the addition of services to a sixteenth county, San Benito. These small counties have many inherent geographic, demographic and economic barriers, as well as a scarcity of health resources, which hinder the maintenance and operation of a local health department.

Basic preventive health and disease control services are provided by public health nurses and sanitarians who reside in the contracting counties. Professional supervision and coordination are provided by department staff. A local health officer (part-time), responsible for the day-to-day activities of the local staff and the legal health authority in each county, is appointed by the county board of supervisors. Local health services are provided in close cooperation with county boards of supervisors. Program emphasis varies among counties in accordance with local needs, facilities, and interests. This element also implements the Child Health Disability Prevention Program in these counties.

## c. Dental Health

The dental health staff evaluates the State's dental health needs; promotes the development of prevention programs in schools and industry and evaluates their cost effectiveness; provides public and professional education directed toward prevention of dental disease and the proper utilization of existing resources; provides direction and guidance for prevention programs in other state departments and agencies; develops and promotes the establishment of new or improved programs of prevention aimed at reducing the cost of care; administers the State's topical fluoride programs for school children; provides consultation and workshops for personnel in local programs; and provides consultation to other programs and agencies on dental subjects.

The Department of Health is currently contracting with local agencies for pilot projects to promote and evaluate the effectiveness of local dental health prevention programs.

## d. Emergency Medical Services

Emergency medical services are those services required in the event of an unforeseen illness or accident occurring to persons outside of a hospital and for whom it is necessary to provide prompt evaluation, transportation, and care. The goal of this element is to improve emergency medical services throughout the State.

This element develops training standards for ambulance personnel, public safety personnel, nurses, physicians, and emergency medical technicians, and it evaluates emergency medical training programs. In cooperation with local jurisdictions, it provides consultation, coordination, and evaluation of statewide emergency medical services. It develops data whereby community emergency medical services can be augmented by assistance from other resources. It is responsible for developing standards for classifying emergency medical capabilities in hospitals and for developing a central communications system to coordinate and integrate emergency ambulance services, public safety organizations and hospital emergency services.

This element is also responsible for the medical and health aspects of the State Emergency Plan prepared in conjunction with the State Office of Emergency Services for use in the event of widespread disasters such as earthquakes, nuclear power plants incidents, air pollution emergencies, etc. It also monitors some 21 federal grants to local agencies in California for emergency medical services projects totaling approximately \$6 million.

## e. Indian Health Services

There are about 200,000 Native American Indians in California, 30,000 of whom live in rural areas, 5,000 on reservations, and the remaining 165,000 in urban areas. While services are provided to this group through Medi-Cal and other health systems, a need still exists for Native American Indians to receive health services in a setting where the providers understand their cultural needs.

Chapter 606, Statutes of 1975, appropriated \$2,500,000 to be used specifically for Indian Health Services. The department's budget contains sufficient funds to maintain this program at the \$2,500,000 level during 1977-78. The law authorizes the department to contract with existing urban and rural Indian health programs. The funds are to be used to assist these programs in planning, implementing, and upgrading existing programs to attain a comprehensive health services delivery system for Native American Indians in urban and rural areas.

In addition, the Indian Health Program conducts studies of health and health services for Indians and their families, provides technical assistance to local agencies concerned with the health of Indians and their families and coordinates with similar programs of the Federal Government, other states, and voluntary agencies.

## f. Infectious Disease Control

The objective of the Infectious Disease element is to identify and define the occurrence of infectious diseases in California and to direct and coordinate efforts to prevent or minimize their harmful effects.

This element is responsible for surveillance, investigation, and control of over 75 communicable diseases. Reporting procedures or control measures are stipulated by law for 50 of these diseases. Disease control depends greatly on laboratory support provided by the State's Microbial Disease and Viral and Rickettsial Diseases Laboratories and by local health department laboratories.

Infectious disease reports throughout the State are compiled, analyzed, and disseminated to physicians and local health departments. Reports describe epidemiologic trends and aid in developing and directing communicable disease control programs. Special surveillance systems are maintained for diseases such as influenza, malaria, mosquito-borne viral encephalitis. State epidemiologists are on call to assist local health departments in the investigation and control of infectious disease outbreaks.

Surveillance is maintained to identify illnesses preventable by immunization. A program to assess immunization status among California school entrants was started in September 1974. Local health departments are provided information on immunization levels by school district so that programs to raise immunization levels can be undertaken.

Efforts of this element are also directed toward prevention and reduction of venereal disease. Programs are provided by direct assistance (state staff) and financial assistance to local health agencies. Currently, activities are mainly directed toward prevention and reduction of syphilis and gonorrhea. In addition to detection and treatment of existing cases, training and educational programs are conducted. Training programs are provided to professionals to assist in technical skills and provide ongoing assistance when needed. Also, educational activities are offered to increase general public knowledge about transmission, symptoms, and treatment of venereal diseases. Programs for schools, community, and professional groups educate the public about causes, treatment, and prevention of venereal diseases.

## DEPARTMENT OF HEALTH—Continued

This element assists local health departments in developing and improving their tuberculosis control efforts through consultation and periodic program review. It administers projects designed to ensure the early diagnosis, uninterrupted treatment, and appropriate follow-up of persons with tuberculosis.

This element is also responsible for surveillance, investigation, and control efforts related to human illness acquired from animals (e.g., brucellosis, leptospirosis, psittacosis, rabies, and salmonellosis). Activities include administration of animal rabies, control of wild animal importation, pet bird banding, and pet turtle importation control programs.

## g. Biomedical Laboratories

The objectives of the Biomedical Laboratories element are to provide laboratory support and services for surveillance, epidemiological investigations, prevention and control of infectious diseases; and to assure the quality of biomedical laboratory services in public and private laboratories throughout the State.

These objectives are met through the conduct of the following kinds of activities: (1) Isolation and identification of disease organisms or their antibodies; (2) "discovery" of new infectious disease agents; (3) developing, adapting, evaluating, and standardizing new procedures and reagents; (4) applied research relevant to diagnosis and control of infectious diseases; (5) assisting in development of high quality, reliable biomedical laboratory services by local health departments and clinical laboratories through training, reference examinations, performance evaluation, technical information, and consultation; and (6) regulatory and consultative efforts in relation to clinical laboratories, local public health laboratories, tissue banks, cytology and tissue laboratories, blood and other biologic facilities, animal facilities, genetic disease testing laboratories, methadone testing laboratories, and forensic alcohol testing laboratories.

## h. Cancer Epidemiology

Cancer Epidemiology carries out studies directed at determining the relationship between the various types of cancer and environmental and cultural influences on the prevalence of that disease. It offers the opportunity for the collection of collateral data from laboratory studies of a viral, genetic, or psychologic nature in the search for clues to the causes of cancer and for relating these clues to the population groups involved.

The objective of cancer epidemiology is to identify points at which cancer control measures may be effectively applied. It includes the California Tumor Registry which, over a span of 28 years, has collected information concerning over 500,000 cases of cancer in California. It maintains a cancer incidence reporting system based on the five Bay Area counties and measures whether or not the incidence of, cancer is increasing or decreasing.

The great bulk of this element's work is carried out through a grant from the National Cancer Institute as a part of the national effort for cancer control.

## i. Rural Health

Activities are directed toward the nine percent of the population residing in rural areas. This population has problems in obtaining health services which are different from those of urban population and are frequently more difficult to surmount. The rural population has a greater proportion of individuals living at incomes below poverty level than is true for the State as a whole. Three particular groups of the rural population are considered to be at special risk and in need of organized services. These are the migrant farmworkers, the older population, and persons at the lower income levels. These groups have special needs because of the distance that must be traveled for health care services due to a lack of adequate services in many of the rural areas of California. *Chapter 1196, Statutes of 1976 will increase the Rural Health program by \$2.1 million in Fiscal Year 1977-78. This legislation will fund direct health services to residents in rural areas via a state administered Health Services Corps and locally administered health projects.*

*The Department of Health provides various services to this rural clientele group, including: services to the mentally disabled and the developmentally disabled, medical assistance to the needy, Social Services, Crippled Children Services, Contract Counties Health services, Indian Health Services, Child Health Disability Prevention, and as mandated by Chapter 1196, Statutes of 1976, direct rural health services. In all, the Department of Health currently provides or pays for an estimated \$250 million worth of services to two million rural Californians.*

(This estimate was derived by taking specific departmental services provided to selected rural counties and projecting what the total amount of departmental services, in dollars, is for all rural Californians.)

## II. ENVIRONMENTAL HEALTH SERVICES PROGRAM

## Program Objectives and Description

The program's objectives are (1) to promote and maintain a physical environment which contributes positively to health, and (2) to assure protection of the consumer public against unsafe, unwholesome, and ineffective or misrepresented foods, drugs, domestic water supplies and other products.

The health of California's citizens is critically dependent on many factors over which the individual has little control, but over which this program has a major regulatory, supportive, or advisory influence. The factors relate to the quality and safety of work, home, and recreational environments, and to the food, water, and other products consumed or contacted.

*During the 1976-77 fiscal year, the Department received a Federal grant of \$461,700 to augment the State's ongoing domestic water supply supervision program. The grant will provide for additional staffing to expand efforts in bringing domestic water supply systems up to Federal standards and expand operations to provide technical assistance to local agencies. This program is funded from the Safe Drinking Water Act of 1974, through the auspices of the U. S. Environmental Protection Agency. The State has also proceeded to satisfy Federal requirements with the amendment of current water standards via Chapter 1087/1976.*

**a. Food and Drug**

The food and drug element implements, directs, and coordinates detection and control activities to protect consumers against adulterated, misbranded, or falsely advertised foods, drugs, and medical devices, hazardous household products, and cosmetics. The Food and Drug Laboratory, Southern California public health laboratory, and Microbial Disease Laboratory provide support by analyzing food and drug samples. This section has five components: food protection, cannery control, drugs and medical devices, hazardous household products, and health fraud control.

**a.1. Food Control**

This component enforces the provisions of the California Health and Safety Code pertaining to the manufacture, storage, distribution, sale, labeling, and advertising of foods in California. This component is responsible for the regulatory control of 16,000 manufacturers and 32,000 retailers. The objective is met by: monitoring industry, conducting industry surveys for new technology, industry surveillance, industry education, chemical and micro-biological analysis of raw and finished products, and by review and investigation of consumer complaints. Compliance is attained by implementing legal criminal or civil remedies which may include issuance of notice to appear, as well as administrative proceedings such as license revocation, post inspection letters, or conferences.

**a.2. Drugs and Medical Devices**

This component maintains a program to assure that manufacturers produce high quality safe and effective drugs and medical devices for the practitioner and consumer. This is accomplished by enforcing provisions of state law requiring an annual licensing and inspection to determine whether drug and device manufacturers are following "good manufacturing practices" and have an adequate quality assurance program to eliminate human, technological, and mechanical errors. In addition to inspection and evaluation of the manufacturing practices, consumer complaints are investigated and thousands of marketed products are routinely monitored via a sampling testing and label review program. All new drugs and devices are subjected to a preclearance review procedure to eliminate the dangers of marketing untested, unproven drugs and devices. When firms are in violation of the law, legal remedies are initiated to bring about correction and/or remove offending products from the market.

**a.3. Cannery Control**

This component prevents outbreaks of botulism in commercially canned foods by maintaining a rigid control program that includes licensing, daily plant inspections of 125 plants with an annual production of about 100 million cases, development of official processes, restraint of questionable lots, inspection of fishing boats and examination of fresh fish prior to processing, label reviews, educational activities for consumers and industry, and when necessary, institution of regulatory remedies. The California cannery inspection program is mandated by provisions of the California Health and Safety Code.

**a.4. Health Fraud Control**

Although no one really knows how much is spent on worthless, useless, and dangerous products, it is estimated that Californians spend over \$200 million annually on drugs, devices, foods, and cosmetics that are falsely represented to cure conditions including cancer, arthritis, or to enhance the buyer's appearance or health. Investigation and regulatory activity to curb this growing health problem is the role of the health fraud control component. The vigorous enforcement program is augmented by health education activities for consumers and industry.

**a.5. Product Safety Control**

An estimated 200,000 Californians are injured each year by common household products (i.e., chemical cleansers, polishes, toys, glazed ceramic tableware, hobby and recreational articles). This component is responsible for inspection and sample collection of hazardous products manufactured, distributed, and marketed for use in the home. Products capable of inflicting chemical, mechanical, electrical, and thermal injury to or on children and adults are sampled and tested for compliance with label and warning requirements and the labels are reviewed to assure that adequate warnings are declared. When necessary, regulatory actions including quarantines, banning of products, criminal and civil proceedings are implemented. Educational activities are directed toward consumer knowledge of the hazard and safe use of products and the education of the industry as to legal requirements.

**b. Sanitary Engineering**

The sanitary engineering element provides essential safeguards for domestic water supplies, waste disposal operations, shellfish production, and harvesting operations in recreation waters by a continuing program of standard setting, surveillance, evaluation, education, and enforcement. This element has four units:

**b.1. Domestic Water Supply**

Domestic water utilities and bottled water companies are required to have a permit from the State Department of Health issued after requirements designed to provide a safe product have been met. This component issues certificates to qualified water treatment plant operators. Preventive, corrective, and enforcement actions are taken, based on (a) annual surveillance of all systems, (b) comprehensive reviews on a decennial basis, (c) prompt investigation of waterborne illness, (d) failure to meet bacteriological standards, and (e) substantial consumer complaints about water quality.

**b.2. Domestic Sewage Disposal and Safe Use of Reclaimed Sewage**

This component evaluates sewage treatment and disposal and sewage reclamation and reuse projects to assess health protection and takes preventive, corrective and enforcement actions as necessary. The component makes recommendations to the State Water Resources Control Board and the nine Regional Water Quality Control Boards to ensure health considerations are reflected in those water pollution control programs.

**DEPARTMENT OF HEALTH—Continued****b.3. Recreational Water Sanitation**

This component develops guidelines, standards, and regulations and provides technical assistance for use by local health departments and industry.

**b.4. Shellfish Sanitation**

This component conducts surveillance, sampling, and testing in shellfish growing areas and takes enforcement actions to assure protection against shellfish toxin. The component issues certificates for growing areas and processing plants.

**c. Radiologic Health**

The objectives of the radiologic health element are to protect the people of California from the dangers of ionizing radiation and to reduce unnecessary radiation exposure to workers and the public from either the use of radioactive materials, including contamination of the environment, or the use of radiation machines. To accomplish these objectives, the element is comprised of a radioactive materials and an X-radiation component.

**c.1. Radioactive Materials**

This component establishes and enforces standards for the use of radioactive materials for any purpose and issues licenses to persons/organizations whose training, facilities, and operating procedures are safe and effective; conducts inspections and surveys of licensees to assure that appropriate protection standards are followed; investigates accidents and incidents involving the use of radioactive materials; identifies, evaluates, and monitors levels of environmental radiation throughout the State from sources such as nuclear power plants; and evaluates and approves contamination surveillance programs of nuclear power plants and other major installations. The component is assisted in its work by the Sanitation and Radiation Laboratory, over 100 volunteers from governmental agencies, the Department of Industrial Relations, and local contract agencies.

**c.2. X-Radiation**

This component conducts inspections to maintain and enforce standards that assure radiation-producing machines are safely used and maintained in good operating condition; examines workers using radiation machines for medical purposes to assure that standards of competence are met; and establishes and enforces standards for schools and hospitals providing medical X-ray training. The component is assisted in its work by the Department of Industrial Relations and local contract agencies.

**d. Vector and Waste Management**

The vector and waste management element, with support from laboratory services, provides protection surveillance and conducts a statewide program to prevent or suppress those vectors, hosts and disease-reservoir animals of greatest public concern and performs surveillance and enforcement of the safe disposal of solid and hazardous waste to protect the public health. Epidemiological, engineering, biological and chemical methods, materials, techniques, and equipment are under constant development and evaluation to facilitate public and private participation in disease and vector prevention and control and to solve problems of hazardous and solid waste management.

1. To suppress animal-related disease, epidemiological/ecological investigations are directed toward the infectious agent (viruses, bacteria, etc.), the animals that maintain the infectious agent in nature, the vector, and the environment. Control measures are recommended and applied where appropriate.

2. To prevent diseases associated with water-related vectors, epidemiological surveillance is maintained of vector mosquitoes, animals that provide virus reservoirs in nature, and virus occurrence. Mosquito pesticide resistance is monitored and alternative pesticides are recommended and their use regulated through cooperative agreement with local vector control agencies, including certification of pesticide applicators. Engineering and biological evaluations and demonstrations are conducted to guide local agencies in developing programs that will prevent outbreaks of vectors through broad ecological approaches including land and water management and biological control. Other activities include epidemiological surveillance and control procedures development to suppress annoying and biting insects of aquatic origin and snail-associated swimmer's itch (schistosome dermatitis).

3. Hazardous and solid waste management and related vectors prevention and control activities are directed toward reducing human health threats associated with hazardous wastes and vector produced by solid wastes in general, at the same time emphasizing resource conservation. Primary concerns are such vectors as flies, cockroaches, and rodents; toxic and infectious materials; and the effects upon human health of solid waste storage, collection, and disposal. Criteria and standards related to health aspects of solid and hazardous wastes are being developed in response to legislative mandates.

4. Community premises and related vector prevention and control involves monitoring vectors that affect people in residential, commercial, and industrial areas, and developing control methods, materials, and techniques. Prevention through ecological measures is emphasized to reduce the use of toxic substances (pesticides) in close proximity to people and their food, and precautions and precise application methods are developed where pesticides must be used. Local health agencies are assisted in developing domestic rat control programs augmented by short-term federal funds.

5. Field-wilderness area vector prevention and control activities are focused on reducing public health risks associated with venomous or noxious vertebrates and invertebrate animals, occurring in rural or wilderness recreational environments.

**e. Local Environmental Health Programs**

The objective of the local environmental health programs element is to assure that local health departments and state institutions achieve and maintain a level of environment which is free of disease and hazards, is conducive to optimum health and well-being, and is accomplished at a minimum of cost to the taxpayer.

This element reviews and evaluates local environmental health programs to determine federal and state subvention eligibility; assists 46 local health departments in program planning, delegates responsibility for and monitors effectiveness of local environmental health agencies in enforcing retail food laws and regulations, provides training for environmental health professionals, and directs the State's health resources in the development of the health component within housing programs.

It also administers a registration program of sanitarians to assure, through an examination process, that individuals are qualified to practice environmental health. It establishes and enforces minimum standards for schools providing approved curricula in environmental health.

Through environmental health surveillance, the element works to assure that a safe and healthy environment is maintained for inmates, wards, patients, and employees in state institutions.

**f. Bioenvironmental Laboratories**

The objectives of the bioenvironmental laboratories element are to provide laboratory and related support and services necessary for: controlling air pollution; protecting employees against the health hazards of their work environments; assuring the safety and quality of foods, medicinal drugs, and other consumer products; controlling water and waste water quality; and averting health hazards from radioactive materials.

These objectives are met by conduct of the following kinds of activities: (1) providing chemical, physical, radiological, and biological analytical and related services; (2) developing, evaluating, and standardizing new methodology; (3) applied research; (4) providing reference laboratory services, training, consultant, and technical assistance to other units in the Department, and to other state and local agencies; (5) assuring quality of services provided by water testing laboratories through regulation and consultation; and (6) collecting, analyzing, and interpreting information relative to the causation and course of disease or other harmful effects due to exposure to chemicals, physical agents, or other environmental stresses, and recommending remedial actions, with particular attention to air pollution, pesticides, and community noise. The Bioenvironmental Laboratories is a support function to the overall Environmental Health Program. The costs are distributed to each of the elements in this program.

## DEPARTMENT OF HEALTH—Continued

## III. OCCUPATIONAL HEALTH PROGRAM

## Program Objectives and Description

The program's objectives are to reduce the incidence of occupational illness by (1) identifying environmental factors which constitute sources of disease in places of employment; (2) developing and applying medical and engineering information and techniques for the prevention and control of occupational illnesses; (3) providing technical assistance to the State Department of Industrial Relations in the development and enforcement of state occupational safety and health standards; (4) providing information, training, and education to employers and workers that will reduce or eliminate occupational health hazards.

California's 8.5 million workers live in every community and comprise 40 percent of the population. A substantial portion of their waking hours are spent at their 430,000 workplaces. Work and work environment which is unsafe are responsible for over 40,000 reports of occupational disease or illness each year, with additional substantial numbers of cases of disease and illness occurring but going unreported. A major segment of the most serious occupational diseases arises from man-made hazards, with an ever-increasing number of hazards from new chemicals, new materials, and new processes arising out of advances in industrial technology. Detection and correction of health hazards in the workplace has the effect of lessening the number of persons who are made ill by work exposures; it reduces the likelihood that such hazards will become general environmental health problems for the total population; it has the effect of diminishing the economic burden on individual disabled workers and their families as well as on the community or the State which must aid in supporting such persons when they become unable to support themselves; and it relieves the burden on medical facilities and personnel required to provide care for ill and disabled workers.

The program's activities are required under and supported through an interagency agreement with the Department of Industrial Relations, in conformance with the State Plan for Occupational Safety and Health, and the California Occupational Safety and Health Act. The Occupational Health Branch is supported in this activity by the Air and Industrial Hygiene Laboratory and the Southern California Laboratory of the Bioenvironmental Laboratory Section.

## a. Occupational Health

The occupational health element has the following responsibilities:

## 1. Standards Development

Occupational health standards and requests for variances are developed and evaluated for presentation to the Occupational Safety and Health Standards Board for approval and adoption. The element maintains surveillance and determines the necessity for standards on occupational health issues not already adequately covered.

## 2. Field Studies

The Branch investigates the occupational health status of workplaces throughout the State and provides the Division of Industrial Safety and other parties with its findings for compliance and/or consultative purposes.

## 3. Training and Consultation

The Branch provides the Division of Industrial Safety workers and employers with training in the recognition of common health hazards; and it develops and disseminates information to employers and employees to aid them in preventing occupational disease.

Output and Program Size Indicators	1975–76	1976–77	1977–78

Incidents of occupational illness reports per 100,000 workers .....	480	483	486

## b. Laboratory Services

The laboratory services element through the Bioenvironmental Laboratory Section's Air and Industrial Hygiene Laboratory in Northern California and the Southern California Laboratory in the southern part of the State assists in the occupational health program by receiving and analyzing samples of environmental media collected in workplaces; reporting the results of the analyses to identify hazardous concentrations of toxic materials; providing scientific backup to field staff in determining sampling methods and procedures; developing and improving analytical techniques and methods; and otherwise furnishing technical expertise with respect to chemical and biological sampling and analysis.

Determinations .....	17,809	27,000	27,000

## DEPARTMENT OF HEALTH—Continued

## IV. MATERNAL AND CHILD HEALTH PROGRAM

## Program Objectives and Description

The best medical care is no substitute for preventive services. Unless greater attention is given to the prevention of illness and injury, the present health care delivery system may become overburdened and unable to meet future health care demands. Programs directed at prevention and early detection of diseases are needed to reduce the need for costlier episodic care and hospitalization. In contrast to the immediacy and urgency of curative programs, preventive programs can be planned and conducted on a systematic and orderly basis.

Poverty families have high infant death rates more than twice those of the more affluent; maternal death rates are double; twice as many mothers receive late or no prenatal care and have four times as many out-of-wedlock births. Among these high-risk children and adults, 20–30 percent suffer from anemia and they have a higher incidence of preventable diseases.

The health of California's citizens require that special groups of the population and selected disease entities be singled out for intensive preventive programs. Population groups at special risk include mothers, infants, and children, especially the poor and certain minorities. By directing special health service to these groups, disease and disability can be prevented.

The objectives of the program are to reduce and prevent maternal, infant, and childhood morbidity and deaths; to reduce the incidence of heritable diseases and to limit disability resulting from these diseases; to provide maximal nutrition for mothers, infants, and children; to provide citizens of the State of childbearing age knowledge and services so that they can plan their families; and to reduce the disabilities resulting from physical defects and handicaps in persons under the age of 21 years. *Nine new positions have been established to provide increased management of these programs.*

## Authority

Health and Safety Code, Sections 248–270, 280, 283–284, 290–293, 295, 300–305, 310, 319, 325–327, 420, and 1685–1686.

Social Security Act, Title V.

California Administrative Code, Title 17, Chapter 4, Subchapter 3, Group 1, Section 2890–2906 inclusive.

Many of this program's services are provided by local health agencies funded by contracts and grants with the program. Contract agreements specify standards to be maintained and the contractors are monitored and evaluated for performance. Such efforts have a great effect in improving and maintaining the quality of services rendered.

## a. Children and Youth

The Children and Youth Element provides overall coordination and direction for child health services throughout the Department, including well-child conferences, teenage services, school health programs, and similar programs.

These activities include work directed to the development and implementation of health aspects of health education and child care programs, including hearing and vision screening, well-child clinics and immunization programs, and investigation of significant special problems, such as needs for pediatric manpower and facilities, utilization of hospitals and clinics, incidence and prevention of acute and chronic diseases of childhood. School age activities include hearing testing, health education, and coordination with the State Department of Education and exploration of new sources of allied health manpower, such as the extended role of the nurse in pediatrics. Youth and young adult activities include health services for teenagers and the funding of direct service programs to very young mothers.

## b. Genetic Disease Prevention

This element administers the amniocentesis, PKU, Rh factor, Sickle Cell, Tay-Sachs screening programs, and the rhesus (Rh) isoimmunization hemolytic disease reporting program. The tasks of the element include: evaluation of screening tests; preparation of regulations; development of criteria and guidelines for screening programs; identification of diseases for which screening is effective; preparation of educational materials; development of professional education; maintenance of a directory of patient services; establishment of standards for screening programs; and development of screening demonstration projects. *Chapter 480/75 created a sickle cell program. Funds have been included in this budget to provide 2 staff and continue the program at a total of \$508,200. Chapter 1212/76 appropriated \$228,400 for the last half of Fiscal Year 1976–77 for the purpose of providing health services to persons with genetically handicapping conditions, including cystic fibrosis, hemophilia, and sickle cell. The budget contains \$456,643 for Fiscal Year 77–78 in order to maintain this level of program.*

## c. Crippled Children Services

This element provides high quality comprehensive medical and related services to children with physically handicapping conditions, in order to correct, ameliorate, or eliminate their handicap. Services are provided to children whose parents are unable to pay for them, wholly or in part. Parents who are able are required to help pay part of the cost.

Nineteen thousand infants are born each year in California with congenital deformities serious enough to endanger life or result in lifelong disability. Several hundred children each year are severely burned, paralyzed, or suffer other severe injuries. Infectious diseases, and poisoning further contribute to the picture of childhood disability. Many children whose handicaps prevent regular school attendance can receive education in special schools if physical and occupational therapy is a part of the school day activities. Modern medical science can correct or modify most of these handicaps but the cost of treating such cases is greater than some families can afford from their own resources.

## DEPARTMENT OF HEALTH—Continued

## c.1. Diagnosis

Activities such as birth certificate surveillance and child health conferences are designed to promote and provide early casefinding. Referral services assure comprehensive medical evaluation by appropriate physician specialists and uniformity in the payment for these services.

## c.2. Treatment

The element also provides, or assists in arranging for specialized medical care and allied services for eligible handicapped children.

## c.3. Therapy

Therapy services in medical therapy units of special schools and classrooms are provided in conjunction with the State Department of Education. Standards for space, equipment, number of therapists in special schools and administrative procedures are established and revised as necessary.

## d. Perinatal Health

The goal of this element is to improve the quality of maternity and newborn in-hospital care by concentrating deliveries in hospitals that can maintain a high standard of care and to improve ambulatory prenatal care. Activities include promotion, improvement, and consolidation and better utilization of newborn intensive care units; development of transportation systems to carry sick infants safely and speedily to these speciality units; special studies to identify high risk mothers and develop methods of preventing premature delivery; research in the prevention of infant health problems resulting from blood type (Rh differences), maternal, rubella infections and metabolic problems; a pilot program to provide health services to high risk pregnant women; training of physician-nurse teams in infant resuscitation; a special study of sudden infant death syndrome; setting standards for ambulatory prenatal care and for hospital services; and wide distribution of information on newborn screening procedures.

Chapter 1217/75 established a demonstration project for health care services to high risk pregnant women. Of the \$2 million annual appropriation in the legislation for this program, \$358,213 is being budgeted for staff to administer the San Joaquin High Risk Perinatal Project.

## e. Family Planning

The goal of Family Planning, as established by Chapter 1213, Statutes of 1973, is "To make available to citizens of the State of childbearing age, comprehensive medical knowledge, assistance, and services relating to the planning of families," and "...to establish in each county, a viable family planning program for the dispensation of family planning, infertility and birth control information and techniques," and to establish goals and priorities for state agencies involved in family planning services.

California's family planning programs are designed to provide individuals with the knowledge and means whereby they can freely choose the number and spacing of their children, so as to improve the health of California's women and children.

Publicly supported family planning services are provided to individuals who need and want them but cannot afford to pay for them. The services include public information, patient education and counseling, assistance with problems of infertility, as well as assistance in prevention of unwanted pregnancy and births.

When these services are available, they are used voluntarily by eligible persons. Patients also must be given full information about all types of family planning services and any possible complications or side effects, and allowed to make a free and voluntary choice.

Persons who meet federal and state eligibility requirements receive family planning services in special clinics operated by local public or nonprofit agencies which contract with the Department of Health. There will be more than 160 such contracts managed by the Office of Family Planning in Fiscal Year 1977-78. Each contract agency must meet standards developed by the Office of Family Planning. These standards specify the types of services to be provided, the quality of services that is expected as well as the content, and the requirements in terms of staff and facility. These standards are revised as family planning techniques, practices, and needs change. Review of clinic practices to assure compliance with standards is done by field staff. Agencies which contract to provide these services are reimbursed according to a fee schedule.

## V. CHILD HEALTH AND DISABILITY PREVENTION PROGRAM

## Program Objectives and Description

The Child Health and Disability Prevention (CHDP) Program was established to provide a preventive health program of early and periodic health screening and referral for diagnosis and treatment of potentially handicapping conditions for the children and youth of California. Any child between birth and enrollment in the first grade residing in California and all persons under 21 years of age who are certified eligible for the California Medical Assistance Program are eligible for services from the program. Thus, the program incorporates Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) services mandated by Title XIX.

The legislation mandates that all children entering first grade present to the local school district evidence of having had a health screening examination. The target population totals approximately three million statewide. Of this number, approximately 1.2 million are Medi-Cal children eligible for EPSDT services, and approximately 72,000 are first graders eligible for screening payments under CHDP.

*This budget includes an additional \$1,060,546 in General funds to match federal funds for local assistance to county welfare departments. They will establish separately identifiable EPSDT units to comply with federal requirements and avoid substantial penalties against the state.*

*A staff augmentation of 38.6 positions is proposed to provide increased program direction and increase the number of children screened. It is projected that CHDP screening payments will increase from 43,000 to 50,000 in 1977-78. Out of 359,000 first graders statewide, screening information will be collected on around 100,000 in 1976-77. In 1977-78, the goal is to collect screening information on 100% of the first graders through improved co-ordination with school districts. At present, documentation is received on only about 150,000 EPSDT eligibles; this is expected to increase significantly with improved identification, coordination, and reporting.*

## Activities

Screening services provided under this program include a health and development history, assessment of physical growth, developmental assessment, physical examination, tests for vision, hearing, anemia, tuberculosis, diabetes, and urinary tract conditions, an assessment of nutritional and immunization status, and, where appropriate, testing for sickle cell trait and lead poisoning. Services to the program are financed by a combination of state and federal funds. Standards and regulations are established at the state level and the program is administered by local health departments. The program in the 16 counties that contract with the State for services is administered through Contract Counties Health Services of the Department of Health.

Under this program children may receive services from public or private physicians, practitioners, or facilities. In addition to payment for screening services given to Medi-Cal eligible and certain other children of low-income families, the department provides funds to counties for local program development and implementation and for outreach, referral, and follow-up services.

## DEPARTMENT OF HEALTH—Continued

## VI. HEALTH PLANNING PROGRAM

## Program Objectives and Description

The objectives of this program are: (1) to develop the State Health Plan and the State Medical Facilities and Services Plan and (2) to implement the State's Certificate of Need Program for health facilities and services construction, remodeling, and additions.

## Authority

Chapter 854 of the Statutes of 1976, the Keene-Beilenson Hospital Planning and Cost Containment Act of 1976 and the designation of the State Department of Health as the State Agency for Health Planning and Resources Development under Public Law 93-641.

## Office of Statewide Health Planning

The Office develops the statewide medical facilities and services plan used as the criteria for the allocation of federal and state construction funds and loan guarantee programs and for the Certificate of Need Program. It evaluates all requests from health facilities relating to new or expanded health facilities and services, including capital expenditure programs.

This program also provides staff assistance to the Advisory Health Council and develops a state health plan in coordination with the Local Health Service Agency plans from each of the 14 health service agencies in the State. It reviews all institutional health services in the State and makes findings as to appropriateness of such services.

## VII. MENTAL DISABILITIES PROGRAM

## Program Objectives and Description

The Mental Disabilities Program is responsible for the management of state and federal resources provided to city and county mental health programs through the Short-Doyle Act. It is also charged with administration and enforcement of the human rights guaranteed by the Lanterman-Petris-Short Act. It is a unified service delivery system that focuses mainly on the mentally disordered and the mentally ill offender, but also provides services to the developmentally disabled, drug and alcohol abusers. Services delivered through three basic components: community mental health, continuing care services, and state hospitals.

The objectives of the program are to: prevent mental and emotional crises by making the community more aware of problem-causing situations; provide early diagnosis and treatment through services that do not require disruption of daily routines; provide treatment to enable the client to quickly return to normal life; and provide continuing care for those individuals requiring long-term treatment.

## DEPARTMENT OF HEALTH—Continued

## a. Community Mental Health

Community mental health services have been established in every county, with the goal of tailoring the program to the requirements of the local citizenry. The counties determine what services shall be provided within broad guidelines set out by state and federal laws and regulations. Program planning is done by mental health advisory boards in each county and then sent to the county board of supervisors for approval. The plan is then sent to the Department of Health for approval and funding.

Community mental health takes many forms. For example, crisis teams work with emergency medical facilities, clinics, and law enforcement agencies to get quick and mobile services to people in distress. Neighborhood clinics provide individual and group services on either a walk-in or scheduled basis, and in more severe cases, 24-hour treatment is provided.

Several different types of long-term living environments are provided for persons unable to care for themselves due to their disability. The two most common are the skilled nursing facility and the family-care home. Skilled nursing facilities provide basic living and treatment services. In 1974-75, supplemental services for rehabilitation and subacute treatment were added and are now certified for the operation of 1,377 special treatment beds. In 1975-76, several medium-term, nonhospital-based, acute treatment facilities were put into service. These are being tested for broader use in the future. Family care homes serve six or fewer persons in a family setting and provide personalized service by the caretakers.

It has long been recognized by both the executive and legislative branches that a more adequate and uniform statewide system of continuing care is needed. Heavy emphasis has been placed on the development and maintenance of systems in each county that will ensure continuing care planning, monitor progress, evaluate individual patient needs, provide linkage to rehabilitation, education, and employment resources, and keep track of patients during the entire term of their mental disability. The county mental health program is responsible for management of individual patient treatment under this system. During 1975-76, efforts in program were intensified. This effort took three forms: (1) peer citizen reviews of all county programs on a scheduled basis to produce reports and recommendations to boards of supervisors and advisory boards; (2) clients self-assessment and satisfaction studies on a sampling basis, with results compiled by an independent contractor and supplied to the Department of Health and to the counties; (3) since July 1, 1976, data has been gathered on each episode of treatment, including clinical services assessment, to indicate the types of disorders treated, their intensities, and the rate of improvement. These efforts augment the continuing subjective evaluation provided by program staff on a daily basis.

Chapter 1258/75 (AB 1228), effective January 1, 1976, promotes the availability of mental health services for inmates of juvenile detention facilities and city and county jails. The bill allows jail inmates access to voluntary mental health care in Short-Doyle-funded programs and also extends eligibility for LPS conservatorship proceedings to gravely disabled jail inmates, prisoners, wards and parolees of the Youth Authority, and to judicially committed persons. The cost of these conservatorship investigations and management is to be reimbursed to the counties on a 100 percent basis.

Chapter 1274/75 (AB 1229) provides superior courts the option to commit defendants found to be not guilty by reason of insanity (PC 1026), incompetent to stand trial (PC 1370), or mentally disordered sex offenders (WIC 6316) et seq.) to local mental health programs, from state hospitals.

Such changes in commitment procedures will result in a gradual shift of mentally ill offenders from state hospitals to local programs, the extent of which will depend on the ability of local programs to provide adequate facilities and programs for persons requiring some degree of security.

During the 1976-77 fiscal year, an increment of \$10.5 million dollars was allocated to community mental health programs to establish equity of funding among counties in the distribution of mental health funds. An additional increment of \$10.0 million has been proposed in fiscal year 1977-78 to continue movement towards achievement of equity of funding for community mental health programs. A base year of 1975-76 resources has been utilized along with the 22 social indicators of need for allocation of these funds. The County Mental Health Allocation Chart (facing page) identifies proposed allocations for 1977-78 as well as the existing allocations for the current fiscal year. The proposed Fiscal Year 1977-78 Allocations reflect a 6% Cost-of-Living increase to all county mental health programs in addition to the \$10 million equity allocation to 42 counties.

## DEPARTMENT OF HEALTH—Continued

## b. State Hospital Programs

Programs for the mentally disabled are provided at six state hospitals, with a full range of services, except medical-surgical and services to children. Stockton State Hospital maintains a 100-bed program by contract with San Joaquin County. Atascadero and Patton are secure hospitals for the control and treatment of mentally ill offenders. Patton also provides a 210-bed program for both acute and chronic patients from several of Southern California counties. Persons with secondary diagnosis of alcoholism are seen and treated in any state hospital for the mentally disordered, and specific programs for alcoholics exist at Camarillo and Metropolitan State Hospitals. *In fiscal year 1976-77, the alcoholism program at Metropolitan State Hospital is being phased out and alcohol services will be provided by alternative alcoholism programs in the community. In fiscal year 1977-78, the Office of Alcoholism will continue to assist county alcoholism agencies in developing community-based alcoholism programs as an alternative to higher cost alcoholism programs in the state hospitals.* Services for patients with drug abuse problems are being provided locally at an increasing rate, and community demands for state hospital services are declining. The state hospital patient population dropped rapidly with the development of community-based mental health programs. The population reached a peak of 37,000 and decreased to a low of 6,114 on June 30, 1976. *In addition to the 116 positions added in the Budget Act of 1976, 338 additional positions have been administratively established in Fiscal Year 1976-77 to enhance the health and safety of state hospital patients and employees. Increased staffing towards the recommended levels will continue for fiscal year 1977-78 with 94.9 new positions in programs for the mentally ill. The 1973 staffing standards will be under continuous evaluation and modification of the standards will be undertaken as needed.*

*In addition, 32 additional food service assistant positions are included in the 1977-78 Budget to maintain congregate dining facilities at Agnews and Patton State Hospitals. Atascadero State Hospital has also been authorized 5 additional food assistant positions to provide increased supervision in the dining facilities.*

## c. Continuing Care Services

This function is a direct service arm of the Department for the provision of follow-up and continuing care services for mentally disabled persons released from mental health facilities, persons in mental health facilities who need planning for community living, mentally handicapped persons who may require hospitalization, and judicially committed persons released from state hospitals. Among the protective social services provided are individual, family, and group counseling; case management; advocacy; preplacement planning; continuing care following placement; recruitment of placement resources; community adjustment programs; consultation with other public and private agencies. With 457 staff, situated in 47 field offices, this section provides services to 14,095 persons in the community, as follows: 95 children live in residential treatment facilities, 2,000 persons live in small family homes, 5,700 persons in other out-of-home residential care placements, and 6,300 clients reside in their own homes.

## VIII. DEVELOPMENTAL DISABILITIES PROGRAM

## Program Objectives and Description

In California there are approximately 290,000 developmentally disabled individuals requiring care, treatment, development, and maintenance. About 204,000 are mentally retarded, 25,000 have cerebral palsy, 61,000 are epileptic, and 2,000 are autistic.

The quality of life for each of these individuals depends upon the conception, planning, and provision of needed services by many state and community agencies aimed toward the ultimate goal of development to maximum potential, normalization, and social integration.

The objectives of the program are to prevent developmental disabilities by intensive concentration of efforts in early screening and genetic counseling; to develop each individual to their maximum potential and reduce the degree of dependency of persons with developmental disabilities; to increase the capacity of adaptive behavior into normal life community living; to maintain the health and welfare of each individual; and to increase the individual's social and cultural capacity to create, maintain, and develop a quality life for themselves.

Major revisions in the planning and provision for service to the developmentally disabled were included in a series of legislative bills enacted this year (AB 3800-3809).

## a. Regional Centers

Regional Centers are private nonprofit corporations under contract to the State to provide fixed points of referral in the community where developmentally disabled persons and their families may receive assistance in obtaining needed services. The primary objective of the regional centers is to obtain services that will allow developmentally disabled persons to live in situations as close to normal as possible. The centers serve as advocates for the developmentally disabled to obtain, through the mainstream of generic agencies in the community, such necessary services as community living arrangements, social integration, medical and dental, hospitalization, workshop and special schooling. When these services are not available through other generic agencies the regional centers may purchase the needed service.

The 21 regional centers strategically located throughout the State provide diagnostic and counseling services free to any person believed to have a developmental disability. In addition, ongoing case management is purchased or provided. *The number of developmentally disabled individuals being served by the regional centers has increased by approximately 6,019 additional clients in the current year. In addition, the department projects a continuation of this current trend and anticipates a net increase of 8,500 for 1977-78. The cost of services associated with the caseload increase will require a budget augmentation of \$7.8 million for the 1976-77 fiscal year. Funds for this purpose have been authorized to the department from Title II Public Works Employment Act funds. Expenditure of Title II funds are reflected in the Employment Development Department budget display and shown in the Department of Health Budget as reimbursed services. In addition, the budget for 1977-78 has been increased by \$23.85 million from the General Fund to provide for the services to 8,500 new clients and the increased costs of clients added this year.*

## b. Continuing Care Services

The Continuing Care Services element provides protective social services to 8,115 developmentally disabled persons so that these individuals may remain in their own homes, or in acceptable alternative living arrangements. *During 1976-77, the projected caseload growth of the Regional Centers will be 8,777 clients. Of this number, 1,580 will be provided out-of-home care services by CCSS. The anticipated caseload increase of the Regional Centers in 1977-78 will be 8,500 clients. Of this number 1,530 clients will be provided services by CCSS. To meet this increasing caseload, CCSS received \$659,971 to fund 48.5 new positions in the 1976-77 fiscal year from Title II funds. In addition to this increment, \$1,238,271 and 47.5 new positions are reflected in the 1977-78 fiscal year for CCSS to be funded from the General Fund.*

Services are provided, at the request of the regional centers, through 36 offices throughout the state. Approximately 90% of the individuals served are linked to social welfare programs, and matching Title XX funds are used to serve them.

This element offers a full range of case management services which include assessment of client needs, development of plans for meeting these needs, and periodic evaluation of progress in relation to established objectives designed to maximize individual functioning.

Staff are also involved in the development of community resources to support clients in the community. Six new non-case carrying positions are budgeted for the 1977-78 Fiscal Year. This new staff will provide 1) a continuing assessment of community facility needs in service areas, 2) a link between project resources and allocations based on priority needs and 3) first-hand knowledge of the need for new community resources. This staff will also serve as key resource people to local planners in the recruitment and development of new resources and services within the service areas.

## c. State Hospitals

The state hospital element provides care, treatment, development, and maintenance services to approximately 9,400 clients. The nine state hospitals with programs for the developmentally disabled provide service for the most demanding of the State's developmentally disabled population. These individuals are placed in programs whose goals and objectives are appropriate to their needs. Program impact is assessed on a regular basis and clients are moved according to their progress from most to least restrictive environments. These persons require special assistance in their physical, social, intellectual, and vocational development. They include blind, deaf, and disturbed persons; destructive, hyperactive adolescents; chronically physically ill people, as well as individuals with cerebral palsy, uncontrolled epilepsy, autism; and other neurologically handicapping conditions.

DEPARTMENT OF HEALTH—Continued

Regional Centers have initiated a purposeful movement of clients to the community when appropriate placements are found. Health and Safety Code 38000 has mandated an annual review of commitments that will lead to some community releases and a higher population of regional center registered clients. Individuals unable to provide safely for their own food, clothing, and shelter will be retained in hospitals until appropriate sheltered placement is found. Admissions are based on determination by a regional center that the service provided by the state hospital is preferable to all alternatives. *Results of pilot studies in three state hospitals indicate improvements in the level of functioning of developmentally disabled residents. Based upon these findings the Administration approved in principle, the 1973 staffing standards. Therefore, in addition to the 330 positions authorized in the Budget Act of 1976 260 positions have been administratively established in Fiscal Year 1976-77. In fiscal year 1977-78 492.6 positions are being proposed to continue this increased staffing program. The 1973 staffing standards will be under continuous evaluation and modification of the standards will be undertaken as needed.*

d. Program Development

This element has primary responsibility for Department of Health developmental disabilities program development and program evaluation activities. Program development activities include identification of program and service needs of the developmentally disabled and development of family support services, community living arrangements, and other services for developmentally disabled persons residing in the community. As a result of developmental disabilities legislation enacted in 1976, this unit will be responsible for the utilization of the Program Development Fund newly established by the legislation to provide for development of community based services to serve as alternatives to institutionalization for the severely disabled. The Section's evaluation responsibilities include assessing the quality and effectiveness of ongoing programs, and improving programs by revealing ways to make constructive changes in program design, implementation, operation and management.

IX. SUBSTANCE ABUSE PROGRAM

Program Objectives and Description

The substance abuse program was established in 1973 to implement those provisions of the Campbell-Moretti-Deukmejian Drug Abuse Act of 1972, and was assigned to the Department of Health. The goal of the program is to ensure the provision of a coordinated and comprehensive community-based program for the prevention, treatment and rehabilitation of narcotic addicts and drug abusers. The objectives of the program are to increase the personal and social functioning of narcotic addicts and drug abusers by assisting the counties in the development, implementation, funding and evaluation of drug treatment and rehabilitation programs; to protect the client and the public by reviewing, approving, monitoring, and evaluating the use of methadone in the treatment of narcotic addiction; and to reduce the incidence of illicit drug usage through drug education, prevention programs.

The substance abuse program is responsible for the development and implementation of mass media drug education, and information programs which will increase public awareness and reduce the incidence of illicit drug abuse. A new emphasis will be added toward program development to meet the needs of women, children and minorities in drug programs.

*During fiscal year 1977-78, the responsibilities and staff of the State Office of Narcotics and Drug Abuse will be merged into the Department of Health, Division of Substance Abuse. The proposed merger will be accomplished through a reorganization plan which will be submitted to the Legislature. Staff from newly organized Substance Abuse Branch will be used to augment: 1) a unit responsible for training local drug program staffs, 2) a planning and research unit, 3) a special liaison office, and 4) a federally funded unit responsible for the administration of Federal funds through contracts with programs and counties. This reorganization will integrate the staff and functions of SONDA and the Substance Abuse Division and reduce the duplication of effort and other overlapping responsibilities which now exist. The Health and Welfare Agency will provide a coordinator for the drug efforts of the four departments within the Health and Welfare Agency (Corrections, Health, Rehabilitation, and Youth Authority) with the related functions in the Department of Education and Justice.*

Authority

Welfare and Institutions Code, Chapter 3, Division 4, and Parts 25 and 30, and Division 5.

e. Administration .....	(13)	(15.4)	(19.6)	(299,892)	(398,942)	(525,023)

a. General Drug Treatment Programs

The substance abuse program does not provide direct treatment services, but assists counties and local programs in the development, implementation, coordination and funding of community-based drug prevention, treatment, and rehabilitation programs. The program administers state funds through the county Short-Doyle program and federal funds through contracts with the counties or individual programs.

b. Methadone Treatment Services

The substance abuse program supervises all organized use of methadone for the treatment of narcotic addiction. This involves the review and approval of methadone maintenance or detoxification program applications; monitoring, regulating, assisting, and evaluating local methadone programs; approval of hospital pharmacies to dispense methadone; and approval of drug wholesaler to distribute methadone.

Methadone is a potentially dangerous narcotic and these activities are designed to protect the health of the client, reduce the unauthorized distribution of methadone to the general public and to simultaneously upgrade the quality of the treatment services associated with the dispensing of methadone.

c. Information and Evaluation Services

The substance abuse program administers the federally funded integrated drug abuse reporting process (IDARP) which provides needed statistical and management information. This data collection system will serve as the basis for a "short-term" outcome evaluation methodology to be developed and implemented during 1976-77. An on-site "process" evaluation methodology was implemented in January 1976. One hundred programs a year are evaluated.

d. Alcoholism

Chapter 1128/75 (SB 744) transferred the alcoholism program to the Office of Alcoholism effective January 1, 1976. Current and budget year expenditures for this program are reflected in the Office of Alcoholism budget display.

## DEPARTMENT OF HEALTH—Continued

## X. SOCIAL SERVICES PROGRAM

## Program Objectives and Description

Objective is to provide social services to over two million elderly, blind, disabled, and children of California in order to:

1. Protect them from abuse, neglect, and exploitation and to help families stay together.

2. Help them become or remain economically self-supportive.

3. Help them become or remain self-sufficient (able to take care of themselves.)

4. Prevent inappropriate institutional care by making home and community services available; and to arrange appropriate placement and services in an institution when this is in the individual's best interest.

This is accomplished with federal funds under Title XX and state and county funding through which services are provided by 58 county welfare departments, Office of Family Planning of the Department of Health, Continuing Care Services Section of the Department of Health, Regional Centers, 14 Mental Health Opt-Out Counties, and the State Department of Education. The Social Services Division of the Department of Health is the designated single state agency responsible for supervising the delivery of services by all these providers.

The Adoptions Program is totally state funded. The program receives \$16.8 million for this purpose.

In addition of Title XX and state and county funds, California receives \$3.4 million federal funds under Title IV B. These funds are allocated to county welfare departments for child welfare services.

The Social Services Program administration has been expanded by 60 positions: 32 are assigned to the Homemaker/Chore program with the balance in the areas of children's services, adult services, and fiscal resources management and evaluation. Adoption services will be expanded into the 23 northern counties currently without state adoption services. An additional 14 adoption services staff will work with hard to place children in foster care in an effort to return these children to their natural homes or place them in adoptive homes. This effort will be from January 1977 through June 1978 when the program will be evaluated for effectiveness.

The Homemaker/Chore subvention budget has been increased due to the increase in minimum wage and worker's compensation coverage.

## a. Title XX Services

Federal Title XX law requires the State to provide at least three services for beneficiaries of Supplemental Security Income, family planning services for beneficiaries to Aid to Families with Dependent Children, and at least one service directed at each of five national goals. Ten services in California are mandated state law. The following, based on California Comprehensive Annual Services Program Plan, describes these services and estimates of resources allocated to each service and the number of persons to be served in 1976-77:

## 1. Information and Referral Services

To assist people in learning about and obtaining needed services. \$13.2 million and 1.5 million served.

## 2. Protective Services for Children

To remedy cases of neglect, abuse, and exploitation of children. \$31.5 million and 177,710 served.

## 3. Protective Services for Adults

To remedy cases of neglect, abuses, and exploitation of adults who cannot protect themselves. \$9.8 million and 56,783 served.

## 4. Out-of-Home Care Services for Children

To decide whether children need placement in foster homes or treatment facilities, to place and work with children in such facilities, and to help children return to their own homes or into other permanent living arrangements as soon as practical. \$27.8 million and 91,555 served.

## 5. Out-of-Home Services for Adults

To assist adults in deciding whether placement is necessary, to help them enter facilities suitable to their needs, and to work with them during and after placement. \$12.1 million and 47,483 served.

## 6. Child Day Care Services

To arrange and pay for care of children during part of the day while parents are working or in training. This service is also provided to children who need to be out of their own homes during part of each day for their protection. \$109.9 million and 54,233 served.

## 7. Health Related Services

To help people recognize the need for health and medical care and assist them to obtain such care. \$13.9 million and 123,169 served.

## 8. Family Planning

To help people who voluntarily wish to limit their family size to receive such services. \$8.3 million and 140,954 served.

## 9. In-Home Supportive Services - (Homemaker/Chore)

To pay for care needed to enable aged, blind, or disabled persons to remain in their own homes. \$119.4 million and 112,966 served.

## 10. Employment Related Services

To arrange for training and other services which will lead to employment. \$10.6 million and 14,874 served.

In addition to the 10 mandated statewide services described above, counties have designed 13 special services which are unique to the needs of their local citizenry. A summary of these are:

A. Special care and service related to home, family, and personal capacities. Through placement of specially trained adults in homes of families or through specialized professional guidance — (1) help parents learn homemaking and parenting skills which may prevent disruption of the family, (2) help parents to better manage family budgeting, nutrition, physical maintenance of the home, understand and practice better health habits and care of self and children, and (3) help children cope with school-related personal and social problems. \$16.7 million and 94,203 served.

B. Enable families and disabled or elderly adults to assess their circumstances related to serious housing deficiencies, special legal needs; counsel such persons relative to personal behavior which isolates them or makes them vulnerable to exploitation; act as facilitators to identify special financial guidance, or treatment resources which can help correct such problems; and assist persons to use these resources to stabilize and enhance their personal social, and physical life situations. \$13.2 million and 75,288 served.

## DEPARTMENT OF HEALTH—Continued

C. Provide special counsel and guidance to individuals incarcerated in jail; help inmates maintain family ties, stabilize families in the absence of the husband or wife; assist the inmates to prepare for release, employment, and full citizen responsibility. \$56,638 and 2,680 served.

D. Enable blind persons to receive help essential to the unique circumstances of blindness. This includes strengthening their capacity to accept the fact of blindness, use fully their abilities by exploitation of training in mobility, personal care, home management, and securing of special aids such as talking books and other special appliances \$66,226 and 468 served.

In addition, there are several specialized services provided by local mental health agencies for mentally disabled and by regional centers for the developmentally disabled. These are: Work Activity Program for Developmentally Disabled Individuals — to provide and arrange for services necessary to the individual to develop work related skills — \$8,472,621 and 6,385 served, Special Services for Mentally Disabled Adults and their Families, Special Services for Mentally Disabled Children and their Families, and Home Management and Other Functional Education Services for Mentally Disabled Individuals — \$988,350 and 1,113 served.

## b. Adoption Services

The adoption services element (1) establishes adoption program standards and regulations, (2) reimburses public adoption agencies' costs, (3) directly and indirectly provides relinquishment and intercounty adoption services, and through district offices and nine delegated county adoption agencies studies all independent adoption placements to present recommendations to the court, (4) operates an interagency adoption information exchange system, (5) assures the legality of infant releases from hospitals and of all relinquishment for adoptions, (6) maintains basic records on all California adoptions, and (7) administers and regulates placement of children across state lines.

## c. Indochinese Refugee Program

The Deputy Director for the Social Services Division is the statewide coordinator for Indochinese resettlement within California. A small staff is assigned to carry out this responsibility. Additionally, the Federal Government is providing 100 percent reimbursement for the Indochinese Refugee Self-Support Project to provide English as a second language and job training and placement to selected refugees in eight counties of the State with welfare caseloads highly affected by the refugee influx. These counties are: Los Angeles, San Diego, San Francisco, Orange, Monterey, Alameda, Santa Clara, and Riverside. The participants in the project are employable adults who are now or are in imminent danger of becoming cash assistance recipients.

## XI. MEDICAL ASSISTANCE PROGRAM (Medi-Cal)

## Program Objectives and Description

The Medical Assistance Program has primary responsibility for the administration of California's medical assistance program (Medi-Cal), serving over 2.4 million Californians. The program's objectives include assuring that quality health care is provided to those California residents unable, either wholly or in part, to pay for their medical services, and to assure that services are delivered at a reasonable cost, under proper controls, to ensure maximum utilization of public funds.

Organizationally the Medi-Cal Eligibility element is responsible for the coordination, clarification, and implementation of procedures to assure that Medi-Cal eligibility is determined accurately and on a timely basis by the 58 county welfare departments. The section reviews and evaluates program eligibility requirements, and assures compliance with federal Medicaid regulations. The section proposes new legislation, new regulations, and recommends policy for executive staff decision. The element prepares and implements corrective action plans to meet the objectives of the federally-mandated Medicaid Eligibility Quality Control Program. The element administers the Medi-Cal County Administrative Cost Control Plan which has been implemented to assist counties in keeping down the cost of county administration of the Medi-Cal program, and to find more cost effective methods of handling the eligibility process. The element monitors county operations for accuracy and consistency of policy and procedures, answers county questions, and trains county staff as needed. The element also reviews proposed fair hearing decisions concerning eligibility matters and recommends final action to the director.

The Medi-Cal Benefits element is responsible for functions relating to the scope and duration of benefits, provision of services, and payment for health care services; recommending and developing laws, regulations, and policies for administration of these functions; and maintaining liaison between the department, providers, and professional organizations.

The Field Services element authorizes the provision of those health services which require prior approval; administers utilization control procedures, and determines the appropriateness of placement of patients in hospitals, skilled nursing, and intermediate care facilities. These functions are performed by field offices located throughout the State by licensed professional consultants representing various medical disciplines. In addition, consultants determine the necessity for care given to consumers by institutional providers.

A competitive procurement process for the development and eventual selection of a statewide Medi-Cal fiscal intermediary claims processing system is under way.

The Fiscal Intermediary element implements Medi-Cal program policy and directs the processing for fee-for-service claims through private insurance carriers acting as intermediaries; coordinates program policy changes; issues directives to providers creating new policy or modifying existing policy; and ensures that departmental policies, regulations, and procedures are implemented by the intermediaries in a prompt and efficient manner. There has been an increased emphasis on on-site monitoring of the intermediaries which has resulted in more effective operations of the claims processing function.

The Fiscal Intermediary Section administers the California Dental Service Contract and other pilot projects dealing with variations of the fee-for-service program. These projects are monitored and evaluated for statewide implementation potential.

Another major thrust of the Medi-Cal Division is to eliminate as much unnecessary paper work and as many procedures as possible to make the program more efficient as well as responsive to consumers and providers of services, while maintaining fiscal integrity.

The Medi-Cal Information element ensures accurate and timely response to complex and unusual problem situations relating to all aspects of the Medi-Cal program that have not been resolved through regular administrative channels. The unit receives from 10,000 to 12,000 letters annually from private and public providers of medical services in California and other states, from consumers of these services, from various provider and consumer organizations, from members of the Legislature and their staff representatives, and from the Governor and his staff.

The new unit Surveillance and Utilization Review is being organized to identify and take corrective action in cases of provider fraud and abuse. This unit will absorb the current drug monitoring function and expand review activities into the areas of inpatient and outpatient hospital services, outpatient physician services, podiatry, psychology, optometry, laboratory services and dentistry.

Additional efforts will be devoted to providing more effective and intensive review and management of the Medi-Cal claims processing contractor. Five contract coordinators will be located on-site at the fiscal intermediaries in San Francisco, Oakland, and Los Angeles to identify claims processing problems. Four additional positions have been added to the existing unit in Sacramento to perform in-depth systems review and problem resolution in identified functional areas.

## BUDGET ASSUMPTIONS FOR MEDI-CAL PROGRAM

The assumptions underlying the 1977-78 fiscal year expenditures for the medical assistance program (Medi-Cal) are:

1. The Prepaid Health Program will have an overall average monthly enrollment of 183,500 for fiscal year 1977-78.
2. County Administration Cost Containment implemented in July of 1976 will be continued throughout the 1977-78 fiscal year.
3. The County of San Diego Vs. Vandegrift lawsuit will be settled by stipulated judgment between the county and the state. Although final settlement has not been resolved, a deficiency appropriation which is estimated at \$7,546,091 will be requested.
4. County participation in the cost of the program, as prescribed in Section 14150 of the Welfare and Institutions Code, will increase by 10 percent over the 1976-77 level due to estimated increases in the counties' modified assessed value.

## DEPARTMENT OF HEALTH—Continued

5. The Medi-Cal Program estimate reflects no change in provider rates for 1977-78. Adjustments to rates will be in accordance with the funding reflected in Program XVIII Provider Rate Increases.

6. Fifty percent Federal financial participation will be received in 1977-78 for EDP claims payment costs.

7. The budget reflects a current year General Fund cost of the California Hospital Association vs. Mario Obledo lawsuit. The estimate of retroactive payments to those hospitals which have received tentative cost settlements and payments for December 1976 and January 1977 actual costs are \$4,900,000 General Fund. A proposed deficiency appropriation of \$16,114,700 is reflected within the Medical Assistance Program to reimburse hospitals without applying cost containment from February 1 to June 30, 1977 in the event that the State's request for a stay pending appeal is denied. If the State is not successful in requesting a stay of the judgment pending appeal and fails in its attempt to implement an alternative cost containment system, an increase of \$56,800,000 will be required in 1977-78. This expenditure is reflected in the Health budget, Program XIX, Hospital Cost Containment and will be proposed as a separate appropriation item for this contingency.

d. Administration .....	(115.9)	(141.6)	(141.2)	(2,487,039)	(10,018,069)	(10,341,316)

## a. Title XIX Services

Medi-Cal allows a California resident to choose his or her own doctor, hospital, or other health service, or a California resident may obtain these services through a prepaid health plan under contract with the department. The entire program is supported by taxes at the federal, state, and county level and no person who qualifies for Medi-Cal is denied medically needed program benefits.

There are three major categories of residents who may obtain Medi-Cal benefits. They are (1) Public Assistance Recipients who receive or are eligible to receive a welfare check through Supplemental Security Income/State Supplemental Payment program (SSI/SSP); Aid to Families with Dependent Children (AFDC), (2) medically needy persons and families; and (3) medically indigent persons and families.

Health services available to Medi-Cal eligibles include the following: physician's services, hospital outpatient services, physical, occupational and speech therapy, podiatry, optometry, and chiropractic services, psychological services, prescribed drugs, laboratory, X-ray and radioisotope services, blood and plasma, hemodialysis services, skilled nursing facilities services, intermediate care facility services, dental services, home health agency services, medical transportation, artificial limbs and braces, hearing aids and audiology services, assistive devices and durable medical equipment, eyeglasses, artificial eyes, eye appliances, inpatient hospital services, family planning services, and health screening for persons under 21. Some of the above services must be approved by Medi-Cal before they may be given.

The following scope of services and limitations are applicable to the program:

## a.1. Professional Providers

Included in the professional provider category are physicians, dentists, optometrists, chiropractors, podiatrists, psychologists, occupational and physical therapists, speech therapists, audiologists, and nurse anesthetists.

Outpatient services rendered by these providers are covered benefits subject to utilization controls.

When provided in connection with a covered hospital stay, surgical and other inpatient procedures are fully covered benefits.

## a.2. Prescribed Drugs

Prescribed drugs are a covered benefit subject to utilization controls. Medi-Cal Drug Formulary drugs with few exceptions may be provided without prior authorization. Most non-Formulary prescription drugs may be covered subject to prior approval by state Medi-Cal consultants.

## a.3. Dental Services

Dental services benefits are provided through a pilot project contract with the California Dental Service (CDS). The State pays CDS a flat fee per beneficiary. CDS then approves and provides payment for covered services.

## a.4. Hospital Services

Inpatient hospital care, whether provided in a county or community facility, is a covered benefit subject to utilization controls. Emergency admissions do not require prior authorization but the emergency must fall within specified criteria as defined in regulations. All hospital stays are subject to "length of stay" guidelines established for a particular diagnosis.

## a.5. Skilled Nursing Facility Care and Intermediate Care

Skilled nursing facility and intermediate care facility services are covered benefits subject to utilization controls. Admissions must be on order of a physician and must have prior authorization. State medical review teams periodically review the level of care needed by each patient. Reauthorization of continued stays is required every 60 days except for those patients identified as needing "prolonged care". In these cases reauthorization may be required only twice a year. About 60 percent of all Medi-Cal patients fall into the category of needing "prolonged care".

## a.6. State Hospitals

Medi-Cal pays for medical services for eligible mentally ill persons under 21 and over 64 in accredited state hospitals and for all eligible developmentally disabled individuals in state hospitals for the mentally retarded.

## a.7. Other Services and Supplies

Home Health Agencies, Short-Doyle Provider Services, Independent Laboratories, Medical Transportation, Prosthetic and Orthotics, Hearing Services, Eye Appliances, Blood Bank, Durable Medical Equipment (i.e., wheelchairs and intermittent positive pressure breathing apparatus), Oxygen.

DEPARTMENT OF HEALTH—Continued

a.8. Title XVIII Buy-In

Medi-Cal pays Title XVIII Part B medical insurance premiums for Medi-Cal eligible individuals 65 and over and those persons that have been disabled and are on Social Security for two or more years. Coverage includes physician's services, outpatient hospital services, and other necessary services and supplies. Subject to a yearly deductible, Medicare Part B pays 80 percent of reasonable charges (or costs where applicable) for covered services.

a.9. Implementation of Dialysis Medi-Cal Program

Chapter 1531 of the Statutes of 1974, effective September 27, 1975, added Article 4.4 (commencing with Section 14140) to Chapter 7 of Part 3 of Division 9 of the Welfare and Institutions Code. This law provided for special Medi-Cal eligibility for persons in need of dialysis and related services. Dialysis and related services are covered under the Dialysis Medi-Cal program for persons who are not otherwise eligible for Medi-Cal and, if under 65 years of age, not otherwise eligible for Medicare. The law provides that each Dialysis Medi-Cal beneficiary must pay 1 percent of the cost of his dialysis and related services for each \$5,000 of the beneficiary's annual net worth.

a.10. Dialysis and Related Services

Covered under this program are renal dialysis, renal hemotransplantation, and all related services which include dialysis center services, hospital services, physician services, medical transportation, laboratory tests, medical supplies and drugs related to renal dialysis, renal homotransplantation, the treatment of renal failure, and complications related thereto.

b. County Administration

The overall Medi-Cal responsibility of the 58 county welfare departments is to make accurate and timely determinations of eligibility for Medi-Cal's Medically Needy and Medically Indigent programs and to evaluate the effects of changing circumstances on eligibility. In addition, county welfare departments determine eligibility for cash grants under Aid to Families with Dependent Children (AFDC). This group is automatically eligible for Medi-Cal.

County welfare departments assist the Department of Health in achieving program objectives by identifying and recommending changes in procedures and policy matters. Counties are reimbursed by the State for their administrative expenses incurred in determining eligibility through a time reporting system. The Medi-Cal County Administrative Cost Control Plan became effective July 1, 1976. The purpose of the plan is to control the costs associated with the counties' eligibility determination processes through eligibility simplification, assistance to the counties in implementing cost-effective procedural changes, the development of workload and performance standards, and the application of fiscal penalties for counties not meeting those standards.

c. Fiscal Intermediary

Since the inception of the Medi-Cal program in 1966, the department has contracted with Blue Shield of California (Blue Shield), Blue Cross of Northern California (Blue Cross-North), and Blue Cross of Southern California (Blue Cross-South) to serve as the program's fiscal intermediaries for claims processing and payment activities. Effective November 1, 1972 these three organizations consolidated their Medi-Cal claims processing activities into a single administrative structure to improve their claims payment system. The resulting structure is called Medi-Cal Intermediary Operations (MIO).

The MIO system features a consolidated data base which provides for the processing of Medi-Cal claims for both institutional and professional providers utilizing prepayment utilization control, utilization review and program information reporting, screening based on a review of beneficiary treatment profiles, post payment utilization review, and appropriate provider relations activities.

The department reimburses MIO on a cost basis for expenditures made in the processing and payment of claims.

XII. ALTERNATIVE HEALTH SYSTEMS PROGRAM

Program Objectives and Description

Alternative Health Systems Program is responsible for developing, monitoring, and evaluating alternatives to the established fee-for-service health care delivery system. The emphasis of this program is directed to contracting with organizations to provide a comprehensive range of health care services to voluntarily enrolled public assistance recipients within a geographically defined area. These organizations (prepaid health plans) are reimbursed on a fixed monthly premium per capita for providing health care services to enrollees. Prepaid health plans stress quality of care, preventive medicine, internal grievance procedures, and fiscal and management integrity in providing services to enrollees.

Prepaid health plans are also subject to regulation by the Department of Corporations pursuant to the Knox-Keene Health Care Services Plan Act of 1975 (Chapter 941/1975). The Department of Health and the Department of Corporations are currently working to clarify respective responsibilities for monitoring prepaid health plans and reduce overlapping functions in these monitoring activities.

Public Law 94-460 requires prepayment contractors under Title XIX to be federally designated as health maintenance organizations. Federal financial participation will be withdrawn from California's prepaid health plans if these plans do not become designated as HMO's by the renewal date of their contract or October 8, 1977, whichever comes first.

## XIII. LICENSING AND CERTIFICATION PROGRAM

## Program Objectives and Description

This program regulates over 43,000 hospitals, nursing homes, clinics, group homes, nurseries and preschools, foster homes, half-way houses, day care centers and homes, and other similar public and private, medical and nonmedical, out-of-home care facilities. Licensing works to assure the public that all such facilities in California meet established care standards. The Medi-Cal review teams work to determine the necessity for and quality of care given to consumers by institutional providers.

To apply the standards, the Licensing and Certification Program maintains a physical inventory of health facilities; approves construction plans; manages a variety of construction grants and loans; evaluates and reports on services and condition of facilities; cites deficiencies; help develop plans for correction; issues, denies, or revokes licenses; certifies facilities for eligibility in the Medicare and Medi-Cal programs; investigates complaints, levies fines; controls performance of other public agencies and agents under contract for these activities.

The Licensing and Certification Program has five elements: licensing, provider participation, services approval, medical review, and construction. Sixteen offices are located throughout the State, with headquarters in Sacramento. Contracts for delivery of services are negotiated with the Office of Architecture and Construction, the State Fire Marshal, Los Angeles County health services, and with most county welfare department.

The Investigation Element of the Licensing and Certification Division, which investigates alleged abuse of the Medi-Cal program, has been moved to the Medi-Cal Division.

The medical review teams, which determine the necessity for and quality of care given to residents of long term care facilities has been transferred from the Medi-Cal Division to the Licensing Division.

## a. Facilities Licensing

Licensing of health and community care facilities is designed to ensure that people receive the appropriate kind, quality, and level of care for which each facility is licensed.

Facilities licensing personnel evaluate community resources and services for compliance with state and federal regulations. All facilities are visited unannounced at varied times during the week. The licensing evaluators tour facilities, talking with patients, residents, nurses, cooks, activity directors etc., checking records to assure medications and services are being given according to directions. Any deficiencies are noted and the facility operator must make specific commitments for correction within specified deadlines. Facilities with serious patient care deficiencies may be subject to fines of up to \$5,000. Follow-up visits are made to assure correction. Additional unannounced and unscheduled visits are made to investigate complaints about conditions or treatment of patients or residents.

## b. Provider Participation

The Federal Title XIX (Medicaid) regulations specifically require that a state participating in the Medicaid (Medi-Cal) program have a "single state agency" to ensure that federal survey and certification requirements are met. Full and ultimate responsibility, for compliance and general administrative program supervision under the federal regulations, rests with the agency defined as the Department of Health. The Provider Participation Section is that integral arm, of the Department's Licensing and Certification Division, having the responsibility of monitoring state survey agency certification actions and recommendations relative to provider participation agreements, thereby ensuring continued federal financial participation for the administration of the Medi-Cal program and reimbursement for beneficiary health care within; long-term facilities (skilled nursing, intermediate care, and hospital/long-term distinct part facility services); hospitals; and, other health facility services (home health agencies, rehabilitation centers, clinical laboratories, outpatient clinics, chronic renal dialysis services, portable X-ray units, and special programs (mentally disordered/developmentally disabled)).

Conditional certifications and the nonrenewal of agreements are control mechanisms used to effect a timely correction of state and federal regulatory violations. The reconsideration of nonrenewal action requires an acceptable plan of correction. Failure to correct noncompliances may result in Medi-Cal program eligibility termination of a provider, if such violations jeopardize patient health and safety or otherwise do not meet federal and/or state requirements.

## c. Services Approval

This element provides intensive specialty training to skilled nursing facilities staff to improve the quality of patient care. It provides direct consultation to the facilities, conducts workshops for groups of health workers, and prepares manuals and pamphlets to educate and train nursing facility staffs in better methods of patient care. Physicians, specialized nursing consultants, pharmacists, nutritionists, physical and occupational therapists, medical record consultants, and medical social workers are employed for this effort.

Consultants also assist licensing personnel in surveying skilled nursing facilities and other health facility when expert opinion is needed to complete the survey or to take administrative or legal action against the facility.

This element also reviews specialized services in general acute care hospitals and outpatients settings.

Output	1975-76	1976-77	1977-78
Deficiency investigation and correction visits .....	3,108	3,700	4,000
Testimony in support of enforcement hearings .....	66	140	150
Specialized services visits .....	293	350	400
Training sessions for facility personnel .....	979	1,000	1,050

## d. Facilities Construction

Many California communities have serious financial problems when expanding, modernizing, or replacing aging health facilities to meet growing public demand and strict earthquake and life safety requirements. High costs have prompted federal and state programs for funding grants and loan guarantees. The Department of Health's approval of building plans is required for funding to the communities. Construction plans and specifications for all major facilities are reviewed for compliance with state building codes as prerequisite for licensing. Plans of hospitals and other facilities designated in the law are checked for compliance with state seismic safety requirements.

## XIV. DISABILITY EVALUATION PROGRAM

## Program Objectives and Description

California residents with physical and/or mental disabilities may qualify for benefits under Title II (Disability Insurance), Title XVI (Supplemental Security Income), Title XIX (Medical Assistance) of the Social Security Act, or related state public assistance programs. Entitlement to these benefits requires Social Security coverage or qualification for public financial assistance and that the disabling conditions preclude gainful employment for at least one year.

The responsibilities of the Disability Evaluation Program are (1) to measure the disability with the claimant's capacity to work, and (2) to refer for vocational rehabilitation services those claimants having rehabilitation potential. These activities are detailed in agreements, under which the program is fully reimbursed from federal or state contract funds.

Activity begins with a claim filed at a Social Security Administration district office or a county welfare department. Analysts trained in the evaluation of disabilities and attuned to the job market, consult with program medical consultants and gather and evaluate medical and other evidence of disability. Current medical evidence, when needed, is purchased from local physicians, medical evaluation clinics, or similar sources. During the process, activities involving potentially rehabilitatable claimants are coordinated with the State Department of Rehabilitation. Program responsibility ends with notice to the Social Security Administration or county welfare department of the decision made on the claim.

## Authority

Federal laws: Social Security Act (Titles II, XVI, XIX).

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

Claimants referred for rehabilitation .....	129,990	98,164	95,826

## XV. ADMINISTRATION

The Administration Division functions as the "administrative arm" of the Department providing support and control services for efficient management of the Department's programs. The broad areas of responsibility assumed by this Division include financial management, systems analysis, equipment and space management, personnel services, statistical procedures, and general administrative information. The Administration Division includes four branches for staff support:

## Financial Management Branch

This Branch (comprised of the Rates and Fees, Accounting, Fiscal Systems, and Contract Coordination Sections) is responsible for administration and reporting of the fiscal resources and related activities of the Department including maintenance of accounting records, analytical determination of provider reimbursement rates, and coordination of contracts.

## Management Systems and Computer Services Branch

This Branch (comprised of Systems Analysis, Data Processing Services, Center for Health Statistics, and Vital Statistics Sections) is responsible for providing effective and efficient data services, system support, and other technical expertise to solve problems normally present in the management of a large department. In addition, health statistics, both public and pertaining to departmental programs, are maintained by components of this Branch.

## Personnel Management Services Branch

This Branch (comprised of Personnel, Training, and Labor Relations Sections) provides a broad spectrum of personnel services, including recruitment, personnel transactions, training, employee safety and health, employee rights, and employee/employer relations.

## Program Services Branch

This Branch (comprised of Business Services, Office Services, and Facilities Management Sections) provides centralized clerical, duplicating correspondence, and other office service support, equipment control, space management, and facilities construction and repair planning services.

## XVI. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

## Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provided for the reimbursement of costs of legislative mandated programs.

Following is a table and descriptions of legislative mandates.

Program Requirements	1975-76	1976-77	1977-78
Totals, Legislative Mandates .....	343,010	546,498	579,288
General Fund .....	343,010	546,498	579,288

## a. X-Rays

Chapter 954, Statutes of 1973, attempts to ensure that students giving X-rays are closely supervised by a licensed instructor or a licentiate of the healing arts by authorizing the Department of Health to give approval to licentiate of healing arts board to provide radiological technology on-the-job training.

## Mandate

To have a radiation specialist, as defined, present in the same room when all but defined students in a school for radiological technologists administer diagnostic or therapeutic X-rays on a human being.

## b. Sudden Infant Death Syndrome

Chapter 453, Statutes of 1974, establishes a procedure to collect information about the frequency of infant death through a mandated autopsy. The intention of the bill is to provide counseling and information to parents who have experienced the tragedy of suddenly losing an infant.

## Mandate

Requires the county health officer, upon being informed by the coroner of any case in which sudden infant death syndrome is the provisional cause of death, after consultation with the infant's physician of record, to inform all concerned if a determination is made that sudden infant death syndrome is the cause or probable cause of death.

## c. LPS

Chapter 1061, Statutes of 1973, revises provisions for review and submission of county Short-Doyle plans, makes changes to timing of submissions, adds language providing for certain precare and aftercare services, provides that no administrative duties in local mental health services which serve a population in excess of 100,000 shall be carried out by a physician, psychiatrist, psychologist, or clinical social worker who is also performing in clinical program areas, and provides that the Department of Health shall submit a five-year plan for local mental health services by October 1 of each year.

## Mandate

This mandated impacts only upon counties in the following manner:

- (1) Include a quality control system, a placement directory and training program in each county Short-Doyle plan.
- (2) Perform administrative and supportive functions in local mental health services with staff skilled in those functions.

## d. Developmentally Disabled

Chapter 694, Statutes of 1975, grants developmentally disabled persons the right to have the court appoint a public defender or attorney to represent them during the appointment of a conservator or guardian in a guardianship hearing. Reimbursement is to be made for the cost of such legal service if the person is unable to pay the cost.

## e. Cystic Fibrosis

Chapter 835, Statutes of 1975, requires the Department of Health to conduct a program of care and treatment for those persons suffering from cystic fibrosis who are 21 years of age or older. The law provides that the county cost of administering the case under the Crippled Children's Program will be paid by the State.

## f. Health Planning

Chapter 854, Statutes of 1976 revised existing provisions of law relating to health planning and establishes a Certificate of Need Program for construction of health facilities and development of medical services. It makes the decisions of area health planning agencies only advisory, with the actual decision making power vested in the State Department of Health. The statute created a new certificate of need program under which construction or addition of new health facilities and services requires approval from the State prior to initiation of the project.

## DEPARTMENT OF HEALTH—Continued

## Mandate

Application for a certificate of need should be accompanied by a fee. Local agencies required to file applications will be reimbursed for filing fees.

## g. Nursing Assistants

Chapter 1202, Statutes of 1976 requires each long-term health care facility to adopt an approved training program for nurse assistants working in the facility. It also requires persons employed by a long-term health care facility as nurse assistants to be certified or enrolled in precertification programs.

This mandate impacts local government only to the extent that they operate long-term health care facilities and do not receive reimbursements from other sources for mandatory activities.

## XVII. SPECIAL PROJECTS ACTIVITIES

## XVIII. PROVIDER RATE INCREASES

Program Requirements	1975-76	1976-77	1977-78
Totals, Provider Rate Increases .....	—	—	\$90,577,949
General Fund .....	—	—	52,611,649
Federal funds .....	—	—	37,966,300

Provider rate increase funds for certain Department of Health programs are reflected separately for the 1977-78 fiscal year. The funding is to provide a 6 percent provider rate increase to all medical service providers with the exception of physicians which received an overall 19.7 percent increase in October of 1976. The funds are to be transferred to their respective program upon order of the Department of Finance. The following is the estimated allocation of funds by program:

1. Medi-Cal, \$87,315,600
2. Crippled Childrens Services, 1,027,950
3. Developmental Disabilities, 2,036,896
4. Child Health Disability Prevention, 197,503

## XIX. HOSPITAL LAWSUIT

Program Requirements	1975-76	1976-77	1977-78
Totals, Hospital Cost			
Containment Lawsuit.....	—	(\$33,950,000)	\$88,750,000
General Fund .....	—	(21,700,000)	56,800,000
Federal Funds.....	—	(12,250,000)	31,950,000

The 1976-77 Governor's Budget assumed that "Costs of hospital inpatient services will be controlled in accordance with an approved plan for payment on a reasonable cost basis." The Department's Hospital Cost Containment Plan which was approved by the U.S. Department of Health, Education and Welfare and implemented July 1, of 1975 at a 10 percent limitation and updated July 1 of 1976 to a 7 percent limitation was declared invalid by the U.S. District Court in California Hospital Association v. Mario Obledo et. al. The judgment which is currently being appealed, held that the amendments to Title 22 of the California Administrative Code which implemented cost containment were invalid. In addition, the judgment enjoined the Department of Health, Education and Welfare from approving any amendment to the California State plan which imposes a set percentage limit on the amount of reasonable cost increases sustained by California hospitals in providing services to Medi-Cal beneficiaries.

Although an appeal is currently in process, it is estimated to take up to two years before a final decision is obtained. The Department of Health has therefore requested a stay of the judgment pending appeal and has assumed that a decision on the stay will be received by February 1977.

The Attorney General has advised the Department to comply with the judgment pending a decision on the application for a stay. This includes making certain adjustment payments to hospitals which have received cost settlements and paying December 1976 and January 1977 actual costs. \$4,900,000 is included as an expenditure for this purpose.

If the stay pending appeal is denied, the Department of Health will be required to continue to reimburse the lesser of costs or charges without cost containment from February 1 to June 30, 1977. A proposed deficiency appropriation of \$16,114,700 is reflected within the Medical Assistance Program for this contingency.

If the State is not successful in obtaining a stay of the judgment pending appeal and fails in its attempt to implement an alternative cost containment system, an increase of \$56,800,000 will be required in 1977-78. This amount is reflected in the Budget to provide a vehicle for contingency funding.

## INTRADEPARTMENTAL TRANSFERS

Various funds budgeted in local assistance are expended via the state operations budget. This has the effect of including these expenditures twice in the Summary by Object. This adjustment reconciles program and traditional expenditures.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## EMPLOYMENT DEVELOPMENT DEPARTMENT

The Health and Welfare Agency through the Employment Development Department provides comprehensive statewide and local manpower planning, improves the efficiency of and accountability for delivery systems for manpower programs, places job-ready individuals in suitable jobs, provides qualified job applicants to employers, assists potentially employable individuals to become job ready, creates employment opportunities, and pays unemployment and disability insurance benefits.

The Department's overall balanced program is designed to achieve its five essential, interrelated and interdependent goals, none of which is less important than the others. The fundamental goals are:

1. Provide job placements.
2. Furnish job placements and related services to low-income clients.
3. Maintain an unemployment insurance and disability insurance benefit payment system.
4. Provide services to employers.
5. Place welfare recipients in jobs.

Employment Development offers a broad spectrum of services to the employables and their potential employers, including current and localized labor market information, instructions in job and employer requirements, seek-work methods, training and education in demand occupations, job development with employers and industries, placement services, and follow-up to improve job retention.

The resources and programs of the Office of Economic Opportunity are integrated into the objectives and programs of the Department.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Employment Services Program .....	\$52,272,732	\$59,178,868	\$61,472,507

XVIII. Separate identification of departmental rural and migrant expenditures .....		(397,403,931)	(342,055,447)

### I. EMPLOYMENT SERVICES PROGRAM

#### Program Objectives and Description

The citizens of the State of California benefit from having a stabilized and growing economy. However, many employer job openings remain unfilled with a loss in production of goods and services and at the same time, large numbers of potential job applicants are unable to find employment and suffer wage loss and reduced buying power.

The objective of this program is to provide the means successfully to serve employers and applicants by reducing the length of time a person is unemployed and the length of time a job is vacant.

#### Authority

Federal: Wagner-Peyser Act; Title, III, Social Security Act; Presidential Executive Order 11422, August 15, 1968.

State: Unemployment Insurance Code; Division I, Part I, Chapters 1, 9 and 9.5; Divisions 2, 3 and 4.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## Program Elements

a. Applicant assessment .....	578.1	612.5	612.4	\$10,541,505	\$12,349,815	\$12,832,731
b. Job placement .....	966.6	1,032.1	1,031.7	18,188,095	20,905,481	21,718,581
c. Indirect services .....	854.5	908.7	908.4	19,143,905	20,469,253	21,256,534
Administration distribution .....	191.3	251.5	251.4	4,399,227	5,454,319	5,664,661

## a. Applicant Assessment

The objective of this element is to identify the skills, knowledges and abilities of job applicants and also to assist them in making occupational choices. Assessment is accomplished through a variety of procedures such as completion of work application, analysis of work history, education, individual skills, knowledges, and abilities, and when necessary, by employment counseling and testing. Employment counseling will also be provided applicants with problems of adjustment for the purpose of manpower training, medical assistance, social services, and other services supporting employability.

Output				1975-76	1976-77	1977-78
Individuals assessed .....				1,095,665	1,281,440	1,282,704
Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	578.1	612.5	612.4	\$10,541,505	\$12,349,815	\$12,832,731

## b. Job Placement

The objective of this element is to make the best match possible between individual applicants and available jobs in the shortest time consistent with legal and reasonable requirements and with the qualifications and reasonable requests of job seekers. The second objective of this element is to develop job openings for those applicants for whom no suitable openings currently exist.

Output				1975-76	1976-77	1977-78
Individuals Placed:						
Total agricultural and nonagricultural .....				280,007	323,107	323,444
Placement Transactions:						
Total placement transactions .....				412,575	465,000	465,465
Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	966.6	1,032.1	1,031.7	\$18,188,095	\$20,905,481	\$21,718,581

## c. Indirect Services

The objective of this element is to provide support to the direct employment service functions by providing (1) manpower information, (2) employer and union services, (3) community services, (4) management, supervisory and technical services, and (5) career development training. Through such efforts, an effective network of statewide labor market information will be maintained, the relationship between potential users of employment services and the Department will be strengthened, and effective supervisory support will be realized.

Labor market information responsibility has been assigned to all field offices of the Department (except disability insurance offices), to collect, coordinate, maintain, and disseminate published occupational data and labor market information. Responsibility for identification and dissemination of state and national labor market information needed locally is vested with Employment Data and Research Division.

To strengthen the job placement operation, services to employers and unions are provided through field offices. These services include the provision of available applicant supply information, anticipated changes in the local economy and assistance in applicant recruitment.

To strengthen further the placement services, field office staff works with chambers of commerce, local office advisory committees, civic groups, and governmental agencies to stimulate broadly based community action to solve manpower problems hindering maximum development and use of human resources.

In order to insure that all job seekers may be given equal opportunity, Job Finding Work Shops are established to serve those applicants who cannot be placed by best match or job development attempts. The objective is to provide job seekers with techniques which they may independently apply to become employed.

In the area of employment services management and supervision, effort will be maintained to insure that the responsibilities and goals of the Department will be met and to take corrective actions to reduce deficiencies and deviations from goals.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	854.5	908.7	908.4	\$19,143,905	\$20,469,253	\$21,256,534

## II. FOOD STAMP PROGRAM

## Program Objectives and Description

The objective of Food Stamp work registration is to provide direct job placement and employability services to food stamp recipients. These services are intended to help the food stamp recipients become employed and self-sufficient so that food stamps are no longer needed. Applicants for food stamps are referred to EDD as part of the food stamp process to register for work or employability services. At EDD the applicant is interviewed and an assessment of his employability needs is made.

After EDD has conducted an assessment interview, the food stamp applicant will be regularly considered for any job openings or services that become available.

## Authority

Federal: Food Stamps—PL 91-671, PL 92-603 and PL 93-86 amendments to the Food Stamp Act of 1964.

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

## III. WORK INCENTIVE (WIN) AND RELATED SERVICES PROGRAMS

## Program Objectives and Description

The purpose of the Work Incentive (WIN) and related welfare programs is to assist recipients of Aid to Families With Dependent Children (AFDC) to obtain employment.

Various activities are included within this program: Work Incentive Program (WIN) and employment related social services. The objectives of these program elements are to place welfare applicants/recipients in regular, unsubsidized jobs at the earliest opportunity and to provide occupational training to the marginally employable.

Employable applicants for and recipients of AFDC benefits must register with EDD for employment, manpower services, and training. Intensified employment and supportive services are given to employable recipients in order to assist them in obtaining regular, unsubsidized employment. Coordination of employment and supportive services to those recipients is greatly facilitated by county social services (Separate Administrative Unit, SAU) staff and EDD staff sharing the same facility.

In an effort to obtain employment for registrants and WIN participants, EDD staff contacts employers by mail, telephone, and in person to develop jobs. *Intensive Manpower Service workshops are conducted for job-ready registrants and WIN participants. These workshops include guided work search, test-taking tactics, employer application form completion, and other areas selected to meet the needs of specific groups of participants.*

## Authority

Federal: WIN—Title IV of the Social Security Act, as amended by PL 92-248 and 92-223.

State: WIN—Unemployment Insurance Code, Division 2, Sections 5000-5308.

b. Employment related social services .....	2.5	1	1	258,314	829,258	382,773
Administration .....	68.2	78.6	78.6	1,215,563	1,382,839	1,434,143

## a. WIN

Registration with EDD is a condition of eligibility for AFDC benefits unless an individual is determined exempt under the exemption criteria established by federal legislation. Individuals determined exempt from registration may volunteer to register.

At the time of registration, registrants are assessed as to their degree of employability in their local labor market areas. Services are provided in relation to employability.

Recipients selected for WIN components are to be advised of their rights and responsibilities and the purpose of the WIN Program. This orientation may be provided on an individual or group basis.

Major WIN components are:

*Intensive Manpower Services (IMS) is designed to provide maximum exposure to the labor market immediately following registration into the WIN Program.* This component will enable the Department to provide employment services to a greater number of clients in a more timely manner. The emphasis will be on permanent and unsubsidized job placement.

The intent of WIN-OJT is to provide a job for the recipient in a contractual agreement which provides vocational training and an opportunity to enter regular, unsubsidized employment. It is intended that the recipient will remain in employment after the completion of the subsidized training period.

The intent of WIN-Public Service Employment (PSE) is to provide a job for the recipient with a public agency or private nonprofit organization which serves a public purpose. PSE is to be negotiated for jobs which would not otherwise be performed by regular employees.

Institutional Training teaches a specific occupational skill in a classroom setting. This training consists of basic education, English as a second language, General Educational Development, and vocational training.

Output	1975-76	1976-77	1977-78
WIN registrants .....	177,693	196,013	196,013

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	852.9	1,038.4	1,038.4	\$33,492,034	\$39,137,438	\$43,210,480

## b. Employment Related Social Services

Employment Related Social Services are designed to assist in the placement of WIN participants into jobs in the shortest time possible. The need for social services is identified by EDD staff and provided or arranged for by welfare department staff. Employment related services are child care, family planning, counseling services, employment related medical, remedial and health care services not available elsewhere, selected vocational rehabilitation not otherwise funded and other supportive services included in the WIN state plan.

EDD provides the state matching share money for WIN Child Care and thereby has the responsibility for the administration of these funds.

The cost of premises for the county and state staff housed in EDD offices is shared by the welfare departments.

Staff filling EDD social services positions facilitate the coordination of EDD local office and county welfare department activities. Only EDD coordinating staff are shown in this element. County welfare participation will be approximately 400 positions during the 1976-77 fiscal year.

Output	1975-76	1976-77	1977-78
Entered employment .....	33,821	34,250	39,500

Expenditures.....	2.5	1	1	\$258,314	\$829,258	\$382,773

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## IV. SERVICE CENTER PROGRAM

## Program Objectives and Description

The eight Service Centers are located in economically depressed areas of the State, where few job opportunities exist, and the population is largely disadvantaged, ethnic minority, young, poorly educated, and only marginally skilled. The Service Center Program serves these individuals by augmenting and expanding the employment and supportive services available from other funding sources.

The following locations have designated "Service Centers": San Francisco, Avalon, West Fresno, East Los Angeles, East Fresno, San Diego, Richmond, South Central Los Angeles.

The redesigned Service Center Program, implemented on July 1, 1976, provides individual employability development and placement services to applicants who are potentially employable as discussed in the "Report to the Legislature on the Service Center Program, June 1976." These persons are in need of more intensive services before becoming employable, because they are vocationally handicapped due to disability, lack of skill, obsolescence of job skills, limited education, poor work habits, or poor work attitudes.

Intensive employability services are provided by Case Responsible Persons (CRP's). CRP's are full-time case carriers, i.e., accountable for managing a caseload of potentially employable clients who need intensive employment-related services in order to be competitive in the labor market. The services to be provided include labor market information, employment exploration, job development, job referral, enrollment in educational or vocational training, counseling, testing, referral to outside agencies for removal of barriers to employment, and the provision of Case Services Funds to provide financial aid.

## Authority

Governor's Executive Order 66-11 (July 1, 1966). Chapter 1460, Statutes of 1968 UI Code, Section 301.5.

## Output

The effectiveness of the Service Center Program will be measured by the number of barriers to employment removed and the resulting number of successful closures.

	1975-76	1976-77	1977-78
Enrollments.....	—	14,710	15,446

## V. JOB AGENT PROGRAM

## Program Objectives and Description

Job Agents provide job placement and employability-related supportive services including removal of barriers to employment to economically disadvantaged clients residing in economically disadvantaged areas. Clients served by Job Agents are frequently those who cannot be served by other EDD staff because of the severity of their barriers to employment. The clients have single or multiple barriers to employment which include low-educational level, lack of skills, health problems, arrest records, or being a member of a minority group. Job Agents provide intensive services to their clients that are not available in all Employment Service offices. Clients receive continued support from Job Agents throughout their time in the caseload. The Job Agent is a case responsible person and as such retains total responsibility for the case.

Job Agents provide the following kinds of services to assist their clients:

a. Assistance in removing barriers to employment. This covers a wide spectrum of services. Job Agents provide transportation to job interviews and help clients to obtain suitable transportation. By developing a wide range of community resources and contacts, they are able to assist clients in getting medical attention, clothing, shelter, legal aid, educational tutoring, food, housing and other needed services that increase employability.

b. Case Services Funds. Effective with fiscal year 1976-77, each Job Agent position has been allocated \$2,500 to assist clients as appropriate. Case Services Funds may be used in seven broad categories related to obtaining or maintaining employment: transportation; wearing apparel; fines, licenses, dues; health care; work-related equipment; housing; miscellaneous. Job Agents will continue to use community resources and contacts they have developed before using Case Services Funds.

c. Training. Many clients have limited education and limited work experience. Job Agents are aware of training and educational opportunities in their communities and make referrals as appropriate. CETA, WIN, PSE, and NAB-JOBS are all training resources used by Job Agents as well as community educational and vocational programs.

d. Job Placement. Job Agents work toward placing their clients on jobs. They make referrals to jobs through regular ES job openings. Frequently they must develop jobs for their clients or negotiate with employers about existing job openings.

e. Follow-up. Job Agents provide intensive follow-up with their clients throughout the six-month employment period. They are required to report on the status of employed clients at 30-, 90-, and 180-day intervals. The follow-up period is intended to provide assistance and overcome obstacles so that the client can remain employed.

## Authority

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## VI. CALIFORNIA EMPLOYMENT AND TRAINING ADVISORY COUNCIL

## Program Objectives and Description

Establishment of the California Employment and Training Advisory Council was a result of the reorganization in fiscal year 1975-76 of the State Manpower Planning Office. The primary objective of the reorganization was to separate the State's administration of the Governor's Special Grant from its function as a Balance-of-State Prime Sponsor. The California Employment and Training Advisory Office (CETA-O) administers Governor's Special Grant funds provided to the State under the Comprehensive Employment and Training Act of 1973 for vocational education services, support of the State Manpower Services Council and statewide manpower services.

Through the California Manpower Services Council, the CETA-O provides for participation by local government, community-based organizations and labor, business and client groups in the development of manpower policy and comprehensive plans. CETA-O is also responsible for coordination of the employment and training-related programs and activities of all state agencies with those of local CETA Prime Sponsors.

By Executive Order B20-76, effective July 1, 1976, the office also assumed responsibility for coordinating the Public Service Employment (PSE) program for state agencies.

## Authority

Federal: Wagner-Peyser Act, Social Security Act; Federal Comprehensive Employment and Training Act of 1973 (CETA). Emergency Jobs and Unemployment Assistance Act of 1974, PL 93-567.

State: Division 1, Part 1, 9 and 9.5 and Divisions 2, 3 and 4 of the Unemployment Insurance Code; Employment Development Act of 1973.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

Administration .....	2.2	3.1	3.1	46,579	76,148	79,148

## a. Governor's Grant—California Manpower Services Council

CETA-O will provide staff and other necessary services in support of the State Manpower Services Council, provide technical assistance, and monitor the activities of the State's 37 prime sponsors. CETA-O will coordinate the programs of individual prime sponsors, state agencies, and local manpower and education organizations with the purpose of eliminating needless duplication in the delivery of manpower services to the State's unemployed, underemployed and economically disadvantaged. Funds not used for the above purpose will be used to fund special demonstration projects and other manpower activities.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	45.4	72.1	72.1	\$957,296	\$1,408,822	\$1,476,168

## b. Governor's Grant—State Manpower Services

CETA-O will provide labor market, economic, demographic, and other appropriate information for the State's 37 prime sponsors by funding positions in EDD's Division of Employment Data and Research. CETA-O will also fund model demonstration training projects to meet the needs of offenders, minority youth, women, and other special groups in the State's labor force and explore more effective ways to deliver manpower services and training.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	28.3	24.1	28.9	\$4,100,443	\$7,269,435	\$7,516,091

## c. Governor's Grant—Vocational Education

The Governor will provide vocational education funds to the Department of Education for the purpose of providing vocational education services to the State's 37 prime sponsors. The level of funding for services provided each prime sponsor will be based on each prime sponsor's percentage of the State's total number of adults in low-income families. The services to be provided will be in accordance with nonfinancial agreements developed between the Department of Education and each local prime sponsor. Vocational education services include classroom training, counseling, testing, assessment of need, and certain other services.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	—	—	—	\$9,050,889	\$9,135,937	\$9,436,219

## d. State Public Service Employment (PSE) Program

PSE funds provide unemployed and underemployed persons with transitional employment in jobs providing needed public services and provide training and manpower services to enable these persons to move into non-PSE, public-sector jobs. CETA-O has responsibility for providing coordination between prime sponsors and all state agencies. This coordination consists of contract negotiation and monitoring as well as assurances of maximum utilization of available funds. Over 2,600 PSE jobs have been created with transition to permanent employment having occurred for 50 percent of those employed.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	4.5	8.1	8.1	\$84,016	\$10,000,000	\$6,000,000

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

## e. Planning Rural Development Program

CETA-O will plan a finance and training system to assist the establishment of small farms as a means of generating self-employment opportunities for unemployed persons. Funds are being provided by the Department of Commerce.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	—	—	—	—	\$83,333	\$16,667

## VII. BALANCE OF STATE PROGRAMS

## Program Objectives and Description

The Employment Development Department has been designated by the Governor as the Balance-of-State Prime Sponsor for California. The Balance-of-State Prime Sponsor administers funds provided to the State under the Comprehensive Employment and Training Act of 1973 (CETA) for training and employment programs for 28 California counties whose populations are too small to qualify them for direct federal funding. The CETA Balance-of-State (CBOS) Office works in conjunction with local government to plan and deliver manpower training and services to meet the needs of the counties' unemployed, underemployed, and economically disadvantaged residents.

## Authority

Federal: Wagner-Peyser Act, Social Security Act; Federal Comprehensive Employment and Training Act of 1973 (CETA); Emergency Jobs and Unemployment Assistance Act of 1974, PL 93-567.

State: Division I, Part I, Chapters 1, 9 and 9.5, and Divisions 2, 3, and 4 of the Unemployment Insurance Code; Employment Development Act of 1973.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs (Federal funds) .....	59.6	69.5	60.7	\$38,490,977	\$42,466,912	\$20,100,000

## Program Elements

a. Title I—balance-of-state employment and training programs .....	30.4	38.5	38.5	\$6,758,079	\$6,818,471	\$6,880,034
b. Title II—public service employment .....	14.1	23.2	17.4	6,631,599	18,766,049	5,190,924
c. Title III—summer youth programs .....	2.6	2.3	2.3	2,719,325	3,352,708	3,499,092
d. Title VI—Emergency Employment Act ....	10.8	3.6	0.9	22,353,847	13,498,201	4,500,000
Administration .....	1.7	1.9	1.6	28,127	31,483	29,950

## a. Title I—Balance-of-State Employment and Training Programs

The CETA Balance-of-State Office (CBOS) acts as the prime sponsor for 28 of the State's smaller counties. In conjunction with county manpower agencies, CBOS plans and delivers such Title I employment and training programs as on-the-job training with private employers, work experience with public and private nonprofit employers for disadvantaged youth during the school year, full-time work experience programs for the adult unemployed and out-of-school youth, and classroom training that will lead to unsubsidized employment and/or advanced training.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	30.4	38.5	38.5	\$6,758,079	\$6,818,471	\$6,880,034

## b. Title II—Public Service Employment

Under Title II, CBOS as prime sponsor acts in conjunction with individual counties to provide public service employment for the unemployed in city, county, and state government agencies as well as private nonprofit organizations. The goal of public service employment is to train the unemployed for transition to full-time, unsubsidized employment.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	14.1	23.2	17.4	\$6,631,599	\$18,766,049	\$5,190,924

## c. Title III—Summer Youth Programs

In the 28 Balance-of-State counties, CBOS as prime sponsor provided CETA-funded summer employment for economically disadvantaged youth in local government agencies and nonprofit organizations.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	2.6	2.3	2.3	\$2,719,325	\$3,352,708	\$3,499,092

## d. Title VI—Emergency Employment Act

In response to the sharp increase in unemployment, Congress authorized Emergency Employment funds under Title VI of the CETA Act in January of 1975. CBOS, through agreements with individual counties, the State Personnel Board (for fiscal year 1975-76) and the State CETA Office (for fiscal year 1976-77), uses its allocation of these funds to provide emergency employment at the local level in all 28 counties and in the offices of state agencies. Since the purpose of Title VI funds is to provide emergency employment, transition to unsubsidized jobs is not emphasized as heavily as it is in Title II programs.

In October 1976, the Federal Government appropriated funds to continue Title VI programs through September 1977 in the Emergency Jobs Programs Extension Act of 1976.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## VIII. COMPREHENSIVE EMPLOYMENT AND TRAINING PROGRAM

## Program Objectives and Description

Many of the unemployed, underemployed and disadvantaged are unable to compete in the labor market without additional education, vocational training, work experience, on-the-job training incentives, or other assistance. The Comprehensive Employment and Training Program provides comprehensive manpower services, including the development and creation of job opportunities, training, and education to these disadvantaged individuals. However, because of the implementation of manpower revenue sharing for manpower services under the Comprehensive Employment and Training Act of 1973, EDD's participation in manpower programs is expected to decline as other manpower operations assume program responsibility under contracts with prime sponsors. Under CETA, the Employment Development Department's role in manpower programs is no longer that of presumptive deliverer of services. Even in the 28 Balance-of-State counties for which EDD is the prime sponsor, the counties plan their own manpower training expenditures as approved by EDD. In order to extend traditional employment exchange services funded to states to CETA clients and to encourage prime sponsors to choose EDD as a subgrantee, close cooperation and coordination will be maintained with both balance-of-state counties and the other prime sponsors in the State.

## Authority

Federal: Comprehensive Employment and Training Act of 1973.  
State: Employment Development Act of 1973.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	447.7	309	205.7	\$16,754,664	\$11,626,586	\$7,977,048

Administration .....	14.3	10.7	7.6	230,597	202,289	148,181

## a. Comprehensive Manpower Services (CETA Title I)

Funds allocated for manpower programs are allocated to 37 prime sponsors. The State, as prime sponsor for Balance-of-State (BOS), receives approximately 5 percent of the Title I manpower funds for the 28 smaller counties, while 95 percent of the funds go to the 37 local sponsors. EDD attempts to obtain reimbursable contracts with prime sponsors, in competition with other potential program operations. EDD has made a concerted effort to link EDD operations with those of the prime sponsors and to act as a major manpower training resource in local areas. CETA contract services with prime sponsors will continue throughout fiscal year 1976-77. EDD will provide work experience, on-the-job training, vocational education, placement and related services to target groups of eligible persons identified by the prime sponsors. Planning for fiscal year 1977-78 is based upon estimates from 1976-77 reports.

Output	1975-76	1976-77	1977-78
Training.....	6,406	3,173	1,227
Placement .....	3,865	2,132	1,343

Expenditures.....	314.7	192	93	\$14,490,406	\$9,294,877	\$5,631,138

## b. Job Corps (CETA Title IV)

The Job Corps program functions to provide basic and remedial education and entry-level vocational skill training in a residential setting to low-income youth (age 16 through 21) who have been determined unable and/or unwilling to benefit from the education and training available in their home environment.

The Employment Development Department recruits and enrolls disadvantaged young men to fill California's quota of openings in Job Corps Centers. This number is determined at the national and regional level of the Job Corps Division, Employment and Training Administration, Department of Labor, based on the number of openings available in Job Corps Centers to which California youth are referred. Additionally, the Employment Development Department provides placement services to all California male and female returnees and relocatees from other states who desire placement services.

The Job Corps program is a continuing program directed by the U.S. Department of Labor. CETA does not transfer responsibility to CETA prime sponsors for the Job Corps program.

Output	1975-76	1976-77	1977-78
Enrolled in training .....	3,272	3,517	3,500
Placed after training .....	3,083	3,100	3,200

<sup>1</sup> Includes youth placed in jobs, school and Armed Forces.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	56.6	52	52	\$985,935	\$963,160	\$999,360

## c. National Alliance of Businessmen—Managers of Manpower Development

The National Alliance of Businessmen (NAB) is a nonprofit corporation organized to assist persons who traditionally have had a problem in finding employment. NAB develops job and training opportunities for disadvantaged, exoffenders, welfare recipients, veterans and in-school youth. NAB is operated by the respective employers including 14 governmental executives on loan from EDD as managers of Manpower Development (MMD) who coordinate NAB placement activities. Personal and nonpersonal services costs of the MMD are paid by the Department of Labor.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

Output				1975-76	1976-77	1977-78
Placements.....				67,734	100,000	120,000
Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	15.1	14	14	\$382,685	\$402,864	\$420,828

## d. Labor Market Information (Title III)

Through funds provided by the Department of Labor under Title III of CETA, the Employment Department fulfills the State's obligation to prime sponsors by providing basic information regarding local labor area conditions. Using this information, the prime sponsor is then able to gear training programs to the unemployment problems in that particular area.

## Output

EDD gathers, analyzes, interprets and disseminates data on employment and unemployment in the State, economic regions, counties and prime sponsor areas. EDD also prepares labor area newsletters and reports as well as monthly labor market condition estimates.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	47	40.3	39.1	\$665,041	\$763,396	\$777,541

## IX. PUBLIC WORKS EMPLOYMENT ACT OF 1976 (Title II)

## Program Objectives and Description

To establish an antirecession program, the federal government has made funds available under Title II of the Public Works Employment Act of 1976 (PWEA) to state and local governments to stimulate economic recovery. This program represents California State Government's participation in the national effort. The main objective of this program is to assist in the nation's economic recovery by enabling the maintenance of basic program services customarily provided by the State which might otherwise be cut back due to lack of available funds.

An estimated \$50 million will be paid to the California State Government under PWEA for the five calendar quarters beginning with July 1, 1976. The current federal authorization covers the period July 1, 1976 to September 30, 1977. Each quarter's allocation must be obligated or appropriated within six months of receipt. The unobligated portion is subject to recovery by the United State Treasury Department.

The Employment Development Department (EDD) has been assigned administrative responsibility for PWEA Title II state government projects. In this role EDD will monitor and report the progress on approved projects and make recommendations for the efficient and proper use of PWEA funds in accordance with state procedures and federal rules and regulations.

## Authority

Federal: Public Works Employment Act of 1976 (Title II, P. L. 94-369) enacted July 22, 1976.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## X. UNEMPLOYMENT INSURANCE PROGRAM

## Program Objectives and Description

Seasonality of certain industries, along with fluctuations of the economy and changes in technology, programs, and work methods create conditions of uncertainty for workers as to whether they will enjoy uninterrupted employment. To alleviate the economic suffering that accompanies periods of involuntary unemployment and act as a stabilizer of the economy, unemployment insurance is a necessity.

Each year one out of eight protected persons finds that he must use this insurance. Approximately 75 percent of the labor force is covered by state or federal unemployment insurance programs. Those persons generally not protected are comprised of new entrants into the labor force, the self-employed, local government employees and domestic employees.<sup>1</sup> The Emergency Jobs and Unemployment Assistance Act of 1974 provides for a temporary program of Special Unemployment Assistance to workers who are unemployed and not otherwise eligible for unemployment compensation or allowances under any state or federal law. This temporary coverage for most workers not heretofore afforded unemployment insurance protection, became effective during December 1974, and under the Act, is extended to December 31, 1977 with phaseout allowing for payments for weeks ending not later than June 24, 1978. In addition, the Emergency Unemployment Act of 1974 was further amended commencing March 30, 1974 to provide federal funds for an additional 13 weeks up to a maximum of 26 weeks during periods of specified levels of unemployment. Under current law, the Emergency Unemployment Act of 1974 will expire on March 31, 1977. Ex-servicemen and Federal Government employees are covered under regular special federal provisions.

The program's objective is to provide a system of income maintenance based on insurance principles.

Subject employers are identified, registered and tax rates determined by the Department of Benefit Payments who also make unemployment insurance tax collections and maintain wage records to establish the monetary eligibility of claimants to unemployment insurance compensation. Benefits must be paid promptly when it is determined that claimants meet eligibility requirements as established by the Employment Development Department.

<sup>1</sup> The Unemployment Compensation Amendments of 1976 (HR 10210), were signed into law by President Ford on October 20, 1976. This new federal law has been designated Public Law 94-566. Pursuant to the provisions of PL 94-566, effective January 1, 1978, coverage is extended under specified conditions to domestic workers and employees of state and local governments and nonprofit elementary and secondary schools.

## Authority

Federal: Title III and Title IX of the Social Security Act; and Chapter 85, Title V, U.S. Code, Emergency Jobs and Unemployment Assistance Act of 1974 (PL-567).

State: Division 1, Parts 1, 3, and 4, Sections 101, 3501, and 4001 of the Unemployment Insurance Code.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	5,667.7	4,922.2	4,565.7	\$2,195,004,130	\$2,114,548,738	\$1,812,294,951

<sup>1</sup> Positions and dollars for WIN Appeals and DI Appeals are included under III Work Incentive (WIN) and Related Services and XI Disability Insurance respectively.

## a. Unemployment Insurance Benefit Functions

The objective of this element is to pay benefits promptly when it is determined that claimants meet eligibility requirements and to assist the unemployed insurance claimant to become reemployed.

Field offices process claims, determine eligibility, and make payments varying from \$30-104 per week depending on a claimant's earnings in covered California employment during a prior one-year period which is the base period. In addition, in cooperation with all other states, the District of Columbia, Puerto Rico, the Virgin Islands and Canada, the Department administers an interstate unemployment insurance program.

Output	1975-76	1976-77	1977-78
Number of benefit weeks claimed .....	33,521,665	28,828,500	25,500,000

**b. Unemployment Tax Collection**

This contractual program is accomplished by the Department of Benefit Payments and funded through a federal grant to this Department. The figures relating services provided by the Department of Benefit Payments for Employment Development Department are based on federal formula and are not necessarily accepted under workload computations of the State of California.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures:						
Employment Development Department .....	35	40.3	40.3	\$649,008	\$1,362,601	\$1,412,832
Department of Benefit Payments.....	(559.4)	(710)	(710)	9,537,964	12,209,974	12,671,057

**c. Unemployment Insurance Support**

The unemployment insurance support element has always been critical to a viable quality program. Careful utilization of management and technical resources have, over the years, placed California as one of the low-cost states commensurate with a high-quality program. The economy of the program and the quality of operations are attributable to effective management and supervision, maximum utilization of staff technical services, planned staff development, continuing research to effect.

The primary mission of supportive services, therefore, is to provide the Unemployment Insurance Program with the direction and resources to improve field office capability to better serve the workers and employers of the State.

Implementation of the embossed card payment system was completed during fiscal year 1975-76. This claims processing technique is highly automated and provides better service to the public and more effective controls.

Other support activities will include the review of approximately 125 pieces of state and federal legislation affecting the unemployment services function of the Department and necessary regulations will be written and implemented for new laws.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures:						
Employment Development Department .....	595.9	390.6	374.8	\$12,438,170	\$8,767,217	\$8,772,001
Department of Benefit Payments.....	(148.3)	(128.5)	(127.1)	2,737,058	2,618,557	2,688,113

**d. Appeals process**

The state and federal programs in which an appeal or petition may be filed are: unemployment insurance benefits, including benefits claimed by federal and state employees, exservicemen, and individuals pursuing retraining courses; unemployment benefit hearings for persons living in California but claiming from another state; benefit adjudication for individuals who had their hearing outside California but are claiming benefits based on California wages; unemployment disability insurance appeals, including claims against voluntary plan carriers; and determination of tax liability of employers, e.g., transfers of reserve accounts, claims for refunds, and assessments.

A claimant or interested employer may appeal a determination to an Administrative Law Judge (lower authority), and an employer may file a petition to an Administrative Law Judge (lower authority) from an assessment, denial of a claim for refund, or protest to charges to the employer's reserve account, or a transfer of a reserve account. The Administrative Law Judge's decision may be appealed by the interested parties, including the Department, to the Appeals Board itself (higher authority).

The object under lower authority is to afford each party a fair and impartial hearing; to issue a decision setting forth all material facts relevant to the issues and contentions of the parties and the applicable principles of law; and to hold hearings and issue decisions promptly within federal time-lapse standards.

The objective under higher authority is to review thoroughly the hearing transcript, the exhibits, and decision of the Administrative Law Judges and written argument of the parties to determine whether the rights of the parties were properly decided. Higher authority also interprets the law by designating appropriate cases as precedents for the guidance of Administrative Law Judges, claimants, employers and the Department.

The Appeals Division is administered by the California Unemployment Insurance Appeals Board. The Board consists of five members, appointed by the Governor, for four-year terms.

The Appeals Board has adopted rules, which set forth the rights and obligations of parties. These rules are published in subdivision 2, Title 22, California Administrative Code. Parties are also informed of their rights on all forms used by the Appeals Division.

Output	1975-76	1976-77	1977-78
Unemployment Insurance:			
Ruling appeals (lower authority) .....	4,655	4,360	3,820
Ruling appeals (higher authority) .....	200	190	165
Total benefit appeals (lower authority) .....	85,036	85,745	71,950
Total benefit appeals (higher authority) .....	11,541	11,619	9,750
Regular Contribution Appeals:			
(Lower authority) .....	847	795	695
(Higher authority) .....	35	32	28
Disability Insurance Appeals Disposals:			
State plan .....	3,032	3,180	3,455
Lower level .....	2,771	2,900	3,150
Higher level .....	261	280	305

Appeals process workloads reflect the total workload in Unemployment Insurance, Disability Insurance and the Personal Income Tax Program. The Appeals Board (lower and higher authority) serve all of these programs, thereby providing a fair hearing process for departmental benefit and tax functions. The budget for the Appeals Board is based on the estimated base workload approved by the Employment and Training Administration.

Procedures are not expected to materially differ in 1977-78 and will be adapted to state or federal legislative changes.

<sup>1</sup> Positions and dollars for WIN Appeals and DI Appeals are included under III Work Incentive (WIN) and Related Services and XI Disability Insurance respectively.

## XI. DISABILITY INSURANCE PROGRAM

## Program Objectives and Description

In 1946, the Legislature established a system of wage loss indemnification for workers disabled because of nonoccupational illness or injury. When hospitalized, additional costs accrue to the worker. To help defray these costs, additional benefits are provided. To ensure prompt and efficient service to the claimants, the program is administered through decentralized field offices established to process claims, determine eligibility and compute entitlement, maintain accounting records, make claim payments, and provide informational services.

Employers may substitute the state plan of disability insurance with a voluntary plan which must provide at least equal benefits payable at costs not to exceed those under the state plan. There are provisions for elective coverage for employers, self-employed persons and family employees.

## Authority

Division I of the California Unemployment Insurance Code.

--	---------	-------	-------	-----------	-----------	-----------

## a. Disability Insurance Benefit Payments

When disabled for nonoccupational injury or illness, the eligible worker receives a weekly benefit amount of from \$25 to \$119 based on wages paid during a 12-month base period. Maximum benefits payable during a period of disability are 26 times the weekly benefit amount or one-half the base period earnings, whichever is smaller. Hospital benefits are payable at the rate of \$12 a day for a maximum of 20 days of confinement in a hospital or, under certain specific conditions, a nursing home.

Disability insurance coverage includes (a) most persons protected by unemployment insurance; (b) employees of district hospitals; and (c) employers, self-employed persons and family employees, if they elect the coverage. To receive disability insurance a person must (1) file a claim in accordance with regulations; (2) serve a noncompensable seven-day waiting period, except that the waiting period is waived from the date of confinement in a hospital; (3) have sufficient wage credits to establish an award; (4) submit to a reasonable examination when required by the Department; and (5) file a certificate of disability signed by a duly authorized doctor of medicine, osteopath, chiropractor, dentist, optometrist, podiatrist, government medical officer, or religious practitioner.

## b. Voluntary Plan Review

The Unemployment Insurance Code permits employers to substitute private plans for state plan coverage, provided that the costs to the employee do not exceed the cost of the state plan. A voluntary plan may be either insured by an admitted disability insurer, or it may be self-insured. Self-insured plans require that the employers deposit security as determined by the Department to guarantee compliance with the terms of the plan.

The Department's administrative responsibilities connected with voluntary plans concern the review and approval or disapproval of voluntary plans submitted, depending on whether or not such plans exceed state plan coverage. In addition, the Department conducts ongoing evaluations of approved voluntary plans, to insure continued compliance with the provisions of the Unemployment Insurance Code.

Employees are relieved of statutory contributions to the State Disability Fund while covered under an approved voluntary plan and are ineligible for state plan benefits for any disability which commenced while they were covered under the voluntary plan. Voluntary plans must bear the additional administrative cost incurred to the Disability Fund as a result of voluntary plan activities. Such costs are assessed annually.

## c. State Employees Disability Insurance Benefit Payments

Permanent and probationary full-time state officers and employees who are members of the Public Employees' Retirement System or the State Teachers' Retirement System are covered for disability insurance effective with periods of disability commencing on or after October 1, 1976. The Legislature established a system of wage loss indemnification for state employees disabled because of non-occupational injury or illness to compensate in part for wage loss when the state employee has exhausted sick leave. Benefits of one-half of full pay or \$125 per week, whichever is less, are provided for a maximum of 26 weeks for any one period of disability. To ensure prompt and efficient service to the disabled state employee, one field office has been designated to process claims and determine eligibility, with assistance in field visits and informational services by the other field offices of the disability insurance program. The State Controller will pay the benefits when authorized by the Employment Development Department.

Division 5 of Title II of the California Government Code and Division 1 of the California Unemployment Insurance Code.

## XII. MIGRANT SERVICES OFFICE

## Program Objectives and Description

The major objective of this Office is to provide, through local housing authorities, housing and supportive services at a reasonable cost to migrant farmworkers and their families during peak harvest season. Part of the supportive service provided includes day care which provides a supervised environment for the young children and contributes to an orderly, enriched childhood experience and frees the mothers for their contribution to the family income. Such services are provided to children ages two through five. In addition to day care, Migrant Services also provides the tenants in its housing centers with access to various other social services including health and medical services, nutritional services, educational programs for school-age children and career guidance, counseling programs, and in five centers there exist infant care centers which take care of children who are from one day to two years of age.

Section 7100 of Division 7, Title I, Government Code, as amended by Chapter 1460, Statutes of 1968.

## a. On-Season Maintenance

During the six-month period of time during which the centers are occupied by migrant farmworkers and their families, the 25 housing centers function as small communities for their 13,000-14,000 residents. Management of the centers during the harvest season is focused on maintaining the ongoing delivery of services to the tenants. Such services include the continuous provision of water and fire protection, the scheduling of tenant council meetings, and the coordination of a variety of social services.

These activities require ongoing collaboration with 14 housing authorities, 25 center managers, 25 day care managers and 6 regional offices of Migrant Education. It is through work conducted with these agencies that service is provided to those living in the centers.

Output	1975-76	1976-77	1977-78
Persons served .....	13,503	14,000	14,000

Expenditures .....	\$419,383	\$973,298	\$973,298

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## b. Off-Season Maintenance

During the six months when the center is empty, management focuses on the maintenance of the family facilities, bringing them up to standards as specified in the California Migrant Master Plan Maintenance Manual. Such maintenance is made necessary through wear during the on-season. Normal maintenance includes, but is not limited to, such activities as painting and sanitizing buildings and furniture, repairing appliances and fixtures, attending to the landscape, patching roads, and making general repairs to community facilities. The aim of this seasonal rehabilitation is to make the centers physically ready for the following on-season.

Output	1975-76	1976-77	1977-78
Units maintained .....	2,118	2,118	2,118
Input			
Expenditures .....	\$408,487	\$410,000	\$410,000

## c. Housing Rehabilitation

The buildings which are currently being used for housing in the 25 centers were originally constructed about 10 years ago and were designed to last for approximately five years. Consequently, somewhat over one-third of the houses are in need of replacement while another 15 percent require the addition of individual sanitation facilities. The rehabilitation of these structures will take place over a three-year period which began in 1976-77. The Migrant Services Office is currently contracting with an architectural and research firm which will provide designs for the new buildings and for the needed structural rehabilitative additions to existing dwellings as well as assessments of the child care centers and other such buildings.

Additional improvements to the centers may include the use of solar energy equipment, proper drainage and pavement of roads, and landscape at each of the 25 centers. The entire rehabilitation effort will provide off-season work for those families who desire work during the winter months.

Output	1975-76	1976-77	1977-78
Houses replaced .....	—	310	325
Sanitation facilities replaced .....	—	115	20
Input			
Expenditures .....	—	\$2,000,000	\$1,750,000

## d. Day Care

The average size of the families residing in state-sponsored centers is in excess of five members each. Since each family is a total economic unit, it is necessary for all available family members to work to contribute to the family income and as a result, younger children are often left unattended. The Migrant Services Office, in cooperation with the State Department of Education (SDE) currently provides day care services for children ages two through five over a 12-hour period of each day. This service includes supervision, meals, participation in educational programs operated by SDE, rest and play. All care is provided by qualified teachers and day care aides. In addition, the State Department of Education through the Office of Compensatory Education offers Mini-Corps and Medi-Corps personnel who assist the migrant children in the local schools and assist the families with medical and related problems. Day care services are provided through interagency agreement between EDD and the Department of Education.

Output	1975-76	1976-77	1977-78
Children served .....	1,896	2,100	2,100
Input			
Expenditures .....	\$507,473	\$563,000	\$563,000

## e. Migrant Administration

Approximately 100,000 migrant farmworkers enter California each year. Various services are made available to them through the Migrant Services Office. The Office contracts with over 40 different county-level agencies, each of which has its own policy and program goals. Additionally, the Office must deal with the centers on a one-by-one basis to satisfactorily cope with the idiosyncracies of the various agencies and personnel involved in providing services to center residents.

This pattern of operation requires lengthy periods of personal as opposed to procedural involvement on the part of a Migrant Services staff which finds its territory extending from Bakersfield to the Oregon border.

## XIII. STATE ECONOMIC OPPORTUNITY OFFICE (SEOO)

## Program Objectives and Description

The State Economic Opportunity Office links state government to federal programs which aid low-income people, and to local agencies which serve the low-income population.

The major objectives of the Office are to provide access for low-income people to government and to the economic system. Minor objectives are to provide assistance to local communities and anti-poverty agencies.

SEOO coordinates Housing Intern programs and Weatherization programs. In these programs, SEOO acts as a pass-through for funds for subgrants to approved community groups, and provides staff to work with local groups.

SEOO will analyze federal and state programs which affect low-income people, compare them to determine needs and priorities, and develop strategies to increase low-income participation; prepare a report on the Status of Poverty in California which will serve as a poverty planning document for state agencies.

SEOO will promote access to the economic system by assisting local communities to develop overall economic development plans for low-income people and by developing new methods to involve the low-income population.

SEOO will help increase participation of state agencies in anti-poverty programs; increase the involvement of low-income people in the governmental process; provide management assistance and training to local anti-poverty agencies; and make recommendations to the Governor regarding their federal grants.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## a. Local Agency Assistance

The primary function of this element will be to identify state resources on behalf of local agencies providing services to the poor. SEOO links state government to federal programs which aid low-income people and to local agencies which serve the low-income population. The major objectives of the Office are to provide access for low-income people to government and to the economic system. Minor objectives are to provide assistance to local community and anti-poverty agencies, and to make recommendations to the Governor regarding anti-poverty programs.

Expenditures .....	40.5	43	43	\$880,680	\$1,109,544	\$761,003

## b. Research Projects

This element is for the development of innovative projects which seek out and assist in the mobilization of state, federal, local government, community or private resources (programs, expertise, funds, etc.) that can be effectively marshalled to serve the CAA's and the Balance-of-State counties.

A product of this element is the Housing Intern Program which trains Housing Loan Assistants and Housing Loan Aids to package rural housing loans for low-income people available through the Farmers Home Administration. Thirty trainees have been placed in state, federal, and private sector employment. This program will be transferred to the Department of Housing and Community Development in fiscal year 1977-78.

The Native American Personnel Systems Capacity Building Project was developed in cooperation with the State Department of Agriculture, Inter Personnel Act and the Northern California Institute for Local Government which provided training to Native American groups in management, personnel, and Affirmative Action to strengthen the Native American groups they represent.

Expenditures .....	10.8	29.5	—	\$187,273	\$893,077	—

## c. Demonstration Projects

This element will deliver services to poverty areas not reached by conventional methods or agencies.

Programs are developed as a result of marshalling resources identified by the Local Agency Assistance Element.

One such resource is the Balance-of-State CETA and CETA Discretionary Funds. A statewide Energy Skills Program has been developed to train Energy Conservation Specialists. This was done by subcontracting with local CAA's and community group which will retro-fit (weatherize) homes for the low-income elderly and handicapped. This program is supported by trainers in cooperation with the State Energy Commission and housing and community development agencies.

SEOO will also monitor the progress of the State CETA Ex-Offender Program and administration of the Balance-of-State Summer Youth grants to delegate agencies.

SEOO does not project expenditures beyond September 30, 1977, under the CETA Energy Conservation or Weatherization Program.

## XIV. CALIFORNIA VIETNAM VETERAN OJT PROGRAM

## Program Objectives and Description

This program has been phased out. In fiscal year 1974-75 training opportunities (slots) were developed for Vietnam veterans. All of the money allocated for on-the-job training was obligated in fiscal year 1974-75; however, approximately 323 trainees were in training in fiscal year 1975-76 and the employers were reimbursed after the training had been given. A total of \$44,644 was expended in administration of this program during fiscal year 1975-76. Anticipated during fiscal year 1976-77 are expenditures of \$7,057 and an appropriation revision of \$184,756.

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

## XVIII. RURAL AND MIGRANT AFFAIRS

## Program Objectives and Description

In the State of California today, there are two million Californians living in rural areas. Several agencies and departments provide services which impact rural and migrant populations. Previously these programs had no central focal point for coordination of efforts. This resulted in duplication, overlap, and in some instances gaps in services to rural areas. In order to overcome these coordination problems, and to focus new energy in programs impacting on rural and migrant populations, the Health and Welfare Agency has been directed by the Governor's Executive Order B17-76 to take the lead in the coordination of state activities and services related to rural and migrant affairs.

EDD administers several programs that impact the State's rural and migrant population. The proportionate amount of major services of the Department's programs are outlined below in an informational display. The child care services are employment related and are made available through the Work Incentive (WIN) Program. The Department of Benefit Payments will have all responsibility and funding for WIN social services in FY 1977-78. The Employment Development Department primarily provides manpower planning, delivery systems for manpower programs, job placement activities, creates employment opportunities, and pays unemployment and disability insurance benefits. It is estimated that 13.4% of EDD services provided in these areas are for rural and migrant populations. In addition, EDD operates the Migrant Services Program which provides services solely to the migrant farm worker. The expenditure detail by source of funds is provided in the individual programs.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Capital Outlay

STATE BUILDING PROGRAM EXPENDITURES	Actual 1975-76	Estimated 1976-77	Proposed 1977-78
<b>SUMMARY</b>			
Employment Development Department (expenditures) .....	-\$616,322	\$297,810	\$2,691,235
Employment Development Department Contingent Fund .....	-110,143	185,000	-54,822
Unemployment Trust Fund (Reed Act) .....	-506,179	112,810	2,746,057

## GENERAL ANALYSIS

The capital outlay budget of the Employment Development Department continues the major departmental building program started in 1964-65. The Department is resuming its emphasis on replacing leased premises with state-owned buildings where feasible so as to reduce future rental payments. Concurrently, the Department is continuing with its policy of improving and upgrading existing premises as needed. Cost of the construction of buildings and building additions will be recovered through rental amortization, which restores money to the funds from which capital expenditures were made.

## DEPARTMENT OF REHABILITATION

The primary goal of the Department of Rehabilitation is to rehabilitate and place into suitable occupations the physically and mentally handicapped with special emphasis on serving the severely and moderately disabled. It does this by providing, as needed by the disabled person, a variety of services, including counseling, independent living training, vocational training, physical and mental restoration, placement, and followup services. The Department also has a number of subsidiary goals, including the removal of architectural and transportation barriers to the disabled, the provision of special adjustment training to the blind, the operation of food vending and service facilities for the blind, and the development of programs for the disabled related to public and private nonprofit community rehabilitation facilities.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78

Personnel years .....	2,237.6	2,302.3	2,304.9

### Significant Program Changes

During 1976-77, the Department revised its policy on services to individuals by giving priority to the severely and moderately disabled and at the same time providing services to those who have substantial vocational handicaps that derive from mild disabilities.

For the 1977-78 fiscal year the department anticipates no significant program changes, though it will be evaluating the effects of major changes made the previous year, which included:

1. The establishment of a policy on priorities which assures services first to persons with severe functional limitations due to disability and then, within available resources, to those with moderate limitations.
2. The general reorganization of departmental programs to make them more effective in meeting the mission of the Department.
3. The expansion of services to the Industrially Injured through the use of Title II Public Works Employment Act funds. During fiscal year 1977/78 this program will be funded mainly from reimbursements from insurance carriers as provided by Chapter 1435, Statutes of 1974, (AB760).
4. Services to the blind are being improved by the addition of one counselor-teacher to a district office which currently did not have such a position. This will provide equitable opportunities for blind services in all areas of the State.
5. Six rehabilitation counselors for the deaf were added to the staff to improve services to this disabled group which is currently underserved.
6. Eight rehabilitation counselors were added to district offices to serve the developmentally disabled. Such specialists were not available in those district offices.
7. Eighteen resource specialists and 6 clerical positions are added to improve supportive services to field case carrying counselors.

## I. REHABILITATION OF THE DISABLED

### Program Objectives and Description

The Rehabilitation of the Disabled Program is the department's major service program. The department estimates that for the budget year there will be some 537,500 disabled Californians of working age who have a need for basic vocational rehabilitation services in order to obtain or retain employment. Many others have a need for rehabilitation services not necessarily vocational in nature.

The department delivers basic vocational rehabilitation services to the general disabled community through district and branch offices throughout the state. A number of cooperative agreements between the department and state and local agencies (educational institutions, hospitals and mental health treatment facilities, alcoholism treatment programs) assure specialized services to particular target groups among the disabled population.

Other kinds of rehabilitation services are provided either to nondepartmental clients such as the blind who need reader services to participate in college programs, or blind persons without vocational potential who need training in independent living skills. The Department is also assisting ten private, non-profit groups to establish Independent Living Centers statewide. These centers will be developed to provide prevocational training in the various skills necessary to enable the severely disabled to cope effectively with the environmental factors that serve as barriers to their independence.

### Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112).

Rehabilitation Act Amendments of 1974 (Public Law 93-516).

State—Welfare and Institutions Code, Division 10, commencing with Section 19000.

DEPARTMENT OF REHABILITATION—*Continued*

## a. Basic Rehabilitation Services

This program element is the single most important service delivery effort of the department. Through rehabilitation counselors the department evaluates applicants for rehabilitation services, determines eligibility for services, develops jointly with the disabled person individualized written rehabilitation plans, identifies specific services required for rehabilitation, provides such services either by coordination of available community resources or purchase of services from the community, helps the disabled person upon completion of the plan to find suitable employment, and maintains follow-up contact to assure employment stability.

The general disabled public receives such services through a basic program which is 80 percent financed by federal funds and 20 percent financed by state and other matching funds. The department's programs to serve beneficiaries of Social Security Disability Insurance and recipients of Supplemental Security Income benefits are financed with 100 percent federal funds. Special cooperative agreements with other state and local agencies are financed with 80 percent federal funds and 20 percent with funds from the cooperating agency; these programs direct rehabilitation services to particular target groups such as the mentally ill, the mentally retarded, alcoholics and drug addicts, and disabled high school and college students. In addition, as a result of Chapter 1435, Statutes of 1974, the Department provides services to disabled individuals with work related injuries through reimbursement from insurance carriers. 66.5 positions were administratively established in the current year and are continued in the budget year for the industrially injured program. The start up costs are funded from Title II, PWEA, and future costs will be funded by reimbursements.

During fiscal year 1975-76 the department rehabilitated 14,522 disabled persons, including a total of 4,646 public assistance recipients and 995 beneficiaries of Social Security Disability Insurance. Rehabilitations of this kind represent considerable annual public savings in Welfare, Medi-Cal and Social Security costs, as well as increased tax revenue from the earnings of rehabilitants. The department estimates that the total economic benefits which will accrue annually from the rehabilitation of disabled persons during 1975-76 will amount to \$16,787,601.

In accordance with the Federal Rehabilitation Act of 1973, the department has established a priority system of extending services to the severely disabled. In 1975-76 the severely handicapped comprised 35 percent of disabled persons rehabilitated. This year's Individualized Written Rehabilitation Plan objective is 25,715 of which 58 percent are intended to be developed for the severely disabled. Among efforts being implemented to give priority services to the severely disabled are:

- 40 field positions were administratively established in the current year by redirecting existing resources to improve the rehabilitation process. The positions are proposed to be continued in 1977-78.
- Heavy emphasis on staff training to work with the severely disabled.
- Greater involvement with the severely disabled who are students in the state's community colleges.
- Encouragement of increased use by rehabilitation counselors of extended evaluation services to determine the employment potential of the severely disabled.
- The allocation of case-carrying staff and case service funds according to the proportionate numbers of severely disabled persons in given geographic areas.

b. Other Rehabilitation Services

The department also provides certain general rehabilitation services not necessarily vocational in nature. These include the services of counselor-teachers who provide in-the-home counseling and training in independent living skills to the blind and deaf-blind with no potential for employment. Another group of blind individuals who are not vocational rehabilitation clients receive reader services from the department enabling them to participate in college programs. Such individuals are attempting to further their education, but may not have vocational goals in mind. The department makes every attempt to stress the vocational goal in the above situations wherever possible.

The department also purchases specialized workshop services for severely disabled persons who can, after training, qualify for its basic rehabilitation services. This 2 year demonstration program in accordance with Chapter 1440, Statutes of 1972 required the administrative establishment of 4.5 positions in the current year and continuation in 1977-78.

Output	1975-76	1976-77	1977-78

II. BUSINESS ENTERPRISE

Program Objective and Description

Business Enterprise provides comprehensive training and supervision enabling legally blind to support themselves in the operation of vending stands, snack bars and cafeterias, and provides employment opportunities for the disabled in both the public and private sectors. One architect was administratively added in the current year and continued in 1977-78 and 2 business enterprise officers are proposed for 1977-78 to service additional locations.

Authority

Federal—Randolph Sheppard Act. Rehabilitation Act of 1973 (Public Law 93-112).  
State—Welfare and Institutions Code, Division 10, commencing with Section 19000.

## a. Business Enterprise

Business Enterprise will continue to provide training and employment of blind persons in the operation and management of food service installations such as vending stands, snack bars and cafeterias.

The staff promotes and develops new locations in public and private buildings for vending and food service operations. Services also include the design and installation of new operations, remodeling of older facilities, ongoing supervision of operators, and general business services.

Legally blind persons who have been trained are selected on a competitive basis to operate the enterprises. They retain the profits except for a percentage prescribed by law, which is returned to set aside funds for establishment of new enterprises and the maintenance of equipment in existing enterprises.

Business Enterprise is being expanded with 25-30 new locations being developed statewide. In addition, remodeling and alterations of 15-20 existing facilities will be carried out.

## Output

	1975-76	1976-77	1977-78
Business locations (year end).....	307	315	342
Gross income of locations.....	\$19,800,581	\$20,445,651	\$22,251,465
Number of persons employed.....	760	776	840
Disabled persons employed.....	95	155	290
Blind persons trained.....	50	30	60
Estimated benefits from employees and operators, tax revenues, welfare and medical savings .....	\$2,460,378	\$2,517,914	\$2,712,098

## Input

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	34.6	37.7	40	\$2,062,014	\$2,219,000	\$2,428,096

## b. Job Development

Job Development is comprised of four components: Small Business Opportunities, Industrial/Labor Relations, Manpower Development, and State Employment Opportunities.

## Output

The Small Business Opportunity component will coordinate establishment of four business enterprises for the severely disabled; provide special training for self-employment for six severely disabled persons; and evaluate and follow-up on the training.

The Industrial/Labor Relations component will develop agreements with ten major employers to provide employment opportunities for the department's clients, and develop and monitor agreements with five labor organizations to improve the penetration of the department's clients into the work force represented by these organizations.

The Manpower Development component will research and catalogue existing community manpower programs in the Los Angeles area, city and county, and will develop other community resources, disseminate resource information to the districts and coordinate use of all manpower resources.

The Department's effort with the State Personnel Board will identify obstacles to recruitment, testing and employment of the disabled in state service, assist in developing policies to overcome these obstacles, and provide liaison between the department's staff members and SPB staff and the personnel sections of other departments and agencies.

## Input

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	-	10.2	9.8	-	\$323,402	\$322,554

## III. DEVELOPMENT OF COMMUNITY REHABILITATION RESOURCES

## Program Objectives and Description

The department's Community Resources Development Section works cooperatively with local government and private nonprofit organizations toward the development and improvement of rehabilitation services needed to serve clients of the department and other handicapped people at the local community level. These local services include those of private trade schools, public schools, rehabilitation workshops, rehabilitation centers, special facilities for the blind and deaf, halfway houses and alcoholic recovery homes. The department has placed greater emphasis on community resources becoming more involved in job development and placement of disabled persons.

The department also sets standards for services provided by such resources, inspects and certifies programs which meet standards, and assists all agencies of state government in establishing fee schedules for services purchased from rehabilitation resources. Each year the department inventories rehabilitation facility services throughout the State and publishes the California State Plan for Rehabilitation Facilities. The department also surveys community training facilities such as public and private trade and business schools and community colleges to identify training resources for department clients.

Another aspect of community resource development relates to the removal of architectural and transportation barriers which prevent full participation of the disabled in work and community affairs. The department's Mobility Barriers Section develops the standards and informational resources needed by local building officials to assume their responsibility for enforcement of existing laws on barrier prevention and removal. The Department also assesses needs of the disabled for accessible housing and public transportation and develops workable legislative recommendations to meet those needs.

DEPARTMENT OF REHABILITATION—*Continued*

## Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-516).

Rehabilitation Act Amendments of 1974 (Public Law 93-516).

State—Welfare and Institutions Code, Sections 19008, 19013, 19152, 19154, 19400-19402, and 19800-19813.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	35.8	40.6	40.6	\$7,789,160	\$3,394,526	\$3,175,864
General Fund.....				161,751	228,373	235,173
Federal funds <sup>1</sup> .....				6,496,091	3,166,153	2,940,691
Reimbursements.....				1,131,318	-	-

## Program Elements

a. Technical consultation to rehabilitation facilities.....	25	23.2	23.2	\$695,915	\$659,698	\$681,924
b. Grant administration.....	10.8	9.8	9.8	6,190,238	2,531,663	2,288,338
c. Architectural and mobility barriers.....	-	7.6	7.6	903,007	203,165	205,602

## a. Technical Consultation to Rehabilitation Facilities

Community resources specialists and technical consultants provide assistance to local community rehabilitation facilities in general management, program planning, industrial engineering, accounting, public relations, contract procurement, and other technical areas. In addition, consultation is provided to local community self-help groups on proposals for Innovation and Expansion grants to fund independent living skills training centers for the severely disabled. In the case of workshops, the technical consultation enables local program administrators to integrate what is essentially a rehabilitation service program with a production manufacturing operation to create a setting in which realistic evaluation, work adjustment, and vocational training of disabled people can take place. This consultation has enabled 134 relatively small organizations to provide a high level of service to a substantial number of handicapped persons throughout the state.

Output	1975-76	1976-77	1977-78
Average daily caseload in workshops.....	23,825	24,000	25,000
Input	75-76	76-77	77-78
Expenditures.....	25	23.2	23.2
	\$695,915	\$659,698	\$681,924

## b. Grant Administration

The department administers federally-funded establishment grants and innovation and expansion programs for community rehabilitation facilities and/or organizations and coordinates federal grant programs for facility improvement, training, and other related areas. These grants are administered within the framework of the California State Plan for Rehabilitation Facilities. Almost all of the grant programs are administered on the basis of reimbursement for each individual expenditure made by the facility under an authorized project budget. This type of detailed grant administration requires substantial assistance from the department's Community Resources Development Section.

Output	1975-76	1976-77	1977-78
Number of grants awarded by department.....	176	112	74
Value of grants awarded by department.....	\$6,140,586	\$2,252,661 <sup>1</sup>	\$2,000,000
Number of grants requiring supervision by department.....	225	229 <sup>2</sup>	152

<sup>1</sup> Establishment and I&E grants, including \$743,457 of DR/DOH grants and \$275,462 of Transportation grants.

<sup>2</sup> Establishment and I&E grants, including 17 Alcoholism grants, 24 DR/DOH, and 24 Transportation grants.

The above grants for FY 1976-77 include \$672,115 allocated to ten community organizations to establish independent living skill centers for the severely disabled.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	10.8	9.8	9.8	\$6,190,238	\$2,531,663	\$2,288,338

## c. Removal of Architectural and Mobility Barriers

Although architectural barrier removal laws, which have been in effect since 1968, mandate enforcement to local building officials, there is a need for adequate standards to incorporate into the building permit process. The Department develops standards and sources of technical information which will help building officials enforce the law. The Department also assesses needs for housing and transportation among the disabled, develops policies and legislative recommendations and seeks out alternative financial resources to increase accessibility to the disabled of housing and public transportation.

Output	1975-76	1976-77	1977-78
Architectural barrier removal contracts.....	24	-	-

## Removal of Mobility Barriers

The department will develop and print building standards and distribute such standards and enforcement instructions to building officials. Eight seminars will be conducted to train building officials in the application of barrier removal standards. Material on architectural barriers will be developed for use in architect and designer training and licensing exams. Architectural and modification standards for accessible housing will be developed. Legislation to improve public transit accessibility will be developed and supported and efforts to increase the availability of parking for handicapped persons will be increased by working with officials to implement existing laws.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	-	7.6	7.6	\$903,007	\$203,165	\$205,602

## DEPARTMENT OF REHABILITATION—Continued

## IV. ADMINISTRATION

## Program Objective and Description

This program provides executive direction, planning, program support, and administrative services to the department. It is administered through the Director's Executive Office and four divisions.

The Director's Office includes the Legal, Public Information, Civil Rights and Legislative Liaison functions as well as overall direction of the department's activities.

The Division of Field Operations exercises line administration over 26 district offices providing direct services to disabled persons. The Program Development Division provides staff services in planning, evaluation and statistics, research, and job development. The Program Support Division provides direction over ancillary rehabilitation functions such as the Business Enterprise Program, the Community Resources Development activity, and program managers for services to the deaf, blind, industrially injured, alcoholics, welfare recipients, and cooperative school programs. The Administrative Services Division provides fiscal and employee services to the department.

11.5 positions were administratively established in the current year and continued in 1977-78 and one additional position is proposed for 1977-78 due to increased workload. Three of these positions are included in the Industrial Injured package discussed under program I.

During fiscal years 1976-77 and 1977-78, many existing fiscal and management systems will be strengthened by more comprehensive and uniform automated systems. The most important of these are:

1. An automated case service encumbrance reporting system.

2. An automated monthly budget report.

3. A more comprehensive management information system.

Change to other management systems during the budget period will include:

1. The development of standards in program evaluation, case weighting, and case recording to insure better program performance.

2. The refinement and improvement of the budgeting system being used by field offices and of the "zero-base" budget system in Central Office.

3. The performance of a demographic study to correct the lack of data concerning the numbers, types, and location of disabilities in the California population.

4. New training of staff in areas of plan development, placement, other resource identification, and skill development in working with severely disabled.

DEPARTMENT OF BENEFIT PAYMENTS

The Department of Benefit Payments manages the State's Welfare Payment programs, and is the consolidated fiscal control department for the Health and Welfare Agency. The Department specializes in tax collections, recoveries, auditing, claims payment, the operation accounting systems, and the review and evaluation of Agency payment systems in addition to the operation of the Welfare Payment program. The Department is composed of three major program areas (health operations, employment tax operations, and welfare program operations) and administrative support.

- The goals of the Department are to:
- 1. Ensure the delivery of payments and benefits to welfare recipients, the unemployed, and other economically disadvantaged persons, with human dignity and equality; with effectiveness in terms of accuracy of payments and with efficiency in terms of the lowest possible administrative costs.
  - 2. Assure that payments to providers of state funded health care services are paid promptly and in accordance with laws and regulations, and that the recoveries of amounts due the state are made in a timely, equitable, and efficient manner.
  - 3. Collect unemployment insurance, disability insurance, and personal income taxes at the lowest possible cost consistent with accuracy and uniformity.
  - 4. Improve fiscal accountability within the payment programs administered by the Health and Welfare Agency and improve the state's ability to prevent fraud and administrative error in Benefit Payment delivery systems.

III.	Reduction Medi-Cal Quality Control Program .....	-15	-278,610
III.	Increased review of agency payment systems .....	6	139,741
III.	Increased emphasis in food stamp efficiency and effectiveness review .....	10	257,377
IV.	Delete welfare data standardization .....	-10	-250,610

I. HEALTH OPERATIONS

The health program activities of the Department of Benefit Payments are primarily located within the Health Audits and Review Division, Health Operations Branch. The Health Operations Branch has the responsibility for the fiscal audits, fiscal appeals and collections activities of health programs, i.e., Medi-Cal, Short-Doyle, Crippled Children, Alcohol Abuse, Drug Abuse, Developmentally Disabled, Family Planning, and Social and Rehabilitation Services.

The programs are also evaluated in terms of fiscal compliance with state and federal laws and regulations. The following entities receive and rely upon the Health Operations Branch audits, appeals and collection activities: Department of Health; State Controller; Department of Finance; Office of Auditor General; U.S. Department of Health, Education, and Welfare; county auditors; county administrators and hospital administrators.

The Health Operations Branch is organized into three bureaus: Health Audits, Health Recovery, and Health Appeals.

The Health Audits Bureau of the Health Operations Branch has audit responsibility in three major health program areas: the Medi-Cal Program, the Short-Doyle Program, and other health programs. The audit of the Medi-Cal Program includes the audit of approximately 600 community and county hospitals' costs on an annual basis. Auditing the Medi-Cal Program includes the evaluation of management practices and verification of the costs claimed for: a) Appropriateness of fiscal intermediary administrative costs; b) Appropriateness of Los Angeles County Medi-Cal claims which employs the use of statistical sampling to verify individual Medi-Cal claims in the field post-audit rather than audit at the point of payment. Three new positions are proposed for increased emphasis in these audits and c) Home office (parent company) expenditure claims.

The Short-Doyle Program is audited for compliance with appropriate laws and regulations under the Short-Doyle Act and includes an evaluation of management practices. The bureau audits the 58 counties and their subcontractors in the administration of this program and focuses on the allowability of costs to the program. An important portion of the audit is the management recommendations made available to the Department of Health program managers. This information makes it possible for program managers to see some of the changes or improvements necessary to maximize the effectiveness of the Short-Doyle dollar.

Other health programs include Alcohol Abuse, Drug Abuse, Developmentally Disabled, Family Planning, Crippled Children Services, and Social and Rehabilitation Services. Audits conducted for these programs are typically for compliance with program guidelines, laws, rules and regulations, and allowable costs determination, with heavy emphasis on program management information. These audits are often requested by Department of Health program managers to gain current information about immediate program needs. Three new positions are proposed for additional audits of federal grant contracts in the Drug Abuse Program.

The Health Recovery Bureau is primarily concerned with the collection of monies due the Medi-Cal Program. Its two major responsibilities are recovery on: a) Other Health Coverage—a function geared to billing in excess of 1,100 health insurance companies across the nation who provide insurance coverage to some persons who are beneficiaries under the Medi-Cal Program. The Other Health Coverage Unit prepares and sends billings to the insurance industry on a quarterly basis; and b) Other collections—a function which has approximately 10 categories of collection effort including Third Party Liability (beneficiaries who have been injured by a third party who is then liable to repay Medi-Cal for part or all of the medical services cost), Beneficiary Overpayments, Paternity Collections, Hospital Cost Audits, etc. Collections in this category utilize the typical collection tools such as liens, judgments, and follow-up work in the field, face-to-face, if necessary. Two positions are proposed in the Legal Affairs Division to provide adequate legal support for increased Medi-Cal recovery activities.

For the list of standard (lettered) footnotes, see the end of the Governor's budget.

## DEPARTMENT OF BENEFIT PAYMENTS—Continued

The Health Appeals Bureau provides the administrative due process to persons who may disagree with the findings resulting from audits conducted by the Audits Bureau. The largest appeals volume program category is in the area of Medi-Cal, specifically hospitals. Appeals are also conducted for all of the health programs audited by the Health Audits Bureau and, in addition, the bureau also processes appeals generated by Department of Health provider investigation activities. One position is proposed to process an increased workload in audit appeals.

Three auditor positions are proposed for the Health Operations program to verify the Medical Assistance expenditures which have been issued by the Medi-Cal Intermediary Operation, e.g., Blue Cross.

**II. EMPLOYMENT TAX OPERATIONS****Program Objectives and Description**

The Employment Tax Division is the revenue agency for support of the State's Unemployment Insurance (UI) and Disability Insurance (DI) programs. The Division also administers the California Personal Income Tax (PIT) withholding program and Unemployment Insurance for Classified School Employees. It registers employers and collects, audits, and accounts for payroll taxes received from them. In addition, the Division accounts for Unemployment Insurance and Disability Insurance benefit payments made.

The Unemployment Insurance Program is part of a national program administered jointly by the individual states and the federal Department of Labor. Program costs are financed by a tax on employers. The tax rate is calculated individually for each employer based upon the unemployment experience and the taxable wages of employees. Administrative costs incurred by the the Employment Tax Division are shared by the General Fund, Disability Insurance Fund, and Unemployment Insurance funds.

The Disability Insurance Program is a state program administered jointly by the Employment Development Department and the Department of Benefit Payments. The program is financed through a tax on an individual's wages. The tax is withheld and remitted to the state by employers. Certain employers may also elect to be covered by the program. Additionally, the law also allows employers with the agreement of the majority of their employees to elect to participate in a voluntary program rather than in the state program. Disability Insurance administrative costs are directly funded from the Disability Insurance Fund.

The Personal Income Tax Withholding Program is performed under a contract with the Franchise Tax Board. The program assures a continuous cash flow into the state's General Fund. In terms of dollars collected, this is the largest of the three programs with over \$3 billion in General Fund revenue collected annually. During 1977-78 an increased emphasis will be placed on this program. This will be accomplished by redirecting 46 personnel years from the Unemployment Insurance program.

For all three programs, the Division is responsible for identifying and determining whether employing units are subject to the appropriate tax laws and regulations; whether services rendered by individuals on the behalf of subject employers are covered under the law; and whether remuneration received by covered employees is taxable. Employer status records, contribution reports and wage earner listings are processed and recorded. Tax remittances are received, accounted for and deposited in the appropriate fund. The Division maintains delinquency controls and carries out an active statewide tax auditing and collection program directed toward the goal of voluntary compliance by the employer community. Division personnel in the Sacramento central office and in 37 field offices investigate and audit employers to determine or verify tax liabilities; collect amounts due; and provide advisory services to assure compliance with the appropriate tax law.

Tax accounting activities are performed to ensure that remittances from subject employers are correct and are recorded and deposited on a timely basis; that prompt and accurate billings are sent to employers for additional taxes due; that employers are equitably charged for benefits paid against their accounts; that tax rates are correctly computed and statements of charges are issued to subject employers; that employer protests and petitions are resolved; and that activities related to those employers participating in elective coverage programs on a cost reimbursement basis are accounted for.

The Employment Tax Division is also responsible for investigating, adjusting and recomputing benefit awards related to employer and claimant protests and for determining the amount of benefit awards for Unemployment Insurance claims involving wages from other states and certain federal programs. The Division accounts for all Unemployment and Disability Insurance benefit payments paid by the Employment Development Department.

The Division maintains employer accounts receivable files, wage-earner records, and claimant ledger files. These are essential in: 1) determining the appropriate benefit awards based on the earnings received by those claimants for Unemployment Insurance and Disability Insurance benefits; 2) determining employer tax rates based on the benefit charges and credits to the employer's balancing account; 3) detecting instances of potential fraud or overpayment; 4) maintaining appropriate accounts receivable for benefit overpayment cases and reimbursable employers; and, 5) sending prompt and accurate billings or notices of overpayments to employers.

## a. Combined Tax Collection

During FY 77-78, California employers are expected to remit 5.5 billion dollars to the state in Unemployment Insurance taxes, in state Personal Income, and in Disability Insurance taxes withheld from the paychecks of their employees.

Because most employers and employees are covered by the Unemployment Insurance, Disability Insurance, and Personal Income Tax Withholding Programs, a combined tax return is used by the Division to obtain information and revenues for all three programs. This combined tax collection method has been judged to be cost-effective from the standpoint of the employer community as well as the State and Federal Government.

## Program Size Indicator

DEPARTMENT OF BENEFIT PAYMENTS—*Continued*

## b. Combined Benefit Accounting Activities

The Division is responsible for assuring the accuracy of the benefit award computations for Unemployment and Disability Insurance. As an essential part of this responsibility, the Division obtains and assures the accuracy of individual wage records for each individual subject to the Unemployment and/or Disability Insurance provisions.

In the event of disputed wage credits, the Division ascertains facts necessary to resolve the legal status and correct wage credits of claimants. It recomputes benefit awards, makes adjustments to wage records, and corrects charges to employer accounts as necessary. It also participates in fraud audits of individual Unemployment and Disability Insurance Claims.

The Division accounts for the Unemployment and Disability Insurance benefits and for Comprehensive Employment Training Act benefits paid to individual claimants by the Department of Employment Development. It makes adjustments to benefit claims as required to assure correct payments and accounts for such payments. It reconciles checking accounts used by the Employment Development Department for the payment of benefits; and maintains, controls, adjusts, and reconciles the benefit overpayment accounts.

The Division computes and prepares statements of amounts due from employers who have chosen a reimbursable method of financing benefits. This type of employer includes the Federal Government, the United States Postal Service, all 50 State Governments, Puerto Rico, Guam, local government entities and nonprofit organizations.

Additionally, the Division maintains the Unemployment and Disability Insurance claim and payment documents and the Comprehensive Employment Training Act payment documents.

Program Size Indicators	Actual 1975-76	Estimated 1976-77	Estimated 1977-78
Number of covered employees

## c. Classified School Employees

Classified School Employees were extended Unemployment Insurance coverage effective as of January 1, 1972. School employers contribute to the Classified School Employees Trust Fund to reimburse the Unemployment Fund for Unemployment Insurance benefits paid. The reimbursement is on a dollar-for-dollar basis for Unemployment Insurance benefits paid out to eligible classified school employees. The contribution also pays for the administrative cost of operating this program.

Department of Benefit Payments' activities include processing quarterly returns, preparing and mailing local experience charge notices, accounting for adjustments and charges to school district accounts, auditing employers, collecting delinquent reports and contributions, providing advice and assistance to the school districts, determining the status of school employees with respect to coverage under the Unemployment Insurance Program and determining the adequacy of program funding and the contribution rate structure. In accordance with state law, an annual report is prepared for both the State Legislature and for school districts.

Program Size Indicators	Actual 1975-76	Estimated 1976-77	Estimated 1977-78
Subject employers (school districts) .....	1100	1110	1110

Revenue .....	\$12,794,762	\$7,533,000	\$6,208,000

## DEPARTMENT OF BENEFIT PAYMENTS—Continued

## III. WELFARE PROGRAM OPERATIONS

## Program Objectives and Description

Many California residents are unable to support themselves. Through the Department's welfare payment program these citizens are provided financial assistance.

The welfare payment program is comprised of four elements: the Supplemental Security Income/State Supplementary Program (SSI/SSP, i.e., payments to aged, blind, disabled), ancillary adult programs, payments to children (Aid to Families with Dependent Children (AFDC)) and Food Stamps.

The objective of the program is to provide, on behalf of the general public and within the limits of public resources, reasonable financial assistance to eligible needy and dependent families and to monitor, assist in administering, and improve the SSI/SSP and Food Stamp Programs.

The estimate of the General Fund cost of the grants to be paid under the welfare payments program reflects the effect of the following: PL 94-566 (HR 10210) which provided federal financial participation for AFDC-U parents receiving unemployment insurance benefits; the federalization of the former Adult Aid programs effective January 1, 1974; an annual cost-of-living adjustment for AFDC, Aid to the Potentially Self-Supporting Blind (APSB), and SSI/SSP; Old Age, Survivors, and Disability Insurance (OASDI) increases affecting caseload and grants beginning July 1976 and July 1977; cost impact of court cases; the effects of AB 2601 (Chapter 348, Statutes of 1976) which increased the July 1976 AFDC payment standards by 6 percent, changed the method for computing the SSP cost-of-living adjustment, provided a permanent \$3 increase in the SSP payment schedules, and provided for a dollar-for-dollar pass-on of the SSI benefit increase; minimum wage increases on January 1, 1976 and October 18, 1976; Unemployment Insurance Benefits (UIB) for farm workers; absent parent child support provisions of PL 93-647 and AB 2326 (Chapter 924, Statutes of 1975); increased UI benefits; modifications of the job search requirement; AB 3293 (Chapter 512, Statutes of 1976) which provided a \$12.50 grant increase for AFDC-Boarding Home and Institutions (BHI) children in foster care; PL 93-567 (HR 16596), regulation changes relating to incapacitated parents; increased work-related expense allowances; the end of extended unemployment insurance programs; and various Food Stamp Program changes.

The welfare program cost estimates show a General Fund increase for 1977-78 over 1976-77 of \$123.6 million. This is due primarily to cost-of-living adjustments in the AFDC and SSI/SSP programs, and payment standard increases in both the adult and children's programs under AB 2601 (Chapter 348, Statutes of 1976).

It is proposed that 9.5 positions be added to the Office of the Chief Referee (OCR) to handle the increased workload due to an increase in fair hearings requests. An additional 9.5 positions are proposed to be added to the OCR to fulfill a contract with the Department of Health to process Social Services related fair hearings.

The benefits to be derived from an expanded sample Medi-Cal quality control review have never been established. Therefore 15 positions are proposed for abolishment.

It is proposed that 14 positions be added to the Civil Rights Program in order to comply with requirements in Title VI and VII of the 1964 Civil Rights Act; Federal regulations; Section 10000 of the Welfare and Institutions Code; and a U.S. District Court order.

It is proposed that \$362,250 be transferred to the Department of Health to enable them to contract directly with the State Personnel Board to conduct Merit System Services in the counties for the Medi-Cal and Social Services Programs.

Six analyst positions are proposed for increased review and evaluation of payment systems within the Health and Welfare Agency.

One position is proposed for clerical support to the SSI/SSP, Repatriated Americans, Indo-Chinese, and Cuban Refugee Programs.

## a. Payments for Children

This payment operation provides financial assistance to eligible needy dependent children and the parents, eligible relatives or other caretakers with whom they live.

The program element is divided into three major subgroups: aid to family groups, aid to families with unemployed parents, and aid to children in boarding homes and children's institutions. All three subgroups are administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law.

AB 2601 (Chapter 348, Statutes of 1976) provides for a 6 percent increase in the July 1976 AFDC payment standards, effective January 1, 1977, in addition to the normal COL adjustments provided on July 1 of each year.

The Department of Benefit Payments, effective October 1, 1975, became the single state agency responsible for WIN-Social Services. Thus, in the current year, 7 positions were administratively established and it is proposed that they be continued in the budget year in order to implement and coordinate the new WIN regulations in the counties.

10 or more.....	622	675	716	750

## Family Groups (AFDC-FG)

Cash grants are provided to children and their parents or guardians whose income is insufficient to meet their basic needs. Eligibility is limited to those needy families in which the children are deprived of one or both parents due to incapacity, death, dissolution, or other continuing absence. Eligibility is further based on statutory maximums related to the age of the children and the amount of income plus real and personal property available to the family.

The financial need of the family is determined by the number of eligible persons in the budget group, and is based on an established payment standard. The cost of the grant is shared by the federal, state and county governments and may not exceed the maximum aid amounts set forth in state law. In addition to the maximum aid payment, a family may also receive an allowance for recurring special needs such as medical diets and transportation as well as an allowance for nonrecurring special needs caused by sudden and unusual circumstances beyond the control of the family. The level of payment prior to consideration of any special needs is known as the Maximum Aid Payment (MAP), while the payment level after consideration of recurring or nonrecurring special needs is known as the Minimum Basic Standard of Adequate Care (MBSAC). Both payment standards are adjusted each July with a cost-of-living increase to maintain their purchasing power.

Projections for fiscal year 1977-78 show a small decrease in the AFDC-Family Group (FG) caseload which is expected to reduce General Fund expenditures by \$6.2 million. AFDC-FG grants will be increased approximately 6 percent beginning January 1, 1977 due to AB 2601 (Chapter 348, Statutes of 1976); General Fund cost due to AB 2601 for AFDC-FG during 1977-78, excluding the county share the state will pay due to SB 90, is expected to be \$33.1 million, an increase of \$17 million over the half-year state cost of \$16.1 million in 1976-77. In accordance with Welfare and Section 11453, an estimated 5.46 percent cost-of-living increase effective July 1, 1977 is expected to raise state costs by \$28.9 million. The offsetting effects of other minor changes result in a net 1977-78 General Fund increase in the AFDC-FG Program of \$37.2 million.

## DEPARTMENT OF BENEFIT PAYMENTS—Continued

## Unemployed Parents (AFDC-U)

Needy children may receive assistance when they meet the basic eligibility requirements if their parent(s) is not fully employed. Additional conditions of eligibility require the parent to be available for and to seek employment. The basic grant standard is developed in the same manner as the aid to family groups program.

AFDC-U caseload estimates for 1977-78 indicate a decrease from the 1976-77 level. This decrease is consistent with projected statewide unemployment trends. This year-to-year caseload reduction is estimated to result in General Fund savings of \$1.7 million; however, this will be more than offset by the cost-of-living adjustment effective July 1, 1977 which will raise state cost by \$3.4 million. The state cost of AB 2601, excluding the local mandated share, is estimated to be \$3.9 million in 1977-78 compared to \$1.9 million in 1976-77, an increase of \$2 million. Federal financial participation for AFDC-U parents receiving unemployment insurance benefits (PL 94-566) is estimated to shift \$7.7 million in state AFDC-U costs to federal sources in 1976-77 and \$12.0 million in 1977-78 for a net year-to-year savings to the General Fund of \$4.2 million. Other increases and offsets result in a net 1977-78 General Fund increase in the AFDC-U Program of \$0.4 million.

## Boarding Homes and Children's Institutions (AFDC-BHI)

Children who cannot receive care in their own homes may be placed in foster homes or private institutions. Federal financial participation in the cost of foster care is available for some of these children. Those not qualified for federal participation may be eligible for benefits from the state and county funds. The state funds are subject to a maximum rate set by the Welfare and Institutions Code.

The state cost of implementing AB 3293 (Chapter 512, Statutes of 1976) on September 1, 1976 is estimated to be \$2,175,000 in 1976-77 and \$2,672,200 in 1977-78. This represents a year-to-year increase of \$497,200.

A slight increase in the BHI caseload is projected between 1976-77 and 1977-78. The state cost for the BHI program is estimated to be \$24,792,700 in 1976-77, and \$25,839,100 in 1977-78. Changes in caseload costs account for the majority of the resultant 1977-78 increase of \$1,046,400 in General Fund Expenditures.

## Child Support Incentive Payments

PL 93-647, signed January 4, 1975, initiated a Federal Child Support Enforcement Program. The state enabling legislation, AB 2326 (Chapter 924, Statutes of 1975), became effective October 1, 1975, providing a State Child Support Enforcement Program to supplement the federal plan. Under the state legislation, the Department of Benefit Payments was designated the single state agency responsible for securing child support and determining paternity. Two funds (Support Enforcement Incentive Fund, SEIF, and the Interstate Collection Incentive Fund, ICIF) were established to create an incentive to counties to collect child support from absent parents from within and outside the state. The incentive payment for the period October 1, 1975 through June 30, 1976, was established at 33.75 percent of the child support payment collected. Effective July 1, 1976, the incentive was decreased to 27.75 percent. PL 93-647 provides for federal participation in the incentive payments of 25 percent of the child support payments collected which are owed for the first 12 months and 10 percent of such collections for child support payments owed for any month after the first 12 months. AB 2326 provides for state incentive payments to augment the federal share to equal 33.75 percent, before June 30, 1976 or 27.75 percent after July 1, 1976.

## DEPARTMENT OF BENEFIT PAYMENTS—Continued

## b. Payments for Adults

SSI/SSP is a federally administered program under which eligible aged, blind and disabled recipients receive from the Federal Government a combined monthly check comprised of the federal grant payment for SSI and the California grant payment for SSP. The SSI/SSP payment is intended to cover the recipients' basic needs and living expenses. The state monitors the federal payment operation to determine whether, under the supplemental program, state monies are accurately and properly expended and recipients' payments are properly received.

Although HR 1 (PL 92-603) which brought the SSI/SSP program into being was signed in October 1972, and the program has been in effect since January 1974, substantiated, reliable caseload and cost data are still not available from the Federal Government. Until such time as Social Security Administration's (SSA) reporting process is improved, state budget estimates are subject to revision.

General Fund expenditures estimated for the SSI/SSP program in 1977-78 increased by \$82.1 million over current year expenditures. This net figure is the result primarily from increases due to (1) cost-of-living adjustments; (2) \$3 grant increase and SSI pass-ons under AB 2601 (Chapter 348, Statutes of 1976); (3) caseload increases due to HR 7228 (PL 94-569) which eliminated the maximum home value limitation as a criterion for SSI/SSP eligibility and therefore eliminated the state-funded Excess Value Home Program; and (4) caseload increases offset by (a) OASDI benefit increase; (b) SSI increases; and (c) reduction in mandatory supplemental expenditures.

## c. Special Adult Programs

In addition to regular SSI/SSP benefits, two ancillary programs established by Chapter 1216, Statutes of 1973 (AB134), are available to SSP recipients. Each of these is funded by the state and administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law. The first is Special Circumstance which provides allowances to eligible recipients for special nonrecurring needs, such as the replacement of essential household furniture and equipment or clothing, required housing repairs, necessary moving expenses, and unmet shelter needs. The other is the Emergency Loan Program for recipients whose regular monthly SSI/SSP payment is lost, stolen or delayed. The Excess Value Home (EVH) Program provided monthly grants to persons who were ineligible for SSI/SSP solely because their home value exceeded the federal resource limitation of \$25,000. Need for this program was removed by PL 94-569 (HR 7228) which abolished home value limitation as a criterion for program eligibility. Signed into law on October 20, 1976, PL 94-569 will result in EVH recipients being transferred to the SSI/SSP program effective January 1, 1977.

An additional program for blind SSP recipients is the Guide Dog Special Allowance (funded under Special Benefits), which offers recipients with a specially trained guide dog an additional allowance to cover the cost of dog food. This differs from the above programs in that the Guide Dog Special Allowance is state administered as well as state funded.

The Aid to the Potentially Self-Supporting Blind (APSB) Program assists blind recipients with a plan of self-support to become economically independent by allowing them to retain resources in excess of those allowed under the basic SSI/SSP program. APSB grant costs and 50 percent of the administration costs are state funded. The remaining 50 percent of the administrative costs are county funded.

## d. Food Stamps

The objective of the Food Stamp Program is to raise levels of nutrition among welfare and other low-income households through offering eligible households the opportunity to purchase food stamps at a cost presently averaging 44 percent of their redemption value when used to buy foods at local markets. Administration of the system is the responsibility of the United States Department of Agriculture, Food and Nutrition Service (FNS), which has an agreement with the Department of Benefit Payments to direct the operation of the system within the state. The Department supervises counties in the determination and certification of the eligibility of applicant households. The bonus value of the food stamps is borne entirely by the United States Department of Agriculture. Recent increases in bonus values and coupon allotments have encouraged a larger number of people to participate in the program. In addition, more stringent federal accountability and mandatory program monitoring requirements have caused increases in staff responsibilities and consequent growth in administrative costs. The administrative cost for certifying welfare households participating in the Food Stamp Program is included in the administrative costs for the children's program, which is reimbursed by the Department of Health, Education and Welfare (HEW) at the 50 percent level.

In addition to welfare linked Food Stamp recipients, certain low income nonassistance households are also eligible. For the Nonassistance Food Stamp (NAFS) Program, 50 percent of the administrative cost is reimbursed by the United States Department of Agriculture with the remaining 50 percent assumed by the state and counties.

As provided under AB 134 (Chapter 1216, Statutes of 1973), counties will be held to a maximum liability for food stamp costs based on their calendar year 1973 expenditure level; this maximum cost for all counties totals \$21.7 million.

The Department, through its Food Stamp Program Management Branch, supervises the county administration of the program by providing consultation and technical assistance in implementing and operating the program on the local level. This unit is the prime intermediary between California counties and FNS. As the single state agency, Benefit Payments is accountable to FNS to assure that the Food Stamp Program is operating in an effective and efficient manner. The Department makes certain that counties receive adequate and timely instruction and guidance as required so that needy eligible households may be promptly and accurately certified. The Department is reimbursed for 50 percent of its cost by a combination of FNS and HEW funding.

Provisions of AB 134 (Chapter 1216, Statutes of 1973) mandated counties to issue food stamps via direct mailing, public assistance withholding, and at least one other nonmail method. These requirements were recently changed by SB 1944 (Chapter 886, Statutes of 1976) which would allow up to two issuance methods to be waived under certain conditions. In addition, final regulations implementing the efficiency and effectiveness regulations of PL 93-347 have been issued and were implemented by the Department on January 1, 1976. Public Law 94-379, which was signed into law August 12, 1976, permits California to continue its SSI/SSP food stamp cash-out practice. The cash-out is allowable so long as the Secretary of HEW finds California's SSP payments have been specifically increased in conjunction with SSI cost-of-living increases so as to include the amount of the food stamp bonus value. State enabling legislation, which was effective July 1, 1976, mandates increases in California's SSP payments in amounts which satisfy the criteria established under PL 94-379. Federal and state legislation will require a substantial increase in state level administrative responsibilities.

## DEPARTMENT OF BENEFIT PAYMENTS—Continued

DBP will be contracting with the State Economic Opportunity Office (SEOO) to provide assistance in the administration of the federal Food Stamp mandates. This effort will be federally funded with one-half the funding (\$365,110) received under Title II of the Federal Public Works Employment Act of 1976.

An emergency loan (Item 104, Budget Act of 1976) of \$39,467 and Federal Funds from the Department of Agriculture will fund the program from July 1, 1976 through December 31, 1976. After that date, the remaining fiscal year cost will be equally shared by Title II of the Federal Public Works Employment Act of 1976 and the United States Department of Agriculture.

Ten positions are proposed to be added for the Food Stamp Efficiency and Effectiveness (E & E) reviews to provide better data regarding administration of this program.

## e. County Administration

County administrative costs are funded by the Federal, State, and County Governments. AFDC Program administrative costs are subject to 50 percent federal reimbursement and 25 percent state reimbursement. Food Stamp Program administrative costs are subject to 50 percent federal reimbursement; all other nonfederal administrative costs above the costs incurred by the counties in calendar year 1973 (\$21.7 million) will be borne by the state. In addition, the state pays 100 percent of administrative costs associated with the special circumstances, special benefits, and emergency payments programs for adult recipients. The APSB Program is shared equally (50 percent) by the state and the counties. The state share of each of these programs is subject to the amount appropriated each fiscal year.

County administrative funds are used to pay salaries and benefits of eligibility workers, clerical support, and administrative support staff. These funds are also used to pay for the typical operating costs of space, utilities, supplies, checkwriting for recipients, EDP, and other operating costs. The majority of administrative funds (82 percent) are used to pay salaries and employee benefits of welfare department employees with the remaining 18 percent being used for operating costs.

Due to the rapid escalation of county administrative expenditures in recent years the Department of Benefit Payments undertook a major effort to control these costs. This effort began in fiscal year 1975-76 with the creation of the County Administrative Expense Control Bureau. In the fiscal year 1975-76, cost control plans were developed for the AFDC and NAFS programs and went into effect with the submission of those plans to the Joint Legislative Budget Committee in October 1975. Even though the plans were in effect for only nine months, they proved to be effective in controlling county administrative costs.

It had been reported that in fiscal year 1975-76 administrative costs would increase to \$54.6 million for AFDC and \$74.4 million for NAFS. However, as a result of cost control efforts, these cost increases were limited and the state realized a \$4.7 million savings in AFDC and a \$6.05 million savings in NAFS. It is anticipated that in subsequent years these dollar savings will continue and additional savings realized.

In fiscal year 1976-77, the basic plans remain unchanged; however, significant revisions have been made to allow county flexibility while maintaining cost consciousness. A county-by-county estimating and budgeting system was developed for determining allowable expenditure levels for each county. This is a significant improvement over past years because each county can now be addressed individually based upon their needs and situations.

In fiscal year 1977-78, county administrative costs are expected to slightly increase over the previous year in accordance with projected changes in the California CPI.

Two positions will be added to the Financial Management Branch to perform federal and state mandated county field consultations. The field consultants will evaluate and monitor proposed and ongoing county financial systems.

One position is proposed for the Financial Management Branch to coordinate Workers' Compensation insurance coverage under the state's blanket policy for recipients participating in county Employment/Education/Training (EET) Programs.

## f. Special Programs

The Cuban Refugee Program was established by Presidential proclamation in 1961 and was implemented in accordance with the Migration and Refugee Assistance Act of 1962 to meet the needs of Cuban refugees who entered the United States and are in need of assistance.

The Indochinese Refugee Assistance Program was established under the authority of the Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23). Special Appropriations for Assistance to Refugees from Cambodia and Vietnam (Public Law 94-24) and federal policy directives. Effective July 1, 1976, Laotians were added to the Indochinese Refugee Assistance Program.

These federal programs are administered by the county welfare departments under the supervision of the Department of Health, Education and Welfare and the Department of Benefit Payments.

The function of the Indochinese Refugee Assistance Program and the Cuban Refugee Program is to provide financial assistance, medical assistance, and social services to the Cuban, Vietnamese, Cambodian, and Laotian refugees. These programs are 100 percent federally funded.

## IV. ADMINISTRATIVE SUPPORT

## Program Objectives and Description

In the administration of the above programs, the Department requires management direction and administrative support in order to assure that the programs are efficiently and effectively administered in accordance with sound management principles, methods and techniques. Such support is provided by portions of the Executive, Legal, Administration, and Government and Community Relations Divisions. In addition to policy direction and management provided by the Executive Division, the services provided include those in the areas of fiscal management; personnel services management; electronic data processing systems; legal advice and assistance; planning; public information; and generalized staff services such as facilities operations, centralized office services, training, and centralized procurement and control of equipment and supplies.

Thirty-three temporary help positions are funded during fiscal year 1976-77 with Federal WIN-COD program funds.

Five positions were established for fiscal year 1976-77 to provide staff services support for the Health and Welfare Agency.

The Department has concluded that Welfare Data Standardization is not feasible. Therefore 10 positions authorized last year for that purpose are being abolished.

Sixty-seven additional temporary help positions are proposed to meet increased workload requirements throughout Health Operations, Welfare Program Operations, and Administrative Support.

Three positions are proposed for the Computer Services Branch. One position will provide computer software technical support and two positions will provide additional data processing technical support for the Health Recovery and Title XVI systems.

## V. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

Program Requirements	1975-76	1976-77	1977-78
Totals, Legislative Mandates.....	\$233,893	\$9,201,200	\$17,222,100
General Fund .....	233,893	9,201,200	17,222,100

## Program Elements

a. UI Program .....	233,893	300,000	900,000
b. AFDC Program.....	—	8,901,200	16,322,100

## General Description

a. The appropriation for the UI Program in the Department of Benefit Payments is used to pay mandated unemployment insurance costs for classified school employees. In addition, the State Controller makes payments to other entities (i.e. special districts, municipalities, etc.) for mandated unemployment insurance costs from the appropriation.

b. AB 2601 (Chapter 348, Statutes of 1976) increased the July 1976 AFDC payment standards by 6 percent, effective January 1, 1977. This has created an obligation to reimburse the counties for costs pursuant to this legislation in subsequent years.

## DEPARTMENT OF CORRECTIONS

The principal programs of the Department of Corrections are the control, care, and treatment of men and women who have been convicted of serious crimes, or those admitted to the civil narcotic program, and committed to state correctional facilities. The Department's objectives also include supervision of men and women who have been paroled from correctional facilities and returned to the community.

Headed by a director, the Department is organized into four line divisions: Policy and Planning, Institutions, and Parole and Community Services, with support of various staff service functions such as legislative liaison, personnel management and training, and public information. Within the Institutions Division and located throughout the State are 12 correctional institutions with three of these having reception centers.

Included within the budget are the autonomous entities of the Community Release Board, the Narcotic Addict Evaluation Authority, the Correctional Industries Commission and the Board of Corrections.

The Department will experience significant procedural and organizational changes with the enactment of Chapter 1139/76 (SB 42) which becomes effective July 1, 1977. This new law replaces the State's indeterminate sentence law with a determinate sentence system whereby the courts select terms of imprisonment from three possible statutory choices. The length of the terms is determined by the type of felony and severity of the crime. These terms can be lengthened by the number and character of prior prison terms and other factors and considerations related to the crime and identified as enhancements. The Director of Corrections or the newly created Community Release Board may at any time recommend that the court recall a commitment and re-sentence a prisoner.

Good behavior credits are applied to the determinate sentences of prisoners who participate in constructive work, educational, vocational, or similar programs and who avoid assaultive, destructive, and criminal activities. Sentences can be reduced by up to one-third.

The Adult Authority and the Women's Board of Terms and Parole will be replaced July 1, 1977 by the Community Release Board under the provisions of Senate Bill 42. As one of its principal responsibilities, the Board will decide whether to hold or release prisoners who are serving life sentences.

Prisoners released from determinate sentences will normally be placed under parole supervision for up to one year. The Department determines the conditions of parole, but this is subject to review and modification by the Board. It is anticipated that changes in the parole population will occur when Senate Bill 42 becomes effective. More intensive pre and post release programming and supervision for felons are expected and funds are reserved in Program VII, Community Correctional Program Re-direction, to accomplish this intent. Plans for the more intensive programming and supervision will be presented to the Legislature.

Funds to contract for defense counsel for inmates as a result of Senate Bill 42 are proposed in the 1977-78 Budget for the Community Release Board.

## I. RECEPTION AND DIAGNOSIS PROGRAM

## Program Objectives and Description

A systematic method of intake, diagnosis and classification recommendation is an integral part of the California correctional program. A personal history is compiled on each inmate, incorporating information principally from law enforcement agencies, courts, other correctional programs, the military, family, friends, and schools. This information is documented and used in diagnosing institutional custodial and program needs.

In addition to processing new commitments, 90-day diagnostic evaluations and 120-day evaluative reports on convicted offenders are provided to California courts at their request.

Reception Centers are located at the California Medical Facility and California Institution for Men for male felon commitments, and the California Institution for Women for female felon commitments. Civilly committed narcotic addicts are received and processed at the California Rehabilitation Center.

## Authority

Penal Code Sections 1168, 1203.03, 5068, 5079.

## II. INSTITUTION PROGRAM

## Program Objectives and Description

The Department of Corrections is required by statute to accept convicted felons and civilly committed nonfelon narcotic addicts from California courts when their sentence is imprisonment in a state correctional facility. It is the Department's responsibility to provide secure detention facilities to protect society from further criminal activities and to provide necessary services such as feeding, clothing, medical care and treatment programs, including academic and vocational education, and psychiatric and counseling services.

The Department's security housing units confine the system's most violent and difficult inmates, many of whom are members of antagonist prison groups. This volatile mixture of prisoners requires constant and alert staff supervision. As a result of this close confinement, inmate movement is necessarily restricted and activities and programs available to the general population cannot be offered to security housing unit inmates. In order to provide this close supervision and to make additional activities available to these inmates, 36 custody and program positions and \$591,409 are being allocated to five institutions in 1977-78.

It is necessary that some employee work assignments, identified as posts, be staffed seven (7) days a week. In the past, those who have worked on state holidays were paid only at straight time. However, a recent California State Personnel Board rule change provides that those who work holidays may be paid at a time and a half rate. A deficiency bill to fund the rule change in the current year will be supported and \$842,553 is proposed for 1977-78.

## Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Division 3.

## a. Security

California law requires that the Department of Corrections provide secure and safe facilities to house convicted felons and civilly committed nonfelon narcotic addicts for the term of their sentences. Inmates are housed in the appropriate units equipped with the degree of security needed, based on the inmate's escape risk, violence propensities and history of assaultive behavior. Custodial personnel are assigned to posts and perform a variety of functions including supervision of inmates in housing units, dining areas, recreation areas, specialized security areas, and on work details.

The most violent and difficult inmates are housed in Security Housing Units and Management Control Units and require increased security staffs in addition to properly secured facilities.

The regular visiting program, which takes place days and evenings, is generally regarded as a highly beneficial program which promotes close ties between inmates and their families and friends, and helps to reduce tension within the institution. Eleven positions and \$180,150 are proposed in 1977-78 for 11 institutions to expand both visiting days and hours, to more adequately control the introduction of contraband and to further reduce inmate tension.

Output	Actual			Estimated	
	1973	1974	1975	1976	1977
Male Felons

	4,119.5	3,930.6	3,946.1		

## DEPARTMENT OF CORRECTIONS—Continued

## b. Inmate Support

The California correctional system has implemented rules, regulations, and practices which insure that inmates receive humane treatment and adequate support services, including food, clothing, housing and medical care.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$51,689,389	\$56,778,387	\$62,014,518
Personnel years .....	1,048.1	1,078.1	1,071.5

## b.1. Feeding

Three meals per day are served to the institution population, prepared by inmates on work assignment or participating in vocational programs under supervision of civil service instructors.

Each institution maintains communication with inmate representative groups regarding menu acceptability and quality of food.

A recent Department of Health survey revealed that the Department has a substantial amount of major culinary equipment that is seriously deteriorated and requires replacement. Operating with this equipment constitutes health and safety hazards. Inasmuch as this equipment cannot be replaced within the Department's operating budget, which is needed for replacement of smaller equipment items, a one-time allocation of \$330,000 is provided in 1977-78 for ten institutions and four camps.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$14,271,427	\$15,937,304	\$16,997,919
Personnel years .....	167.6	185.5	184.4

## b.2. Clothing

Security considerations dictate that inmates wear distinctive clothing for easy identification both in the institution and outside in the event of escape.

The clothing operation provides clean and suitable clothing for the inmates appropriate to the climate at each institution and conducts vocational training in laundering and drycleaning, sewing skills and clothing distribution. Most of the basic clothing is made by Correctional Industries.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$5,362,904	\$5,343,455	\$5,972,170
Personnel years .....	29.1	29.3	29.1

## b.3. Medical-Dental Services

The Department of Corrections maintains 549 medical-surgical beds and provides outpatient and inpatient care and treatment for nearly any medical-dental problem arising in the inmate population. A major surgical hospital at San Quentin has been established for departmental use. In addition, the hospitals at the California Men's Colony and California Medical Facility are used for medical and surgical referral patients. Outside medical facilities, as well as medical consultants, are utilized when required for highly specialized medical and surgical procedures.

## Medical

Output	1975-76	1976-77	1977-78
Total number of hospital patients .....	10,136	10,280	10,896
Average daily sick line .....	1,971	1,999	2,119
Total complete physical examinations, inmates and staff .....	23,050	23,377	24,779
Total surgical operations .....	4,209	4,269	4,525

## Dental

Total surgery procedures .....	13,656	13,850	14,680
Total fillings .....	93,432	94,759	100,439
Total dentures, full and partial .....	4,988	5,059	5,362
Total repair of dentures .....	2,374	2,408	2,552
Total number of treatments .....	31,412	31,858	33,768

Input	1975-76	1976-77	1977-78
Expenditures .....	\$13,702,319	\$14,435,864	\$14,576,626
Personnel years .....	487.3	493.6	490.5

## b.4. Housekeeping

Housekeeping services provide the inmates with clean surroundings and personal care items to promote cleanliness and help instill improved personal habits.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$2,168,673	\$2,516,013	\$3,184,114
Personnel years .....	31.4	30.7	30.6

## b.5. Facilities Operations

Facilities operations includes the furnishing of utilities, maintenance and special repair projects. These functions are performed chiefly by staff and inmates.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$16,184,066	\$18,545,751	\$21,283,689
Personnel years .....	332.7	339	336.9

## DEPARTMENT OF CORRECTIONS—Continued

## c. Treatment

The period of time an inmate is confined to a correctional facility provides an opportunity for attitude and behavior modification and personal development through the many rehabilitative programs available. These programs include psychiatric and counseling services, academic and vocational education, leisure-time activities and religion and are designed to assure that treatment meets the needs of the individual inmates.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$23,701,605	\$26,697,903	\$27,805,753
Personnel years .....	988.8	1,009.6	1,030.8

## c.1. Psychiatric Services

Many inmates committed to the Department suffer from serious emotional and mental problems which result in varying degrees of social disability. To aid in correcting such conditions, institutions utilize professional staff and programs, including psychiatric hospitalization for treatment of those with mental disorders. The major psychiatric program is carried out at the California Medical Facility at Vacaville. In addition, the California Men's Colony at San Luis Obispo operates a psychiatric program to care for the increasing number of inmates in the system requiring treatment.

The most severe cases of mentally ill inmates are housed and treated in S-Wing at the California Medical Facility. These patients are frequently homicidal, assaultive and suicidal and require close attention. An additional 18.2 positions at a cost of \$304,579 are proposed for 1977-78 to provide improved care and treatment for the increasing number of the severely disturbed inmates.

Output	1975-76	1976-77	1977-78
Psychiatric and psychological treatment cases .....	5,091	5,163	5,473
Total psychiatric examinations .....	18,777	19,044	20,185

Input	1975-76	1976-77	1977-78
Expenditures .....	\$4,725,843	\$5,162,217	\$5,476,943
Personnel years .....	175.8	174.8	192.4

## c.2. Counseling Services

Counseling services render casework assistance to inmates. All inmates are continuously evaluated by counseling staff as to their behavior, attitude, and progress in the various programs. The counselor also continues to work with the inmate in preparation for his or her return to the community.

Many inmates are interested in activities and programs that are not a part of the Department's formal programming. They can pursue these interests and activities through departmentally approved self-help groups. There are some 74 self-help groups including Alcoholics Anonymous, Toastmasters, and various cultural groups meeting weekly in every institution. Institution staff members sponsor and supervise these self-help groups on their own time. This situation results in high sponsor turnover and has a disruptive effect on the programs. In 1977-78, \$100,000 is proposed to compensate self-help group sponsors. A special classification will be established to provide the mechanism for compensating such institution staff members.

Output	1975-76	1976-77	1977-78
Number of inmate cases reviewed .....	25,260	25,436	25,775
Input	1975-76	1976-77	1977-78
Expenditures .....	\$8,527,420	\$9,563,556	\$9,900,106
Personnel years .....	495.7	501.8	504.6

## c.3. Academic Education

The average inmate committed to the Department has a tested grade placement slightly below the eighth grade level but many do not possess even basic literacy.

Academic education is provided on the premise that the inmate's earning potential is increased as is the inmate's awareness and understanding of his or her responsibilities and opportunities.

Primary emphasis is placed on providing necessary services to eliminate illiteracy and achieve the eighth grade level. College-level courses are also available for qualified inmates.

Output	1975-76	1976-77	1977-78
Average academic enrollment .....	6,546	6,000	6,500
Elementary diplomas/certificates .....	775	700	725
High school diplomas .....	783	700	750
GED high school equivalencies .....	454	450	450
Associate in arts degrees .....	45	30	30
College courses completed .....	2,806	2,000	2,800
Input	1975-76	1976-77	1977-78
Expenditures .....	\$4,246,321	\$4,841,972	\$5,065,460
Personnel years .....	88.6	96.1	95.5

## c.4. Vocational Education

Many inmates have unstable work records, few marketable skills and little knowledge of how to use the skills they possess. To meet the need for vocational skills, training is conducted in 46 occupational areas, which provides approximately 2,500 work-training stations.

Output	1975-76	1976-77	1977-78
Average enrollment .....	5,453	5,500	5,525
Number of vocational training areas available .....	47	46	46
Number of vocational classes available .....	143	146	148
Vocational certificates of achievement issued .....	2,092	2,064	2,100

DEPARTMENT OF CORRECTIONS—*Continued*

## Input

Expenditures .....	\$4,693,412	\$5,370,948	\$5,562,723
Personnel years .....	172.8	179.3	180.1

## c.5. Leisure-Time Activities

Programs of physical fitness and leisure-time activities designed to improve an inmate's physical and emotional well-being are provided at all institutions. These activities occur mainly in the evenings and on weekends and holidays.

Self-help activities in an institution, achieved principally through inmate activity groups, are another means of helping inmates use leisure time constructively.

## Input

	1975-76	1976-77	1977-78
Expenditures .....	\$781,797	\$905,232	\$941,022
Personnel years .....	25.7	25.4	26.2

## c.6. Religion

Full-time chaplains are located in each institution. They provide religious services for the major faiths, pastoral counseling, and coordination of the services rendered by visiting clergy representing many diverse faiths.

## Input

	1975-76	1976-77	1977-78
Expenditures .....	\$726,812	\$853,978	\$859,499
Personnel years .....	30.2	32.2	32

## d. Inmate Employment

Inmates have productive work assignments to minimize idle time and contribute toward the development of certain useful job skills. Inmate employment provides inmates with a source of limited income from correctional industries, conservation camp operations or institution work assignments.

## Input

	1975-76	1976-77	1977-78
Correctional Industries:			
Expenditures .....	\$14,006,280	\$16,573,213	\$17,045,086
Personnel years .....	223.4	246	246
Work Projects—Cooperating Agencies:			
Expenditures .....	\$3,395,616	\$3,550,824	\$3,562,677
Personnel years .....	145	137.6	136.8

Expenditures .....	\$1,037,920	\$1,033,325	\$1,256,244
Totals, Inmate Employment:			
Expenditures .....	\$18,439,816	\$21,157,362	\$21,864,007
Personnel years .....	368.4	383.6	382.8

## d.1. Correctional Industries

The objectives of Correctional Industries are to provide constructive work for inmates to reduce idleness, improve work habits and skills of inmates to better prepare them for employment after release, and provide reduced cost of maintaining the prison system through the sale of products and services.

There are 23 major industrial and seven agricultural enterprises operating at 11 institutions. Financial support is through the Correctional Industries Revolving Fund, which is maintained by revenues from the sale of products and services provided to public agencies.

The average amount earned during the 1975-76 fiscal year was about \$353 per inmate.

## Output

	1975-76	1976-77	1977-78
Average inmate population .....	20,819	21,195	21,585
Average number of inmates employed .....	2,016	2,000	2,000
Percentage of total population .....	9.7	9.4	9.3

## Input

Expenditures (Correctional Industries Revolving Fund) .....	\$14,006,280	\$16,573,213	\$17,045,086
Personnel years .....	223.4	246	246

## d.2. Work Projects—Cooperating Agencies

The increasing public use of state and federal natural resources has created a demand for available inmate labor to assist primarily in wildfire suppression and to perform allied forestry projects and maintain and protect the natural resources of the State. These work projects involve cooperation with both state and federal agencies. The conservation program consists of 19 California Division of Forestry Camps.

## Output

	1975-76	1976-77	1977-78
Hours worked in fire suppression .....	406,209	390,600	379,680
Regular project assignment hours .....	2,038,488	2,362,500	2,400,250
In-camp work project hours .....	243,424	784,350	821,510
Average number of inmates assigned .....	962	1,125	1,170

## Input

Expenditures .....	\$3,395,616	\$3,550,824	\$3,562,677
Personnel years .....	145	137.6	136.8

## DEPARTMENT OF CORRECTIONS—Continued

## d.3. Work Assignment—Support

Operation of the various institutions provide many meaningful work assignments for inmates. Feeding, laundry, housekeeping, maintenance, hospital, grounds care, and similar tasks are performed by inmate workers supervised by civil service employees.

Most inmate workers receive pay; however, there are still a number of unpaid workers. It is extremely difficult to keep inmates on nonpaid assignment for several reasons. Without pay much of the incentive to work is absent and nonpaid workers may be required to work with paid inmates. An additional 1,000 paid positions at a cost of \$149,040 are proposed for in 1977-78.

Output	1975-76	1976-77	1977-78
Total number of inmates employed .....	8,800	8,500	8,732
Number of paid positions .....	6,241	6,241	7,241

## Input

Expenditures .....	\$1,037,920	\$1,033,325	\$1,256,244
--------------------	-------------	-------------	-------------

## e. Inmate Welfare Fund

The Inmate Welfare Fund was created in 1945 as a special trust fund for the benefit, education and welfare of the inmates. The fund is administered by the Department and derives its income mainly from the profits of inmate canteens. Other sources of funds are sales from handicraft shops, interest on invested reserve moneys of the fund itself and cash donations.

Income from this self-supporting fund is used for such inmate benefits as movies, inmate newspapers and library books.

Leather goods, jewelry and art work created by inmates are sold to the public at the institutions. A percentage of an item's selling price goes to the Inmate Welfare Fund, and the remainder is credited to the inmate's account. Purchases for materials are paid for from the inmates' own funds. The program provides earnings to inmates who may have no other source of income.

Output	1975-76	1976-77	1977-78
Purchase for inmate benefits .....	\$312,198	\$257,324	\$238,686
Percent of inmates participating in handicraft .....	36	36	36

## Input

Expenditures .....	\$5,365,946	\$5,763,563	\$5,964,243
Personnel years .....	44.6	50	50
Resources .....	\$5,615,278	\$5,865,577	\$6,019,781

## f. Institution Operations—Administration

Effective administrative leadership, guidance and support are essential to administer and coordinate all institution program activities. To assure the efficient utilization of available resources, it is imperative that institutions are operated within the framework of departmental goals at the most reasonable cost to the State.

## Input

	1975-76	1976-77	1977-78
Expenditures .....	\$11,144,034	\$11,592,668	\$13,176,109
Personnel years .....	334.7	336.5	353.8

## g. Workers' Compensation—Inmates

Chapter 1347/76, Senate Bill 627, of the 1975-76 Legislative Session became effective January 1, 1977, and provides for workers' compensation benefits for inmates injured while performing assigned work in departmental institutions. Included in the anticipated additional cost to implement Senate Bill 627 and charged to the separate budget item are the costs to administer the program, maintain records and provide medical care.

Input	1975-76	1976-77	1977-78
Expenditures .....	-	-	\$22,600

## DEPARTMENT OF CORRECTIONS—Continued

## III. RELEASING AUTHORITIES

## Program Objectives and Description

With the enactment of Chapter 1139/76 (SB 42), which becomes operative July 1, 1977, the Adult Authority and the Women's Board of Terms and Parole are to be abolished and replaced by the Community Release Board. This new board will have jurisdiction over male and female felons. However, it has limited authority concerning the length of time spent by determinately sentenced inmates in the institutions and has limited responsibility in regard to time spent under parole supervision. The length of combined inpatient and outpatient treatment for nonfelon narcotic addicts will continue to be determined by the Narcotic Addict Evaluation Authority.

## Authority

Penal Code, Part III, Titles 1, 2, 3, 5, 7; Welfare and Institutions Code, Divisions 2.5 and 3.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

General Fund .....				2,676,365	2,947,865	3,592,130
Reimbursements .....				194,561	—	—

## Program Elements

a. Community Release Board .....	—	—	71.4	—	—	\$3,477,303
b. Narcotic Addict Evaluation Authority .....	5	5.9	5.9	\$110,126	\$138,082	144,827
c. Adult Authority .....	63.1	63	—	2,584,446	2,553,304	—
d. Women's Board of Terms and Parole .....	8.5	9.3	—	176,354	256,479	—

## a. Community Release Board

The newly created Community Release Board consists of nine full-time members appointed by the Governor with the advice and consent of the Senate. Initially, however, two of the original appointees must have been members of each the Adult Authority and the Women's Board of Terms and Parole.

The Department will review all cases of inmates sentenced prior to July 1, 1977 and in accordance with provisions of Senate Bill 42, apply the new sentencing standards. The new Board will review all appropriate cases for final determination for release dates. A three-member panel of the Board must meet with each life-sentenced prisoner within the first year of incarceration to review the inmate's file. Each determinately sentenced prisoner is also seen within the first year. The Board also makes commutation recommendations to the Governor and reviews cases of denial of good behavior credits.

At the current time it is not possible to project the workload of the Community Release Board and the appropriate staffing. The funding level, which is appropriated as a separate item, reflects the current year program levels of the Adult Authority and the Women's Board of Terms and Parole. Per the provisions of Senate Bill 42, \$600,000 is proposed in order to contract for defense counsel for indigent inmates. Subsequent revision to the funding level and specific proposed new positions for the Community Release Board may be anticipated.

Output	1975-76	1976-77	1977-78
Community Release Board:			
Cases reviewed without hearing .....	—	—	24,000
Institution cases heard .....	—	—	8,500
Appeals from loss of time credits .....	—	—	850
Release granted .....	—	—	9,130
Audit of court sentences .....	—	—	7,960
Parole and Community Services:			
Cases heard .....	—	—	4,000
Parole suspended .....	—	—	900
Revocation hearings .....	—	—	1,800
Other (mandatory review cases, reaffirmed actions, Narcotics Treatment Control Unit, release or placements ordered, parole continuation advices) .....	—	—	5,000
Input			
Expenditures .....	—	—	\$3,447,303
Personnel years .....	—	—	71.4

## b. Narcotic Addict Evaluation Authority

The Narcotic Addict Evaluation Authority consists of four part-time board members.

When a male or female narcotic addict in the Civil Addict Program shows significant progress as a result of treatment and demonstrates the potential to abstain from narcotic drug use, the superintendent of the California Rehabilitation Center, where such commitments are confined, certifies this progress to the Narcotic Addict Evaluation Authority for release consideration.

In addition, the Authority considers the cases of outpatients who violate their conditions of release and determines whether these individuals should be returned to inpatient status for further treatment. As a result of the Bye court decision, the workload has increased as evidenced by the number of oral orders granted and the cases considered following revocation hearings.

Output	1975-76	1976-77	1977-78
Narcotic Addict Evaluation Authority:			
Institution cases heard .....	4,805	5,377	5,566
Outpatient revocation cases heard .....	11,775	11,212	11,234
Final discharge hearings .....	490	466	467

## IV. COMMUNITY CORRECTIONAL PROGRAM

## Program Objectives and Description

The primary objective of the Community Correctional Program, consistent with the public's safety, is to increase the rate and degree of successful transitions of adult offenders who have been, or who are in the process of being, released to the jurisdiction of the Parole and Community Services Division by providing supportive services and controls, and by enlisting community understanding and assistance.

The Community Correctional Program is divided into five geographic parole regions consisting of 14 districts and approximately 56 parole units. The effects of Senate Bill 42 on the State's parole system will be substantial. Prisoners released from a life term may be placed under parole supervision for a maximum of three years. Those released from determinate sentences are to be placed under parole supervision for up to one year, unless the Community Release Board waives parole for good cause and discharges the inmate. The Department determines the conditions of parole subject to review and modification by the Board. These reduced parole periods also apply to those sentenced prior to July 1, 1977. Confinement for a technical parole violation is limited to six months and may not extend beyond the maximum statutory length of parole supervision.

In this printed budget, existing caseload standards and program levels are maintained. However, more intensive pre and post release programming and supervision of felons call for new approaches and revised standards. Plans for these changes are now being developed and will be presented to the Legislature.

## Authority

Penal Code, Part III, Titles 1 and 7; Part IV, Title 1; Welfare and Institutions Code, Chapter 2.

## a. Supervision—Case Services

The primary objective of this program, consistent with the public's safety, is to increase the rate and degree of successful transitions by adult offenders under jurisdiction of the Parole and Community Services Division through providing effective supervision and case services.

The Supervision—Case Services element is composed of five components which are: (1) felon supervision for male and female felons with parole agents supervising caseloads averaging 50 cases; (2) nonfelon supervision for male and female civil addicts with parole agents supervising caseloads averaging 32 cases; (3) work furlough supervision for male and female inmates released shortly before established parole dates, with parole agents supervising caseloads averaging 35 cases; (4) Interstate Unit supervision for other states' parolees in California and California parolees in other states; (5) field administration and supervision to provide administrative leadership, guidance, direction, and technical and clerical support.

	1975-76	1976-77	1977-78
1. Felon Supervision:			
Average daily population .....	13,595	12,675	8,935
Input			
Expenditures .....	\$7,597,913	\$7,797,705	\$6,796,495
Personnel years .....	266.7	241.5	191.1
2. Nonfelon Supervision:

5. Field Administration/Unit Supervision:			
Input			
Expenditures .....	\$6,515,845	\$7,361,433	\$7,207,683
Personnel years .....	317	316.6	270.1

## b. Community Correctional Centers

The primary objective of Community Correctional Centers is to increase the probability of a successful parole outcome by providing residence in a controlled environment and employment, education or training in the community for selected inmates and parolees. Parolees and inmates without adequate resources are very prone to become involved in new criminal activities. Community Correctional Centers provide a more heavily structured supervision program for a short period after release from prison or in lieu of return to an institution as a parole violator.

While the centers are used primarily as a residence for those male and female inmates participating in work furlough prior to release on parole, they also provide a controlled environment for those parolees who are exhibiting difficulty in their community adjustment. Center programs include employment as well as opportunities for participation in academic education, training, counseling, and psychotherapy which better prepares both inmates and parolees for a satisfactory adjustment in the community.

	1975-76	1976-77	1977-78
Output			
Population beginning fiscal year .....	115	143	113
Total received .....	929	690	576
Total departures .....	901	720	582
Population end of fiscal year .....	143	113	107
Average daily population .....	131	126	93
Input			
Expenditures .....	\$769,251	\$1,009,528	\$898,152
Personnel years .....	31.2	33.4	33

## c. Psychiatric Outpatient Services

The objective of Psychiatric Outpatient Services is to reduce the incidence of psychiatrically related incidents among suspected or identified psychiatrically disturbed offenders by diagnosing psychiatric problems and providing appropriate treatment services.

Following institutional psychiatric treatment, inmates with a history of aggravated assaultive crimes and/or serious sex offenses are often required by paroling authorities to participate in additional psychiatric treatment while on parole. Over 95 percent of parolees receiving psychiatric treatment do so at the request of the paroling authority.

Required psychiatric services are supplemented by additional diagnostic and psychiatric services for parolees not routinely receiving such services but who require them because of occasional serious mental health problems, which may or may not be associated with new criminal acts. It is estimated that approximately 15 percent of the parole population require these services. Psychiatric services are provided via Psychiatric Outpatient Clinics in San Francisco and Los Angeles with satellite service available in many other communities.

## DEPARTMENT OF CORRECTIONS—Continued

## Output

	1975-76	1976-77	1977-78
Number of patients beginning of fiscal year .....	1,354	1,655	2,060
Number of admissions .....	1,219	1,620	2,020
Number of terminations .....	918	1,215	1,515
Number of patients end of fiscal year .....	1,655	2,060	2,565

## Input

Expenditures .....	\$927,296	\$1,085,283	\$1,108,571
Personnel years .....	29.7	29.9	29.6

## d. Special Narcotic Services

Effective parole programming requires the implementation of the most effective techniques to detect and deter the use of opiates by parolees and thereby reduce their incidence of readdiction. Urinalysis, routine physical examinations, and methadone maintenance are used to deter and/or detect opiate usage.

Urinalysis testing of parolees with records of opiate addiction is performed by a contract laboratory. Additional testing, as well as the state-operated methadone maintenance program for 200 parolees, is carried out at the Central Testing Clinic in Los Angeles. An additional 150 parolees participate in the state-operated methadone maintenance program through a federally-funded project with the State Department of Health.

Approximately 1,133 other parolees are participating in methadone maintenance programs conducted by other private or public agencies or organizations. An alternative to returning addicts to prison is provided by contracting for narcotic detoxification services with a variety of public and private organizations.

## Output

	1975-76	1976-77	1977-78
Number of addicts supervised .....	10,427	9,900	10,200
Number of urinalyses .....	147,242	140,000	144,000
Number of positive urinalyses .....	14,811	14,500	14,600

## Input

Expenditures .....	\$960,072	\$885,448	\$926,306
Personnel years .....	11.5	11.3	11.1

## e. Executive

The executive element, comprising two components, Administration and Business Management, facilitates accomplishment of overall objectives of the Parole and Community Services Division by providing effective leadership, policy and program, planning and analysis, sound and understandable administrative procedures, clear communications and a functional organization.

## Input

	1975-76	1976-77	1977-78
Expenditures .....	\$1,463,482	\$1,438,499	\$1,458,002
Personnel years .....	58.8	47	49.9

## V. ADMINISTRATION

## Program Objectives and Description

The Department of Corrections, in order to successfully achieve the responsibilities charged to it by California law, operates with an administrative organization consisting of the office of the director, four line divisions and several staff services functions.

The director and chief deputy director have overall administrative and program responsibility. The administrative assistant coordinates the day-to-day activities of the office of the director.

The Institutions Division is responsible for all field operations including institutions, classification, medical, education, records, and related program services.

The Administration Division is responsible for the business affairs of the Department including budgeting, feeding, construction and maintenance, and advises the director on the status of fiscal affairs.

The Policy and Planning Division is responsible for research and statistics, legal services, and guidance and assistance in planning, development and operation of departmental programs.

The Parole and Community Services Division is responsible for the parole supervision program, but is not an organizational unit of the Administration Program.

The staff services functions include public information, legislation liaison, human relations, and personnel management and training. These offices are responsible for providing advice and counsel to the director and line administrators in their specialty areas.

Within the Policy and Planning Division is the Offender-Based Information System which is grant-funded through 1976-77. This system, which replaces the old manual/punch card statistical system, provides data on the inmate population such as movement, program, and board actions. Grant funds were available only for the development of the system, and now that much of it is operational, state funds are required. In 1977-78, 73 positions and \$1,715,441 are proposed.

Due to increased workload, state funding will be provided in 1977-78 for four staff support positions at \$61,887.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## DEPARTMENT OF CORRECTIONS—Continued

## VI. SPECIAL ITEMS OF EXPENSE \*

## Program Objectives and Description

California law provides for the reimbursement to local jurisdictions for expenditures incurred in providing services related to persons who have been committed to the Department of Corrections. Counties are entitled to reimbursement for the following four principal types of expenditures: (1) transportation of prisoners and parole violators; (2) returning fugitives from justice; (3) court cost and county charges; and (4) detaining state parolees. Special appropriation items provide the funds.

## Authority

Penal Code Sections 1389, 1549, 1557, 4016, 4700, 4700.5, 6005, 11190, et seq.; Welfare and Institutions Code 3000, et seq.; and Government Code 26749.

\* Special items of expense are reflected in the local assistance section.

## Program Requirements

	1975-76	1976-77	1977-78
Continuing Program Costs:			
Transportation of prisoners.....	\$189,354	\$200,000	\$220,000

Totals, Special Items of Expense (General Fund).....	\$3,126,746	\$3,263,934	\$2,784,934

## VII. COMMUNITY CORRECTIONAL PROGRAM REDIRECTION

Changes in parole population will occur when Senate Bill 42 becomes effective July 1, 1977. More intensive pre and post release programming and supervision of felons will be provided. To insure that adequate resources are available to perform this intensified supervision, programming and to help restore parolees to a productive life, funds are reserved in this program. The Department intends to present its proposals to the Legislature in sufficient time for review prior to legislative hearings on the Governor's Budget.

## DEPARTMENT OF CORRECTIONS—Capital Outlay

STATE BUILDING PROGRAM  
EXPENDITURESActual  
1975-76Estimated  
1976-77Proposed  
1977-78*Departmental Administration*

The Department of Corrections, headquartered in Sacramento, operates a system of 12 separate institutions. These institutions have a total bed capacity of more than 24,000 and a total acreage of nearly 10,500. A prime emphasis for 1977-78 is to improve sanitation and sewage facilities to meet environmental and health requirements.

The facilities planning effort, which was made available by a budget augmentation, will be concluded with a final report to the Legislature by March 1, 1977.

## MAJOR PROJECTS

*California Conservation Center, Susanville*

Alterations, security modifications and related work .....	\$238,800	—	—
Remodel or replace sewage plant .....	—	\$306,250	—

*Correctional Training Facility, Soledad*

Rehabilitate electrical system .....	—	\$870,000	—
Remodel sewage system .....	—	—	\$100,688

## DEPARTMENT OF THE YOUTH AUTHORITY

The primary objective of the Youth Authority is "to protect society more effectively by substituting for retributive punishment, methods of training and treatment directed toward the correction and rehabilitation of young persons found guilty of public offenses." The Department carries out this mandate to protect the public by: (1) providing residential and community rehabilitation programs which will help persons committed to the Youth Authority to become useful and productive citizens, and (2) accumulating a body of knowledge relative to the causes of delinquency and the treatment and control of those who engage in illegal behavior.

The mission of the Department of the Youth Authority is to protect society from criminal and delinquent behavior by children and youth.

### Goals

Youth Development: *Increase opportunities for all children and youth to participate as contributing members of society.*

Delinquency Reduction: *Reduce probability of illegal behavior by children and youth not yet involved in the justice system, but who have exhibited antisocial characteristics.*

Offender Rehabilitation: *Reduce continuing illegal behavior by offenders.*

Research: *Systematically develop knowledge about delinquency reduction, youth development, and offender rehabilitation.*

The Department is organized into four branches: Parole and Institutions; Prevention and Community Corrections; Planning, Research, Evaluation and Development; and Management Services. Programs are managed by the branches under direction of the Director of the Youth Authority.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78

### I. COMMUNITY SERVICES

#### Program Objectives and Description

The objectives of Prevention and Community Corrections Branch is to assist local governmental and private organizations and citizens in development and improvement of delinquency reduction programs; and to assist local government in the development and improvement of juvenile law enforcement and correctional systems.

Other Youth Authority responsibilities include assisting county correctional agencies to increase the effectiveness of their programs through standard setting and inspections, training, special studies, and other technical and financial assistance.

From the inception of the probation subsidy program in 1966-67 through 1975-76, there has been a reduction of 43,182 juvenile and adult commitments by the courts to the State compared to the numbers which could potentially have been committed if past rates had continued. In 1976-77, 44 of the 58 counties will participate in the program, which will include counties accounting for 97 percent of the State's population.

#### Authority

c. Delinquency prevention assistance to local communities.....	15.7	18.5	15.5	1,030,615	2,164,799	2,154,645

## a. Services to Public and Private Agencies

## Output

The Department has statutory responsibility to develop standards for: Juvenile halls; the confinement of minors in jails; camps, ranches and schools; probation duties; probation subsidy; and other community-based prevention and correctional programs. In conjunction with these standards, the Department is required to inspect and evaluate programs to be certain that they are meeting minimum standards and delivering effective services. In addition, consultation and technical assistance are provided to local components of the criminal justice system by disseminating and explaining standards, encouraging the development of crime and delinquency prevention projects, and assisting communities to develop new and improved correctional programs.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	23.2	24.9	24.9	\$746,421	\$804,444	\$838,326

## b. Financial Assistance

Financial assistance programs provide part of the financing for the maintenance and operation and construction of juvenile homes, ranches, and camps, special probation supervision programs, and delinquency prevention programs of public or private agencies. These programs attempt to reduce the occurrence of delinquency and/or to strengthen local community resources in such a way as to reduce the number of cases penetrating into the criminal justice system.

## Output

CONSTRUCTION AND MAINTENANCE OF JUVENILE HALLS, RANCHES, AND CAMP SUBSIDY	1975-76	1976-77	1977-78
Juvenile homes, ranches, and camps provide institutional treatment at the local level for the following average daily population .....	2,996	4,128	4,200
Number of facilities .....	73	84	85
Juvenile camp construction subsidy funds—total capacity available.....	3,785	3,994	4,075

## PROBATION SUBSIDY

Total reduction of commitments to the Department of the Youth Authority and Department of Corrections .....	3,960	3,529	3,529
Youth Authority.....	2,804	2,499	2,499
Corrections .....	1,156	1,030	1,030
Percent of state population represented by the counties .....	97.5	97	97

## DELINQUENCY PREVENTION SUBSIDIES

Thirty-nine counties are subsidized up to \$1,000 of the administrative expenses of each county delinquency prevention commission. In addition, matching funds are used for demonstration delinquency prevention projects sponsored by local communities.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	20.6	22.1	22.1	\$25,617,297	\$23,198,887	\$24,934,858

## c. Delinquency Prevention Assistance to Local Communities

## Output

The Department's efforts have resulted in increased activities on the part of delinquency prevention commissions, juvenile justice commissions, and other citizen groups that have sponsored delinquency prevention projects funded through state, local, and federal funds. As a direct result of requests from a variety of community groups, the Department conducted drug education, volunteer, delinquency prevention and diversion seminars throughout the State.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	15.7	18.5	15.5	\$1,030,615	\$2,164,799	\$2,154,645

## II. REHABILITATION SERVICES

## Program Objectives and Description

The objectives of Parole and Institutions Branch are:

1. To determine by diagnosis which treatment or training programs or combinations of programs offered by the Department can best meet the needs of each ward committed to it.
2. To provide a secure, closed and varied treatment setting for wards during the institution phase of their treatment program and supervision, supportive and surveillance services within the community while they are on parole.

DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*

## Authority

Welfare and Institutions Code.

## Trends—Youth Authority Population

1. Ethnic group composition of wards first committed to the Youth Authority has undergone a significant change in recent years. In 1965, minority group members constituted 47 percent of Youth Authority's commitments. In 1975, 56 percent of the total first commitments were from minority groups.

2. Wards committed to the Youth Authority without prior records have been increasing. For example, between 1965 and 1975 the proportion of wards with no prior record has increased from 3.9 percent to 5.3 percent. However, commitments for serious crimes have been increasing. For example, males with a first commitment offense in the category of "offenses against persons" now comprise 42.2 percent as compared to 15.5 percent of the total male commitments in 1965.

3. Since 1965, the juvenile court-criminal court "mix" of first commitments to the Youth Authority has shifted significantly. Criminal court commitments have increased as a percentage of the total. The 1965 ratio was 75.1 percent juvenile and 24.9 percent criminal court commitments. The 1975 ratio was 53.7 percent juvenile and 46.3 percent criminal court cases.

4. The age of youths at first commitment to the Youth Authority is increasing. The median age of all wards committed in 1965 was 16.9 years while in 1975 it was 18 years. The median age of those housed in Youth Authority facilities has changed. The median age on June 30, 1965 was 17.6 while on June 30, 1975 it was 19.

5. There has been a marked increase in violent behavior by Youth Authority wards in institutions. A comparison of 1965-66 to 1974-75 shows attacks on staff up from 24 to 140 and attacks by wards on other wards up from 22 to 374.

6. First commitments to the Youth Authority have decreased from 6,190 in 1965 to 3,404 in 1975. The number of more serious offenders has increased length of stay, even with credit given for reception center time, from an average of 9.4 months in 1965 to 11.2 months in 1976.

Youth Authority institution and parole populations for 1974-75 through 1976-77 fiscal years are shown in the table entitled, Statement of Population—Institution and Parole.

b. Care and control	2,276.8	2,339.4	2,344.2	\$3,505,116	\$9,817,571	\$2,138,217
c. Treatment	1,070.4	1,099.1	1,087.1	24,359,221	26,750,179	27,495,084

## a. Diagnosis

All wards received by the Youth Authority go through an intensive diagnostic process at one of four Youth Authority reception centers. The clinical study includes psychological and educational testing, interviewing, medical and dental examinations and observation of daily activities. This information is then used in formulating the final diagnosis and treatment recommendations.

The Youth Authority is planning a pilot project, with federal funds, in the San Francisco area. This project will attempt to utilize local facilities for diagnosis of new commitments to the Youth Authority.

The DeWitt Nelson Training Center provides dental work for all wards transferred to the several Youth Conservation Camps. The pre-camp training program is conducted at this center and the dental work is completed while the wards are being trained.

## Output

	1975-76	1976-77	1977-78
Reception Center Admissions:			
First admissions	3,543	3,700	3,850
Parole returns	997	1,400	1,500
Contract cases (out-of-state and county referred)	477	475	475
Totals (Clinic reports completed)	5,017	5,575	5,825

Expenditures	349.6	361.1	355.9	\$8,376,663	\$9,329,914	\$9,586,059

## b. Care and Control

Providing adequate care, control, custody and surveillance for youth committed to the Department, and thus protection of the public is one of the major responsibilities of the Youth Authority and must be accomplished within an atmosphere that promotes progress towards individual rehabilitation goals.

Custodial personnel have physical control and security as a primary responsibility. This responsibility is exercised in the living unit, through supervision of recreation activities and work details, movement within the institution, and a variety of other activities in

The male population is estimated for the current year at 3,770 and for the budget year at 3,678. The estimate for the current year requires that the 1976-77 authorized budget be reduced. Five living units will be closed in the current year reducing the budgeted bed capacity by 250. The Department will be revising its population projection shortly after April 1, 1976. Layoffs will not be made as a result of living unit closures. Excess staff will be placed in attrition blankets and be utilized for various post-coverage relief assignments, but not utilized to enhance legislatively authorized staffing ratios.

The institutions presently provide security coverage of visiting areas within the institution during visiting periods on weekends and holidays. The present staff coverage has proven insufficient for operation of recently installed metal detectors, increased number of visitors, observers at board hearings, and increased need for surveillance of visitors and wards to prevent visitors from passing contraband to the wards, and to prevent incidents from arising in visiting halls. To provide adequate security coverage for this activity, seven temporary help positions and \$117,311 are proposed in the 1977-78 fiscal year.

The work programs at the DeWitt Nelson Training Center require movement of wards in and out to work assignments outside of the security fence. To maintain the safety and security of wards and staff during these movement periods, 3.2 positions and \$56,223 are proposed in the 1977-78 fiscal year.

A \$300,000 allocation is proposed in the 1977-78 fiscal year to meet the special repairs and maintenance needs of the Department's institutions. The Youth Authority has submitted applications for participation in the federally-funded School Lunch Program, School Breakfast Program and Special Milk Program.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Special Milk Program. It is anticipated that the department will receive net reimbursements in the amount of \$1,014,717 in the 1977-78 fiscal year. Two institution based camps will be established at the Dewitt Nelson and Ventura Schools in the budget year in addition to the existing institution based camp at El Paso de Robles. The institution based camps will be established from the closure of the Dewitt Nelson Forestry Training Program (two units) and the conversion of a regular program unit at Ventura. The camp program at Ventura School is significant in that it will enable girls to participate in a conservation camp program for the first time.

Institution based camps enable more wards to participate in conservation camp programs such as fire prevention and suppression. The combination of a secure institution based program and supervised work crews provides meaningful work experience for wards and at the same time produces tangible benefits to the state in preservation of natural resources.

## Output

The youth committed to the Youth Authority are eventually returned to the community under parole supervision. Surveillance and control of the parolee's activities are supplemented by other casework services, including individual and group counseling, assistance in obtaining employment and school placement, when appropriate, foster home placement, and other supportive services.

The parole agent is responsible for face-to-face contact with youth assigned to his caseload as well as all contacts with private and public agencies and interested citizens with respect to them. The parole agent's parolee supervision responsibilities include maintaining controls over the parolee's activities in school, employment, and the community.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	2,276.8	2,339.4	2,344.2	\$53,505,116	\$59,817,571	\$62,138,217

## c. Treatment

Each Youth Authority institution and parole unit provides a variety of counseling and other treatment services. These services include small and large group counseling, individual counseling, guided group interaction, activity groups, clinically oriented therapy, academic and vocational education, religious counseling and psychiatric evaluation and treatment.

The preponderance of wards in institutions operated by the Department of the Youth Authority are between 16 and 20 years old. Their backgrounds frequently include a history of poor school experiences. Only 6.8 percent of first admissions in 1971 had no reported school misbehavior, and only 7.2 percent had achieved high school graduation. The reading and math achievement levels are severely depressed. Sixty-three percent of the wards had reading comprehension levels three or more years below their age-grade expectancy, and 85 percent had math achievement levels three or more years below their age-grade expectancies.

A survey of student attitudes at Preston School found that their understanding of the world of work was what one would expect from a 13-year old. The employment record of these students is relatively poor. A survey of parole caseloads found that approximately 40 percent of male parolees, 60 percent of female parolees "in the labor force" are unemployed at any point in time.

A ward pay plan has been implemented to provide incentive for older and more experienced wards for work not directly related to training but necessary for the operation of the institution. The wards are paid on a sliding scale of \$0.04 to \$0.12 an hour, with an average rate of pay of \$0.08 an hour.

During the 1974-75 fiscal year, an intensive treatment program for juvenile offenders became operational at the Northern Reception Center and Clinic. This program cares for a limited number of youth in Northern California. In addition, the Department operates a similar program in Southern California, funded by Los Angeles County Mental Health.

In the current fiscal year, the Department's substance abuse program and purchase of community based treatment program is funded primarily with federal Law Enforcement Assistance Administration funds, which will terminate on June 30, 1977. In fiscal year 1977-78 \$250,000 will be provided to continue this program from funds available to combat narcotics and drug abuse.

Wards with histories of psychiatric disturbance have a high potential for personality disorientation when confronted with stressful life situations while on parole. To provide needed psychiatric care, \$100,000 is proposed in the 1977-78 fiscal year.

## Output

## PAROLE VIOLATION STATUS OF PAROLEES

Year of release	Number released to parole supervision	Revoked or discharged for violation within 24 months	
		Number	Percent
1970.....	6,737	2,817	41.8
1971.....	6,251	2,505	40.1

## III. RESEARCH

## Program Objectives and Description

This program provides the evaluation and feedback to management mandatory to determine which programs are effective and should be continued, those that show promise and should be reinforced and those that should be discontinued.

1. To provide planning to guide and help implement the long-range program.
2. To provide the Department with an information system as a basis for arriving at sound management decisions.
3. To provide the Department with a research capability and a system for evaluating how well its program objectives are being met.

## Authority

Welfare and Institutions Code.

The Division of Research has two major areas of responsibility. One is the operation of the departmental information system, and a second is to provide research services to ongoing programs and to special demonstration projects.

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	86.4	67.1	67.1	\$1,973,178	\$1,920,720	\$1,763,098

General Fund.....				1,179,255	1,457,330	1,478,463
Federal funds.....				238,751	150,372	90,078
Reimbursements.....				555,172	522,043	208,521

## Program Elements

a. Information systems.....	14.5	13.3	14.3	\$356,816	\$414,465	\$436,317
b. Research and evaluation.....	71.9	69.4	48.8	1,616,362	1,715,280	1,340,745

## a. Information Systems

Information is collected on the principal decision points in the movement of wards through the Department's rehabilitation program from the point of initial referral to final discharge. Predictions of future institutional and parole caseloads are made for support budgeting and Capital Outlay budgeting.

The Offender Based Management Information System (OBMIS) provides ward-related information in the major components of the Department's operation, ward testing, acceptance, and intake; institution placement programs, and movements; Youth Authority Board reviews and action; and parole placement and follow-up through final discharge. The Department is currently involved in the development and implementation of a vastly improved version of this system through the federally-funded Offender Based Institutional Tracking System (OBITS). Federal funding terminates on June 30, 1977. To provide continuation of OBITS, a total of one position and \$157,841 are proposed in the 1977-78 fiscal year.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	14.5	13.3	14.3	\$356,816	\$414,465	\$436,317

## b. Research and Evaluation

The evaluation resource is the primary means whereby the Department fulfills its commitment to careful, scientific evaluation of its program to ensure its resources are being used most effectively.

The Youth Authority proposes to design and implement a performance monitoring and evaluation system which encompasses all programs operated and subsidized by the Department. This system will increase the degree to which measurable objectives, program descriptions, and staff performance standards are available for use in the management programs. To implement this system, an additional 3.5 positions and \$72,212 are proposed in the 1977-78 fiscal year.

## Output

Output is measured in terms of the timeliness, comprehensiveness, accuracy, and relevance of data made available to management.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	71.9	69.4	48.8	\$1,616,362	\$1,715,280	\$1,340,745

## IV. YOUTH AUTHORITY BOARD

## Program Objectives and Description

The Youth Authority Board is mandated by statutes to make decisions as to persons committed to the Youth Authority. These decisions involve setting a date for the person's next appearance before the Board; the person's readiness for return to the community on parole; conditions relating to the person's conduct on parole; violation and revocation of parole; return to the committing court for redispotion by the court; and discharge of the person from the jurisdiction of the Youth Authority.

The objectives of the Youth Authority Board are:

1. To protect the public.
2. To assure the rehabilitation of the youthful offender.

Since June 1972, five major court decisions have had a significant impact on the operations and workload of the Department and the Youth Authority Board. The workload increase, as a result of the three most recent decisions (all California Supreme Court decisions), *In re: LaCroix*, *In re: Valrie* and *Gee vs. Brown*, were reflected in the 1976-77 fiscal year budget.

## Authority

Welfare and Institutions Code.

In June of 1972 and May of 1973, the U.S. Supreme Court decided two cases: *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli*, which placed a substantial workload increase on the Youth Authority Board. The *Morrissey vs. Brewer* decision set down minimum requirements for due process procedures for the revocation of parole of any person. The *Gagnon vs. Scarpelli* decision provided the right to request counsel and created an obligation upon the State to ensure counsel is provided under certain circumstances for any person who was undergoing a parole violation or revocation process.

Both the *In re: LaCroix* and *In re: Valrie* decisions requires the Board to hold a hearing for persons being detained on Youth Authority initiative to determine if there is probable cause to believe the person has violated conditions of parole. The rights afforded persons in *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli* apply to probable cause hearings. In the *Gee vs. Brown* decision, the court set forth a higher standard of due process for persons undergoing disciplinary action within an institution if the person had been referred to parole. If this disciplinary action may lead to the vacating of a referral to parole, the court requires the *Morrissey vs. Brewer* and *Gagnon vs. Scarpelli* due process protections to apply.

Currently, the Youth Authority Board and the Department are assessing the impact of recent legislation, Chapter 1071/76 (AB 3121), Chapter 1139/76 (SB 42), and the recent California Supreme Court ruling (*Olivas* decision) on the Board's decisions regarding period of confinement and jurisdiction and departmental population.

## Percentage of Wards to Total Population Designated Full Board and Special Services

As of	Full Board	Intensive Supervision
June 30, 1972.....	11.1%	8.9%
June 30, 1973.....	16.4%	9.9%
June 30, 1974.....	19.3%	10.6%
June 30, 1975.....	24.3%	13.7%
June 30, 1976.....	25.7%	15.2%

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

The full Board (three-Board-member panel) is hearing an increasing percentage of cases. There is a growing percentage of parole cases which require intensive supervision.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## V. ADMINISTRATION

## Program Objectives and Description

All of the Department's operational and program areas require overall leadership, coordination, and administrative support to assist in reaching the Department's objectives, which are to:

1. Provide leadership and coordination for departmental programs.
2. Ensure the most efficient and effective use of the available manpower and resources.
3. Provide administrative, business and other services necessary for the efficient operation of the Department's programs.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	162.5	176.2	176.2	\$4,581,703	\$5,301,136	\$5,158,025

b. Support services .....	149.5	191.6	178.9	4,088,485	4,914,240	4,712,899

## a. Executive

The director of the Youth Authority is the chief administrative officer of the Department and chairman of the Youth Authority Board.

The office of the director, including the chief deputy director, combines with the branch deputy director to constitute the central administrative core within which the responsibility for all major policy determinations, program planning, and evaluation is centered.

The director personally carries the responsibility for coordinating policy and procedure between the program operation arms of the Department and the case decision making authority of the Youth Authority Board. A mutually supportive relationship between these two entities is essential to the effective operation of both.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	13	13.5	13.5	\$493,218	\$548,911	\$577,270

## b. Support Services

General administrative services are provided to support the various program operations of the Youth Authority. Staff services for fiscal management, management analysis, data processing, facility construction and maintenance, and safety are provided by the Administrative Services Division. Staff services for personnel and training are provided by the Division of Personnel Management.

## Output

All of the support services are performed at the request of managers involved in the program areas. There are few output measures other than the relationship of administrative costs compared to total program costs.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	149.5	191.6	178.9	\$4,088,485	\$4,914,240	\$4,712,899

## VI. LEGISLATIVE MANDATES

## Program Objectives and Description

Section 2231 (a) of the Revenue and Taxation Code, requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Chapter 1071/76 (Assembly Bill 3121) makes numerous changes to the juvenile justice system.

Analysis of the enacted legislation indicated there will be direct local costs. Funds are provided in the budget year and a deficiency bill will be proposed to provide funds in the current year.

Program Requirements	1975-76	1976-77	1977-78
Program costs ( <i>General Fund</i> ) .....	—	\$1,329,000	\$2,658,000

## DEPARTMENT OF THE YOUTH AUTHORITY—Continued

## SPECIAL PROJECTS

The Special Projects section is a listing of Youth Authority programs funded by federal or private agencies. Most federal projects are funded for three years, and are demonstration or experimental in nature. Projects are closely monitored and evaluated to determine relevance to the Department's goals. Projects that show results are submitted for state funding through the normal budget process.

## CALIFORNIA HEALTH FACILITIES COMMISSION

The California Health Facilities Commission was created by Chapter 1242, Statutes of 1971, and charged with the responsibility of developing a uniform system of accounting and reporting for all hospitals in California. Chapter 1171, Statutes of 1974, further required the Commission to develop and implement an accounting and uniform reporting system for the approximately 1,200 long-term care facilities in California, in addition to the hospitals. The purpose of developing these systems of reporting requirements was to: (1) encourage economy and efficiency in the provisions of health care services, (2) enable public agencies to make informed decisions in purchasing and administering publicly financed health care, (3) encourage organizations which provide health care insurance to take into account financial information provided to the state in establishing reimbursement rates, (4) provide a uniform health data system for use by all state agencies, (5) provide accurate information to improve budgetary planning, (6) identify and disseminate information regarding areas of economy in the provision of health care consistent with quality of care, and (7) create a body of reliable information for research into the economics of health care.

The hospital accounting and reporting system has been completed and became operational July 1, 1975. The Commission has received one full year of hospital disclosure reports. Since this system has been developed, the legislative mandate in this regard has been fulfilled. The need for Commission deliberations is substantially reduced. *Accordingly, this budget reflects a proposal to transfer the ministerial data collection duties and the personnel directly associated with the hospital accounting system to the Department of Health, effective January 1, 1978. Overall staff and dollar savings will be realized as a result of this transfer and reduction of duties. Duplication that previously existed between the Department of Health and the Commission will be eliminated.* The development of long-term care facilities disclosure function will remain with the Commission during the budget year. However, when the system is operational, it is anticipated that the function will be transferred to the Department of Health. The Administration will support legislation which will effectuate this transfer.

### SIGNIFICANT PROGRAM CHANGES

Program Description	Personnel-years	Dollars
I. Transfer hospital disclosure function to Department of Health .....	-7	-\$232,371

### I. UNIFORM ACCOUNTING AND REPORTING—HOSPITALS

#### Program Objectives and Description

The objective of this program is the development and administration of a uniform system of accounting and financial and statistical reporting for all of the hospitals of California. Secondary objectives include the analysis and publication of information collected under these regulations to provide governmental and private agencies and individuals with accurate cost information and to use this information as a basis for recommending methods for more efficient operation and provision of health care services.

Within four months of completing each fiscal year, all hospitals are required to submit prescribed annual financial and statistical reports. During the 1975-76 fiscal year, the first annual hospital financial reports were submitted. During current and budget years, summaries, compilations, or supplementary reports will be prepared which will be available to the public for inspection. This information will be used as a basis for doing long and short range special studies with the purpose of recommending economies in the provision of health care services.

*During the budget year, it is proposed that this program be transferred to the Department of Health. The Department will use this data to continue its ongoing responsibilities for evaluating California's health care systems. To accomplish this transfer, seven positions will be transferred from the Commission to the Department. As a result of duplicative activities currently performed by these two agencies, four additional positions will be reduced from the Commission and associated savings will be realized.*

## CALIFORNIA HEALTH FACILITIES COMMISSION—Continued

## II. UNIFORM ACCOUNTING AND REPORTING—LONG-TERM CARE FACILITIES

## Program Objectives and Description

The objective of this program is to develop and implement a uniform system of accounting and financial and statistical reporting for all skilled nursing and intermediate care facilities in California. The responsibility for this program was added to the Commission by the enactment of legislation during the 1974 session to be effective July 1, 1975. Long-term care facilities began or will begin using the uniform system of accounting and reporting for fiscal years beginning on or after January 1, 1977. During the current and budget years, the Commission will be developing the data processing system necessary to process the disclosure reports submitted beginning in April, 1978 (four months after the close of fiscal years ending on or after December 31, 1977).

The proposed transfer of the hospital disclosure function to the Department of Health will not directly impact the Commission's responsibilities to administer uniform accounts and reports for California's long-term care facilities. Sixteen and one-half positions will remain in the Commission to accomplish this task. Once the system becomes fully operational, it will be proposed that it be transferred to the Department of Health. However, this will not occur until a subsequent fiscal year.

# EDUCATION

## DEPARTMENT OF EDUCATION

California's public education system is administered at the state level by the Department of Education, under the direction of the State Board of Education and the Superintendent of Public Instruction, for the education of more than 5 million students from preschool age through adulthood. The department's organizational structure, which emphasizes delivery of elementary, secondary, and adult programs, recognizes the organizational arrangement existing in schools as well as the particular needs of students at different age levels. At the same time the department is aware of the need to integrate delivery of services across age spans to meet special student needs.

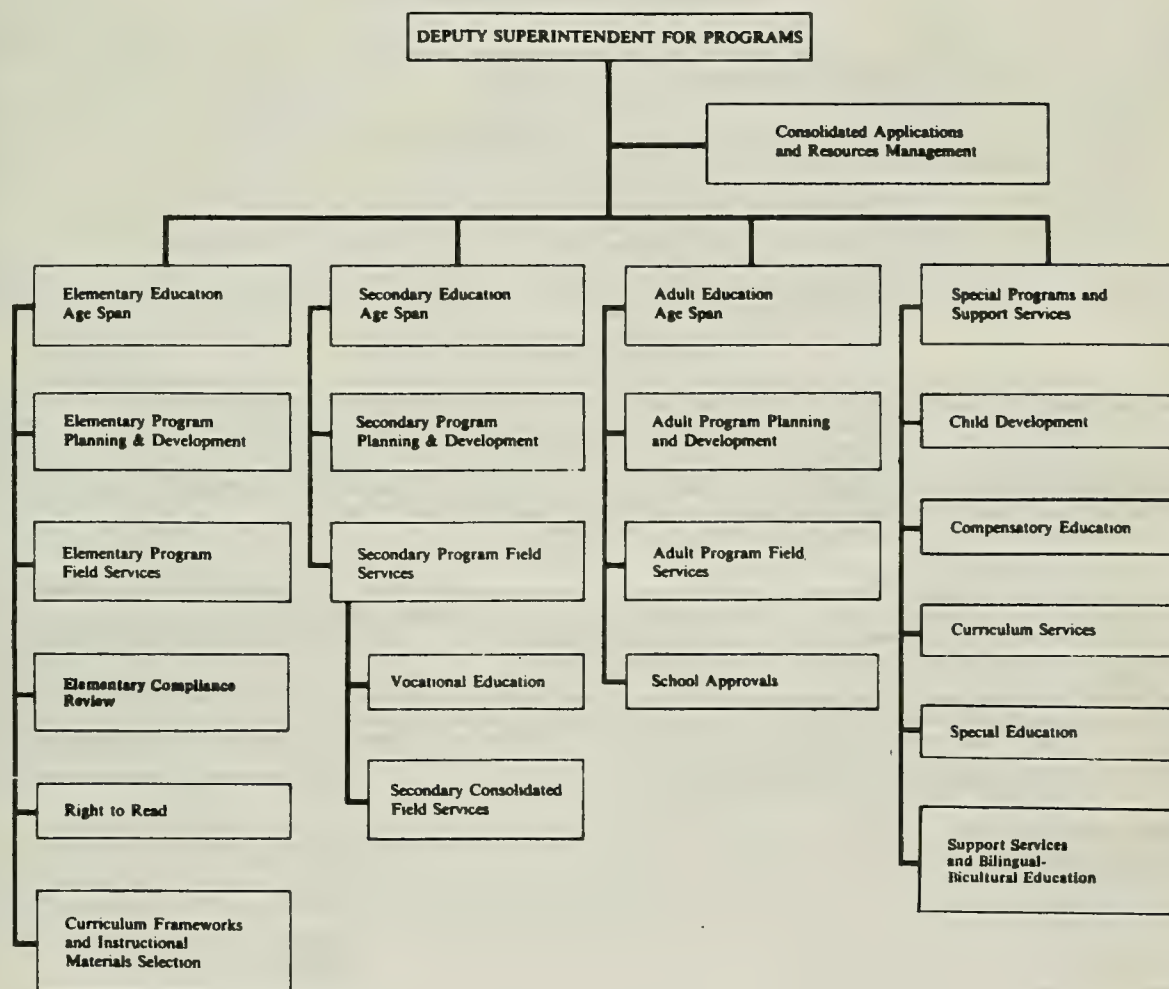

Operations of the department are divided into eight budget programs:

- I. Elementary Education
- II. Secondary Education
- III. Adult Education
- IV. Special Programs and Support Services
- V. Administrative Support Services
- VI. Department Management and Special Services
- VII. Library Services
- VIII. Legislative Mandates

The 1976-77 department organizational structure has been designed to ensure direct administrative responsibility and accountability within age spans as well as coordination across age spans. An outline of the department's structure for the program branch is displayed in Figure 1.

Figure 1

VII-D	Establish program for conservation and restoration of valuable historical materials in state library.....	25,000
Various	Provide inflation adjustment for local assistance programs.....	18,298,058

## I. ELEMENTARY EDUCATION

The elementary education program includes general statewide leadership and administration of specially funded state and federal programs for elementary schools. Of prime importance is the early childhood education (ECE) reform effort, designed to restructure schooling from kindergarten through grade three. The provision of services to educationally disadvantaged and limited-English-speaking children is also emphasized.

The staff of the elementary education age span is responsible for all department operations affecting elementary schools receiving funds through the consolidated application. The staff also cooperates with the staffs of the secondary education age span and the special programs and support services unit to ensure compatibility and integration where necessary. During 1976-77 responsibility for all field services in support of the state bilingual education program in elementary schools is assigned to the staff of the elementary education age span.

For the budget display, elementary education activities are divided into:

- Early childhood education
- Consolidated categorical programs
- General activities (including the right-to-read program, curriculum frameworks and instructional materials selection, professional development and program improvement centers, new careers in education programs, and follow-through technical assistance)

Elementary education program operations are organized into three basic sections: elementary field services, elementary compliance review, and elementary program planning and development. Elementary field services staff is responsible for (a) providing assistance to school districts in developing funding applications; (b) reviewing school plans for compliance and quality; (c) conducting on-site program reviews; and (d) providing technical assistance to schools with identified program weaknesses. Elementary compliance review is responsible for (a) preparing compliance review procedures; (b) conducting compliance reviews in the 20 largest school districts; and (c) conducting thorough compliance follow-up reviews when elementary field services reviews have raised serious questions as to program compliance. Elementary program planning and development is responsible for (a) developing policy; (b) developing workable implementation strategies; (c) preparing internal budget and management plans; (d) coordinating development of documents for use in elementary school program development and review; and (e) supporting the operations of the field services section.

## DEPARTMENT OF EDUCATION—Continued

## a. Early Childhood Education

In 1977-78 early childhood education (Chapter 1147/72) will be in its fifth year. This program continues to be a top priority of the Department of Education.

The goal of the early childhood education (ECE) element is to provide individualized instruction that gives each participating child a chance to reach maximum potential. The program is designed so that pupils, at the end of grade three or its equivalent, have acquired the skills, self-confidence, and social adjustments needed to complete their schooling successfully. A critical goal of the program is to reduce the pupil-adult ratio to 10 to 1 through the use of community aides and the participation of parents.

Program objectives for 1977-78 are:

a. Each elementary school expecting to receive funds will submit a school program plan to the department by July 1, 1977.

b. Each ECE school visited will receive a quality assessment of its program indicating strengths and weaknesses.

c. Schools found to be out of compliance with regulations in the visitation will be in compliance by May 1 of the school year.

*Per-pupil entitlements for Early Childhood Education have been increased by 6% in the budget year in recognition of increased cost-of-living. The 1976-77 unit amounts of \$140 per ADA plus \$70 per disadvantaged ADA will be increased to \$148 and \$74, respectively.*

## b. Consolidated Categorical Programs

In 1973 the department initiated a consolidated approach to federal and state categorical programs in order to reduce the administrative burden on school district staffs. The consolidated application process requires school districts to coordinate the use of funds from the following special sources.

Early Childhood Education Program

Elementary and Secondary Education Act, Title I

Elementary and Secondary Education Act, Title II, Phase I (IV.B)

Elementary and Secondary Education Act, Title III (IV.C)

Miller-Unruh Basic Reading Act

Educationally Disadvantaged Youth Program (SB 90)

American Indian Early Childhood Education Program

State Preschool Program

State Bilingual Education Program

The consolidated application process is composed of three steps:

1. The process is initiated by the district's submittal of a consolidated application for special program funds on Form A-127D. The department processes the application for action by the State Board of Education.

2. Each school receiving funds then develops a comprehensive school plan (Form A-127ES) that describes in detail the allocation of resources and outlines provisions for personalized instruction for all children and extra services for the neediest. The department reviews these plans for compliance.

3. A third document, the consolidated evaluation report (Form E-127P), assesses how well the school met the objectives of its plan, accounts to federal and state agencies on the use of funds received, and provides information for statewide evaluation of categorically funded programs.

Throughout the process the department's elementary education staff provides planning assistance, on-site reviews, school plan reviews, and program improvement assistance to the 3,000 schools in 850 participating school districts. The staff also reviews all school plans submitted and program visits to ensure adherence to state and federal regulations. (Most of the consolidated programs are not limited to elementary education. Descriptions of the individual programs, except the Miller-Unruh reading program, appear under Program IV, Special Programs and Support Services.) The Miller-Unruh program provides reading specialist teachers to improve the reading achievement level of pupils in primary grades. *This budget includes a 6% cost of living increase of \$831,000 for the Miller-Unruh program in 1977-78.*

## c. General Activities

## c. 1. Right-to-Read

The right-to-read component, authorized as a separate program and officially entitled the National Reading Improvement Program (PL 93-380), assists schools in the adoption of exemplary reading practices.

The department's primary responsibilities are to identify and demonstrate ways to improve reading programs, coordinate departmental reading instruction services, and assist staff members in reading programs. Emphasis is placed on inservice training for administrators and teachers.

In 1977-78, approximately 150 local educational agency directors will use right-to-read program planning documents to develop improved reading programs.

## Authority

PL 93-380 (ESEA, Title VII Amendment).

## c. 2. Curriculum Frameworks and Instructional Materials Selection

The department provides staff assistance to the State Board of Education and the Curriculum Development and Supplemental Materials Commission in the evaluation and adoption of instructional materials for use in California's elementary schools.

Primary responsibilities of the component are to develop curriculum frameworks and instructional materials selection criteria, prepare calls for bids for instructional materials, review publisher submissions, coordinate and monitor legal compliance, evaluate the content of materials submitted by publishers, coordinate selection of material to be placed in adoption, and prepare instructional materials selection guides to assist elementary school districts in the selection process.

Chapter 929/72 established textbooks and instructional materials evaluation, selection, adoption, acquisition, and distribution on a biennial cycle. Beginning with the 1975-76 adoption cycle, a process has been initiated whereby instructional materials will be adopted for use by school districts over a six-year period.

Program objectives for 1977-78 are:

- Reduce the instructional materials adoptions cycle to a period of less than 24 months.
- Manage the process by which instructional materials are adopted.
- Update and revise instructional materials selection guides for use by the staff in elementary schools.

## Authority

Chapter 929/72.

## c. 3. Professional Development and Program Improvement Centers; New Careers in Education Programs

In 1976-77, ten professional development and program improvement centers will serve elementary schools having low pupil achievement in reading and mathematics. These centers, operated by school districts or offices of county superintendents of schools, retrain principals, teachers, and aides in diagnostic-prescriptive teaching. In 1977-78, the number of centers will be increased to twelve. Additionally, single-district projects are being phased out and replaced by a network of multidistrict projects that require matching funds. *This budget includes a 6% cost of living adjustment of \$39,000 for Professional Development Centers in 1977-78.*

Four new careers in education programs provide resources to enable low-income interns to complete a baccalaureate degree program. This undergraduate program emphasizes the development of competency-based teaching skills and supervised on-the-job training to prepare the interns to teach in elementary schools serving students from low-income families.

## Authority

Chapters 1453/69 and 1499/74. Education Code, Sections 44630-44643; and 44520-44534.

## c. 4. Follow-Through Technical Assistance

The federal Follow-Through program provides funding to local school districts in order to implement nationally designed models of compensatory education in specified classrooms serving grades K-3. These comprehensive projects are directed towards the provision of basic skills instruction and auxiliary services to educationally disadvantaged youth.

The federal program sponsors one professional position in the Elementary Division to provide: (a) technical assistance to local district projects, and (b) liaison between the U.S. Office of Education's follow-through division and 15 local projects, six follow-through model sponsors, and other agencies and organizations.

## II. SECONDARY EDUCATION

The department provides general statewide leadership in secondary education (grades seven through twelve) and administers specially funded state and federal programs for intermediate and secondary schools.

The major priority of the secondary education program is to aid school districts in implementing positive changes in intermediate and secondary education. In addition, special emphasis is given to the provision of (a) extra services needed to improve and expand vocational education programs; and (b) services needed to meet the special needs of educationally disadvantaged and limited-English-speaking students. Secondary education also administers the state traffic safety education program.

The staff of the secondary education age span program maintains close coordination with the staff of the elementary education age span, especially in activities related to the administration of the consolidated delivery system; with the staff of the adult education age span in activities related to vocational education and technical training; and with special programs and support services in such activities as secondary level curriculum services and bilingual-bicultural education. In 1976-77, responsibility for all field services in support of the state bilingual education program in secondary schools is assigned to the staff in secondary education program field services. In addition, secondary education coordinates its efforts with manpower agencies and offices of county superintendents of schools, which provide technical support for the consolidated delivery system.

The secondary education age span program is divided into (a) secondary program planning and development, including processes for integrating vocational education and consolidated categorical programs with general secondary reform programs; and (b) secondary program field services, which administers the vocational education program (including career education), the consolidated application delivery system for secondary schools, the special demonstration programs in reading and mathematics, and the driver education and traffic safety education programs.

For the budget display, secondary education activities are divided into:

- General secondary education
- Consolidated categorical programs
- Traffic safety education
- Vocational education

DEPARTMENT OF EDUCATION—*Continued*

## a. General Secondary Education

Four areas of program services are included under the general secondary education element: intermediate and secondary education leadership; general secondary planning and program development; administration of demonstration programs in reading and mathematics; and coordination of the activities of the California Council for Individually Guided Education (IGE).

Staff will continue to develop methods of data collection; expand its efforts to identify promising practices; initiate a brokerage services network for technical assistance; and undertake further planning to develop a consolidated secondary education strategy for all specially funded programs (for example, the vocational education program; the educationally disadvantaged youth program; ESEA, Title I).

The secondary education unit is also responsible for the development of policies and management procedures for ongoing programs as well as for special services required by newly enacted legislation. This unit, for example, will aid school districts in implementing Chapter 856, Statutes of 1976, which requires that by June 1981, a student must meet district-established minimum competencies in order to graduate. The secondary education unit will work with the department's Program Evaluation and Research Unit, which will provide examples of minimum academic standards for graduation to school districts by February 1, 1978. Chapter 371, Statutes of 1975 (SB 1243/75) provided funding for the administration of the *California High School Proficiency Examination*. The secondary education unit assists the department's Office of Program Evaluation and Research in providing information to the public concerning this examination. Those who pass the examination and have completed one year of tenth grade receive a certificate of proficiency from the State Board of Education. The certificate is the legal equivalent of a high school diploma. Students who receive the certificate may, with parental permission, leave school before age eighteen.

Similarly, Chapter 210, Statutes of 1976 (SB 1591/76), under rules adopted by the State Board of Education, gave school districts authority to develop independent study contracts with individual students, thereby providing increased flexibility in the selection of learning methods and locations. Chapter 448, Statutes of 1975 (SB 445/75), required the department to develop procedures permitting school districts to establish alternative schools and programs, including provisions for waiving sections of the Education Code where appropriate. Each of these new provisions affords students broader options for meeting individual educational or career objectives, or both.

Finally, Chapter 1127, Statutes of 1975, authorized the continuing operation of cost-effective demonstration programs of intensive instruction in reading and mathematics for low-achieving students in junior high schools. Currently, 29 schools are conducting programs, which are designed to raise the achievement level of participating students. These schools will also disseminate program information extensively so that other schools are able to replicate the demonstration programs in whole or in part. Department staff provides overall leadership and coordination for these programs. *This budget includes a 6% cost of living increase of \$183,000 for the demonstration programs 1977-78.*

It should be noted that, beyond the staff resources specified in this element, additional staff members whose positions are funded from categorical resources (see II.b.) are also assigned to handle various activities in general secondary education.

## b. Consolidated Categorical Programs

An estimated 70,000 students in 517 schools are being served by secondary education consolidated categorical programs. These programs (described in Program IV, Special Programs and Support Services) include ESEA, Title I; ESEA, Title II, Phase I (IV.B); ESEA, Title III (IV.C); Educationally Disadvantaged Youth (SB 90); and State Bilingual Education.

Program objectives for 1977-78 are:

a. A total of 256 regular secondary schools, 160 state-administered institutions serving neglected or delinquent children, 88 schools conducting bilingual programs, and 13 nonpublic schools will have submitted comprehensive program plans complying with state and federal regulations.

b. A total of 238 schools selected for on-site field review by state and county staff will have conducted specially funded programs in full compliance with federal and state laws and regulations.

c. The joint county-state planning committee will have evaluated the degree of cooperation existing between the department and the offices of county superintendents of schools in the delivery of services to elementary and secondary schools.

d. All schools operating consolidated secondary demonstration programs integrating vocational and compensatory services for educationally disadvantaged youth will have achieved specified objectives.

e. Selected intermediate and secondary schools implementing categorical programs will have established reform oriented programs through use of federal innovative project funding. Goals emphasized will be those related to the development of basic skills and self-esteem.

## c. Traffic Safety Education

Approximately 50 percent of all traffic accident victims in California are under twenty-four years of age, and 34 percent of all victims, excluding motor vehicle drivers, are under fourteen years of age. In an effort to reduce the number of accidents, driver education instruction is provided annually to 350,000 students, including interested adults. In 1976-77, pursuant to Chapter 695, Statutes of 1976, the Department of Education, in cooperation with the California Highway Patrol, the Department of Motor Vehicles, and the Office of Traffic Safety, will establish standards governing traffic safety education in elementary and secondary grade levels, as well as in adult schools. This chapter also authorizes the Superintendent of Public Instruction to administer a pilot program in traffic safety education in not more than ten school districts in the 1976-77 and 1977-78 school years. This pilot project will be supported by a federal grant through the California Department of Transportation's Office of Traffic Safety.

Program objectives for 1977-78 are:

- A total of 206 schools selected for field reviews by staff at the state and local levels will conduct driver education programs in full compliance with the Education Code and administrative regulations.
- All requests from school districts for technical assistance to improve traffic safety education will be met.
- Approximately ten school districts will participate in a field study of passenger, pedestrian, and bicycle safety education.

## d. Vocational Education

Federal law states that the purpose of vocational education is to ensure that all persons of all ages in all communities in the state will have ready access to vocational and career education or retraining. Similarly, Education Code Section 51004 states that it is the policy of the people of California to provide an educational opportunity for each individual so that every graduate of a state-supported educational institution should have marketable skills sufficient to obtain suitable employment.

Within this broad mandate, the department's vocational education element administers the following federally funded programs: the Vocational Education Amendments of 1968 (PL 90-576); the Comprehensive Employment and Training Act (CETA; PL 93-203); and the Education Professions Development Act (EPDA; PL 93-35). In addition, the unit coordinates career education services (ESEA, Title V (IV.C); PL 93-380); administers regional occupational programs and centers (Education Code, Section 52309); provides technical assistance to regional adult and vocational education councils and oversees council activities (Education Code, Sections 8020-8035).

Operations are organized into three major sections:

- The field operations section, with three regional offices, provides technical assistance to districts to develop plans and implement effective vocational education programs.
- The instruction section provides specialized curriculum and professional development assistance in manpower programs and agricultural, business, homemaking, and industrial education.
- The services section assists in developing statewide vocational and career education plans and administers vocational research and innovation projects and the vocational information system.

In addition, regional adult and vocational education councils (RAVECs) were established by law (Chapter 1269/75) to merge the function of two administratively separate council structures—area vocational planning committees and area adult coordinating councils. A total of 71 councils have been formed statewide. Their primary responsibilities are to review apportionments for vocational and adult continuing education courses and to make recommendations affecting the apportionments; to prevent unnecessary duplication of such courses within a region; and to perform short-range and long-range planning for adult education and vocational education. The RAVECs receive support for this effort from both the state and local levels and receive technical assistance from staff at the state level.

The vocational education staff coordinates with the adult education staff and with other appropriate agencies to ensure program compatibility and the effective use of vocational resources.

The use of all funds by local educational agencies, regional occupational programs or centers, or prime sponsors, must be consistent with the vocational education program plans submitted to the department annually. The plans must emphasize the expansion of vocational education and the development of special services for educationally disadvantaged, handicapped, and limited-English-speaking students who cannot succeed in regular vocational programs.

## DEPARTMENT OF EDUCATION—Continued

Objectives for 1977-78 are:

- a. Each local educational agency, regional occupational program or center, and prime sponsor will prepare a vocational education plan and submit fiscal and statistical reports that comply with federal and state regulations.
- b. As part of a continuing program, 20 randomly selected local educational agencies and regional occupational programs will participate in formal program reviews. (Fifty additional school districts will conduct their own reviews.)
- c. Vocational education programs will be expanded 5 percent to a total of 2,138,700 secondary, postsecondary, and adult enrollments. (See the projection of vocational education enrollments in the state.)
- d. Twenty-five percent of all vocational education programs will have developed curricula reflecting job performance requirements provided by the manpower management information system.
- e. At least 25 percent of the vocational education staff members (state and local) will improve their leadership skills through participation in an inservice development program.
- f. Career education plans will be developed by 125 school districts, as the result of technical assistance provided by the career education staff or by the elementary and secondary consolidated categorical program units.
- g. Approximately 20 research and 10 innovative projects will be completed. These projects will be consistent with vocational education program planning and development priorities.
- h. On-site reviews will be conducted to ensure that all schools operating demonstration programs which integrate vocational and compensatory services for educationally disadvantaged students achieve their objectives.

In October, 1976, a new federal vocational education law, PL 94-482, was signed by the President. Because administrative regulations have not yet been written, the complete impact of the new legislation is not known. However, it is clear that the new law will require substantial change in the federal Vocational Education program in such areas as: (a) improved program planning and accountability; (b) altered funding categories; (c) required state matching funds for administrative costs.

The 1977-78 budget continues the annual level of support of Regional Adult and Vocational Education Councils (RAVECs) at \$1.33 million for local assistance which includes a cost-of-living adjustment of 6%, and \$0.26 million for state operations.

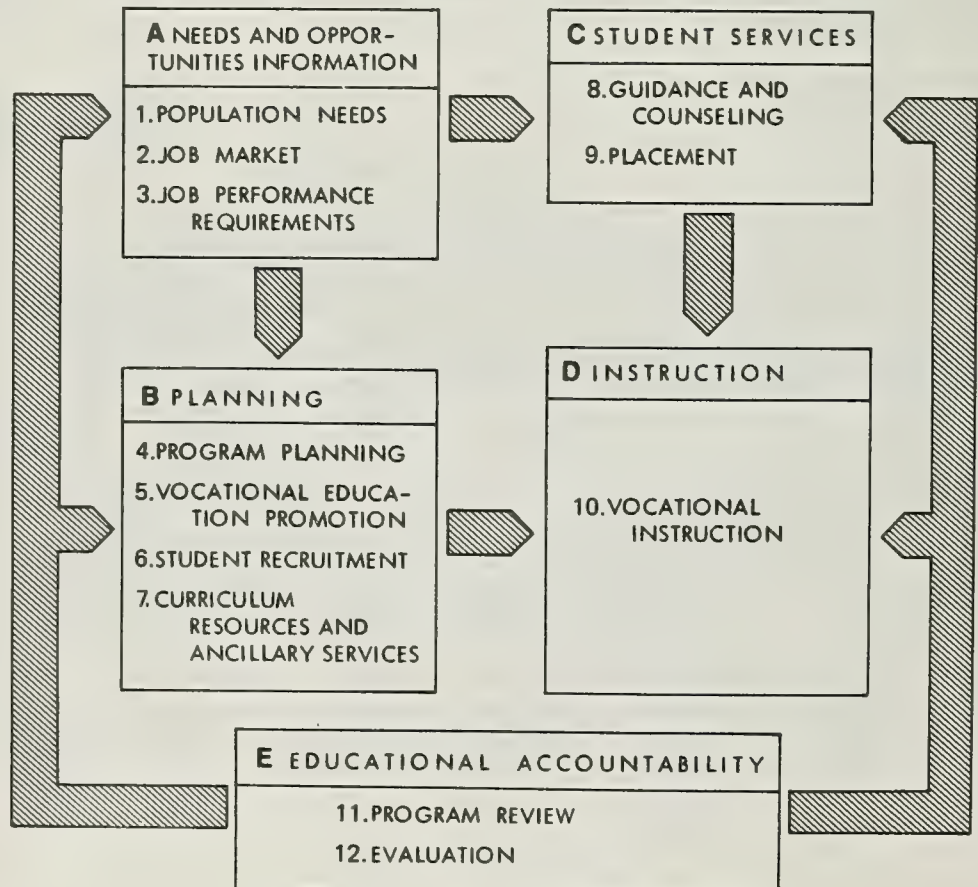

Also, this budget proposes \$114,783 to support the addition of 3 positions to handle the increased workload in the state-funded Regional Occupational Centers and Programs (ROC/Ps). Growth in the number of students in ROC/Ps, as well as increased legislative and administrative regulations, require additional personnel in the State Department of Education to administer the program. The new positions will monitor and review ROC/Ps and conduct course approval activities.

Figure 2 displays the twelve functions of vocational education, each of which is an integral part of the program offered to California's secondary and postsecondary students.

## III. ADULT EDUCATION

Adult and community education includes programs in citizenship and English, adult basic education, vocational and technical education, a wide range of special-interest classes, and civic and community education. The adult education age span is responsible for the management of adult school programs in unified and high school districts and in postsecondary private schools. The staff's responsibility includes the management of adult basic education programs funded under provisions of the Adult Education Act of 1966 as amended (PL 91-230) and the approval of schools for veterans' training under a contract with the Veterans Administration. In addition, the adult education age span is responsible for providing leadership in planning community education programs in coordination with the elementary education and secondary education age spans.

The adult education age span also works with the elementary education and secondary education age spans and with special programs and support services to coordinate efforts and provide support for the following activities: adult vocational education, parent education (parent participation), bilingual-bicultural education, and the administration of high school equivalency examinations.

The age span is organized into three sections: adult program planning and development, adult program field services, and postsecondary education (school approvals). The adult program planning and development section administers special experimental and planning projects, develops instruments to assess needs, prepares long-range and short-range plans and policies, and provides support for the operations of the two other sections.

b. Postsecondary education (school approvals) .....	32.2	32.3	32.3	943,110	1,161,546	1,179,661
c. Vocational education (Local Assistance) .....	—	—	—	3,209,936	4,002,810	3,282,866

## a. Adult Education Instruction

According to 1970 census data, a total of 4,062,000 of the 14 million Californians over twenty-five years of age had not completed high school and more than one million Californians had not completed grade eight. During 1975-76 more than 1.9 million adults were enrolled in classes. Of that number, 233,000 were enrolled in adult basic education programs and approximately 420,000 were enrolled in vocational education programs.

The Education Code requires that the department review all course offerings. As the result of this requirement, staff members in adult program field services consult with school district personnel, prepare guidelines for administration and curriculum development, and prepare and distribute reports on students.

Program objectives for 1977-78 for both the general fund component and the adult basic education component administered by adult education program field services are:

a. Each adult general education program expecting to receive approval for apportionments will submit forms required by the Department of Education, and will receive approval prior to the opening of classes.

b. Each adult general education program will receive a program review periodically, and each adult basic education program will receive a program review at least twice every year.

c. Programs found to be out of compliance with regulations during visitations will be in compliance by June, 1978.

d. Of the anticipated 150 adult education programs participating in department staff development activities, at least 20 percent will demonstrate program improvement.

As a result of state and local programming during 1977-78, approximately 275 unified and high school districts will conduct adult programs. It is estimated that 1,410 students will obtain certificates of completion of elementary school; 16,356 will receive high school diplomas; 4,037 will attain U.S. citizenship; 64,320 will obtain certificates of proficiency in vocational education; and 36,670 will obtain certificates of proficiency in adult general education (such as parent and civic participation programs).

It is also estimated that during 1977-78 approximately 100 school districts will provide literacy instruction to 186,000 adults in PL 91-230 classes in adult basic education. It is further estimated that 10,000 adults will obtain grade eight equivalency certificates; 19,500 will obtain employment or will be upgraded in employment as a result of program participation; 5,000 will leave the program and enter vocational training programs; 2,500 will leave the welfare rolls; 4,000 will receive U.S. citizenship; and 3,000 will register to vote for the first time.

## b. Postsecondary Education (School Approvals)

The postsecondary education element approves courses offered to adults by private postsecondary schools under the provisions of Chapter 3, Part 59, Division 10 of the Education Code; approves courses offered by private and public schools for veterans under Title 38, United States Code; and administers the general educational development (GED) testing program. Program objectives for 1977-78 are:

- All postsecondary courses offered under Chapter 3, Part 59, Division 10 of the Education Code and Title 38 of the United States Code will comply with the educational standards mandated by the codes.
- All general educational development (GED) testing centers will comply with the testing standards of the American Council on Education.

## c. Vocational Education (Local Assistance)

Vocational education programs for adults related to the California State Plan for Vocational Education and the Comprehensive Employment and Training Act (CETA) are administered by the vocational education element and are shown in the adult education budget as local assistance funds only. State operations are carried out by the vocational education element in secondary education; coordination and policy review are performed by adult education management staff.

(See II.d. for the budget of vocational education state operations for adults.)

## IV. SPECIAL PROGRAMS AND SUPPORT SERVICES

The special programs and support services staff provides statewide leadership in special programs and assists the elementary, secondary, and adult education age spans in the delivery of services to local educational agencies.

As displayed in this budget, the special programs and support services program includes:

- Bilingual-bicultural education
- Child development
- Compensatory education
- Curriculum Services
- Planning and federal administration
- Special education

As of July 1976, a single organizational unit has been assigned the responsibility for administration of bilingual/bicultural education and for planning and federal administration.

## a. Bilingual-Bicultural Education

The department supplies administrative and consultant services to local educational agencies to implement and improve bilingual education programs and American Indian education programs. Bilingual education programs are authorized by the Bilingual Education Acts of 1972 and 1976 (Chapters 1258/72 and 978/76). Additionally, the bilingual teacher corps program (Chapter 1496/74) is administered by the Department of Education. American Indian education programs include the American Indian early childhood education program (Chapter 1052/72) and the American Indian education centers program (Chapter 1425/74). Statutory authority for the American Indian early childhood education program expires in 1977.

## DEPARTMENT OF EDUCATION—Continued

## a. 3. Bilingual Education

Approximately 250,000 limited-English-speaking and non-English-speaking (LES/NES) students attend California schools. The goal of the bilingual education component is to continue instruction in the primary language of students while they are learning English. Programs authorized by the Bilingual Education Act of 1972 (Chapter 1258/72) reached approximately 20,000 students in 100 school districts in 1975-76. Further, a bilingual study program, established in San Francisco in 1971 to develop bilingual materials and methods for Chinese students, will be continued through 1977 under provisions of Chapter 262, Statutes of 1975 (AB 893). In addition, Lau centers, established in 1975-76 under provisions of Title IV of the Civil Rights Act of 1965 (PL 88-352 as amended) will continue to develop and distribute resource materials related to bilingual-bicultural education.

An additional number of LES/NES students are served by programs authorized by ESEA, Title VII and ESEA, Title I (Migrant) as well as by programs usually included in elementary and secondary consolidated applications, such as ESEA, Title I; early childhood education; and the educationally disadvantaged youth program. The consolidated application requires schools with ten or more LES/NES students in any grade to provide special instruction for these students. Schools with fewer than ten LES/NES students in a grade are required to have a plan on file showing how the needs of these students are being met.

Newly enacted legislation, Chapter 978, Statutes of 1976, mandates the appropriate method of instruction for LES/NES students under specified circumstances. This legislation appropriates \$3 million for bilingual education in the budget year and requires that districts identify all categorical aid available for meeting the needs of these pupils as a condition for receiving funds.

This budget includes a 6% cost of living increase of \$489,000 for bilingual education programs in 1977-78.

For 1976-77 the bilingual education staff members who monitor and review programs established by the Bilingual Education Act of 1972 are working as members of the elementary and secondary education field service teams. They also provide participating school districts with technical assistance on standards, policies, and procedures affecting bilingual education. However, policy direction for all bilingual education programs continues to be provided by the bilingual-bicultural education section in the office of planning, federal administration, and bilingual-bicultural education.

Program objectives for 1977-78 are:

- a. All districts will identify limited-English-speaking and non-English-speaking students and those students who would benefit from bilingual instruction.
- b. Students in funded programs will receive English language development assistance and appropriate subject matter instruction in the language the student understands.
- c. Participating students will make statistically significant progress in language development, reading, mathematics, and multicultural education.
- d. Participating districts will develop inservice training programs and will evaluate student progress.

## a. 4. Bilingual Teacher Corps

The bilingual teacher corps program provides a \$1,500 stipend and payment for educational expenses to aides who teach in public schools while completing courses leading to a bilingual, cross-cultural teaching credential. Funds allocated during 1976-77 will benefit 550 qualified applicants.

Program objective for 1977-78 are:

- a. Evaluate the training provided to corps members by certain institutions of higher education.
- b. Evaluate the competence of participating teacher aides in language proficiency, culture, professional preparation, and community relations.

## a. 5. American Indian Education

California has one of the largest American Indian populations in the United States. The Department of Education estimates that more than 48,000 American Indian students attend California public schools. Statistics show that these students have an excessively high dropout rate, a low academic achievement record, and a low self-image. Chapter 1052/72 authorized ten kindergarten through grade four pilot projects for three years in rural, relatively poor public schools in which American Indian students made up at least 10 percent of the school population. These districts receive funding through the consolidated application (see I.b.) and technical assistance from the department's American Indian education component. Chapter 899, Statutes of 1976, continues authorization for these projects in 1976-77, pending the results of the evaluation.

In addition to the American Indian early childhood education program, ten education centers for the benefit of American Indian students, parents, and public schools were established by Chapter 1425/74 and approved by the State Board of Education. This budget includes a 6% cost of living increase of \$36,000 for American Indian Education Centers in 1977-78.

Program objectives for 1977-78 are:

- Tutored students will show statistically significant improvement in achievement, particularly in reading and mathematics.
- Self-concepts of participating students and adults will improve.
- Participating students and adults will receive individual and group counseling on personal adjustment, academic progress, and vocational planning.

## b. Child Development

The child development element is responsible for developing, implementing, and managing the department's efforts to assist school districts, offices of county superintendents of schools, and other public and private agencies to provide child development services for children from low-income families. Assistance to preschool education agencies and to child development agencies is provided by the field services section, supported by the development and funding assistance section.

TOTAL											

<sup>1</sup> In 1975-76, includes agencies operated by school districts or private entities, but identified as AB 282 county programs. Excludes these agencies in 1976-77 and 1977-78.

<sup>2</sup> Does not include annualization funds (\$1 million provided in 1976-77 and \$2 million in 1977-78).

<sup>3</sup> Estimated figures are based on the total funds available for fiscal year 1976-77. Programs, however, will not be operative for the full year.

## DEPARTMENT OF EDUCATION—Continued

## b. 1. Preschool Education

The preschool education component provides a part-time development program for four-year-olds and their parents. The purpose of the program is to enhance the development of the child by involving the parents in the education of the child as much as possible. The program provides the participants and the community with a model from which to develop similar programs. More than 19,000 children are enrolled in programs administered by 118 school districts; 69 private, nonprofit agencies; offices of county superintendents of schools; and institutions of higher education. School district programs, which enroll approximately 10,200 of the 19,000 children, are administered by the elementary education age span. *This budget includes a 6% cost of living increase of \$1.4 million for this program in 1977-78.*

The Preschool Scholarship Incentive Program (Chapter 795, Statutes of 1975) provides scholarships for 1,178 preschool permit teachers and aides to assist them in continuing their professional development.

Program objectives for 1977-78 are:

- a. At least 70 percent of the children enrolled in preschool programs will make statistically significant gains in achievement.
- b. Eighty percent of the parents of the children enrolled will be involved three or more times during the year in parent participation activities.
- c. Ninety percent of the children enrolled for the first time will complete health examinations by the end of the school year, and 90 percent of those with health defects will be referred for treatment.

Totals, State Preschool Program .....	\$23,725,884	\$23,813,125	\$25,228,816

## b. 2. Child Care Services

The child care services component provides for the needs of children from prekindergarten age through age fourteen. Major goals of the component are (a) to provide the family with a wide range of health, nutrition, developmental, social, parent participation, parent education, and supervisory services; and (b) to increase opportunities for parents to work or receive employment training. Child development services are delivered by more than 340 public and private child development agencies serving approximately 70,000 children in more than 1,000 locations.

*The availability of Federal funds for child care in 1976-77 offset \$3 million of General Fund expense. This \$3 million in state funds will be used to provide on-going support in 1976-77 for children added in midyear of 1974-75 who had been served by local funding in 1975-76 but for whom local funds are no longer available. Of the \$3 million available, \$1 million will be used for this purpose in 1976-77 and \$2 million in 1977-78.*

Migrant child care services are also administered by the Office of Child Development. In addition to basic child care, many additional migrant family and children's services are provided by these programs. These supplemental services are coordinated with the State Health and Welfare Agency's Office of Rural and Migrant Affairs.

During 1976-77 the state "bought out" \$15 million of the \$47 million allocated for child care services under provisions of federal Title XX of the Social Security Act. This action substituted \$15 million of state funds for Title XX funds with the intent of (a) serving more children and families; and (b) providing a more flexible delivery system that would avoid unduly restrictive staffing ratios. Although it is expected that this action will extend services to at least 4,000 additional children, this expansion will not be fully accomplished in 1977-78, since agencies will be "phased-in" to new program requirements. The Administration will work with the Department of Education to insure that the maximum number of agencies possible receive state funding only in order to serve the maximum number of children.

*In 1976-77 the administration initiated an alternative child care program (Chapter 344/76) by providing \$10 million and by waiving Education Code Division 12.5. This program will: (a) serve children through family day care homes, group centers, and voucher/vendor arrangements for payment; (b) support and coordinate these services with information and referral systems; and (c) provide for minor renovations of facilities. The purpose of the Alternative Child Care Program is to explore methods of reducing costs while maintaining programs of high quality so that more children may be served by available resources. Since this program was not operative for the full 1976-77 fiscal year, an additional \$3 million is provided in 1977-78 to annualize the level of service initiated with \$10 million in 1976-77. Total program proposed for 1977-78 is thus \$13 million.*

*Additionally, during 1976-77, Chapter 986/76 provided \$500,000 to expand campus child development centers to enable more parents to have their children cared for while low income parents pursue educational advancement.*

*This budget provides a cost-of-living increase of \$4.8 million for child care programs in 1977-78.*

Program objectives for 1977-78 are:

- a. Ninety percent of enrolled children and their families will receive full services in education, health, nutrition, social services, parent participation, and parent education.
- b. One hundred percent of participating parents, because of the provision of child development support services, will be able to continue employment or training or will be able to seek employment.

## DEPARTMENT OF EDUCATION—Continued

## c. Compensatory Education

The Department of Education estimates that approximately 1,200,000 educationally disadvantaged children enrolled in preschool and grades one through twelve attend public and nonpublic schools or institutions for neglected and delinquent children. Experience shows that without appropriate services these students will, by the end of grade six, be two and one-half years below grade level in achievement. As many as 70 percent of these students can be expected to drop out of school before receiving a high school diploma. The compensatory education element is responsible for administering education programs for disadvantaged youth. Authorization and funding are provided by PL 89-10 as amended by PL 89-380 and by Chapter 1406/72 (SB 90).

A major portion of compensatory education services is delivered through the elementary and secondary education consolidated application process (see I.b. and II.b.). Personnel funded under provisions of SB 90 are located in the elementary and secondary age spans to perform the required program approval and program monitoring functions. Personnel funded under ESEA, Title I are located in the office of compensatory education to perform certain internal administrative support activities. These personnel are responsible for making compensatory education policy recommendations; administering the ESEA, Title I programs in state institutions; advising school districts with compensatory education programs in matters of parent involvement and community participation; maintaining and coordinating liaison activities with nonpublic schools; and for administering the California Master Plan for Migrant Education.

## c. 1. Educationally Disadvantaged Youth

The educationally disadvantaged youth component provides high-quality educational opportunities for children classified as educationally disadvantaged because of (a) low family income, language problems, and transiency; and (b) academic achievement below the 50th percentile for California students in their grade. Emphasis is placed on instruction in language, reading, and mathematics. State funds made available through the provisions of Chapter 1406, Statutes of 1972 (SB 90), and Chapter 1232, Statutes of 1974, have made possible the provision of compensatory education services to approximately 212,000 FTE students in 1975-76. Chapter 323, Statutes of 1976 (SB 1641), provided \$7.1 million additional state funds to allow service to an estimated 226,872 FTE students in 1976-77 and \$20 million to serve a total of 273,384 FTE students in 1977-78. Chapter 323, Statutes of 1976, also provided \$7,700,000 in state funds for general aid to districts with high EDY impact factors.

Management of field operations and distribution of services are provided by staff members in the elementary and secondary education age spans (see I.b and II.b).

The program objective for 1977-78 is that the target population will achieve a normal range and distribution of academic achievement in reading and mathematics commensurate with the achievement of the general student population in California, as indicated by the results of standardized tests.

<sup>1</sup> Expenditures for the EDY Component are reflected in other Education programs as illustrated in Table 14.

DEPARTMENT OF EDUCATION—*Continued*

## c. 2. ESEA, Title I

The ESEA, Title I component provides programs for educationally disadvantaged students in state-administered institutions and in schools located in low-income areas. Approximately 300,000 full-time-equivalent students in preschool through grade twelve receive services in local educational agencies and in institutions serving neglected or delinquent children. Administrative services and planning assistance are provided by the elementary and secondary education age spans through the consolidated application process (see I.b. and II.b.).

Program objectives for 1977-78 are:

a. The target population will achieve a normal range and distribution of academic achievement in reading and mathematics commensurate with the achievement of the general student population in California, as indicated by the results of standardized tests.

b. Greater use will be made of community resources, and more consideration will be given to the expressed needs of parents and members of the community in the areas of program planning, implementation, and evaluation. Improvement will be indicated by an increase in the number of advisory committee chairpersons signing applications for funds as an affirmation of parent and community involvement in planning, implementation, and evaluation.

Totals, Educationally Deprived Children .....	\$172,194,804	\$178,590,053	\$171,804,922

## c. 3. Migrant Education

Educational programs for Migrant students are administered by the Office of Compensatory Education. These programs include many Migrant services in addition to education, and these services are coordinated with the State Health and Welfare Agency's Office of Rural and Migrant Affairs.

California's migrant children are among the state's most educationally disadvantaged. They make slow progress in school because of irregular attendance. They frequently come from low income families, seldom speak fluent English, and have above-average health problems. To meet the needs of these children, the State Board of Education adopted the California Master Plan for Migrant Education to provide health and welfare services, preservice and inservice education for professional and nonprofessional staff, transportation and other services, child development activities, and to promote active parent involvement. Master plan services are delivered through regional offices and are implemented by service agreements with school districts. During 1975-76 a total of 1,030 schools in 229 districts enrolled 75,136 migrant children.

Program objectives for 1977-78 are:

a. The number of migrant children who drop out of high school will decrease by 25 percent as a result of counseling and work-study programs provided through the migrant education component.

b. The achievement level of migrant children in California schools will parallel that of resident children.

c. The health of migrant children will be such that their attendance and achievement in school will parallel that of resident children.

**Authority**

Chapter 1037/73; Education Code, Sections 54440-54445.

## c. 4. Management Services

For fiscal year 1976-77 and fiscal year 1977-78, this component appears in Program I and Program II.

## c. 5. Nonpublic Schools Liaison

About 2,500 nonpublic (private and parochial) schools in California enroll more than 400,000 students—approximately 9 percent of the equivalent public school enrollment. The nonpublic schools liaison component cooperates with these schools and informs them of changes in state and federal laws that affect nonpublic schools.

The program objective for 1977-78 is to increase the participation of nonpublic schools in federal programs for which they are eligible.

**Authority**

Chapter 1066/73; Education Code, Section 33190.

## d. Curriculum Services

The curriculum services element is responsible for assisting school districts and other appropriate agencies in improving the quality of educational instruction. Programs administered include (1) state-mandated curriculum activities; (2) health education; (3) pupil personnel services; (4) mentally gifted and talented education; (5) continuous learning; (6) disaster preparedness education; and (7) other curriculum activities, including conservation education and instructional television.

## d. 1. State-Mandated Curriculum Activities

The component for state-mandated curriculum activities is responsible for providing curriculum development services in language arts, mathematics (including metrics), science (biological and physical), the arts, music, humanities, social studies, continuation education, physical education, athletics, and school recreation. During 1975-76 the staff responded to more than 6,000 requests for service from local educational agencies, conducted 100 workshops attended by more than 3,000 teachers and administrators, and operated 80 model projects for 1,500 participants.

Program objectives for 1977-78 are:

- Assist educational agencies by replying to an estimated 6,000 requests for assistance in curriculum improvement and operation.
- Provide services and information related to federal regulations as well as to the requirements of the Education Code and the California Administrative Code, Title 5, Education.

## d. 2. Health Education

The health education component is responsible for the administration of school health services and comprehensive school health education, including (but not limited to) nutrition education, venereal disease education, education on genetic diseases and disorders, alcohol education, drug education, mental health education, family health education, and consumer education. During 1975-76 the staff responded to approximately 8,000 requests for services and conducted 750 workshop days and training sessions attended by approximately 22,000 teachers, administrators, and other school and community personnel.

Program objectives for 1977-78 are:

- Forty percent of school districts operating elementary schools will provide instruction in health education, based on the major content areas described in *Framework for Health Instruction in California Public Schools* (a 10 percent increase over 1976-77).
- Thirty percent of school districts operating secondary schools will provide instruction in health education based on the major content areas described in *Framework for Health Instruction in California Public Schools* (a 10 percent increase over 1976-77).
- At least 15 percent of California school districts will provide a health service program meeting the current criteria for school health service established by the Department of Education.
- The Department of Education will fund and monitor approximately 25 nutrition education projects.

## d. 3. Pupil Personnel Services

The pupil personnel services component assists schools, school districts, offices of county superintendents of schools, and institutions of higher education in developing and improving programs in guidance and counseling, school psychology, school social work, and child welfare and attendance. During 1975-76 the staff implemented a state plan to carry out the guidance, counseling, and testing portion of the Elementary and Secondary Education Act, Title III; identified an additional 35 promising practices; conducted 60 inservice training workshops involving 425 counselors, teachers, administrators, and pupil service educators; and completed a first draft of guidelines for pupil records to implement the provisions of federal and state legislation governing privacy.

Program objectives for 1977-78 are:

- A minimum of 150 elementary schools and secondary schools will develop comprehensive guidance programs or comprehensive career guidance programs.
- A minimum of 300 elementary and secondary pupil services specialists, teachers, and administrators will improve their skills in guidance planning, implementation, and evaluation, especially in career guidance.
- A minimum of three inservice training packages will be published and disseminated to the field for the improvement of 50 guidance programs.

## d. 4. Mentally Gifted and Talented Education

The mentally gifted and talented education component was established to (a) provide educational opportunities for gifted children; (b) ensure that gifted children are given adequate opportunity to develop their intellectual, academic, creative, leadership, and career potential; and (c) provide appropriate learning opportunities for children in the upper 2 percent of the student population in general mental ability. The program currently serves 190,000 students in kindergarten through grade twelve in 325 school districts attended by 90 percent of the state's public school students. Program grants are awarded after a school district's application has been approved, and expenditures are monitored and audited for compliance.

## DEPARTMENT OF EDUCATION—Continued

## Program objectives for 1977-78 are:

- a. At least twenty audited district programs will be in compliance with all requirements or will have developed a compliance plan.
- b. Approximately 650 school district coordinators of gifted programs, teachers, and administrators will participate in seven regional workshops conducted to improve the planning and evaluation of programs for the mentally gifted.
- c. Reductions in mentally gifted minors program enrollments will be initiated to limit service to three percent of the student population.

## d. 5. Continuous Learning

The Legislature added Education Code Sections 37610-37620 to enable school districts to offer year-round programs for students enrolled in kindergarten through grade twelve. At the same time the Department of Education recommends continuation of the traditional nine-month calendar. The purpose of the year-round programs is to provide (a) better utilization of space and facilities; (b) alternatives to meet changing life-styles and needs of individuals and families; and (c) expanded curriculum opportunities. The legislation supporting this component expires on June 30, 1977.

## d. 6. Other Curriculum Activities

**Conservation Education.** The department is required to provide assistance to local educational agencies in establishing interdisciplinary programs in conservation education. The services provided by the department include (a) coordination of services for local educational, governmental, and community agencies; (b) maintenance and operation of a materials library; and (c) operation and administration of a grant program to initiate and maintain exemplary local programs. In 1975-76 a total of 34 projects were funded through the environmental education grant program. Teacher inservice training activities were developed, six curriculum development projects were administered, and conservation education activities were coordinated with other state agencies. Similar projects are planned for 1977-78.

## Program objectives for 1977-78 are:

- a. Seven schools receiving funding through ESEA, Title IV, Part C, and 30 other elementary schools will implement environmental education programs.
- b. The receipt of conservation education materials by at least 200 schools will result in program improvement in at least one-half of the schools.
- c. All environmental education projects will be in compliance with all legal requirements.

Table 16a

## Conservation Education

Expenditures (Calif. Environmental Protection Program Fund)

	1975-76	1976-77	1977-78
Department of Education			
State Operations .....	\$9,923	\$12,000	\$12,000
Local Assistance .....	247,500	300,000	300,000
Resources Agency			
State Operations (transferred by Dept. of Education) .....	-	88,000	- <sup>2</sup>
Total, Conservation Education Program, Department of Education .....	\$257,423 <sup>1</sup>	\$400,000	\$312,000

<sup>1</sup> A total of \$275,000 was appropriated to the Department of Education in 1975-76.

<sup>2</sup> In 1977-78, \$88,000 will be directly appropriated to resources agency.

**Instructional Television.** The instructional television component staff approves the plans of school districts and county superintendents of schools for instructional television programs, processes claims, maintains a file on production costs of all instructional television programs developed entirely with public funds, and works with and carries out the plans of the State Instructional Television Advisory Committee. During the 1975-76 school year, 50 offices of county superintendents of schools and 336 school districts conducted instructional television programs involving 1,601,232 students.

## Program objectives for 1977-78 are:

- a. As a result of a statewide demonstration project to show the effectiveness of integrating instructional television with classroom instructional objectives, a 10 percent increase will occur in student viewing of instructional television in at least three curriculum areas.
- b. A 20 percent increase in regional instructional television participation in California will occur as a result of department cooperation with the State Instructional Television Advisory Committee and interested school districts and offices of county superintendents of schools.
- c. A 10 percent increase will occur in the number of teachers who attend inservice workshops on the utilization of instructional television or who receive instruction by means of television.

State Operations .....	13,920	18,636	19,009
Totals, Instructional Television .....	\$710,041	\$840,000	\$840,373

## e. Planning and Federal Administration

Under provisions of PL 93-380, categorical programs formerly funded by ESEA, Titles II, III, V, and VIII and by NDEA, Title III have been consolidated into ESEA, Title IV and are administered by the planning and federal administration element. However, functions formerly performed under provisions of ESEA, Title V—now ESEA, Title IV, Part C, Section 431(a)(3)—remain the responsibility of the executive component.

Some personnel funded under ESEA, Title IV are attached to the planning and federal administration element to perform certain internal administrative support functions. Other personnel are attached to various parts of the elementary and secondary education programs to perform required field services, review and monitoring activities. Part C personnel and those funded under the other listed chapters are attached to this element to perform all major related activities except for ESEA, Title IV evaluation activities, which are assigned to the executive component (Office of Program Evaluation and Research).

This element also provides executive secretary and staff services to the Educational Innovation and Planning Commission, provides planning assistance to all offices within special programs and support services and in other parts of the department in coordination with other planning units, and coordinates the federal program information function and the federally related liaison and planning functions.

Local Assistance	—	—	—	3,221,701	12,339,225	12,009,187

## Planning and Federal Coordination

The planning and federal coordination component is supported by ESEA, Title IV, Part C, Section 431(a)(3)—formerly Title V. It was established to give planning assistance to all offices within special programs and support services, coordinate program planning and development activities with those of other department branches, provide staff support to the Educational Innovation and Planning Commission, and carry out various responsibilities connected with coordinating information and activities related to federally funded programs.

Program objectives for 1977-78 are:

- All special programs and support services units will develop program plans, internal reports, and evaluation procedures consistent with department and program goals, priorities, objectives, and approved operating procedures.
- All program branch units developing plans affecting special programs and support services will develop the plans in cooperation with the planning and federal coordination unit.
- All department program managers will receive federal regulations, requests for proposals, and published budgetary and program information affecting department operations shortly after publication; and federally required plans and reports will be reviewed and transmitted to the appropriate state and federal agencies on a timely basis.
- Staff services will be provided to the Educational Innovation and Planning Commission so that the commission members can perform their duties effectively as specified in the Education Code, Sections 33511 and 33519 (see VI.b.3).

## Libraries and Learning Resources

During 1975-76 half of the categorical programs funded by ESEA, Title II, NDEA, Title III, and the guidance, counseling, and testing portions of ESEA, Title III were consolidated into ESEA, Title IV, Part B, as prescribed by PL 93-380. This consolidation and all phaseout requirements for the previously separate categorical programs will be completed in 1976-77. In 1977-78 ESEA, Title IV, Part B, incorporating the purposes of the previously separate categorical programs cited, will provide entitlement funds for students in all elementary and secondary public and nonprofit, nonpublic schools for the acquisition of school library resources; instructional equipment, materials, and minor remodeling; and guidance, counseling, and testing services.

Program objectives for 1977-78 are:

- Local educational agencies will receive ESEA, Title IV, Part B funds, to be used in compliance with federal laws and regulations. Provision of an equitable share of goods or services for children enrolled in nonpublic, nonprofit schools in California must be made in accordance with the entitlement formula contained in the approved ESEA, Title IV annual program plan for 1977-78.
- ESEA, Title IV, Part B funded projects will be in compliance with federal regulations and state guidelines or will have a plan to correct areas of noncompliance.

## Educational Innovation and Support

The educational innovation and support component is supported by ESEA, Title III and ESEA, Title IV, Part C except for Section 431(a)(3). Phaseout requirements for ESEA, Title III categorical programs will be completed in 1976-77. Under provisions of ESEA, Title IV, Part C, school districts may apply for funding, and nonprofit, nonpublic schools may participate in local projects to (a) improve programs at the local level; and (b) develop models for other educational agencies. Projects are based on the recommendation of the Educational Innovation and Planning Commission, serving as the state advisory council, and are approved by the State Board of Education.

Program objectives for 1977-78 are:

- Incentive grants will result in at least 50 schools in 25 local educational agencies and nonpublic school systems adopting and implementing one or more complete instructional strategies.
- At least 80 percent of the ESEA, Title IV, Part C school districts will continue to participate, and at least 50 percent of those districts will make use of parts of their programs in at least one additional school.

## Southeast Asian Refugee Education

Under the terms of PL 94-23 and PL 94-24 (the Indochinese Refugee Assistance Program) as amended, the Department of Education received grants to provide technical assistance and leadership to local educational agencies in California providing educational services to refugee children from Indochina. The assistance has included inservice training for instructional staff members, services to refugee children, development of curriculum and curriculum materials, and supervision of instructional services.

Recently enacted federal legislation, PL 94-405, provides for the continuation of these technical assistance activities into the budget year. Additionally, this legislation would allocate an estimated \$4 million in local assistance funds to the State Department of Education for distribution to local educational agencies in the budget year. Approximately \$4 million in such grants has been distributed directly to local agencies by the federal government.

## f. Special Education

In California approximately 325,000 children receive services to meet exceptional needs. The goal of special education is to make effective programs available for every school-age individual with exceptional needs.

The components of the special education element are (1) master plan for special education; (2) educational improvement for the handicapped; (3) research and development; (4) special schools; (5) clearinghouse depository for handicapped students; and (6) other special education programs.

State Operations <sup>4</sup>	—	—	—
Local Assistance <sup>4</sup>	—	—	—
Education of the Handicapped Act:			
Part B			
State Operations	873,660	1,003,849	1,289,432
Local Assistance	9,024,001	21,580,116	21,426,597
Part C			
State Operations	1,792,559	2,027,234	2,140,982
Local Assistance	—	—	—
Part D			
State Operations	85,765	245,000	255,459
Local Assistance	—	—	—
Part G			
State Operations	242,521	249,958	315,384
Local Assistance	—	—	—
TOTAL:			
State Operations	\$2,994,505	\$3,526,041	\$4,001,257
Local Assistance	18,167,303	30,179,678	29,601,338
TOTAL, ALL FEDERAL FUNDS	\$21,161,808	\$33,705,719	\$33,602,595

<sup>1</sup> These are projects funded in the State Special Schools for the Handicapped. In the Schools' budgets, the amounts are reimbursements of State Operations costs.

<sup>2</sup> Current and budget year amounts represent the minimum allocation required pursuant to Section 403(a)(8)(B) of Public Law 93-380.

<sup>3</sup> Amounts represent the minimum 10% of granted funds required to be used for the handicapped.

<sup>4</sup> Information for these items is not currently available since cost accounting records were not maintained for this format.

## f. 1. Master Plan for Special Education Pilot Program

Chapter 1532/74 established the California Master Plan for Special Education and authorized a three-year pilot study in as many as ten responsible local educational agencies. By 1978 the Legislature will determine whether to make statewide use of the master plan. *The 1977-78 Governor's Budget contains an increase of \$2,408,600 for inflation in the allowances provided by the Master Plan for Special Education Pilot Program.*

The master plan is designed to solve problems that developed during 50 years in which supportive but fragmented legislation affecting handicapped children resulted in more than 27 different programs funded in various ways. Under this approach the handicapped were rigidly labeled, and many may not have been provided with appropriate services. The master plan proposes a program delivery system that is flexible, eliminates labeling, and provides an individualized plan of instruction for each exceptional child. The plan also requires instruction in a setting that promotes maximum interaction with the general school population.

A group called the Implementation of Master Plan Activities Coordination Team (IMPACT) began operations in October, 1974, and has provided coordination services and technical assistance to 16 responsible local educational agencies wanting to operate programs for handicapped children that follow master plan concepts. Six of these agencies, encompassing 109 school districts enrolling 27,000 exceptional students, started programs in July, 1975; four additional agencies, serving 59 school districts enrolling 23,000 exceptional students, started programs in July, 1976.

Recent federal legislation (PL 94-142, which amends PL 93-380, EHA, Title VI.B) has authorized increased expenditures for special education programs similar to those described in the master plan. In 1977 these federal funds will be available to assist expansion of the master plan.

Program objectives for 1977-78 are:

- Each student participating in the California Master Plan for Special Education will be provided with an individually planned program, based on individual assessment, that meets the student's needs.
- Each student participating in the California Master Plan for Special Education will interact with the general school population in a manner appropriate to the student's needs.

Table 23—Master Plan for Special Education Pilot Program

Expenditures:			
Special Programs and Support Services Program:	1975-76	1976-77	1977-78
State Operations	\$311,708	\$359,431	\$370,976
Local Assistance	23,569,140	55,343,250	57,751,850
Department Management and Special Services Program:			
State Operations	90,638	90,872	93,068
Totals, Master Plan for Special Education	\$23,971,486	\$55,793,553	\$58,215,894

## f. 2. Educational Improvement for the Handicapped

The department administers federal grants under the Education for the Handicapped Act (EHA; PL 93-380) and other programs involving educational improvement for the handicapped.

Programs funded and monitored are program-improvement projects sponsored by local educational agencies, deaf-blind services provided by private agencies, development programs for special education personnel, seven demonstration child service centers, and six pilot projects for the identification of exceptional children.

## DEPARTMENT OF EDUCATION—Continued

During 1977-78 multiple statewide inservice training programs will be conducted to assist local educational agencies in implementing new services to handicapped children under the entitlement provisions of PL 94-142. The purpose will be to promote adoption of concepts contained in the California Master Plan for Special Education.

A special state-initiated project will be started to test and establish on a statewide basis the "search and serve" system for the purpose of identifying, locating, and screening individuals through age twenty-one—but not beyond grade twelve—who need special education services. Other projects will be initiated to provide information and training in preschool education for the handicapped, determine the extent to which EHA, Part B projects have motivated replication of promising programs in the field, and determine the effectiveness of management practices in specific programs.

In addition, this component has been assigned the task of administering the Southwestern Region Deaf-Blind Center, established and authorized through PL 91-230, EHA, Title VI, Part C, Section 622. The center supplements state programs and services for more than 1,000 deaf-blind children and their families in Arizona, California, Hawaii, Nevada, the Navajo Nation, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

Program objectives for 1977-78 are:

- a. All handicapped children within the state will be located, identified, and assessed.
- b. All identified handicapped individuals between the ages of five and sixteen will be provided a free, appropriate education.
- c. A total of 250 school districts will adopt exemplary program practices to provide services for handicapped individuals.
- d. A total of 1,500 professional staff members teaching handicapped children will improve their skills by participating in a statewide inservice training system.
- e. After all of California's deaf-blind children have received an appropriate education and ancillary services, 100 of these children will be provided appropriate rehabilitation services, job training, or placement through state and local agencies.

## Authority

PL 91-230, PL 93-380, and PL 94-142.

Figure 3

Growth in Programs for Handicapped Children  
in California Schools, 1971-72 to 1977-78<sup>1</sup>

<sup>1</sup> Figures from Second Principal Apportionment, not including mentally gifted minors.

<sup>2</sup> Includes transition program for educable mentally retarded students.

<sup>3</sup> Figures for 1975-76 reflect actual data, and figures for 1976-77 and 1977-78 are estimates. Figures for all three years include the autistic program in the Master Plan for Special Education including federal funds used in the Master Plan Pilot Program pursuant to Section 11.7 of the 1975 and 1976 Budget Acts. The Master Plan for Special Education does not reflect true average daily attendance (a.d.a.). Instead, enrollment was substituted for a.d.a. Therefore, in 1975-76 through 1977-78, the line indicating a.d.a. rises faster than it would have if the true a.d.a. had been used.

# DEPARTMENT OF EDUCATION—Continued

## f. 3. Research and Development

Education Code Section 41892 authorizes a program of research and development and provides funds to individuals, organizations, agencies, and institutions of higher education to conduct studies in special education for handicapped children and gifted children. A total of 15 to 20 research and development projects will be funded in 1977-78.

Program objectives for 1977-78 are:

- A total of 100 school districts will adopt program practices resulting in part from studies conducted under Section 41892 of the Education Code.
- The State Board of Education will adopt specific study and research priorities for future programming in special education.

## Authority

Education Code, Section 41892.

## f. 4. Special Schools

The Department of Education operates six special schools for handicapped children under provisions of Education Code Sections 59000-59200. These schools provide highly specialized services for those blind, deaf, multihandicapped-deaf, multihandicapped-blind, deaf-blind, and neurologically handicapped children whose educational needs cannot be met by their home school district. During 1976-77 a total of 1,800 pupils are expected to be served. The schools are administered through the Office of Special Education, and each campus is supervised and directed by a special school superintendent. New structures for the California School for the Blind and the California School for the Deaf in northern California are planned to be completed for occupancy during 1979-80.

Beginning in 1976-77 the School for the Deaf, Berkeley, will provide services for 52 severely multihandicapped deaf students through a federal grant of \$635,438 from Education for the Handicapped Act, Title VI B. This program will augment a similar program supported by the General Fund at the School for the Deaf, Riverside, which serves the severely multihandicapped deaf students of Southern California. It is anticipated that the Berkeley School's program will receive federal funding through 1978-79.

As of January 1, 1977, both State Schools for the Deaf and the State School for the Blind will enter the Federal Child Nutrition Program. This program will provide federal funds in lieu of General Fund, and surplus food commodities to support the feeding programs at these three residential schools.

This budget expands the diagnostic assessment and program planning services at the three regional Diagnostic Schools to include a separate component for autistic children. These programs, at each of the three Schools, will provide demonstration classrooms to aid local agencies serve children afflicted with this complex handicap. Partially modeled on a successful federally funded project now in its third and final year at the Los Angeles Diagnostic School, these three programs will together provide residential instruction for 12 and comprehensive assessment for 54 autistic children across the State annually. The Department of Education will sponsor legislation placing the authorization for such programs in the Education Code.

Staff is added, through this budget, to each of the Schools for the Deaf for guidance counseling. As the student populations in these schools are changing from the elementary age level to the secondary age level it is becoming increasingly important to ensure that appropriate personal and vocational guidance is provided these students.

Program objectives for 1977-78 are:

- A total of 1,000 deaf and multihandicapped-deaf pupils and 150 blind and multihandicapped-blind pupils will have individualized special instructional programs provided through the state's special schools. In addition, the three Diagnostic Schools for the Neurologically Handicapped will provide 500 neurologically and multihandicapped pupils with comprehensive assessments and individualized instruction plans. Some of these pupils may be enrolled in one of the schools for remedial instruction.
- Upon completion of individualized instruction in the California School for the Blind, 50 percent of the students will be advanced to a high school program.
- Upon completion of individualized instruction in the California Schools for the Deaf, 70 percent of the students will be advanced to postsecondary programs, and 25 percent will be gainfully employed.
- Upon completion of comprehensive educational assessment and learning plans, 100 percent of the students served by the diagnostic schools will be placed in appropriate school residential care facilities.

## Authority

Education Code, Sections 59000-59200.

## f. 5. Clearinghouse Depository for Handicapped Students

Education Code Sections 60313 and 60314 mandate that the department operate a clearinghouse depository for handicapped students, a direct-service program offering free materials and specialized equipment to handicapped students in California's public and nonpublic schools and institutions of higher education. During 1977-78 an estimated 150,000 students will benefit from the program.

Program objectives for 1977-78 are:

a. Educational materials in media appropriate to the learning abilities of handicapped students will be made available to each school system administering one or more special education programs; to each public institution of higher education providing special services to handicapped students; and to those nonpublic schools and institutions of higher education requesting services. Each will have at least one transaction with the clearinghouse; depository for handicapped students.

b. Designated personnel in all public and qualified private school systems and hospitals will register the legally blind students in their districts or institutions in the American Printing House federal quota program.

## Authority

Education Code, Sections 60313-60314.

## f. 6. Other Special Education Programs

This component provides consultive, technical, and administrative direction to local educational agencies offering direct services to individual pupils with exceptional needs. It is also responsible for certain categorical programs: (a) development centers for handicapped (DCH); (b) special program for autistic students; (c) speech and hearing handicapped; (d) deaf and hard of hearing; (e) blind and visually handicapped; (f) multihandicapped; (g) orthopedic and other health impaired; (h) educationally handicapped; and (i) mentally retarded (educable and trainable); and sheltered workshops.

The development centers for the handicapped are designed for severely multihandicapped, developmentally disabled persons between three and twenty-one years of age whose handicaps are so severe that without the program they would remain at home or would be institutionalized. During 1976-77 approximately 114 development centers maintained by 50 local educational agencies will enroll nearly 4,499 children.

*Funding for Development Centers for Handicapped Pupils has been increased by \$1,745,400 for an additional 501 enrollments in 1977-78. This increase plus the existing program support will provide full funding to serve all eligible children in this program by September 1, 1978 as required by SB 1782 (Chapter 407/74). Funding has also been increased by \$723,000 to provide an inflation adjustment for the support and transportation rates in the base.*

The special program for autistic students was mandated by Chapter 1527/74 to provide these children with education and ancillary services in special day classes of no more than six students.

Program objectives for 1977-78 are:

a. Approximately 840 local educational agencies not participating in the master plan for special education will be in compliance with the appropriate rules and regulations governing special education.

b. Approximately 840 local educational agencies not participating in the master plan for special education will improve their programs for handicapped pupils.

c. An additional 501 children who are severely developmentally disabled will be enrolled in individualized programs in development centers for the handicapped.

## Authority

Chapter 1527/74; Education Code, Sections 5660, 56700-56729, 56750-56752, 56800-56832, and 56500-56534.

## V. ADMINISTRATIVE SUPPORT SERVICES

Administrative support services bring together resources of personnel and funding that provide support to the department's program branch. These resources support all three age spans: elementary education, secondary education, and adult education.

The program consists of two major elements: (a) apportionment and distribution of aid; and (b) administrative services to local education.

## a. 1. Administration and Apportionment of State Aid

The administration and apportionment of state aid component collects data from school districts and offices of county superintendents of schools: attendance reports, reports of public and private school enrollments, financial reports, research data and publications, and information used in the development of penalty systems.

The component provides administration, control, and supervision of General Fund apportionments, various types of special reports, and administrative research activities. All local assistance from other than federal funds is apportioned by the component, which reports on (a) annual financial reports of school districts; (b) school districts spending less than the specified amount for teachers' salaries; (c) special education costs; (d) costs for adult classes; (e) ratio of administrators to teachers; (f) salaries of certificated employees; (g) selected statistics of California public schools; and (h) enrollment data for the new school year. The component also prepares data on school finance for statistical purposes and for the development of models for proposed school finance measures.

During 1975-76 objectives were met, and a new responsibility for the development of a school finance model (or models) was added for the joint use of the Department of Education, the Department of Finance, the Office of the Legislative Analyst, and legislative consultant.

Program objectives for 1977-78 are:

- Meet the legal deadline for apportionments. (Because of an increase in the number of pilot programs, a steady increase has occurred in the number of apportionments.)
- Continue to automate the apportionment process and the administrative research function.
- Standardize data collection procedures.

## DEPARTMENT OF EDUCATION—Continued

- d. Provide leadership in the development of proposals to conform with the Serrano v. Priest decision.  
 e. Provide leadership in upgrading the system of disseminating information to school districts and offices of county superintendents of schools.  
 f. Develop closer liaison with program consultants and managers within the department.

During 1975-76 significantly increased funding for schools was provided by Chapter 277, Statutes of 1975 (SB 220). This legislation increased the statutory foundation program adjustment by \$21 for 1975-76 (from \$63 to \$84) and reduced the 1976-77 foundation program support for summer school average daily attendance (ADA) by 20 percent. The effect of this legislation was to (a) increase state apportionments by approximately \$80 million in 1975-76 and \$50 million in 1976-77; and (b) increase state property tax relief subventions by \$8 million in 1975-76 and \$12 million in 1976-77. Figure 4 displays school district general fund revenues and expenditures in 1975-76.

**Distribution of School Aid at the School District Level  
Kindergarten Through Grade Twelve**

The 1975-76 budget act placed a "cap" on the growth in average daily attendance that the state would fund in nonmandatory adult education programs and regional occupational centers and programs. Prompted by dramatic annual increases in average daily attendance in these programs and by a growing concern over whether scarce state funds were being directed to the most essential educational priorities, this action allowed time for the state to reexamine its priorities and the funding mechanisms for adult education and regional occupational centers and programs.

Beginning with the 1976-77 fiscal year, Senate Bill 1641 (Chapter 323/76) authorizes (a) an increase in foundation program support; (b) an increase in apportionments for the State Teachers' Retirement System; and (c) changes in the method of funding enrolled adults. This legislation increased the statutory foundation program adjustment by \$37 for students in elementary school and \$38 for students in high school and established a foundation program support level of \$862 for adults. The computational tax rate for adults was set at \$1 for each \$100 of assessed valuation. In all, the new legislation provides approximately \$154 million in additional revenue for the schools and \$60 million in increased state allowances for the district contributions to State Teachers' Retirement System.

## a. 2. Textbook Management and Distribution

Instructional materials to be used in elementary schools are adopted by the State Board of Education, on the recommendation of the Curriculum Development and Supplemental Materials Commission, on a biennial cycle. The Office of Textbook Distribution manages the ordering, purchase, and printing of instructional materials for California's elementary schools. Elementary schools are provided with credits and cash for purchase of textbooks and other materials from the State Instructional Materials Fund. *Chapter 816, Statutes of 1976 (SB 1936), authorizes the continuation of this fund for an indefinite period of time.*

Program objectives for 1977-78 are:

- Prepare and distribute price lists and order forms for state-adopted instructional materials to 960 school districts and 940 participating nonpublic elementary schools by September, 1977.
- Arrange for state printing and commercial purchase by February, 1978, of \$30 million worth of instructional materials ordered by school districts.
- Complete delivery of all instructional materials ordered by the schools before the start of the 1978-79 school year.

## a. 3. Surplus Property

The department acquires surplus federal personal property and food commodities and distributes them to eligible schools, institutions, and other agencies. The level of operation depends on the quantity and variety of equipment, supplies, and food made available. For the past few years, a decline has occurred in the availability of usable property. The decline has been due to (a) the nationwide proliferation of eligible recipient organizations competing with California; and (b) changes in regulations that authorize the U.S. General Services Administration and the U.S. Department of Defense to dispose of certain classes of property by exchange or sale rather than through the donation program. Food distribution activities have also declined, partly because of the elimination of certain federal food assistance programs.

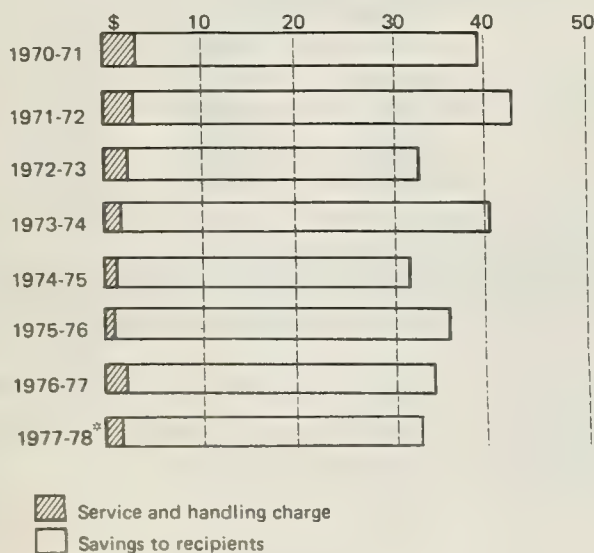

Program objectives for 1977-78 are:

- Provide usable surplus property having a federal acquisition cost of \$32 million, at a cost not to exceed 5 percent of the cost of acquisition.
- Distribute food commodities having a market value of \$27 million, at a cost not to exceed 10 percent of the value of the food distributed.

### a. 4. Food and Nutrition Services

Through the food and nutrition services component, the department administers and supervises the National School Lunch Program, the School Breakfast Program, the Child Care Food Program, the Summer Food Service Program for Children, the Special Milk Program for Children, Nonfood (Equipment) Assistance for School Food Programs and the State Child Nutrition Program. The goal of the component is to provide administrative and technical leadership for these child nutrition programs in public and private institutions.

Program objectives for 1977-78 are:

- Distribute federal and state child nutrition program funds to public and private institutions effectively and efficiently.
- Extend child nutrition programs to all needy children within the state.
- Assist child nutrition program sponsors to improve program operations.
- Provide consultant services to food service personnel at the school, county, and other levels.
- Initiate training for school food service personnel and cooperate with other units within the department to provide nutrition education programs in the classroom.

The State Child Nutrition Program was created by SB 2020 (Chapter 1487/74) and SB 120 (Chapter 1277/75). This program, which is administered by the Department of Education, provides a basic per meal reimbursement of \$.0614 in 1977-78 for all meals served in public and private schools. The program also contains a needy subsidy, which gives additional state funds to assist low-wealth school districts in providing meals to needy students. As of July 1, 1977, SB 120 requires that all school districts offer at least one nutritious meal to needy pupils.

Passage of new federal Child Nutrition legislation (H.R. 4222) in the Spring of 1976, made residential institutions serving the needs of children eligible to receive reimbursements under the federal Child Nutrition Program. During 1976-77, it is anticipated that the following institutions will begin receiving federal reimbursements:

- Special Schools for handicapped children,
- the institutions operated by the California Youth Authority and
- children in state hospitals operated by the Department of Health.

Accordingly, a portion of the General Fund budgeted in 1976-77 for feeding programs in these institutions will be unallotted as federal funds become available. It is estimated that in 1977-78 the state institutions serving children will receive \$3.4 million in reimbursements from the federal child nutrition programs.

The proposed level of funding for the State Child Nutrition Program in 1977-78 is \$39.9 million. Of this amount, \$39.0 million is budgeted for local assistance, a \$2,294,665 increase over 1976-77, and \$0.9 million is budgeted for state operations. Within the \$39.0 million for local assistance, it is anticipated that \$29.0 million will be expended in basic subsidy payments and \$10 million will fund needy subsidy payments to low-wealth school districts.

This budget includes additional federal funds to be received from the U.S. Department of Agriculture for state administration of federal child nutrition programs. The increase in federal funds of \$636,730 for 1976-77 and \$672,081 for 1977-78 is included in State Operations for the Child Nutrition Program. These funds will support an additional 22.5 positions to handle the increased workload in the program.

2. Field management.....	26.2	33	31	1,007,670	1,394,230	1,320,855

## b. 1. School Facilities Planning

The department provides school facilities planning services to all school districts on request and, by legislative mandate, to districts not governed by city boards of education. The services include assisting in long-range master planning, selecting school sites, evaluating existing facilities, translating district educational programs into building space, and planning capital outlay financing programs.

School districts face problems resulting from fluctuating enrollments, alternative educational programs, new developments in the construction industry, and capital outlay funding. The department provides assistance not otherwise available in documenting district educational objectives, evaluating existing facilities in terms of those objectives, and identifying present and future needs for facilities. Services also include assistance in establishing priorities in capital improvement programs.

In addition, the department is responsible for (a) assisting school districts in the development of long-range master plans when state monies are borrowed; (b) establishing and maintaining school building standards; and (c) administering capital outlay programs supported by the federal government in areas impacted by federal activities or struck by major disasters.

Program objectives for 1977-78 are:

- a. Assist 25 or more school districts with growing or declining enrollments in the development of long-range master plans, and assist 75 or more school districts in the updating of existing long-range master plans.
- b. Assist districts in the replacement or rehabilitation of inadequate facilities, emphasizing educational space, environmental qualities, and maintenance.
- c. Ensure that 85 percent of the plans developed and submitted by districts for approval will meet minimum requirements.
- d. Conduct research, including a project for coordinated community planning; review and evaluate 25 or more exemplary educational programs, environments, and facilities designs, including designs for schools with low budgets for energy and maintenance; and disseminate information on exemplary designs to approximately 2,000 recipients.
- e. Assist ten or more school districts with growing or declining enrollment in making space utilization studies, and explore the better utilization of existing facilities, including implementation of year-round school.
- f. Develop, in cooperation with other state agencies, procedures for planning facilities that are consistent with the master plans for early childhood education, special education, migrant education, and vocational education.

## Authority

Education Code, Sections 1851, 5207, 37003, 37004, 56800—56819, 39000—39173, 39210—39659, 41702—41709, 16010, 16011, and 16322; California Administrative Code, Title 5, Education, Sections 14000—14046; Government Code, Sections 7260, 7274, 53094, and 54221.

## b. 2. Field Management

The department provides information to school districts and offices of county superintendents of schools on effective organization and methods of operation, new management applications and techniques, and requirements and options established by law or other directives.

The field management component deals with all noncurricular aspects of school operations, including but not limited to school district organization, pupil attendance accounting and welfare, risk management, school finance, budgeting and accounting, unemployment insurance, pupil transportation, school bus design and construction, school and farm labor bus driver training, the Stull Act, the Winton Act, the Master Teacher Act, Cal-OSHA, and problems related to the energy crisis. In addition, the component provides field representative services at the county and school district levels for other department program managers by assisting with on-site reviews of financial reports and attendance reports for special programs and projects.

Another segment of the field management component is the management assistance team, which analyzes and reports on the administrative operations of school districts and offices of county superintendents of schools. The management assistance team will conduct 18 to 22 studies in 1977-78.

Program activities for 1977-78 are:

- a. Conduct workshops and seminars on (1) classified employees' unemployment insurance; (2) school fiscal budgeting and accounting; (3) school attendance accounting; (4) pupil work permits; (5) teacher evaluation (Stull Act); (6) school and farm labor bus driver training classes; and (7) school district organization.
- b. Prepare reports on (1) alternative plans for school finance in conformity with the *Serrano* decisions; (2) proposals to reorganize school districts; and (3) status of school personnel matters.
- c. Publish materials and forms for (1) school attendance accounting; (2) training for bus drivers; (3) pupil work permits; (4) teacher evaluation (Stull Act); and (5) school district organization.

## VI. DEPARTMENT MANAGEMENT AND SPECIAL SERVICES

The Department of Education, with a staff of approximately 2,600 employees, is responsible for providing leadership to California's public schools and for disbursing approximately \$3 billion in funds, materials, and supplies to local educational agencies. The management of these resources and the achievement of educational program objectives depend on the leadership, policy direction, and support services provided by the department management and special services program.

The program consists of (a) department management; and (b) special services.

## a. 1. Executive

The executive component consists of the offices of the Superintendent of Public Instruction and his deputies and assistants as well as a centralized staff assigned to legal counsel; governmental affairs; program evaluation and research; education information/dissemination (which includes media services and publications); student liaison; intergroup relations; and policy analysis and special projects.

The Superintendent, in cooperation with the State Board of Education, determines priorities to meet the changing needs of the public schools. His office recommends to the public and to the Legislature the actions necessary to provide effective educational programs.

The Office of Program Evaluation and Research (OPER) reports directly to the Office of the Superintendent of Public Instruction. The functions and responsibilities of OPER are carried out in four areas: (a) evaluation services; (b) management information; (c) research and special programs; and (d) state assessment.

Table 30  
State Assessment Test Results, California Public Schools, 1974-75 and 1975-76

Grade level	Content area	Number tested (1975-76)	Average percent of questions answered correctly		
			1974-75	1975-76	Difference
Two	Reading .....	290,848	67.6	67.7	+ .1
Three	Reading .....	289,015	81.3	81.4	+ .1
Six <sup>a</sup>	.....	330,008	—	—	—
	Reading .....	—	62.8	64.8	+2.0
	Written expression .....	—	60.6	61.5	+ .9
	Spelling .....	—	53.6	55.5	+1.9
	Mathematics .....	—	58.5	60.9	+2.4
Twelve <sup>a</sup>	.....	245,700	—	—	—
	Reading .....	—	62.5	63.1	+ .6
	Written expression .....	—	56.4	57.1	+ .7
	Spelling .....	—	61.0	63.7	+2.7
	Mathematics .....	—	66.4	68.0	+1.6

<sup>a</sup> Because the tests in grades six and twelve were revised in 1975-76, the results presented here are for those questions which were used both years.

During the 1975-76 school year, all second and third grade pupils in California, 290,848 and 289,015 respectively, were tested in reading achievement, and all pupils in grades six (330,008) and twelve (245,700) were tested in the basic skills of reading, written expression, spelling, and mathematics. In 1977-78, the State Assessment Program will be responsible for preparing and distributing to districts, frameworks for assessing proficiency in basic skills as required by Chapter 856, Statutes of 1976 (AB 3408). Legislative mandate implications of Chapter 856, Statutes of 1976, will be displayed under Program VIII in the 1978-79 budget.

## Grades Two and Three Results

Reading achievement scores for pupils in grades two and three have been improving steadily since the first statewide testing in those grades was conducted in 1966. For the past two years, however, the rate of improvement has been slowing. The results for 1975-76 show that levels of achievement were maintained in grades two and three. Table 30 presents these virtually identical scores for 1974-75 and 1975-76. These results were based on the third year of use for the *Reading Test*, a test constructed specifically to assess the broad range of reading programs in California's public schools.

Special equating studies conducted in 1973-74 compared the performance of California students to that of students across the nation on several standardized tests with recent norms. California pupils scored slightly above the national average for both grade levels; from the 52nd to the 54th percentile rank for grade two and from the 52nd to the 57th for grade three, depending on the particular test's norm group being used for the comparison. Second grade performance has not changed appreciably since 1973-74, and it can be assumed that California pupils are continuing to score above the national average. However, since third grade scores increased moderately in 1974-75 and slightly in 1975-76, the national percentiles of California pupils obtained in the equating study in 1973-74 should be considered low estimates of the current achievement of California pupils in grade 3.

## Grade Six Results

All pupils in grade six took the *Survey of Basic Skills: Grade 6*, another test developed specifically for the California Assessment Program. Table 30 shows that California pupils improved in all four of the areas tested: reading, written expression, spelling, and mathematics. Improvement was greatest in mathematics, a 2.4 percent correct increase, and least in written expression, .9 percent correct. This is the second year of improving scores in grade six, after several years of declining scores.

## DEPARTMENT OF EDUCATION—Continued

Since this new test was developed specifically for use in California, it does not have national norms. A special study conducted in 1974-75 showed how California pupils compared to the national norming samples of various standardized tests. They performed at approximately the national average in reading (48th 53rd percentile on a scale of 1-99 with the national average at 50), slightly below the national average in mathematics (44 to 51) and below in written expression (43 to 46). The improvements observed in 1975-76 suggest that slight improvements have also occurred in California pupil performance in the national context.

## Grade Twelve Results

All students in grade 12 took the Survey of Basic Skills: Grade 12, the third set of tests developed specifically for use in California schools. Table 30 shows that California students improved in all areas of the test: reading, written expression, spelling, and mathematics. Improvement was greatest in spelling (2.7 percent) and least in reading (.6 percent). This is the first year of improvement for students in grade 12 after five years of declining scores.

A special study conducted in 1974-75 showed that California students were scoring moderately below national norms in mathematics (38 to 41 percentile rank, depending upon the test), slightly lower in reading (33 to 41 percentile rank), and considerably lower in written expression (25 to 32 percentile rank). In spite of the gains made in 1975-76, California students are still below national averages.

## b. 2. Program Management

The Superintendent of Public Instruction must have an effective management system within the department to ensure the delivery of responsive and accountable educational services to students in California.

In the program management component, education program managers are responsible to the Superintendent, through the Deputy Superintendent for Programs, for the implementation of programs for elementary education, secondary education, adult education, and special programs and support services.

The administration branch of the department is managed by the Deputy Superintendent for Administration. Included are the management units for the Division of Financial Resources and Distribution of Aid and the Division of Administrative Services. Also included in the management component is the management unit of the Division of Libraries.

## Authority

Education Code, Sections 33309 and 19301.

## DEPARTMENT OF EDUCATION—Continued

## a. 3. Management Services

Under the direction of the Deputy for Administration, the management services component provides administrative and financial support services to the department's program operations. Administrative services are provided by the personnel and training and management analysis units. Financial services are provided by the budget, fiscal reports, accounting, audits, and business service units.

The management services component is divided into indirect cost units and service units. Indirect cost units are departmental activities that support and are distributed to all programs on the basis of direct labor costs incurred. Service units are departmental activities that provide direct services to all programs but are centralized to provide greater efficiency and avoid duplication. Service units are charged at established billing rates to offset the cost.

4. Council for Private Postsecondary Education .....	—	—	—	9,762	11,600	12,553

## b. 1. Special Assistance to the State Board of Education

The Legislature and the State Board of Education are the governing and policy-making bodies for public elementary and secondary education in the state.

The Board is composed of ten nonpaid lay members appointed to four-year terms by the Governor. The special services element provides the Board with administrative and staff assistance.

## Authority

Education Code, Sections 33000-33010, 33030-33039.

## b. 2. Education Commission of the States

The Education Commission of the States is the operating arm of the compact for education, established to improve state systems of education.

## Authority

Education Code, Sections 12510-12515.

## b. 3. Advisory Commissions and Committees

The advisory commissions and committees, composed of professional and lay members, provide the Board and the Superintendent of Public Instruction with informed recommendations on the development of educational policies.

## Authority

Education Code, Sections 33530-33539, 33502-33522, 33550-33556, 33570-33577, and 33590-33596.

## b. 4. Council for Private Postsecondary Educational Institutions

The Legislature, through Division 10 of the Education Code, has established its intent to encourage privately supported higher education and to protect the integrity of degrees and diplomas conferred by private schools. This council is responsible for advising the Superintendent of Public Instruction on the development of policies and regulations necessary for the governance of these private schools. It also advises the Superintendent on the denial, withdrawal, or suspension of approval of courses offered by private schools to meet the requirements for degrees and diplomas.

## Authority

Education Code, Section 94304.

## VII. LIBRARY SERVICES

The goal of the State Library is to make information available to users in a coordinated, effective, and economical manner. The State Library assists other California public libraries in providing timely, free library service for all state residents.

The library services program elements include (a) reference and research for the Legislature and state agencies; (b) statewide library support and development; (c) special clientele services; and (d) State Library support services.

## DEPARTMENT OF EDUCATION—Continued

## a. Reference and Research for the Legislature and State Agencies

The State Library maintains reference and research materials for the Legislature and state agencies. A central library reduces costly parallel efforts in each agency. When agency libraries are required, the State Library offers backup support.

In 1977-78 the State Library will continue (a) to emphasize the provision of a comprehensive reference service on various topics by the use of automated information retrieval systems; and (b) to develop staff competence in the use of these automated systems by means of training courses. The collection will be developed to respond to the needs generated by the automated information retrieval systems. A survey of state agency collections was conducted during 1976-77 to provide more information on material not included in the State Library collection. In 1977-78 a library procedure manual for the use of small agency libraries will be compiled. The 1977-78 budget proposes \$34,785 for the addition of one librarian and one clerk typist position in the Administrative-Legislative Reference Section to handle the increased information requests from the Legislature and State Agencies.

## b. Statewide Library Support and Development

## b. 1. Government Depository Program

The State Library acts as a coordinating authority in California for the collection and distribution of state and federal publications. It determines the best locations for depositories so that users of local libraries will have immediate access to publications. The objective of the depository program for 1977-78 is to improve the timeliness and completeness of the list of California state publications by developing an automated indexing system.

Chapter 1038, Statutes of 1976 (AB 3539), provides that the State Library shall be the sole responsible authority in the preparation of the list of California State publications and appropriates \$41,000 in 1977-78 for that purpose.

## Authority

Government Code, Sections 14901-14912.

## b. 2. Interlibrary Loan and Reference Support

The State Library offers interlibrary service to (a) supplement the collections of California public libraries; (b) locate materials the State Library does not have; and (c) assist local libraries by answering reference questions and supplying information.

In December, 1976, the third edition of the *California Union List of Periodicals (CULP)* was published, listing 75,000 titles and 350,000 locations. The fourth edition will be issued in December, 1977, listing 100,000 titles and 400,000 locations.

## Authority

Education Code, Section 19320(e).

## b. 3. Consultant and Research Services

This component provides advisory and technical assistance to California libraries. Studies and surveys are made, local program recommendations are provided, research assistance is given, and a library information clearinghouse is maintained. Statistical data from all public libraries are published annually. The consulting staff assists the State Librarian in the administration of the Public Library Services Act, which provides assistance to 20 public library systems; and of the federal Library Services and Construction Act, which also provides grants to public library systems.

In 1977-78 models for services to disadvantaged citizens will be designed. Training programs intended to improve management skills will be offered to staff members in local libraries. State-of-the-art workshops on library automation will be held. Administrative procedures for implementation of revisions in the local assistance program will be developed.

## Authority

Education Code, Section 19320(f) and (j).

## b. 4. State and Federal Grants Program

Under provisions of the Public Library Services Act (PLSA), the State Library has, since 1963, awarded planning, establishment, and per capita grants for the development and maintenance of public library systems. These systems, which now number 20, cover the entire state and include 148 of the 182 public libraries in California. The primary objective of the program is to encourage interjurisdictional cooperation to improve services and reduce costs. No single library can meet the demands of all citizens. By pooling resources, libraries can provide each citizen access to the widest possible range of information resources.

## Authority

Education Code, Sections 39890(m), 12130, and 18700-18772.

## c. Special Clientele Services

The federal government produces talking books (recorded on tape or record) and braille books for those unable to use conventional printed materials. Both types of books are made available by the Library of Congress to designated agencies, which then lend them to eligible patrons who are blind or physically handicapped. The State Library is one of the agencies in California responsible for this service.

Because of the recent growth in the number of individuals requesting this service, the State Library is implementing an automated circulation system in the books for the blind and physically handicapped unit. The new system will be operational in 1977-78.

## Authority

Education Code, Sections 19320(j), 19323, and 19324.

General Fund .....				463,117	775,836	624,951

## d. State Library Support Services

## d. 1. Administration

The objectives of the State Library's administration are to (a) maintain leadership in planning library services at local, state, and national levels; (b) administer the State Library and its programs efficiently; (c) budget and expend funds wisely; and (d) coordinate state and federal grants for libraries according to law.

## Authority

Education Code, Sections 19300-19334.

## d. 2. Collection Management and Control

The objective of the collection management and control component is to gather and control materials for the use of the service elements. By acquiring and organizing books, periodicals, and other types of publications, the State Library complies with its mandated responsibilities. Materials for the State Library are selected on the basis of (a) anticipated need; (b) requests by state employees, officials, and legislators; and (c) available funds.

Materials are purchased in these subject categories: (a) social and political science; (b) law; (c) science and technology of direct interest to state agencies; (d) educational management and technology; (e) public administration; (f) economics; (g) library and information science; and (h) California history.

In 1976-77 it is estimated that approximately 9,800 books will be acquired and processed by the State Library's order and cataloging operations. The number of periodicals and serial subscriptions as well as microform publications to be acquired are in addition to the number of books.

In 1977-78 the State Library will acquire and process a number of books and other publications comparable to the number to be acquired in 1976-77. The 1977-78 budget includes \$25,000 to conduct a program of conservation and restoration of valuable historical materials in the State Library's collection. This budget also proposes \$22,930 for the addition of two clerk positions in the Law Library to handle additional workload of filing looseleaf materials, federal and state bills and court briefs.

## Authority

Education Code, Section 19320(c) and (d) and Section 19321.

## VIII. LEGISLATIVE MANDATES

Section 2231(a) of the Revenue and Taxation Code requires the state to pay to local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Education, there are two legislative mandates: one relates to procedures and hearings required for dismissal of certificated employees of public schools; the other relates to public school pupil disciplinary procedures.

These mandates affect public school districts. These entities will incur higher costs because of the two legislative mandates. Funds are appropriated to the State Controller for allocation and disbursement to these entities upon their claims for reimbursement of costs incurred.

STATE BUILDING PROGRAM  
EXPENDITURES

Actual 1975-76	Estimated 1976-77	Proposed 1977-78
-------------------	----------------------	---------------------

*Schools for the Blind and Deaf and Multihandicapped, Fremont, California*

Pursuant to Chapter 1120, Statutes of 1973, the Schools for the Blind and Deaf will be located on a single site of approximately 91 acres in Fremont, California. This site will contain a facility for the blind with a capacity of 150 children, 50 blind-deaf, and 100 with multiple impairments. The same site will also contain a facility for the deaf with a residential capacity of 100 elementary students, 250 secondary students, and 50 multihandicapped students. The single site will promote capital and operational economies which are administratively and operationally practical and educationally sound in the joint or mutual use of facilities. The total program areas as approved by the Legislature during the 1976-77 fiscal year consists of 137,734 square feet of facilities for the School for the Blind, 327,600 square feet of facilities for the School for the Deaf, and 19,705 square feet of shared facilities. Each school will continue to maintain the integrity of its own educational program. Recognizing the need to replace the existing facilities located in Berkeley, the 1973 Legislature appropriated \$3,100,000 for site acquisition, planning, construction and equipment for a new facility. In keeping with legislative intent the 1974-75 budget appropriated \$19,942,000 for working drawings, construction and equipment for the permanent facilities on a single site located in Fremont, California. The 1977-78 budget includes \$18,691,000 for construction and equipment funds in augmentation of the 1974-75 appropriation, thereby making the total cost for this program \$38,933,000, excluding group II moveable equipment. The scheduled occupancy date is June 15, 1979.

*Diagnostic School for Neurologically Handicapped Children—Northern California*

This is a residential school which provides a comprehensive assessment of a handicapped child's developmental and learning potentials and establishes a medical and educational program to enable the child to return to a local school. The school is located on 2.8 acres and consists of a two-story building housing classrooms, dormitories, kitchen and dining rooms, playrooms, parent bedrooms, examination rooms, infirmary, and administration offices. In addition, the grounds provide play areas for the children and a single-story facility currently being used for storage. The 1975-76 capital outlay program provided one major project totaling \$127,440 to correct life and safety requirements in the existing facilities.

*Diagnostic School for Neurologically Handicapped Children—Central California*

Chapter 634, Statutes of 1973, authorized establishment of a third diagnostic school to be located in central California. Funds were included in the Budget Act for operation in the second half of fiscal year 1973-74 but not for purchase or construction of a facility.

The Department of Education was able to secure a 10-year lease of a four-year-old facility located in Fresno. The lease was to be effective from January 1, 1974, to December 31, 1983. The facility is comprised of approximately 34,000 square feet of space on 6.1 acres. The state and the owner have shared in the cost of building modifications to meet the diagnostic needs of the students and Field Act requirements.

Chapter 176, Statutes of 1975, Item 375.5, appropriated \$1.7 million from the Capital Outlay Fund for Public Higher Education Fund to purchase the facility. The purchase was consummated in June, 1976, thus terminating the lease agreement.

*Diagnostic School for Neurologically Handicapped Children—Southern California*

This is a residential school for the diagnosis, treatment and the determination of an educational program for children afflicted with neurological handicaps. The school is situated on 2.1 acres of state-owned land adjacent to CSU, Los Angeles and consists of a two-story building housing classrooms, dormitories, kitchen and dining rooms, playrooms, parent bedrooms and lounges, examination rooms, infirmary and administration offices.

The 1977-78 Capital Outlay budget proposes one minor project totaling \$8,000 to plan additional play area on land the school obtained through a transfer with California State University, Los Angeles.

# ADVISORY COUNCIL ON VOCATIONAL EDUCATION AND TECHNICAL TRAINING

## PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
Advisory Council on Vocational Education and Technical Training .....	\$199,865	\$263,576	\$259,692
General Fund .....	99,933	65,660	55,587
Federal funds <sup>f</sup> .....	99,932	197,916	204,105
Personnel years .....	4.9	7.5	7.5

## Program Objectives and Description

The council is responsible for evaluating vocational education and advising the State Board of Education, the Board of Governors of the California Community Colleges, and other agencies on matters relevant to vocational education programs.

The specific functions of the Council are shown below:

1. Advise the State Board of Education and the Board of Governors of the California Community Colleges in the development, preparation and administration of state plans for occupational education and training.
  2. Evaluate programs of occupational education and training maintained by local educational agencies, and publish and distribute the results thereof.
  3. Prepare and submit through the State Board of Education and the Board of Governors of the California Community Colleges to the Legislature, the United States Commissioner of Education, and the National Advisory Council on Vocational Education, an annual evaluation report accompanied by such additional comments as the State Board of Education and the Board of Governors deem appropriate which (1) evaluates the programs and services carried out in the year under review to meet the objectives set forth in the state plans, (2) recommends such changes as may be warranted by the evaluations.
  4. A representative of the Council shall serve as an ex-officio member of the California Manpower Services Council and effect coordination of state manpower plans and services with statewide vocational education plans and services.
  5. The Council Chairman or his designee shall serve as a member of the California Postsecondary Education Commission.
- In previous years, the Governor's Budget has included this Council within the display for the Department of Education. Beginning this year, the Council is shown as a separate and independent budget.

## CONTRIBUTIONS TO TEACHERS' RETIREMENT FUND

The objective of this program is to provide State financing of teacher retirement benefits which are not funded by either the employer's or employee's contribution.

Contributions to the Teachers' Retirement Fund are derived from three separate sources: members, employing school districts, and an annual amount from the General Fund. Chapter 1305, Statutes of 1971, placed the system on a reserve funding basis. On July 1, 1972, teachers began contributing 8 percent of their remuneration to the system. Employing school districts were required to increase their contributions from 3.2 percent of teacher payroll for the fiscal year ending June 30, 1973 to 8 percent by July, 1978. For fiscal year 1977-78, the school districts will contribute 7.2 percent of payroll. State funds are provided to low-wealth school districts through the apportionments for public schools to accommodate this increase. In addition, the State has contributed \$135 million each year since 1972 and will continue to do so for the next 25 years.

Chapter 323 as amended by Chapter 991, Statutes of 1976, provided a one time percentage increase in benefits on the first \$300 of the monthly allowance payable to retirants, disabilitants and survivors provided the member had 20 or more years of credited service. The percentage increase varied depending upon the effective date of retirement. The increase was made effective July 1, 1976 and the State began making contributions of \$9.3 million per year in 1976-77 and will continue to do so for the next 27 years to fund the increase.

Chapter 1418, Statutes of 1976, corrected a deficiency in the current retirement law regarding reinstatement after a service retirement under previous provisions of the law. A one time appropriation of \$33,100 was included to fund the present value of the additional program cost.

# DEBT SERVICE ON PUBLIC SCHOOL BUILDING BONDS

## PROGRAM ANALYSIS

### Program Objectives and Description

The electorate of California has previously authorized state school building general obligation bonds totaling \$2,390,000,000 of which \$345,000,000 is available for earthquake construction, and \$2,045,000,000 for construction related to growth. Of the authorized bonds, \$2,215,000,000 has been issued and sold as of November 1976.

In 1976-77, \$135,000,000 in bonds have been or are projected to be sold to finance the continuing cash needs of outstanding final apportionment made to the school districts. Another \$115,000,000 in bond sales are planned for the 1977-78 fiscal year prior to June 30, 1978, for the ongoing requirements of the programs apportionment financing. These sales will exhaust the pool of authorized state school building general obligation bonds.

The repayment of loans from the school districts will amount to \$1,075,577,798 as of June 30, 1978, of the total debt service paid to bondholders totaling \$1,903,854,325 as of June 30, 1978. Repayments amount to 56.5 percent of the debt service from the beginning of the program.

The school districts of the State of California are required to first utilize their individual maximum bond-borrowing capacity to within 95 percent or be within \$25,000 of total bond-borrowing capacity, or sell local bonds equivalent to the cost of the project, before the district is eligible for a state loan in this program. The school districts with an unpaid outstanding loan balance repay the State General Fund on a formula basis which involves the district-assessed property valuations and a partially offsetting local district bonded indebtedness payment of the fiscal year with the net amount due for repayment each year over a period of 30 years. If a district during the 30-year repayment period requests a one-year deferral of its annual repayment, then under existing statutes an additional 10 years is added making a 40-year repayment period for that district's outstanding loan. If after the prescribed period there is still a district loan balance outstanding, then the statutes permit the unpaid balance to be canceled.

### PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
Debt service on Public School Building Bonds .....	\$134,496,089	\$142,032,424	\$147,502,395

## STATE SCHOOL BUILDING SAFETY PROGRAM

Chapter 500, Statutes of 1972, appropriated thirty million dollars to be made available to the School Building Safety Fund for the repair and replacement of local school buildings in compliance with Field Act requirements.

Chapter 22, Statutes of 1973 authorized apportionment loans totaling fifteen million dollars from the State School Building Act Bond Law of 1966 to assist school districts which lack matching funds in order to qualify for state loans to comply with Field Act safety requirements. Chapter 383, Statutes of 1974 authorized an additional twelve million dollars from the State School Building Aid Fund for loans to school districts for matching funds to provide for the safety features required in active school buildings under the Field Act.

Chapter 122, Statutes of 1975, provides an additional seven million dollars to the twelve million dollars available from the State School Building Aid Fund for loans to school districts.

These funds were fully encumbered prior to June 30, 1976, but will not be fully apportioned until June 30, 1978.

## COMMISSION FOR TEACHER PREPARATION AND LICENSING

The Commission for Teacher Preparation and Licensing was established by Chapter 557, Statutes of 1970, with the specific objective of insuring excellence in education by encouraging high standards of quality and diversity through broad minimum standards and guidelines.

The Commission is organized into six program units: approved programs, examinations and evaluation, licensing, professional standards, beginning teacher evaluation study—which is fully federally funded—and administration. Programs are managed by program chiefs under direction of the executive secretary and based on policies of the Commission. Staff functions of the Commission include program approval, monitor and review, external assessment of teacher preparation programs, administration of examination and evaluation programs, licensing of qualified credential applicants, review of charges of immoral or unethical conduct of public school certificated personnel, and general administrative and office functions.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Approved programs.....	\$324,654	\$494,843	\$580,072
II. Examinations and evaluation .....	192,435	305,244	327,071

### SIGNIFICANT PROGRAM CHANGES

Program Description	1976-77	Dollars	1977-78
I. Bilingual/Cross-Cultural Clearinghouse established (Chapter 978, Statutes of 1976) .....	\$50,000		\$100,000
II. Approved programs/contractual services for program monitoring activities .....	-		10,000
III. Licensing/application processing.....	-		116,413
VI. Administration—distributed/additional office space and facility improvements .....	-		17,000

### I. APPROVED PROGRAMS

#### Program Objectives and Description

- To provide state leadership for the planning, development, and approval of programs offered in California institutions for the preparation of teachers and other public school personnel.
- To evaluate teacher education programs in California in accordance with standards established or adopted by the Commission for Teacher Preparation and Licensing.

Staff assistance was provided during 1975-76 to institutions of higher education in the development of 102 professional preparation programs for teaching and service credentials which were granted conditional approval.

Projections indicate that at least 30 institutions will be developing and seeking approval for at least 82 specialist and services programs.

Staff assistance will be provided to assure early correction of program deficiencies identified during initial approval and to establish a clearinghouse of bilingual/cross-cultural credentialed personnel and disseminate this information to school districts. Chapter 978, Statutes of 1976, requires the Commission to provide a status report to the legislature on local, state, and federal funded bilingual/cross-cultural teacher preparation programs and develop a curriculum which will enable teachers to qualify for the bilingual/cross-cultural certificate of competence. An additional \$10,000 for approved program monitoring and reviewing is proposed for 1977-78.

#### Authority

Education Code Sections 5767, 44201, et seq.; California Constitution, Article IX and Article IV.

#### Output

The primary output of approved programs is the competency of personnel prepared through the professional programs developed by California institutions and approved by the Commission. During 1975-76 conditional approval was granted to 102 programs.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	9.1	11	11	\$324,654	\$494,843	\$570,072

General Fund .....				888	50,483	100,000
Teacher Credentials Fund.....				323,766	444,360	480,072

### II. EXAMINATIONS AND EVALUATION

#### Program Objectives and Description

- To establish, maintain, and evaluate an examination system in accordance with the law.
- To provide policies and procedure for evaluating and approving teacher education programs.
- To externally assess 60 approved programs at 12 institutions during 1976-77 and 75 approved programs at 15 institutions during 1977-78.

The law requires 16 examinations in addition to examinations in foreign languages. A nationally administered examination system has been adopted on an interim basis. The system makes available examinations for all but subject matter areas added by legislation during 1974. The Commission is developing an agricultural examination. The Commission plans to evaluate the existing system and based on this evaluation, propose either continuance of the existing system, modification of existing examinations, or development of new examinations on a priority basis.

#### Authority

Education Code Section 44280 et seq.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

Continuing program costs ( <i>Teacher Credentials Fund</i> ) .....	4.2	6	6	\$192,435	\$305,244	\$327,071

## III. LICENSING

## Program Objectives and Description

- To provide a licensing service to school districts, counties, educational institutions, and individuals which insures uniform administration and enforcement of standards.
  - To provide rules and regulations to govern the Commission's procedures for teacher licensing and implementation of improved standards for existing and new licenses.
  - To provide updated, revised, and simplified procedures for processing applications, with the end objective of reducing costs and the time required to evaluate the applicant's qualifications.
- During 1975/76, Licensing processed 107,000 applications with an average processing time of 60 days. In addition to evaluation of credential applications, this unit provided information services to the field and to individual applicants by personal interview, telephone, and correspondence. The Licensing Program includes 8.5 proposed new positions in 1977-78. These include three certification officer II positions, two microfilm technicians, two clerical positions, and 1.5 limited term temporary help positions which are proposed to meet projected workload in processing licensing applications and to reduce the backlog.

## Authority

Chapter 557, Statutes of 1970.

## IV. PROFESSIONAL STANDARDS

## Program Objectives and Description

- To initiate proceedings to suspend and revoke certification documents for cause in accordance with the policies of the Commission for Teacher Preparation and Licensing and under authority of the Education Code.
  - To recommend to the Commission the termination of suspension orders and reissuance of certification documents when satisfactory evidence of rehabilitation has been presented.
- Professional standards in concert with the committee of credentials reviews the personal and professional conduct of individual applicants and credential holders. Such review occurs when there are allegations relating to arrest records, unprofessional conduct, mental health problems, or physical health problems.

## Authority

Education Code Sections 44201 et seq.; and California Administrative Code, Title V.

## V. BEGINNING TEACHER EVALUATION STUDY

## Program Objectives and Description

- To identify behaviors which are related to student achievement in reading and mathematics.
  - To stimulate modification of teacher preparation programs by providing research information about effective teaching behaviors.
  - To provide information and recommendations related to teacher education and certification based on research results.
- The Commission is conducting this research with funding from the federal government through the National Institute of Education. Initial planning in 1972 has led to several years of field work culminating in a field study during 1976 through 1978.

## Authority

Chapter 557, Statutes of 1970; Education Code Section 44225.

COMMISSION FOR TEACHER PREPARATION AND LICENSING—*Continued*

## Output

A funding contract from the National Institute of Education provides monies for the collection and analysis of data and a review of the implications of the research results for teacher education and certification from 1976 through 1978.

## CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

The California Postsecondary Education Commission was established by Chapter 1187, Statutes of 1973. A successor to the Coordinating Council for Higher Education, it assumed its duties on April 1, 1974. It has 23 members; 11 are directly connected with public or private postsecondary education, 12 represent the general public.

The Commission is responsible for developing and annually bringing up to date a comprehensive five-year plan for postsecondary education. It also reviews and integrates the long-range plans of the three public segments of higher education (University of California, California State University and Colleges, and California Community Colleges). Another primary duty is to advise the Governor and the Legislature on the need for and location of new institutions and campuses, and proposals for new programs. The Commission is a clearinghouse for information on higher education.

Operations are divided into:

I. Information systems. The Commission is responsible for developing state-level data collection systems to help in making informed decisions on postsecondary education. It also is engaged in a pilot project to establish nationally compatible systems.

II. Coordination and review. The Commission reviews proposals for new programs and facilities by public institutions in order to (1) provide coordination, (2) prevent duplication, and (3) provide efficient transmittal of state and federal support.

III. Planning and special projects. The Commission develops and keeps the five-year plan up to date, integrates the long-range plans of the public segments, and conducts and/or monitors special studies requested by the Legislature.

IV. Federal programs. The Commission administers certain federal programs, and has been designated by the federal government as the primary postsecondary education planning agency for the state under Section 1202 of the 1972 higher education amendments.

The Commission also develops criteria to evaluate the policies and plans for postsecondary education and submits reports as requested by the Governor and the Legislature.

### SUMMARY OF

PROGRAM REQUIREMENTS	75-76	76-77	77-78	1975-76	1976-77	1977-78

Federal funds .....				1,493,136	1,019,417	905,963

### I. INFORMATION SYSTEMS

#### Program Objectives and Description

This unit has responsibility for developing information systems at the state level to collect, store, retrieve, analyze, and disseminate information which will facilitate making informed decisions about postsecondary education. The Education Code specifically directs the Commission to "act as a clearinghouse for postsecondary education information and as a primary source of information for the Legislature, the Governor, and other agencies, and develop a comprehensive data base insuring comparability of data from diverse sources."

A standing committee of commissioners advises the staff on policy matters. A technical advisory committee representing public and independent postsecondary education, the Legislative Analyst's Office, the Department of Finance, and other state agencies furnishes advice on the design and feasibility of information systems development.

In addition, the staff works closely with the National Center for Higher Education Management Systems and the Western Interstate Commission for Higher Education. California is one of five pilot states in a three-year project to develop information bases at the state level which are compatible nationally. In the budget year, this unit will continue an electronic data processing system which will provide increased storage, collection and retrieval capacity for information gathered by the Commission.

#### Authority

Education Code Section 66903.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs .....	10.8	10	10	\$340,457	\$364,358	\$380,753

### II. COORDINATION AND REVIEW

#### Program Objectives and Description

This unit has the primary responsibility of reviewing and reacting to segmental and institutional plans for new programs, institutions, campuses and other facilities, and programmatic budget requests. The review is based on policies, criteria, and standards which the commission has adopted. Facility, budget, and program reviews are conducted in a manner that (1) provides coordination among interrelated elements, (2) prevents wasteful duplication, and (3) provides an efficient way to transmit state and federal support for programs and facilities.

The staff has undertaken development of criteria for state support of new and existing programs. It also is responsible to the Legislature and the Governor for special studies and projects related to coordination and review.

#### Authority

Education Code Sections 66900, 66902 and 66904.

# CALIFORNIA POSTSECONDARY EDUCATION COMMISSION—Continued

## III. PLANNING AND SPECIAL PROJECTS

### Program Objectives and Description

The commission is required to prepare a five-year state plan making the most effective use of resources in providing opportunities for postsecondary education. The plan must be brought up to date annually. The planning unit, guided by long-term goals established by the commission, alerts the commission to problems affecting the plan, proposes solutions or alternatives to those problems within the boundaries of available resources, and works with the segments in their planning efforts. From these activities, the five-year plan is developed and kept up to date.

The unit also is responsible for integration of the long-range plans of the segments, after review and recommendation by the coordination unit. During the first years, the staff will work with the public segments (University of California, California State University and Colleges, and California Community Colleges) so that all plans will be in a format compatible with the commission's planning data needs.

A second major function of the planning unit is to conduct and/or monitor special studies requested by the Legislature. In the current year, the Commission is expected to complete or continue special studies on: financial conditions of independent institutions, E.O.P. programs, the need for health science trained professionals, community service fellowships, engineering curricula, private education, adult education, accreditation, and others. *A higher education specialist in health sciences is proposed in budget year 1977-78.*

### Authority

Education Code, Sections 66900, 66902, 66903, 66904; ACR 159/73.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	11.7	7	7	\$317,108	\$255,342	\$248,087

Totals, Planning and Special Projects.....	11.7	7	8	\$317,108	\$255,342	\$282,487

## IV. FEDERAL PROGRAMS

### Program Objectives and Description

The commission serves as the administrative agency under several titles of the 1972 amendments to the federal Higher Education Act of 1965. Federal programs not closely related to planning, coordination, or information are administered by this unit. This involves development of a state plan for expenditure of federal funds, review of proposals for funding, and monitoring of funded projects.

Two programs are currently assigned to the unit. Title I, Community Service, emphasizes the development of strong, cooperative relationships among institutions of postsecondary education, local community governments, and community groups, in the solution of pressing community problems. Special consideration is given to programs that incorporate the resources of several institutions into a regional consortium. Title VI-A, Instructional Equipment, provides federal funds to postsecondary institutions for the acquisition of classroom and laboratory equipment in order to improve the quality of instruction in selected areas. Federal funds are available for administration of both programs. One-third state matching is required for Title I.

In addition, Education Code Section 67002 designates the commission as the federal "1202 Commission" for California in order to comply with the Federal requirement that one agency be designated to receive all planning funds. The commission receives federal funds, is responsible for planning and administering the Higher Education Facilities Act of 1965, and accepts other responsibilities required by the U.S. Office of Education. The staff also reviews proposals submitted by California institutions for Funds for the Improvement of Postsecondary Education provided by the U.S. Office of Education.

### Authority

PL 89-329 Title I, Title VI-A, and Title VII; Education Code Section 67002.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	9.6	11	11	\$1,517,854	\$1,067,325	\$940,579

## V. EXECUTIVE

### Program Objectives and Description

The Director provides leadership to the staff in the primary, long-range planning effort of the Commission. At the same time, at the direction of the Commission, he advises the Governor, the Legislature, and other State agencies concerning policies and funding for California postsecondary education, based on the work of staff in the several units. The Director also works with a statutory advisory committee composed of the chief executive officers of each of the public segments and the State Superintendent of Public Instruction (or their designees) and other representatives of postsecondary segments, in reviewing Commission agenda items and associated documents. The Executive function includes liaison with the advisory committee and the segments.

### Authority

Education Code, Sections 66900, 66902, 66903 and 66904.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	7.9	8	8	\$227,470	\$261,478	\$269,328

## VI. STAFF SERVICES

### Program Objectives and Description

Staff services is responsible for internal commission budget, personnel, commission agenda, preparation and distribution of reports, and general housekeeping functions. The commission contracts with the Department of General Services for accounting and personnel services. *Based on workload, a senior account clerk and 2.5 personnel years of temporary help (student assistants) are proposed in budget year 1977-78. In addition, contractual services funding is increased by \$12,000 to provide for the services of specialists on a short-term basis for specific projects.*

### Authority

Education Code, Sections 66900, 66902, 66903 and 66904.

## VII. COMMISSION

## Program Objectives and Description

The Commission has 23 members: two representatives each of the Regents of the University of California, Trustees of the California State University and Colleges, and the Board of Governors of the California Community Colleges; two representatives of the independent colleges and universities appointed by the Governor; the chairmen of the California Advisory Council on Vocational Education and Technical Training and the Council for Postsecondary Educational Institutions; the President of the State Board of Education or his designee; and twelve representatives of the general public. These twelve are appointed as follows: four by the Governor, four by the Senate Rules Committee, and four by the Speaker of the Assembly. The Commission selects its chairman from among the public members.

The budget provides for stipends of \$50 per meeting as authorized, together with necessary travel and expenses for Commission meetings.

## Authority

Education Code, Sections 66901-66904.

## VIII. WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION (W.I.C.H.E.)

The Western Interstate Commission for Higher Education (WICHE) is a public, nonprofit agency established to coordinate and expand interstate and interinstitutional cooperative programs and to gather data for improving planning and management in postsecondary education. Thirteen states participate, with three commissioners from each, appointed by their governors for four-year terms. The main office of the commission's staff is located in Boulder, Colorado; there are also five regional offices. California's annual assessment for 1977-78 will be \$39,000. In addition, the Department of Health budget includes \$7,500 annually as a contribution to support the WICHE mental health program.

The commission has three divisions:

A. *The Division of General Services* includes a student exchange program in the health sciences, a four-state regional medical program, a program to encourage access to higher education by students from ethnic minorities, and continuing education programs in nursing and library science.

B. *The Division of Mental Health* was formed in 1956 at the request of the Western Regional Conference of the Council of State Governments. Major programs seek to improve mental health services on the campus and in the community. These include seminars in psychiatric education for general practitioners, and WICHE conferences to demonstrate methods for training personnel and developing mental health programs.

C. *The National Center for Higher Education Management Systems* was established to assemble and interpret data designed to improve higher education planning and management at the institutional, state, and national levels.

## Authority

Education Code, Sections 99000-99005.

Program Requirements	1975-76	1976-77	1977-78

## CALIFORNIA EDUCATIONAL FACILITIES AUTHORITY

The California Educational Facilities Authority is a public instrumentality of the State composed of five members: the Director of Finance, the State Controller, the State Treasurer, and two public members appointed by the Governor to serve for terms of four years.

The Authority was created for the purpose of issuing revenue bonds to assist private educational institutions of higher learning in the expansion and construction of nonsectarian educational facilities. Through its ability to issue tax exempt bonds, the Authority provides lower cost financing to these institutions than they would be able to secure on the open market.

Facilities used for sectarian instruction or as a place of religious worship are not eligible.

The law specifically provides that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the State or any of its political subdivisions. The full faith and credit of the participating institutions are pledged to the payment of bonds.

A total of \$150,000,000 of bonds was authorized by the Educational Facilities Act. As of June 30, 1976, bonds in the amount of \$72,300,000 have been sold as follows: Stanford University (\$16,920,000); University of the Pacific (\$7,520,000); California Lutheran College (\$1,800,000); San Francisco Conservatory of Music (\$1,200,000); Santa Clara University (\$4,000,000); Loyola Marymount University (\$1,150,000); University of Southern California (\$18,750,000); Stanford University (\$18,100,000); and the University of San Diego (\$2,860,000).

This is a trust activity and involves no state revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

The California Educational Facilities Act is contained in Sections 94100 through 94213 of the Education Code.

## UNIVERSITY OF CALIFORNIA

The University of California is the state university and the land-grant institution of the State of California. It was established by the Organic Act of 1868, and was written into the State Constitution of 1879 as a public trust, to be administered under the authority of an independent governing board—the Regents of the University of California. Presently, the board of regents includes 22 members; 7 ex officio, 14 appointed by the Governor with the approval of the Senate for staggered terms, and 1 student appointed by the board.

The administrative structure of the university is headed by a president who is responsible for overall policy development, planning, and resource allocations. Chancellors have primary responsibility for the management of campus resource allocations as well as campus administrative activities.

The regents have delegated authority to the academic senate to determine conditions for admission (subject to constraints of the Master Plan for Higher Education), degree requirements, and approval of courses and curricula. Special faculty committees serve in an advisory capacity to the regents, the president, and the chancellors in a variety of matters.

There are nine university campuses. Eight of them offer undergraduate and graduate instruction and professional education; the ninth is a health sciences campus. As a departure from the traditional academic organization of the older campuses, the San Diego and Santa Cruz campuses are being developed on the "cluster college" principle.

A master plan for the development of higher education in California was enacted in 1960 and is referred to as the "Donahoe Higher Education Act." This act defines responsibilities of the three segments of public higher education, the University of California, the California State University and Colleges, and the community colleges. It states that the University of California will be the primary state-supported academic agency for research and that the university has exclusive jurisdiction in public higher education over instruction in the professions of law, medicine, dentistry, and veterinary medicine. Sole authority is also vested in the university to award doctoral degrees in all fields, except that joint doctoral degrees with the California State University and Colleges may be awarded.

The University of California is charged with conducting higher education programs in four major areas:

1. Instruction of able young people, by transmitting to them knowledge and skills and by helping them to experience with their instructors, the processes of developing and testing new hypotheses and fresh interpretations of knowledge. The university offers lower division, upper division, graduate and postdoctoral programs on each of its general campuses.

2. Research directed toward advancing the understanding of arts and sciences and the interpretation of human history. The university provides faculty time and the essential libraries, laboratories, and other resources necessary to further faculty research which is intimately connected with teaching in the University—especially at the advanced graduate level.

3. Education for professional careers—education grounded in the understanding of relevant sciences and literature, and enlightened by experience in the methods by which the boundaries of knowledge are pushed back. Education for the professions is a traditional role of the university. It is a role that assumes added significance as each Californian depends more on the expert knowledge and personal integrity of professionals for a variety of specialized services.

4. Public service contributing to the fulfillment of the university's obligation to disseminate knowledge and bringing to faculty and students the stimulation of applying their knowledge and special skills to the problems of modern life. Because of rapid sociological and technological change, increasingly greater numbers of people return to the university to keep themselves abreast of such change.

In order to maximize its productivity the university is engaged in a comprehensive new initiative in university academic planning and policymaking. Its academic planning and program review board is the center of the university's academic planning activity. Composed of faculty, student, and administrative staff, the board is charged with developing the university academic plan and the corresponding resource requirements.

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
I	Enrollment related .....	\$3,700,000
I	Enrich instructional support .....	2,800,000
I	Instructional equipment replacement (one-time) .....	2,000,000
I	General Fund buy-out of education fee funded instructional laboratory cost .....	3,343,000
I	Convert 1976-77 temporary faculty to permanent .....	461,152
V	Clinic No. 3, Irvine Campus .....	303,000

## HIGHLIGHTS OF PROGRAMS OR WORKLOAD CHANGES

The budget proposed for 1977-78 reflects both new funds provided to cover workload increases and inflationary costs and savings which have been redirected to provide improvements in several areas. An overall General Fund expenditure of \$700.2 million is proposed. Funding for employee compensation, including salary increases proposed for 1977-78, is included in a separate budget act item and will be allocated to the University after the enactment of this budget act. Excluding the one-time \$25 million appropriation for teaching hospital working capital provided in the 1976-77 fiscal year, the operating budget for 1977-78 proposes a net General Fund increase of \$44 million which will provide: (a) \$4.1 million for general campus and health sciences instruction related to the planned enrollments; (b) \$2.8 million for instructional support enrichment; (c) \$3.3 million to fund the costs of transferring instructional laboratory costs from the education fee to the general fund; (d) \$303,000 for community clinic #3 at U.C. Irvine; (e) \$807,000 for additional workload related to new space; (f) \$113,000 for enrollment related workload in the libraries; (g) \$232,000 for workload in the admissions and registration offices; (h) \$1.8 million, to be matched by \$1.5 million in non-state funds, to continue the University's student affirmative action program; (i) \$33.8 million for fixed cost increases; (j) \$1.1 million for declines in income offsets to the General Fund. In addition, the budget includes an \$800,000 increase to fund the cost of social security coordination for new employees.

In 1976-77, a one-time augmentation of \$2 million from the Capital Outlay Fund for Public Higher Education was included for the instructional equipment replacement program. For 1977-78, it is proposed that this augmentation be continued for one more year. In addition, the 1977-78 budget proposes an on-going General Fund increase of \$2 million for a total augmentation of \$4 million.

In response to the Governor's desire to maximize the utility of General Fund operations, the University has identified a total of \$2.6 million in on-going savings and proposed the permanent reallocation of an additional \$1.4 million to offset general fund expenditure increases proposed in the budget. In addition, the University is saving at least \$2.6 million as a result of the Planned Purchasing Program which was begun in October, 1967. These savings have permitted existing resources to be more effectively utilized. An additional \$300,000 of savings from the Planned Purchasing Program are included in the \$1.4 million reallocation used to fund the 1977-78 budget proposal. In total the \$4 million savings and reallocations utilized to fund the 1977-78 budget are comprised of:

1. An increase of \$1 million in budgetary savings resulting from a continuation of the 2% budgetary savings target;
2. An increase of \$1.6 million in budgetary savings from academic turnover savings;
3. \$750,000 of internal reallocation resulting from utility personnel savings (\$133,000), Planned Purchasing Program savings (\$307,000) and telephone savings (\$310,000) at the UCLA campus and systemwide through the conversion from ITS to ATSS;
4. \$650,000 of internal reallocations of excess operating expenses identified by the University.

Programs funded from separate Budget Act items are proposed for continuance at the approved 1976-77 level plus appropriate price and merit increase adjustments. Included is the Drew Medical program at \$1.986 million; the podiatric medicine program at \$666,000; the Berkeley-San Francisco medical education program at \$351,000; and the undergraduate teaching excellence program at \$1 million.

## UNIVERSITY OF CALIFORNIA—Continued

## I. INSTRUCTION AND DEPARTMENTAL RESEARCH

## Program Objectives and Description

General Campus instruction includes most of the direct instructional resources associated with the schools and colleges located on the eight general campuses. These resources include faculty, teaching assistants, and various instructional support staff, supplies, and equipment needed to provide the breadth of courses and degree programs necessary to achieve the University's diverse instructional responsibilities. Included are classroom and laboratory instruction as well as joint scholarly research activities of students and faculty.

In 1976-77 the University attracted more students than anticipated. Funding was provided for these students on a temporary basis at a reduced level. The Governor's budget for 1977-78 provides \$461,152 to fund these students at normal workload levels.

The eight general campuses are budgeted to accommodate a planned enrollment increase of 0.3 percent or 373 full-time students over the budgeted enrollment for the current fiscal year. This yields a general fund increment of \$830,000 for 22 FTE faculty, 7.5 teaching assistants, related support and employee benefits at the current budgeted level.

In addition, the instructional support has been increased (1) to provide an additional \$500,000 related to a shift in student enrollments to more resource-intensive disciplines since 1968-69 and (2) to provide \$300,000 to enable greater student access to computers in instruction. Also, the budget provides a \$2 million general fund increase for instructional equipment replacement.

The budget also proposes the addition, on a one-time basis, of \$2 million from the Capital Outlay Fund for Public Higher Education for the instructional equipment replacement needs of both the general campuses and health science campuses. For convenience, the full \$2 million COFPE augmentation and \$2 million General Fund augmentation for this purpose are carried in the general campus program.

A \$3.343 million General Fund augmentation is proposed in order to assume the instructional laboratory costs heretofore funded from the education fee. This funding shift is proposed in order to provide comparability with General Fund support of similar activities and services in the California State University and Colleges; the funding shift does not reflect an acceptance of the University's overall fee policies as adopted by the Board of Regents at their July 1976 meeting nor does it reflect an intention to fund the University's proposed 3-year General Fund buy-out of fee funded activities.

<sup>1</sup> Includes all expenditures for employee benefits in general campus instruction.

## Health Sciences

The instructional program in the health sciences is carried on in 14 schools which provide education in various health fields to students preparing for careers in health care, teaching and research. The health science schools are located on six campuses and include five schools of medicine, two schools of dentistry, two schools of nursing, two schools of public health, one school of pharmacy, one school of veterinary medicine, and one school of optometry. In addition, three programs in medical education are being developed in Berkeley, Fresno, and Riverside. The physical, biological, and behavioral science programs of the general campuses complement the programs of the health science schools. Professional students, interns, residents, fellows, practicing professionals, students in allied health and public programs, and graduate academic students who will become teachers and researchers are participating in these programs.

Additional State funds totaling \$2.8 million are proposed for the health sciences to accommodate a planned enrollment increase of 512 FTE students over the budgeted 1976-77 level. Included in this increase are \$2.7 million in enrollment generated workload which includes 59.55 FTE faculty and related support and \$89,200 for advanced faculty funding for the UCR/UCLA biomedical program which includes 2.14 FTE faculty and related support.

## Summer Sessions

University of California summer sessions are self-supporting instructional programs offering courses for both degree credit and in selected specialized programs. The summer programs provide a broad spectrum of instructional offerings. The specialized programs include intensive language courses conducted at several campuses which enable students to accelerate their progress toward degrees, and serve as refresher courses for new and continuing students and for language teachers. Programs in education are offered to improve instruction in California's schools and colleges; credits earned may be applied to California teaching credential. Courses tailored to meet the specific needs of midcareer professionals are also offered.

## University Extension

University Extension is the largest institution of its kind—the nation's leading “noncampus university”—with an annual projected 1977-78 enrollment of 351,000 students participating in classes, short courses, seminars, field studies, and similar activities throughout every county in California and in several foreign lands. It has open admissions, optional credit and free student selection of curriculum. University Extension is a self-supporting enterprise and its offerings depend entirely on student and other user demand.

Program organization varies from campus to campus, depending on the size of the program and the characteristics of the campus. Normally, programs have a disciplinary orientation; for example, arts and humanities, business administration, dentistry, education, engineering, health sciences, medicine, nursing, physical sciences, social sciences, and urban affairs. Statewide programs are established when there are valid reasons (e.g., when a single university unit can more effectively and economically serve the entire state). The Continuing Education of the Bar Program comprises about 80 percent of the enrollments in statewide programs.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

## Instructional Costs and Faculty Productivity

Tables 1 and 2 present a display of instructional cost and student credit units per faculty. The cost data reflect all state general funded costs of instruction including a pro rata share of libraries, maintenance of plant and other institutional services. Unit costs by level are derived from faculty workload by level of instruction and from student loads by level of student. Table 1 displays unit costs data for all four levels of students and reveals a significant difference in cost per unit of credit between levels. Table 2 displays student credit units per faculty according to the three levels of instruction and provides cost at each level. Interpretations of these data are only meaningful in the context of a full understanding of the differentiation of function among segments of public higher education in California and the resulting differences in educational approaches.

UNIVERSITY OF CALIFORNIA—Continued

II. RESEARCH

Program Objectives and Description

The University is designated by the Donahoe Act as "... the primary state-supported academic agency for research." Its research activities contribute to the social, economic, and technological progress of the state and the nation. More specifically, the university, through the application of mission-oriented research toward the solution of complex problems facing society, enables man to control his environment more effectively. In addition, the research process is essential to the training of scholars in the methodology of inquiry and the nature of the creative scholarly process, especially in the advanced graduate and professional instructional programs. State general funds support for organized research will be provided in 1977-78 at the current level. Price increase funds are included in provisions for allocation and program maintenance.

III. PUBLIC SERVICE

Program Objectives and Description

Activities funded within this function are campus public service, cooperative extension, the Charles R. Drew Postgraduate Medical School, and the California College of Podiatric Medicine program being developed in conjunction with the UC San Francisco School of Medicine.

Included within the campus public service category are arts and lectures and a number of other programs such as professional publications, services to industry, and community service projects. The majority of programs are financed from user fees, general funds support, professional publications, C. R. Drew, and California College of Podiatric Medicine.

Cooperative extension, previously known as agricultural extension, provides information and services to the public, particularly farmers, homemakers, youth, agriculture-related industries, and all types of private and governmental institutions. The purpose is to solve specific, often local, problems through the application of research results generated by cooperative extension or other university units.

In 1976-77, \$1.9 million was appropriated to the University for the support of a program of clinical health sciences education, research, and public service at the Charles R. Drew Postgraduate Medical School, to be conducted with UCLA. Programs which are specified by the act to provide the greatest public benefits are: (1) continuing education of physicians and other health professionals and consumers of health sciences, (2) community medicine, designed to improve the health status of the citizenry, the health care delivery system and health sciences education, (3) internship and residencies, including a family practice residency program at the Martin Luther King Hospital and other appropriate facilities and clinics, and (4) such other programs of clinical health sciences education, research, and public service as the regents and the Charles R. Drew Postgraduate Medical School deem in the public interest, provided that the above specified programs are first funded. State funding was originally authorized by the Legislature in 1973 (Chapter 1140/23—SB 1026). Funds are included for price increase in 1977-78 to continue the program at the 1976-77 level of operation.

Chapter 1497/74 appropriated \$541,000 for the support of an educational program in podiatry to be operated in conjunction with the California College of Podiatric Medicine in San Francisco. Funds are included for price increase in 1977-78 to continue the program at the 1976-77 level of operation.

IV. ACADEMIC SUPPORT—LIBRARIES

Program Objectives and Description

The university libraries provide ready access to books, documents, and other scholarly materials for the university's students, faculty, staff, and faculty from other California colleges and universities. In addition, the libraries may grant borrowing privileges to any California adult. University libraries serve both instructional and research needs and thus must be diverse in nature and maintain comprehensive information about man's knowledge. The rapid expansion of knowledge requires an intensive effort to keep library materials current. Merit salary adjustments and price increases for this program are carried elsewhere in the budget.

For reference-circulation activities, 7.2 staff positions are provided to accommodate the enrollment increase recognized for 1977-78.

## Academic Support—Other

## Program Objectives and Description

*General Campus Programs:* Other academic support on the general campuses is comprised of a number of partially self-supporting activities organized and operated in connection with educational departments and conducted as a basic support for the departments educational programs. These supporting services contribute greatly to the quality and effectiveness of the instructional programs.

Many diversified programs are included, the largest being the demonstration schools (university elementary schools, nursery schools, and a psychology clinic school) which serve as interdepartmental teaching laboratories for experimentation, research and teacher training. These programs receive part of their support from state funds. The demonstration schools not only educate hundreds of children, but contribute to the advancement of education through research efforts and application of results; through development of new programs of teacher education, and dissemination of new knowledge to public schools.

Other activities include vivaria, which provide centralized facilities for ordering, receiving and care of all animals necessary for teaching and research in the biological sciences; support for arts by direct sponsorship of performances and exhibits and funding for galleries and museums; support of specialized physical science and engineering projects which are of service to academic departments and to industry, support for intercollegiate athletics at the smaller campuses, and support for law school journals.

*Ancillary Support—Health Sciences:* In addition to human medicine teaching hospitals, the university operates the dental clinics and neuropsychiatric institutes at UCLA and UCSF, a veterinary medicine teaching facility at UCD, and an optometry clinic at UCB. These facilities are extensions of the health sciences schools, and provide clinical experience essential to the educational process.

*Dental Clinics:* The School of Dentistry and its related clinic activities at San Francisco have an integral part of the university since 1881; the UCLA dental clinic was opened in 1967. The mission of both clinics is to serve as teaching laboratories where university dental students gain essential clinical experience practicing in tandem with technician trainees under the direction of licensed facility dentists. The clinics are funded by the state and by income from patients.

*Veterinary Medical Teaching Facility:* The Veterinary Medical Clinical Teaching Facility (VMCTF) is a specialized laboratory of the UCD School of Veterinary Medicine and provides for clinical teaching needs relating to the diagnosis, treatment, prevention and control of diseases of animals. Programs are carried out at the VMCTF, and other locations such as the UCD campus vivaria and primate center, on ranches and in other off-campus locations. Part of the budget is derived from fees for services rendered, and part from state support.

*Neuropsychiatric Institutes:* The neuropsychiatric institutes at San Francisco and Los Angeles are the state's largest resources for psychiatric residents and a major training resource for social workers and related mental health professionals. They were transferred from the State Department of Health on July 1, 1973.

## UNIVERSITY OF CALIFORNIA—Continued

## V. TEACHING HOSPITALS

## Program Objectives and Description

The University operates five human medicine teaching hospitals located on the Los Angeles and San Francisco campuses and in the counties of Orange, Sacramento and San Diego. University operation of the former Orange County Medical Center as the primary clinical training center for the Irvine Medical School commenced on July 1, 1976. The primary mission of these hospitals is training of new physicians and other health care professionals, plus continuing education of practicing health care professionals. By providing patient care while training thousands of health care professionals, the teaching hospitals offer a major public service in California. Through affiliations with other clinical care centers, such as Veterans Administration hospitals, county hospitals and private community hospitals, University students are exposed to a full range of clinical diagnostic and therapeutic techniques.

State support of at the University-operated teaching hospitals is provided in order to pay for the care of patients essential to the clinical instruction of students but who are unable to pay for care either through third-party sponsorship or their own resources. An increase in State support of \$303,000 is provided to develop and operate Community Clinic #3 with 12,500 visits as part of the academic program of the California College of Medicine at Irvine. The operating budgets for the five University hospitals will increase by approximately \$23.2 million, however, because of a one-time State appropriation of \$25 million for a working capital reserve in 1976-77, the operating budgets for the hospitals show a net decrease of \$1.8 million in 1977-78.

In the current year, Section 28.11 of the Budget Act authorizes a \$5 million loan for anticipated Medicare/Medi-Cal reimbursement shortfalls. The section requires an annual report on the status of the University's appeals to Medi-Cal and Medicare cost reimbursement limits. The University has made a preliminary report to the Department of Finance on the status of the appeals and will update the report during the legislative hearings on the University's budget. Continuation of this loan provision is proposed for 1977-78.

## VI. STUDENT SERVICES

## Program Objectives and Description

The student services program includes six elements: student admissions and records, cultural and social activities, counseling and career guidance, financial aid administration, student health services, and supplemental educational services.

To correct workload deficiencies in admissions' and registrars' activities, an additional 16.83 staff positions are provided for 1977-78. In addition, elsewhere in the budget funds are provided for price increase and merit salary adjustments.

## VII. INSTITUTIONAL SUPPORT

## Program Objectives and Descriptions

Activities funded within this function include planning, policymaking, and coordination within the offices of the chancellors, president and the offices of the regents. Also included for funding are a wide variety of supporting activities such as police, accounting, payroll, personnel, materials management, publications, and federal program administration, as well as self-supporting services such as telephones, storehouses, garages, and equipment pools. No increase in state funds is proposed for 1977-78 except for price increase and merit salary adjustments carried elsewhere in the budget.

A proposed budget year increase of \$700,000 (\$350,000 state general funds and \$350,000 Regents' opportunity funds) in federal contract and grant administration is contained in the provisions for allocation account.

## VIII. OPERATIONS AND MAINTENANCE OF PLANT

## Program Objectives and Description

This function includes resources for the maintenance and preservation of the university's physical plant which comprises 32.3 million square feet of building and related equipment with a current replacement value of \$2.35 billion. Major component elements include utilities and refuse disposal, custodial and grounds maintenance, structural and equipment maintenance, plant administration, and fire departments on two campuses.

The State General Fund increase shown in this program (\$806,843) provides for workload associated with the addition of new building areas to the University inventory. This increase includes \$197,602 for building maintenance, \$223,605 for janitorial services, \$365,175 for utilities and \$20,461 for refuse disposal.

## UNIVERSITY OF CALIFORNIA—Continued

## IX. STUDENT FINANCIAL AID

## Program Objectives and Description

The University of California provides numerous financial aid opportunities for undergraduate and graduate students with financial need. During 1975-76, 50,442 students received assistance from one or more financial aid programs administered by the University or from other agencies providing student aid at a cost of \$105 million. This \$105 million total for 1975-76 is not comparable to figures cited in previous Governor's budgets since earlier totals represented only funds which were controlled and awarded by the University. The \$105 million figure and all totals for subsequent years will reflect all known sources of student financial aid.

The major sources for University-administered programs include student fees, Federal funds, and Regents' sources, including private gifts and scholarships and loan funds. In addition to the University's budgeted financial aid programs, students have alternative sources of assistance. The Federal government insures bank loans (the Federally Insured Student Loan Program—FISL), provides veterans benefits, and makes grants from the Basic Educational Opportunity Grant Program (BEOG). In addition, graduate students receive traineeships and fellowships from numerous Federal programs, and the California Student Aid Commission provides scholarships and grants directly to students. Private and outside agencies provide the remaining amounts of scholarships, grants, and loans available to University of California students.

The 1977-78 budget proposes to continue student affirmative action efforts mounted with state and university funds in the 1976-77 fiscal year. Similar to the joint participation in 1976-77, the 1977-78 Governor's budget requires that the \$1,789,700 general fund appropriation for Student Affirmative Action be matched with \$1,464,300 in non-state funds. This will provide a total \$3,254,000 program, funded in the same percentages as budgeted for 1976-77, i.e., 55% state general funds and 45% Regents' funds. This program will provide: (a) \$891,000 for financial aid for students (594) continuing from 1976-77; (b) \$990,000 for financial aid for new students (660); (c) \$550,000 for support services for new and continuing students; (d) \$462,000 for early outreach; (e) \$292,000 for high school and community college outreach; and (f) \$69,000 for systemwide program coordination.

## X. AUXILIARY ENTERPRISES

## Program Objectives and Description

Auxiliary enterprises are those noninstructional services provided to individuals, primarily students, in return for specific user charges. The organizational units providing these services, which include student housing, parking, intercollegiate athletics, food service, and various others, are largely self-supporting.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

Restricted funds .....				56,209,939	65,209,681	70,307,681

## XI. PROVISIONS FOR ALLOCATION

## Program Objectives and Description

These budgetary provisions serve as a temporary repository for lump sum appropriations which are destined for allocation (1) from Universitywide provisions to campus provision, and (2) from campus provisions to operating programs and subprograms where expenditures will occur. The major provisions for allocation include funds for 1976-77 salary merit increases and promotions, salary range adjustments, academic position upgradings, staff reclassifications, price increases, employee benefits, and unallocated endowment income. Also included are negative appropriations reflecting the University's assigned budgetary savings target and a \$700,000 increase for federal contract and grant administration.

Program Requirements	1975-76	1976-77	1977-78
Authorized .....	—	\$33,316,687	\$33,316,687

## XII. PROGRAM MAINTENANCE: FIXED COSTS AND ECONOMIC FACTORS

## Program Objectives and Description

The elements of program maintenance—fixed costs and economic factors includes funds for merit increases for eligible academic and staff, price increase allowances for utilities, library purchases, supplies, equipment and other non-salary items, necessary shifts in utility consumption from gas to oil, and malpractice insurance increases. A total increase of \$33.8 million is proposed for these purposes.

## XIII. SPECIAL REGENTS' PROGRAMS

Approximately one-half of Federal overhead on contracts and grants (excluding the three major ERDA contracts) assists in financing the University's Budget for Current Operations; the other half supports special programs established by action of The Regents. For 1976-77 The Regents have allocated \$23.5 million for the Special Regents' Program.

At their July 1976 meeting, The Board of Regents approved, contingent on state funding for such programs as are determined by the state and the regents to be appropriately funded from general funds, the implementation, over the period 1977-80, of a systemwide Registration Fee increase of \$16 per quarter per student in 1977-78 and an authorization to further increase the fee to a maximum of \$131 per quarter per student, a permanent transfer of all student financial aid currently funded from Special Regents' Programs to Educational Fee income (\$10.6 million), and a permanent transfer for physical planning offices (\$621,000) and deferred maintenance (\$1.5 million) from Educational Fee income to Special Regents' Programs. Special Regents' Programs will provide interim funding for programs now supported from the Educational Fee and Registration Fees for which State funds will be requested by the Regents in 1978-79 and 1979-80 (\$6.7 million).

As previously discussed under I, Instruction and Departmental Research, this budget provides an increase of \$3.3 million General Funds to assume the instructional laboratory costs heretofore funded from the student Education Fee. This proposed increase does not reflect an acceptance of the University's overall fee policies nor does it reflect an intention to fund the University's proposed 3-year General Fund buy-out of fee funded activities.

The current estimate of 1977-78 Federal overhead available for Special Regents' Programs is \$21.4 million which assumes continuation of the 1976-77 interim billing rate of 29 percent. The following schedule indicates the proposed allocation to campuses at a 29 percent recovery rate.

## General Analysis

The 1977-78 budget for the general campuses focuses on correction of California Administrative Code deficiencies, including fire, life safety, handicapped, improvements to make the University's energy conservation program more effective; making existing and funded facilities operable; alterations, renovations, and/or remodeling of existing facilities to provide more effective use of existing space.

Health sciences bond funds will provide facilities which will permit increasing outputs of health sciences professionals within the capability of the \$155.9 million in construction bond funding authorized in 1972, supplemented by assured Federal matching grants. Supplemental funds may be required over the next several years in recognition of essential life safety requirements not contemplated in the original bond issue.

## Objectives

The University of California is a statewide institution of higher education with the following major functions:

1. *Instruction*

- Broadly based instruction leading to the baccalaureate degree,
- Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,
- Instruction in professional fields,
- Programs for the preparation of teachers, and
- Joint doctoral programs with the state university and colleges.

2. *Research*

The University is designated by the Master Plan for Higher Education in California as the primary state-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.

3. *Public Service*

Provide public service in areas related to the University's programs of instruction and research.

## HASTINGS COLLEGE OF LAW

### University of California

The law school was founded in 1878 by Seranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. The juris doctor degree is granted to the graduate of Hastings College of Law by the faculty of the University of California and signed by the President of the University.

The overall objectives of the college are:

1. To provide students a top quality education so that they will become experts in the use of the tools of their craft, and thus achieve a high level of professional competency.

2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society. In other words, to produce lawyers prepared for the various private and public roles performed by the legal profession.

3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objective of providing a top quality education the college has adopted a faculty recruitment policy which has resulted in the acquiring of a distinguished group of senior professors known as the "Sixty-five Club". Since 1940, the college has deliberately sought out members of other prestigious law school faculties who, after achieving national reputation as legal scholars and teachers, have reached the customary retirement age. These men have brought the advantage of a broad perspective of experience in their chosen field, and the instructional skills unmatched by any law school in the nation. In addition, adjunct faculty (comprised of outstanding legal specialists in specific fields of practice in the San Francisco Bay Area), administrative faculty (dean, vice dean and registrar, director of clinical programs, director of legal writing and research, and law librarian) and other regular faculty under the age 65 provide instruction to Hastings students. In 1977-78 it is planned to continue the enrollment level of 1,500 students.

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
II.	Add new criminal advocacy program element .....	\$98,792
III.	Add new computer-assisted legal research capability (LEXIS) .....	10,000

### I. INSTRUCTION PROGRAM

#### Program Objectives and Description

The principal objectives are:

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history and jurisprudence.
4. Instill in students through theory-practice clinical courses a level of professional competence and skill that will shorten the period of training in the law office.

5. Develop special skills in advocacy for trial lawyers.

The instruction program is designed to provide thorough and systematic instruction in those branches of the law which will best prepare students for their responsibilities to the community as members of the legal profession. It is composed of two elements including the classroom and theory practice. Through these elements it is planned that the student will receive a combination of theoretical instruction, practical experience, and specialized training as trial lawyers.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

**Program Elements**

a. Classroom .....	69.1	74.1	74.1	\$1,626,492	\$1,906,676	\$1,938,522
b. Theory-practice .....	3.5	3.5	3.2	164,245	84,261	81,136

**a. Classroom**

In this element, students receive top quality instruction in classroom seminar, lecture and discussion sessions which are conducted by a professionally qualified group of regular faculty members supplemented by an adjunct faculty comprised of outstanding legal specialists in special fields of practice.

Legal writing and research is a special seminar program calling for intensive training in advance techniques of legal writing and research including drafting of documents, legislation, and briefing.

An increase in summer faculty is reflected in the current year and proposed for approval in 1977-78. This amount is necessary to increase the length of the summer session from the present 6 weeks to 8 weeks. Fees charged will continue to completely offset the costs of the summer program.

**Input**

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	69.1	74.1	74.1	\$1,626,492	\$1,885,276	\$1,907,122

Administrative faculty .....	1	1	1			
Staff .....	11.3	12	12			
Student assistants .....	2.1	4.5	4.5			

**b. Theory-Practice**

In this element, students receive training and insights in the skills of courtroom and office practice. This includes practical experience in preparation and conduct of trials including brief and oral arguments before the court. This experience assists the students in achieving proficiency in preparation and trial of civil cases, appellate procedures and legal medicine. The following activities are examples of this involvement:

1. All second-year students, except those eligible and who elect to work on the Hastings Law Journal or the Constitutional Law Quarterly, are required to participate in the largest and most comprehensive moot court experience in the country. The course is operated under supervision of the Director of Moot Court with the assistance of a student moot court board. This board selects and edits cases involving controversial issues which are assigned to the students. Two students, working as a team, brief and argue their assigned case. Oral presentation of argument is held and prominent members of the judiciary, practicing attorneys and selected students serve as judges.

2. A substantial number of students elect the trial practice course where the emphasis is on demonstrative evidence, jury selection, opening statements, examination of witnesses, or direct cross-examination and argument.

3. Third-year students who have achieved a specified cumulative average for two years are permitted to enroll in the legal clinic seminar for firsthand experience with actual cases, interviewing clients, gathering facts, interviewing witnesses and preparing the case for trial. This is done through a volunteer-participation program including legal aid, public defender's office, district attorneys, private attorneys, and many others.

The budget proposes the transfer of a student assistant position (0.3) from theory practice to student placement for the purpose of providing assistance in the location of student housing.

# HASTINGS COLLEGE OF LAW—Continued

## University of California

### II. PUBLIC SERVICE PROGRAM

#### a. Trial and Appellate Advocacy

The Trial and Appellate Advocacy element is designed to provide specialized training to lawyers, legal educators and judges through short-term intensified courses. It is estimated that 385 attorneys will be registrants in 1977-78, the same level as in 1976-77.

For 1977-78, the budget includes the addition of a new program in criminal advocacy. As in the case of the existing civil program, the criminal program will be completely self-supporting.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78

General Fund .....				2,843	—	—
Reimbursements .....				86,218	126,815	224,882

### III. INSTRUCTIONAL SUPPORT PROGRAM

#### Program Objectives and Description

The principal objectives are:

1. Provide reference material so that students and faculty members can prepare for various aspects in the learning and teaching of law.
2. Provide students and faculty members with a current publication of recent developments in the changing laws.

Students and faculty members need reference material for various preparations and presentations in the legal education process and need to be kept informed of current developments in the changing aspects of the law. The instructional support program is composed of the library and scholarly publications elements and ensures that student and faculty members will have the use of reference material and will be kept informed, with members of the bench and bar, of current developments through the preparation and publication of the scholarly publications.

#### Authority

b. Scholarly publications .....	2	2	2	104,485	119,868	141,397

#### a. Law Library

In the law library, provision is made to maintain a carefully selected collection of legal reference material sufficient in number and scope to allow students and faculty members to research questions of law in preparation for classroom presentations and assignments, and for moot court, trial practice and legal clinic assignments. At the present time Hastings Law Library consists of some 123,000 volumes. Budgeted acquisitions add to this at the approximate rate of 9,000 volumes per year. The library is open 102 hours per week to maximize the availability of reference material.

The budget includes a \$10,000 general fund increase for the purpose of securing the capabilities of a computer assisted legal research program known as LEXIS. Technical internal fund reallocations offset this general fund increase for no net change to the library program.

#### Output

Staff .....	6.2	6.5	6.5			
Student assistant .....	1.8	5.5	5.5			

#### b. Scholarly Publications

In this portion of the budget, provisions are made to keep students, graduates, members of the bench and bar informed of current developments in the law and problems related to the legal profession. This is accomplished by preparing two scholarly publications including the Hastings Law Journal six times a year and the Hastings Constitutional Law Quarterly four times a year.

The Law Journal is devoted to indepth analysis and discussion of significant legal problems and the Constitutional Law Quarterly concentrates on the constitutional legal aspects of the problems. The articles range from exhaustive discussions by eminent legal scholars and members of the legal profession to notes and comments by students on recent developments in the law. Students selected to participate in the work of these publications find it a rewarding and valuable educational experience. Approximately one hundred will participate in the Law Journal and eighty in the Constitutional Law Quarterly. The benefits of this experience are realized not only during the formal legal education, but especially in the advantage the student has when seeking a position after graduation.

The budget for 1977-78 includes the addition, on a pilot basis, of two new scholarly publications. The initial costs of these two new publications are being funded from a combination of general funds (\$7,600) and expected subscription reimbursements.

### IV. STUDENT SERVICE PROGRAM

#### Program Objectives and Description

The principal objectives are:

1. Provide comprehensive student health services involving both on campus treatment by a doctor and nurse, and more extensive medical attention at the University of California Medical Center.
2. Provide supportive financial aid and counseling through loans (federal, state, private), scholarships, grants-in-aid, special grants based upon financial hardship, and the student pay-work study portion of the program to assist students in meeting their financial needs.
3. Provide employment for second- and third-year students in various private and public law offices and agencies on a part-time basis during the academic year.
4. Provide comprehensive placement services for graduating students.

The student service program is composed of three elements: health services, financial aid and placement. Through these functions, the students are provided with services to assist in maintaining good health and necessary financial assistance to complete the instruction program and placement services are available in order to realize the full benefits from a legal education.

c. Student placement.....	2	2	3.3	30,592	36,367	59,121

#### a. Student Health Services

The student health service provides on campus dispensary care including services of a nurse and physician four hours a day, five days a week. Emergency care and hospitalization if required is provided at the San Francisco Medical Center, University of California. The basis for the medical service is an agreement entered into between the medical center and the college.

For 1977-78, the budget includes a \$56,000 general fund request related to increases, actual and projected, in the cost of the College's student health contract with the University of California.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	-	-	-	\$105,759	\$117,600	\$117,600

Totals, Student Health .....	-	-	-	\$105,759	\$117,600	\$173,600

#### b. Student Financial Aid

The financial aid office is responsible for planning, developing, and providing financial assistance for students who would not be given the opportunity for legal education without additional resources. The functions of the office are divided into four groups: (1) information dissemination and application processing, (2) need analysis and award distribution, (3) financial, loan and work counseling, and (4) reports and program development.

All financial aid applicants are required to file the college scholarship service "Graduate and Professional Students' Financial Statement", which gathers, processes, and evaluates information concerning family and student assets and liabilities. These statements combined with student interviews determine the type and amount of financial aid for which the applicant is eligible.

The financial aid office also assists students in the securing of financial resources from external programs.

For 1977-78, the budget proposes a 6% inflation adjustment for 187 LEOP grants. This raises from \$975 to \$1,033 the per student grant level. In addition, the budget proposes an additional \$8,256 for the Registration Fee Offset Grant program in order to offset the effect of a college proposed increase in the Registration Fee in the amount of \$48 per student per year.

Number of students .....	477	636	636
Amount loaned .....	\$1,107,450	\$1,208,400	\$1,208,400

### c. Student Placement

The extensive placement program serves three functions: Providing on-campus interviews with firms, legal departments of public agencies and corporations, and various branches of the judiciary; providing, through its summer observation program, law practice experience during the summer months for the second-year students; and fitting students into part-time employment with law firms, government agencies, public law offices, the judiciary and special poverty law office programs that will provide not only valuable law experience but insure some financial remuneration enabling the student to continue school.

The budget proposes the addition of one full time student counselor to handle the workload associated with employment counseling for students and the development of student employment opportunities. Also included is the 0.3 student assistant position which is proposed to be used for residential counseling workload.

## V. INSTITUTIONAL SUPPORT PROGRAM

### Program Objectives and Description

The principal objectives are:

1. Provide active leadership in meeting current administrative problems.
2. To provide management with fiscal information on resources used in relation to resources available and to provide business services.
3. Provide a reasonable selection system for accepting students.
4. Provide for maintenance of student records.
5. To maintain physical plant facilities and provide security to permit operations of the programs.
6. To foster a continuing relationship between the alumni and the college including the involvement of alumni in campus community affairs.

This program is carried out through the activities of executive management, business services, registrar, admissions, facilities operation and community relations offices.

## HASTINGS COLLEGE OF LAW—Continued

### University of California

#### a. Executive Management

Administration of the college is the responsibility of the dean and his chief administrators including a vice dean and registrar, one associate and two assistant deans. The dean and the registrar are, by statute, the officers of the college. The dean serves as chief executive officer and the registrar serves as secretary to the board of directors. Administrative responsibility includes fiscal management and planning, coordination of instructional programs, curriculum planning, personnel management, development of new instructional and theory practice programs, public relations, supervision and development of physical plant operations, alumni promotion and fund development.

*Proposed increases shown in the executive management function include price increases not already allocated to other programs and functions, an increase in unemployment insurance funding, and an increase in the savings requirement of the institution.*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	14.5	15.8	15.8	\$516,239	\$554,366	\$550,592
Workload adjustments.....	—	—	—	—	—	2,622
Totals, Executive Management .....	14.5	15.8	15.8	\$516,239	\$554,366	\$553,214
Administrative .....	5.1	6	6			
Staff .....	9.4	9.8	9.8			

#### b. Business Services

The various services include accounting, budgeting, cashiering, contract preparation, mail, personnel, unemployment insurance, purchasing and supplies.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	15.6	17	17	\$250,196	\$299,680	\$294,813

#### c. Registrar

The Registrar is responsible for all records held by Hastings College of Law, including all student records and statistical information. Records describe each individual student: his or her academic achievement, personal data, placement, medical, financial (loan and scholarship), honors, law journal, etc. As such, they are an integral part of the official "picture" of each individual student, and become a part of the permanent record of each student.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	3	3	3	\$40,264	\$44,055	\$38,396
Workload adjustments.....	—	—	0.2	—	—	2,300
Totals, Registrar .....	3	3	3.2	\$40,264	\$44,055	\$40,696

#### d. Admissions

Students are accepted through a screening process so that students most highly qualified and with the greatest aptitude for the law are selected. Special attention is devoted to student applications under the legal education opportunity program in an effort to ensure that the student may reach the academic goal. Selection is based on the applicant's undergraduate record, the law school admission test score and other information submitted.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	3.3	4	4	\$47,709	\$64,255	\$63,802

#### e. Facilities Operation

Daily housekeeping, maintenance of the physical plant, security and preservation of order in the college area are provided in facilities operation in order to maintain the quality of the physical environment. *One additional watchman position has been administratively approved in the current year to provide basic security coverage for the evening and weekend hours. It is proposed that this position be approved on a permanent basis with funding to be absorbed by a reallocation of existing resources.*

*In addition, the budget proposes two special repair and maintenance projects: partial replacement of carpeting in the library (\$5,000) and the re-keying of locks in existing buildings (\$3,000).*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	22.1	23	23	\$534,716	\$719,117	\$649,965
Workload adjustments.....	—	1	1	—	10,238	19,883
Totals, Facilities Operation.....	22.1	24	24	\$534,716	\$729,355	\$669,848

#### f. Community Relations

The Office of Community Relations include the functions to carry out the responsibility for the general development and fund raising for the college. These responsibilities include preparing and issuing all press release on law school activities and faculty members and coordinating special programs jointly sponsored by the law school and external entities on both a local and national basis. This office also maintains all alumni association records and files for over 6,100 alumni; issues and alumni bulletin three times a year and an alumni directory biannually; and plans special events for alumni, students, and members of the legal community. The association includes approximately 160 members of the judiciary and a number of California legislators.

### HASTINGS COLLEGE OF LAW—Capital Outlay University of California

#### STATE BUILDING PROGRAM EXPENDITURES

	Actual 1975-76	Estimated 1976-77	Proposed 1977-78
--	-------------------	----------------------	---------------------

The law school was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers, for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. The juris doctor degree is granted to the graduate of Hastings College of Law by the faculty of the University of California and signed by the President of the University.

The overall objectives of the college are: 1. To provide students a top quality education so that they will become experts in the field of law, and thus be able to achieve a high level of professional competency. 2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society. 3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objectives, Hastings Master Plan for Long Range Development proposes the creation of a physical environment to house the Hastings Law Center. This setting will consist of the sensitive siting of a group of buildings integrated with a central landscaped plaza providing a quiet "campus" setting designed to provide a pleasant and positive experience in community relations, and contribute to the growth in clinical legal education.

The buildings include an Academic Facilities Building, a Services Element providing Student and Faculty Commons plus recreation space, and a Legal Affairs Facility providing space for law-related public and private groups and community services. The latter two projects will be financed through non-state funds.

Hastings College of Law is now located in the San Francisco Civic Center on the west end of the block bounded by McAllister and Hyde Streets, just north of the old Federal Office Building. The College proposes an Academic Facilities Building addition just west of the present facilities on the south portion of the Civic Center block bounded by the City's Main Library on the south, the State Building across Larkin Street on the west and the Federal Court Building on the northwest on Golden Gate Avenue.

The construction program for 1977-78 consists of two major projects: \$1,639,000 for land acquisition and site clearance; and \$655,000 for preliminary plans and working drawings for the Academic Facilities Building. Also included are three minor projects totaling \$52,300 to correct deficiencies and improve the existing physical facilities.

# **HASTINGS COLLEGE OF LAW—Capital Outlay—Continued** **University of California**

STATE BUILDING PROGRAM EXPENDITURES		Actual 1975-76	Estimated 1976-77	Proposed 1977-78
<b>MAJOR PROJECTS</b>				
Master Planning .....		\$22,747 <sup>eM</sup>	\$27,253 <sup>eM</sup>	\$25,000 <sup>eM</sup>
Land Acquisition .....		1,069,000 <sup>eL</sup>	—	1,639,000 <sup>gL</sup>
This project proposes acquisition of three parcels consisting of approximately 21,804 square feet of land and is necessary to house the proposed Academic Facilities Building. Funds for site clearance are also included in this request.				
Academic Facilities Building .....		49,709 <sup>hP</sup>	50,291 <sup>hP</sup>	275,000 <sup>gP</sup> 380,000 <sup>gW</sup>
This project will accommodate instructional elements, faculty offices, other instructional activities, support services and the law library. The library will occupy 70,198 assignable square feet; 37,900 utilized for stack space to accommodate 300,000 volumes and 32,298 assignable square feet to accommodate the necessary library support spaces, including 481 reader stations. The building will also provide space for faculty staff assistance, audio visual services, placement services, financial aid, administrative services, facilities operations, duplicating and student locker services. This building will provide services to 1,500 students and consist of 148,500 gross square feet of which 103,954 is assignable square feet and is scheduled for occupancy in July 1981.				
Services Element .....		1,088,000 <sup>eL</sup> 20,909 <sup>eP</sup>	93,000 <sup>eL</sup> 29,091 <sup>eP</sup> 120,000 <sup>eP</sup> 160,000 <sup>eW</sup>	4,425,000 <sup>eC</sup> — — —
This project will provide a building to house a student faculty commons, dining commons, recreational facilities and support activities for a total of 23,310 asf. In addition a parking facility of 54,700 ogsf is included.				
Legal Affairs Facility .....		1,730,000 <sup>eL</sup> — —	595,000 <sup>eL</sup> 750,000 <sup>eP</sup> 850,000 <sup>eW</sup>	17,880,000 <sup>eC</sup> — —
This project will provide a building to house law-related institutes, associations, centers and aid clinics, two courtrooms, auditorium, public agency offices, law offices, a faculty-judicial lounge and club, and community service facilities.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES

Introduction

The individual California State Colleges were brought together as a system by the Donahue Higher Education Act of 1960. In 1972, the system became The California State University and Colleges (CSUC), and 14 of the 19 campuses received the title of "university."

The oldest campus, San Jose State University, was founded in 1857 and became the first institution of public higher education in California. The newest campus, California State College, Bakersfield, began instruction in 1970.

Responsibility for The California State University and Colleges is vested in the Board of Trustees, whose members are appointed by the Governor. The trustees appoint the chancellor, who is the chief executive officer of the system, and the presidents, who are the chief executive officers on the respective campuses.

The trustees, the chancellor and the presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of The California State University and Colleges, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the chancellor.

Academic excellence has been achieved by The California State University and Colleges through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education programs. Each campus requires for graduation, a basic program of "general education—breadth requirements" regardless of the type of bachelor's degree or major field selected by the student. A limited number of doctoral degrees are offered jointly with the University of California.

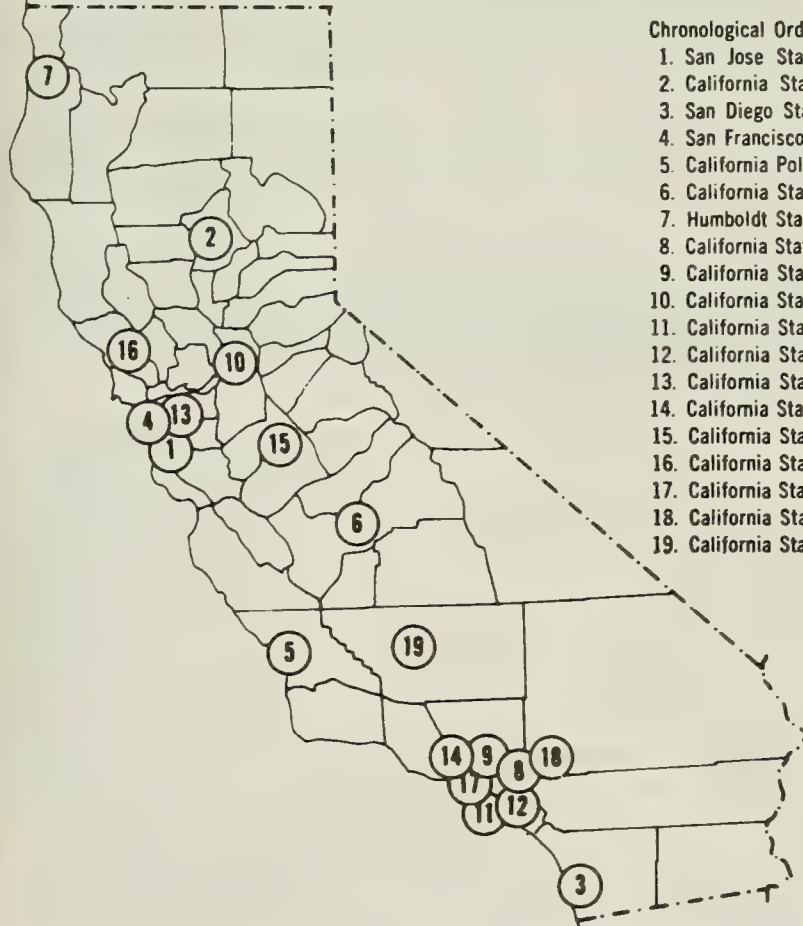

Presently, under the system's "new approaches to higher education," the campuses are implementing a wide variety of innovative programs to meet the changing needs of students and society. Examples of pilot programs currently authorized are instructional television projects, minicourses, and credit-by-examination. A consortium of The California State University and Colleges fosters and sponsors local, regional, and statewide certificate programs to meet the needs of individuals who find it difficult or impossible to attend classes on a campus.

The program objectives of The California State University and Colleges are:

- 1. To provide instruction in the liberal arts and sciences, the professions, applied fields which require more than two years of college education, and teacher education—both for undergraduate students and graduate students through the master's degree.
- 2. To conduct research to the extent that it is consistent with the primary function of The California State University and Colleges.
- 3. To provide public services to the people of the State of California.
- 4. To provide services to students enrolled in The California State University and Colleges.
- 5. To provide institutional services to support the primary functions of instruction, research, public services, and student services in The California State University and Colleges and to ensure that legal obligations related to executive and business affairs are met.

The locations of the 19 campuses show the statewide coverage of this, one of the largest baccalaureate degree higher education systems in the nation.

Personnel years .....	32,223.4	32,732.1	32,923.4

<sup>1</sup> Programs I, IV, V and VI are partially nonstate funded; programs II, III and VII are fully self-supporting.

<sup>2</sup> This summary includes expenditures, but not personnel years for auxiliary organizations and foundations.

## SIGNIFICANT PROGRAM CHANGES

## General

This budget provides for 236,370 full-time equivalent (FTE) students in 1977-78. This total includes 390 FTE students enrolled in the International Program. This is an increase of 0.1 percent over the actual 236,067 enrollment in 1975-76, and a decrease of 1.3 percent from the 1976-77 budgeted level of 239,410. It is currently estimated that CSUC will serve 233,786 FTE students during 1976-77. CSUC experienced an unanticipated decline in enrollments in 1976-77.

Faculty productivity, measured in terms of average student credit units generated by faculty FTE, is continued at the 1976-77 level of 273 units per faculty after adjustment for salary savings. This is equivalent to a student-faculty ratio of 17.8 to 1 and requires an average of slightly more than 12 weighted teaching units for a full-time workload (which includes independent study) per faculty. The following table exhibits the student-faculty ratio for past years:

Year	FTE Student-Faculty Ratio	Student Credit Unit-Faculty Ratio
1973-74 .....	17.82:1	263
1974-75 .....	17.80:1	273
1975-76 .....	17.80:1	273
1976-77 .....	17.80:1	273
1977-78 .....	17.80:1	273

Overall General Fund increases in 1977-78 total \$25.3 million and are directed toward program improvements and maintenance in the state-supported CSUC programs. These augmentations include almost \$21.6 million for price increases attributable to an inflation rate experienced by all state programs, merit salary adjustments, legislation enacted during 1976, and workload adjustments. Funding for employee compensation including salary increases proposed for 1977-78, is included in a separate item and will be allocated to CSUC after the enactment of the budget act.

The following table identifies major budgetary changes included in the 1977-78 Governor's Budget.

## Highlights of the 1977-78 Governor's Budget Proposal for the California State University and Colleges

	1976-77 Proposal	1977-78 Proposal
Merit salary adjustments and promotions .....		\$6,524,384
Full year position funding .....		2,496,594
Increase in PERS contributions and health and welfare .....		6,400,839
Workers and unemployed compensation funding .....		631,000
Price increase .....		7,498,084
Enrollment adjustments .....	-\$1,016,576	-1,857,258 <sup>1</sup>

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## Enrollment Adjustments

Revised enrollment projections for 1976-77 are estimated to total 233,786 FTE students, a decrease of 5,624 FTE (2.4%) from the amount originally budgeted for 1976-77. Section 28.9 of the 1976 Budget Act requires the Director of Finance to unallocate amounts budgeted for CSUC, provided the enrollments are under the original budget expectations by at least 2%. In order to accommodate the intent of Section 28.9, the 1976-77 budget has been reduced by \$1,016,576. This represents the amount necessary to reduce funding for enrollments which exceed a 2% decrease. Stated in terms of FTE students, 1976-77 enrollments decreased by 5,624 FTE under the budgeted level, and funding is reduced for 836 FTE students.

This budget anticipates a 1977-78 enrollment level of 236,370 FTE students, up 2,584 (1.1 percent) from the revised 1976-77 level of 233,786. CSUC continues to project a "steady-state" enrollment condition into the future with relatively small enrollment changes.

## Library Development

CSUC, in response to a Department of Finance recommendation, is proceeding in the development of systems and procedures under the title of the Library Development Program, which will lead to improved library usage and efficiency through interlibrary cooperation and automation. This program was originally designed as a four-year, phased effort to be completed in 1977-78. Due to technical difficulties, the project was delayed and it is now estimated that the project will be completed in 1983-84. The 1976-77 budget contains \$1,587,617 to support the project. The 1977-78 budget contains an additional \$1,127,875 to fund the various phases of the Library Development Program. The major portion of this increase is to support the continued conversion of manual library listings to a machine-readable format.

## Computing Support

The principal responsibility of the CSUC data processing program is to provide support for the education of students who comprise the largest user group of computing facilities. In 1977-78, the budget has been increased by \$380,641 to improve the capabilities of the data processing system. To support increased utilization of the computer by academic and administrative units on every campus, an amount of \$136,862 is provided for three additional positions and selected operating expenses and equipment. An additional \$97,560 is provided for upgrading existing hardware on selected campuses. To increase the effectiveness of the central computing facility, an amount of \$76,922 has been added for operating systems support, central timesharing, and dual processing which is required during the transfer to the Chancellor's office of the central timesharing facility. A total of \$69,297 has been provided for three academic coordinator positions to improve instructional computing at selected campuses.

## Financial Aid Administration

This budget provides additional campus positions (12 financial aid office positions and 51.1 business office positions) to perform the increasing workload requirements related to application processing, eligibility determination, awarding and disbursing of financial aid, loan billing and collection activity, record-keeping and reporting functions at a cost of \$763,522. The objective of this proposal is to:

1. Ensure compliance with all Federal, state, systemwide, and campus administrative policies and procedures;
2. Improve the financial aid services and thereby insure maximum access to education for all students who qualify; and
3. Improve the management efficiency of campus financial aid programs.

This increased staffing will provide improved services to student aid recipients and more timely information to program managers. Improved loan collection and reporting activities will reduce the future need for General Fund support to match new Federal loan funds, as amounts collected become available for new loans.

## Educational Opportunity Program

The Educational Opportunity Programs in the California State University and Colleges began formally in the fall of 1969, following a number of successful pilot efforts. Since that time, state funding has supported this program at varying levels.

In 1976-77, the program was increased \$3,039,043. That increase reflected the Governor's concern for increasing services to disadvantaged students. An additional \$970,128 which includes a 6% inflation adjustment is being proposed in 1977-78. This amount will maintain the current level of first-year students. A total of 21,187 students will be served in 1977-78.

## Instructional Staffing

While the student-faculty ratio which is used for budgeting purposes has remained relatively constant over the past few years, student demand has shifted from courses which are relatively inexpensive to teach (e.g., social sciences) to those which are more expensive (e.g., engineering, health sciences). This budget has been increased by \$2,790,314 to provide a one-time adjustment to remedy this situation. This amount will provide for the addition of 142.9 faculty positions and 40.0 support positions.

## I. INSTRUCTION

## Program Objectives and Description

The California State University and Colleges (CSUC) educational program is designed to educate and grant degrees, credentials, or certificates to qualified students in the liberal arts and sciences, and certain applied fields and professions. Through regular classroom efforts and special supplemental programs, the CSUC program attempts to prepare students for a profession, occupation, or advanced study, or to update knowledge and upgrade skills. Although teaching activity may take place in other programs (e.g., the academic support program), formal study for credit toward a degree or certificate at higher education institutions usually falls within the instruction program.

Currently, the instruction program consists of three subprograms: regular instruction, special session instruction, and extension instruction.

Table II displays the changes in FTE and head count students on each campus for the past, current and budget years. Table III provides similar information for other instruction program components: special (summer) session instruction and extension instruction.

TABLE II—Average Annual Enrollment and Annual Full-time Equivalent Students for the Years 1975-76 to 1977-78

a. Regular Instruction

The primary function of The California State University and Colleges is the instruction of undergraduate and graduate students, through the master's degree level, in the liberal arts and sciences, applied fields, and certain professions. The regular instruction subprogram includes those instructional programs operating during the academic year that are part of a formal degree or certificate curriculum and are managed by the regular academic departments. Table IV displays the distribution of undergraduate and graduate FTE students within the various academic disciplines.

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Academic planning is carried out on each CSUC campus and ensures the availability of appropriate instructional resources. These include faculty, technical, clerical, and administrative personnel; facilities; equipment; operating supplies and materials; libraries; and other services.

Academic advisement of students in The California State University and Colleges typically is carried out by the teaching faculty and department chairpersons as part of the ongoing instruction program. The faculty advisor assists students in planning their academic programs and acquaints them with the various education requirements for a degree.

The instructional programs on the Humboldt, Los Angeles, Hayward, Pomona, San Luis Obispo, San Bernardino, Dominguez Hills, and Bakersfield campuses are offered with instruction on the quarter system. Instruction is provided on a semester basis at the other CSUC institutions except Stanislaus which operates on a 4-1-4 term basis. The Los Angeles, San Luis Obispo, Hayward, and Pomona campuses are year-round operations, with a state-supported summer quarter.

All curricular offerings are based on the Master Curricular Plan for The California State University and Colleges and are expressed in an academic master plan for each campus. The chancellor may approve the establishment of new academic programs when such programs have been projected in an academic master plan previously approved for that campus by the Board of Trustees. These programs are subject to review by the Postsecondary Education Commission.

In 1975-76, The California State University and Colleges awarded approximately 55 percent of the bachelor's degrees and 35 percent of the master's degrees granted in California. More than 200 different baccalaureate and/or master's degrees are offered in broad discipline areas. Table V displays the number of baccalaureate and master's degrees conferred over the past six years through 1975-76.

**TABLE V**  
Recent History of Undergraduate and Graduate Degrees Conferred 1970-71-1975-76

Year	Undergraduate degrees	Graduate degrees	Total

1973-74.....	48,018	8,714	56,732
1974-75.....	44,818	9,475	54,293
1975-76.....	43,910	10,120	54,030

### 1977-78 Regular Instruction Program

The 1977-78 Trustees' instructional faculty proposal decreases the total CSUC faculty from 13,427 to 13,380 for 1976-77. This is the result of a decrease in FTE enrollment from the budgeted level of 239,410 in 1976-77 to 233,786. For 1977-78, the CSUC faculty is proposed to increase to 13,400.2 based upon an FTE enrollment of 236,370. Included in the 1977-78 proposed level for instructional faculty is an increase of \$2,790,314 for the shift in student demand. While the student-faculty ratio which is used for budgetary purposes has remained relatively constant over the past few years, student demand has shifted from courses which are relatively inexpensive to teach (e.g., social sciences) to those which are more expensive (e.g., engineering, health science).

The faculty budget includes 24.7 positions that will be allocated by the Chancellor's Office to reduce the impact of increased student demand in certain offerings. The method of distributing instructional faculty positions should favorably affect normal student progress, reduce excess credit accumulation and aid the CSUC system in meeting shifts in student demand.

Instruction of students by the budgeted faculty will require a systemwide per term productivity of 273 student credit units per full-time equivalent faculty (SCU/FTEF), which is equivalent to the student faculty ratio of 17.8 to 1 budgeted for the current 1976-77 year. This productivity goal will require an average faculty workload slightly exceeding 12 units per term including faculty units earned for independent study.

**TABLE VI**  
Faculty Productivity<sup>1</sup> by Campus

Campus	Reported 1975-76	Estimated <sup>2</sup> 1976-77	Estimated <sup>2</sup> 1977-78

All Categories .....	274	273

<sup>1</sup> Average number of student credit units generated by each full-time equivalent faculty (SCU/FTEF).

Steps were initiated by the Coordinating Council for Higher Education to develop "costs of instruction" information (the Postsecondary Education Commission is continuing to collect this type of data). This budget displays in Table VIII the unit cost data for the CSUC.

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

"Unit Cost" is a variable that captures the influence of class size, faculty productivity, and other critical instructional factors.

This budget contains \$3.3 million for sabbatical leaves at the continuing ratio of one leave for every 12 eligible faculty; the leave is based on a full year's leave with a half year's pay or a half year's leave with full pay. Funding sabbatical leaves is a positive recognition that professional development and teaching effectiveness are enhanced by these leaves.

This budget provides \$1,463,150 for continuation of a fund for innovation and improvement in instruction. This amount includes an augmentation of \$208,053 which restores the program to its 1975-76 level, as adjusted for inflation.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$367,775,498	\$408,615,347	\$420,171,426
Personnel years .....	17,804.2	17,822.6	17,822.6

### b. Special Session Instruction

The California State University and Colleges operates summer sessions on all campuses except for the Pomona campus. (The Pomona campus is one of four campuses offering a state-supported summer quarter.) Table III displays actual and full-time equivalent enrollments for summer session on each campus. This is a fully reimbursed institutional term, and is not part of the ongoing college year in CSUC. The special session instruction subprogram includes all programs that offer credit toward a formal degree or certificate and are in operation during a summer session. Summer sessions throughout the CSUC system have been experiencing declining enrollments since 1969 when 12,331 full-time equivalent students were enrolled; preliminary estimates indicate FTE students increased somewhat in 1976 over 1975. In 1977-78, 7,768 FTE students are projected. A CSUC systemwide task force currently is studying the whole range of continuing education programs.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$5,383,026	\$5,667,286	\$5,322,137
Personnel years .....	407.7	441.2	422

### c. Extension Instruction

Extension instruction, primarily a nonstate-supported function, designed to serve a variety of needs, is offered year-round by The California State University and Colleges. One aim is to provide students a means for making up deficiencies in the educational program and to accelerate the attainment of degrees and credentials. Within the field of continuing education, teacher education provides access for teachers to new techniques to improve instructional expertise. Courses are concentrated at the upper-division level and are designed to satisfy school district and state credential requirements. The extension instruction subprogram includes all program elements that are managed separately by an extension division or similar agency within the system.

Projected extension enrollments in 1977-78 are 9,414 full-time equivalent students. Table III displays estimated enrollments for this instructional component.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$4,359,035	\$4,708,630	\$5,039,909
Personnel years .....	259.5	323.8	346.1

## II. RESEARCH

### Program Objectives and Description

Governmental agencies, business, industry and various other groups require research assistance. Generally, research is authorized in the CSUC when problems are within the competence of the faculty; when adequate financing can be provided for facilities, staff and equipment; when students are involved and receive stipends or salaries; and when the projects will make classroom instruction more effective. Currently, no General Funds are authorized for this activity.

The research program consists of all those research elements commissioned by an agency external to the institution or by an organizational unit within the institution. This program contains only those research projects awarded directly to the campus and does not include foundation projects. This program also contains the academic department research activity that has been created as a result of a contract, grant, or specific allocation of resources to conduct a study or investigation of a specific scope. These projects normally are of a more temporary nature than those undertaken in formal research organizations.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	3.4	10	10	\$46,498	\$148,522	\$153,342
General Fund .....	—	—	—	-1,437	—	—
Reimbursements—other .....	3.4	10	10	47,935	148,522	153,342

## III. PUBLIC SERVICE

### Program Objectives and Description

The public service program contains all the program elements within the institution that are directed toward the benefit of the general public. Programs that are controlled or operated by outside agencies but are housed or otherwise supported by the institution fall within the public service program. Currently, the only General Funds authorized for public service program activities are to cover the instructionally related activities at the educational television station at San Diego State University.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

Reimbursements—other .....	—	16	16	411,862	342,292	363,958

## IV. ACADEMIC SUPPORT

### Program Objectives and Description

The academic support program provides the library, audiovisual, data processing, and ancillary (e.g., college farms, nursery schools) activities that are required to display, retain, and preserve materials and in other ways to assist the academic functions of the system.

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## a. Libraries

Library services consist of all activities which directly support the libraries of the 19 CSUC campuses. The libraries provide the bibliographic and informational resources necessary to help carry out the teaching and research functions of the CSUC. The expenditures required to support the library system include:

1. Collection purchasing, processing (including cataloging and classifying), preserving, and exhibiting library materials which include: books, periodicals, kits, models, microforms, and art objects.
2. Services—reference and referral services to students, faculty and other system users, including institutions, i.e., interlibrary loans and other resource sharing.
3. Operations—management, supervision, training, planning, and equipment maintenance.

The system operates a library at each of the 19 campuses. It has no branch libraries. CSUC library holdings as of June 30, 1976 total 8.2 million volumes and collections range in size from 153,684 volumes at Bakersfield to 722,248 volumes at San Jose.

TABLE IX  
Library Volume Activity

	1975-76	Estimated 1976-77	Estimated 1977-78
<b>Annual Collection Change</b>			
Volumes budgeted .....	439,000	439,000	439,000
Volumes withdrawn <sup>1</sup> .....	54,719	61,000	65,000
Volumes added by purchase <sup>2</sup> .....	421,939	—	—
<b>Total Volumes Held Systemwide</b>			
Countable Total <sup>2</sup> .....	7,676,215	8,066,215	8,456,215
Actual Total <sup>3</sup> .....	8,170,437	8,500,000	8,800,000

<sup>1</sup> Discarded obsolete/worn-out materials.

<sup>2</sup> Only those acquired with state and federal funds (exclusive gifts and exchanges).

<sup>3</sup> Excludes government documents maintained as a separate collection, curriculum library materials, children's books not cataloged in the general collection and microforms.

Expenditures in this program element relate to the acquisition and processing of books, periodicals and a variety of other materials; maintenance of current holdings and card catalogs; services to individual students, faculty members, and other library clients; interlibrary loans; and supervision of these activities.

In addition to the regular library activities, CSUC is engaged in a major developmental program known as the Library Development Program. This project when completed, through the utilization of advanced EDP techniques and equipment, will bring into being a system that will result in better utilization of existing library holdings, provide for a system of cooperative acquisition and processing of books, reduce low-use or obsolete material and enhance interlibrary borrowing. This project is multiyear in nature with a completion date of 1983-84 under current planning. *The 1977-78 level for the Library Development Program has been increased by \$1,127,875 over the 1976-77 budgeted level.*

## 1977-78 Program

Input	1975-76	1976-77	1977-78
Expenditures .....	\$31,489,103	\$36,648,026	\$40,037,001
Personnel years.....	1,700.9	1,726.5	1,719.7

## b. Audiovisual Services

Audiovisual services include activities associated with providing these materials to support the primary programs of instruction, research and public service. The scope of audiovisual services includes utilization, materials preparation and technical services.

The use of instructional television by The California State University and Colleges has long been a matter of interest and concern. In January 1965, the trustees adopted a resolution which established policy guidelines for its orderly development. This resolution recognized the use of television as important means for making the instructional process more productive and efficient.

Television is being used in nearly half of the CSUC campuses in a variety of applications and for professional curricula in broadcasting.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$7,374,141	\$7,812,542	\$8,036,263

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## c. Computing Support

Although support to instruction is the principal responsibility of this element, funds are included to support both academic and administrative computing activities. Students are the largest users of CSUC computing facilities. Computer support for instruction takes two forms: (1) training in computer and information sciences; and (2) using the computer as a tool for instruction and research in a number of academic programs.

The demand for specialists in computing technologies affords The California State University and Colleges full opportunity to offer curricular programs in computer and information sciences at selected institutions serving large geographic areas. The goal of computing programs is to produce individuals both at the undergraduate and graduate level sufficiently competent in computer technology to meet the demand in this field.

Instruction in other areas further increases demand for computer time. Access is essential in the fields of business, engineering, and mathematics and is becoming a prerequisite for architecture, biological sciences, physical sciences and social sciences.

Recognizing that computer support increases the quality of instruction in all fields, and that a significant number of students need some knowledge of computing in order to enter a variety of occupations, CSUC campuses will continue to provide exposure to the largest possible number of students. The goal of instructional usage in CSUC is to make students especially knowledgeable in the use of modern information-systems technology. *The 1977-78 budget proposes an increase of \$380,641 to improve the capabilities of the data processing system.*

Input	1975-76	1976-77	1977-78
Expenditures .....	\$13,380,451	\$15,047,769	\$15,942,413
Personnel years .....	508.3	511	525.1

## d. Ancillary Support

Certain professional instructional programs are much more effective when there are facilities available for practical application of the principles taught in the classroom. There are several clinics, bureaus, centers and institutes that fulfill this objective. Examples are the nursery schools at San Diego and San Francisco which provide practice teaching experience at the preschool level. In addition, there are college farms at Fresno, Chico, San Luis Obispo, and Pomona operated in conjunction with those campuses' agricultural instructional program; a project program at Northridge for education of the deaf; and the medical technology program at San Francisco. Natural resources and fisheries facilities at the Humboldt campus and the Moss Landing marine facility at San Jose State University complement the many disciplines concerned with natural sciences and the conservation of natural resources. Long Beach State University administers the Southern California Ocean Studies Consortium, which also provides service to five other campuses. Humboldt State administers two programs which are responsive to the needs of the Indian Community in Humboldt County.

The costs of these ancillary facilities are a direct result of the enrollment in the professional curricula involved. In this subprogram are accumulated those academic support expenditures that are not appropriately classified in other subprograms.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$10,404,578	\$11,273,426	\$11,999,972
Personnel years .....	375.3	375.6	393.8

## V. STUDENT SERVICE

## Program Objectives and Description

The student service program includes all activities related to the student body except for degree-related activities and student records. Activities in this program are designed to contribute to the student's physical well-being and to his intellectual, cultural, and social development outside of the context of the formal instruction program. Student service programs are supported by the General Fund, the CSUC student services fee, and through the self-supporting organizations. A total of \$2,334,449 additional funds are being provided in the Instruction Program in 1977-78 to continue the third of a four-year "phase-in" or "buy-out" period during which the General Fund will assume support for instructionally related supplies and services. A total of \$10,570,806 is now included in the 1977-78 budget for this purpose.

Typically, campuses provide students with food, health care services, housing, a bookstore, cultural and recreational activities, counseling, testing, and financial aid.

d. Student support .....	764.8	788	831.5	62,057,604	66,763,991	68,027,554

## a. Social and Cultural Development

Student activity programs in The California State University and Colleges have been established to provide for the student's social and cultural development outside of the degree curriculum. These are student activities primarily supported and controlled by the student body such as student associations, student newspapers, annual convocations, lectures and special conferences. Informal, out-of-classroom programs of a cultural, social or recreational nature complement and supplement academic disciplines; provide experiences in self-government; offer social skills and acceptance of responsibility; and develop effective human relations. These are considered an essential part of the educational program. Coordination of off-campus programs is also accomplished through this element.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$12,183,204	\$12,885,250	\$13,240,999
Personnel years .....	166.8	146.8	147.1

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

b. Counseling and Career Guidance

Counseling and testing programs recognize that in order for the State and the student to realize maximum return on their investments, college communities should provide professional counseling services. Students needing such services may be aided in evaluating their educational objectives, strength of motivation, intellectual potential, and vocational and professional goals.

The placement program provides occupational information and placement of students in professions for which they have been prepared. This responsibility includes the careful articulation between instructional programs and the changing professional needs of the business and government communities and follow-up on the placement of graduates. The placement office provides services to the student from the time he enters college until he is ready to enter full-time employment.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$13,833,127	\$17,588,417	\$18,352,111
Personnel years .....	839.3	1,079.3	1,090.2

c. Financial Aid

Financial aid consists of those financial counseling services; analyses of financial needs; administration and disbursement of scholarships, grants, loans and other services that are established to provide financial aid services and assistance to students. This reflects not only the cost of operating such activities, but also the amount of financial aid disbursed to students. The offsetting collections and revenues are shown in the reimbursements program.

Financial aid offices provide information regarding the costs of college attendance and the availability of sources of financial aid. They are responsible for the administration of a complex program of student awards including scholarships, grants, fellowships, loans and employment designed to make it possible for students in need to initiate or continue their academic programs.

There are several systemwide student financial aid programs which are partially or totally funded by the federal government. These include the National Direct Student Loan, College Work-Study, and Educational Opportunity Grant Programs of the U.S. Office of Education (HEW); the Nursing Student Loan, and the scholarship programs of the Public Health Service; and the Law Enforcement Education Loan and scholarship programs of the Department of Justice.

Other programs include the State Scholarship, Graduate Fellowship and College Opportunity Grant Programs administered by the California State Student Aid Commission and institutional scholarships, grants, and loans. The State also provides financial assistance to educationally and economically disadvantaged students through the Educational Opportunity Program.

The Federally Insured Student Loan Program (FISL), under which banks make loans guaranteed by the federal government, provides systemwide student financial assistance. Total borrowing by students in the CSUC system under this program for the 1976-77 academic year was approximately \$12 million. The FISL Program is administered by the campus through verification of student registration and financial need to private lending banks.

The total of all programs administered by CUSC is included in the statewide table included in the budget presentation of Higher Education Student Assistance.

1977-78 Program

State support will continue through matching provisions of federal programs, and through the CSUC-administered Educational Opportunity Program. State support for financial aid for CSUC students is also provided by the budget for the Student Aid Commission in the form of scholarships, graduate fellowships, and college opportunity grants.

The federal government provides for partial reimbursement of student financial aid administration (i.e., staffing for campus business and financial aid offices). The level of such reimbursement is determined by changes in federal law and directives, as well as the level of federal financial aid allocations. Federal law has been revised to raise the reimbursement level from 3% to 4% of federal financial aid grants. This administrative allowance will increase from \$518,327 in 1976-77 to \$1,227,486 in 1977-78. This increase in reimbursement has the effect of reducing the required state appropriation. The Basic Educational Opportunity Grant is projected at \$23,782,000 compared to \$10,490,000 in 1976-77. The Federal Supplementary Educational Opportunity Grant Program is expected to increase from \$2,090,000 in 1976-77 to \$4,254,803 in 1977-78.

The Financial Aid Administration Staffing is projected consistent with the authorized level of 1976-77 which was 26 percent higher than 1975-76. To allow more students to be served (e.g., tutoring, counseling), the Educational Opportunity Program was increased in 1976-77. That allowed the total enrollment level for EOP students to increase from 15,619 in 1975-76 to 19,439 in 1976-77. In 1977-78 the enrollment level projection is 21,352.

The staffing level for the Educational Opportunity Program is essentially a continuation of the authorized level for 1976-77 which was significantly above the 1975-76 authorized level. The amount available for grants to CSUC students has been increased \$397,747 to provide an additional six percent for a special inflation adjustment.

Table X displays details of grants for the state-supported Educational Opportunity Program for 1975-76 through 1977-78.

Input	1975-76	1976-77	1977-78

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

## d. Student Support

Each campus maintains facilities for housing and parking which are totally self-supporting. The special revenue funds are Dormitory Revenue and Auxiliary Enterprise Funds.

As in all special fund operations, the parking program is maintained through the collection of revenue for the use of the facilities. Construction is financed by special revenue bond issues which are liquidated from operating revenues.

TABLE XI

	1975-76	1976-77	1977-78

The health services subprogram of student support is concerned with the health and medical needs of students. Accordingly, the campus health centers are part of a total approach to the provision of comprehensive medical and health care.

Basic on-campus health services include: outpatient medical services; X-ray services; a clinical laboratory; physician-prescribed medicines; immunizations; first aid and emergency care; personal health supervision and counseling; health evaluation and review; campus public health service; plus educational, and advisory, administrative, and supplementary services.

Included also within student support are special services such as the operation of bookstores, cafeterias, vending machines, and other retail services which are provided to the student body. These services are tailored to the campus community and provide for student employment as well as contribute to the students' overall campus experience. All such services are provided on a self-supporting basis, at minimal cost to the students and others.

## VI. INSTITUTIONAL SUPPORT

## Program Objectives and Description

The institutional support program consists of those activities within the institution that provide institutionwide support to the other programs for the day-to-day functioning of the organization. Activities within this program maintain the institution's effectiveness and continuity and ensure that the CSUC system's operations are consistent with the public higher education policy as developed by the Legislature, amplified and interpreted by the Governor, administered by the Board of Trustees, and implemented by the chancellor and the campus presidents.

Development of management policies and provisions of communication, personnel, payroll, purchasing and inventory control, accounting, budgeting, legal and other services are provided in this program.

g. Community relations.....	86.2	77.6	77.8	2,410,609	2,705,001	2,903,112

## a. Executive Management

This subprogram consists of all central executive-level activities concerned with the management and long-range planning of the entire system. The trustees assumed responsibility for administration of The California State University and Colleges on July 1, 1961. The Board is responsible for policy determination, coordinated planning, management, administration, and control of the CSUC system. As the chief executive officer of the Board of Trustees, the chancellor, appointed by the Board, is responsible for implementing policies and programs enacted by the trustees, and recommending executive appointments to the trustees.

Campus presidents are appointed by the Board of Trustees based upon the recommendation of the chancellor, and after consultation with the Academic Senate and the administrators of the campus involved. They are given authority and responsibility over all campus matters within the policy framework established by the Legislature, Governor, Board of Trustees and the chancellor.

The trustees' audit staff reports directly to the Board and is responsible for an ongoing independent management audit of the operations of the campuses and the chancellor's office.

Physical planning and development includes programming, planning, direction, and operation of a statewide plan for the development of physical facilities. This includes presenting capital outlay programs; reviewing, approving and executing capital outlay funding to the campuses; developing new approaches for improving physical development and space management; and with other divisions, conducting special studies relating to space requirements.

Budgeting is concerned with the planning, coordination, preparation and review of support budgets. Activities involved in the budgeting process are the preparation of instructions and guidelines for development of the annual support budget for each campus; review and analysis of institution support budget requests; providing counsel and information on budget preparation; and providing program costs and justification data required by interested individuals, agencies, and appropriate review bodies.

The legal services unit advises the trustees, the campuses, and the chancellor and his staff on legal issues and represents them as necessary.

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

The Academic Senate represents the CSUC facilities for all campuses for the purpose of advising the Board of Trustees and other concerned agencies on matters affecting academic policy. Its members are chosen by the full-time faculty on the individual campuses. The 1977-78 budget contains \$386,370 for support.

Institutional research plans, executes and evaluates studies of varying scope and detail to provide an informed and reliable basis for the formulation, implementation and evaluation of educational policies and long-range planning for The California State University and Colleges.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$19,743,934	\$21,170,769	\$21,883,403
Personnel years .....	807.8	801.1	815.4

## b. Financial Operations

The financial operations subprogram includes those central operations related to the fiscal affairs and fiscal control in The California State University and Colleges including financial aid administration.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$12,218,246	\$13,011,225	\$13,982,714
Personnel years .....	740.3	759.2	798.4

## c. General Administrative Services

This subprogram includes the cost of student admissions and records, employee personnel administration and records, administrative data processing and all other central administrative services provided in the institutional support program.

Input	1975-76	1976-77	1977-78
Expenditures .....	19,411,628	21,962,486	22,189,015
Personnel years .....	1,261.7	1,332.9	1,356.6

## d. Logistical Services

Purchasing, inventory, and property control involve preparation of specifications, preliminary negotiation of contracts and leases, preparation of procurement documents, receiving and checking deliveries, preparing stock-received reports, identifying and labeling all equipment, maintaining adequate supply inventories, taking periodic physical inventories, and providing for the maintenance and repair of equipment. Also included is the maintenance and operation of campus utilities and motor vehicles and the environmental health and safety of the staff and students.

In addition, security is provided for each campus, encompassing building and equipment security, crowd control and crime control.

## 1977-78 Program

Input	1975-76	1976-77	1977-78
Expenditure .....	\$26,847,369	\$29,919,070	\$31,400,401
Personnel years .....	1,013.2	1,023.6	1,035.1

## e. Physical Plant Operations

The plant operation and maintenance element includes all activities necessary to maintain the physical facilities of the campuses. The total existing building square footage under custodial care for the system is 24 million square feet. Maintenance of electrical, heating, and plumbing systems, making repairs, painting, grounds maintenance and janitorial services are required for support.

*New buildings containing 179,484 square feet will be occupied in 1977-78 and funding of \$1,041,387 is included in this budget to accommodate new personnel and operating expenses to maintain these additional facilities.*

Input	1975-76	1976-77	1977-78
Expenditures .....	\$62,567,109	\$73,263,843	\$78,014,443
Personnel years .....	3,243.8	3,553.4	3,565.1

## f. Faculty and Staff Services

This program element consists of the budget allotments for overtime and related faculty and staff service items. Identification of these expenditures facilitates budgetary control.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$4,542,271	\$7,273,218	\$5,897,683

## g. Community Relations

The public affairs programs in The California State University and Colleges maintain communication with the public, business, professional, governmental, cultural, alumni and other constituent groups. Excluded from this subprogram are activities which are designed primarily to provide public service to the community.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$2,410,609	\$2,705,001	\$2,903,112
Personnel years .....	86.2	77.6	77.8

# VII. INDEPENDENT OPERATIONS

## Program Objectives and Description

The independent operations program collects all those program elements that benefit students and faculty and independent financing agencies but are not directly related to the objectives of an institution of higher education. Currently, any campus facilities and manpower used to provide specialized services to agencies of government and industry are provided on a fully reimbursed basis.

b. Outside agencies .....	943.4	631.6	638.7	39,926,885	34,872,389	35,567,948

## a. Institutional Operations

Identified are those costs associated with certain projects contracted for and administered through auxiliary organizations of The California State University and Colleges. The expenditures and related reimbursements are either reported by each auxiliary organization or reported as reimbursed activities through the General Fund support budget. Operations like the credit union, college union, and associated student body are included under institutional operations.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$17,113,916	15,389,060	\$16,615,214
Personnel years.....	649.4	557.4	609.5

## b. Outside Agencies

Outside agencies contain those special projects that are controlled or operated by outside agencies but are housed or otherwise supported by the institution. The projects themselves are sponsored and financed by agencies of the federal government, state government, local community, private and public foundations, and business and industry. The objectives of these projects are prescribed by the sponsoring agency and are independent of the educational mission of The California State University and Colleges. However, significant benefits do accrue to the campus community and the instructional program.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$39,926,885	\$34,872,389	\$35,567,948

## SUMMARY

On November 29, 1971, the Governor signed Assembly Bill 123 into law, which created The California State University and Colleges, thereby redesignating the system previously known as the California State Colleges. This legislation provided legal recognition that the California State Colleges has achieved the status of universities in their first decade as a unified system of higher education.

Established as a system in 1960, The California State University and Colleges offers as its primary function bachelor's and master's degrees in the liberal arts and sciences, in applied fields, and in the professions—including the teaching profession. Faculty research is authorized to the extent that it relates to the teaching mission.

The Board of Trustees of the California State University and Colleges was created by Chapter 49, Statutes of 1960, First Extraordinary Session, and on July 1, 1961, took over the powers, duties and functions previously vested in the State Board of Education and the Superintendent of Education relative to the administration of the state colleges. One of the major functions of the Board of Trustees and its administrative staff is the planning of the physical facilities necessary to accommodate students in an orderly manner.

The California State University and College system consists of 19 campuses.

The 1977-78 capital outlay program is designed to correct health and safety deficiencies; for planning including master planning, general studies and preliminary planning, to make existing and funded buildings operable; to correct existing building and other campus deficiencies including the removal of architectural barriers to the physically handicapped and minor construction projects; to complete the balanced campus concept; to provide facilities for enrollment needs and support facilities and plans for projects scheduled for construction in 1978-79; and to provide utility and site development projects to complete the campuses where needs are most critical.

## CURRENT CAPACITY AND PROJECTIONS OF THE NEED FOR ADDITIONAL CAPACITY

The initial step in determining current capacity is to determine the amount of space available in terms of assignable square feet (ASF) for each room. The appropriate space and utilization standards, depending on the type of room, the discipline by which it is used, and the level of instruction for which it is primarily intended, should then be applied to arrive at existing full-time equivalent student (FTE) capacity. Lecture and laboratory FTE capacity are summarized on a campuswide basis in Table I, but the basic unit used to determine FTE capacity in this presentation is the student station rather than ASF. Each room having been categorized by its primary use, e.g., classroom or class laboratory is assigned a student station count based on the judgment of the person categorizing the room. This student station count is then weighted in accordance with the type of room, the level of instruction for which it was designed, and the appropriate utilization standard to derive an FTE capacity for each classroom and classroom laboratory and, in the aggregate, for each campus. Historically, the student station count method results in a lower FTE capacity than using ASF as the basic unit.

Future classroom and class laboratory space requirements are determined by comparing existing FTE capacity with projected FTE enrollments. Needed FTE capacity is translated into assignable square foot requirements in accordance with the Coordinating Council for Higher Education "Space and Utilization Standards" adopted on March 2, 1971 in resolution 402. These standards incorporate Assembly Concurrent Resolution 151 of August 1970 and the interim standards set forth in the 1973 Supplemental Conference Committee Report relating to class laboratory standards and faculty office needs.

The existing and funded FTE capacity in the classrooms and teaching laboratories is shown in Table I as 231,483 FTE students available in 1979-80. These capacities were calculated in accordance with the student station count method referenced above.

Enrollment projections for the system are provided by the Department of Finance and are based upon trend extrapolations of age and sex specific participation rates applied to appropriate age and sex groups in the projected statewide population. The future rates are based upon a five-year historical comparison of actual numbers of students by age and sex in the system with comparable age and sex groups in the estimated total population. These rates are projected by extending historical trends, gradually flattening the projected curves until the rates are constant for each year, reflecting a constant relationship of enrollment to population in each age and sex category. This projection is compared to the results of a student flow model which utilizes projected California public and private twelfth-grade graduates as the driving data series, and which takes into account the following: the number of first-time freshmen attending the California State University and Colleges, the numbers of transfers of class level and institution of origin, and the number of continuing and returning students and their rates of survival by class level.

The chancellor's staff then converts these systemwide projections of enrollments into annual full-time equivalent (FTE) students, based upon the average number of units for which students are enrolled equated to a factor of 15 student credit units per full-time student. This total systemwide projection is then allocated to the individual campuses.

Table II presents the estimated FTE enrollment of students from 1978-79 through 1981-82. Other (earned) FTE (e.g., physical education, military science) have been netted out in this table in order that valid comparisons might be made between projected capacities and enrollments.

The budget, both support and capital outlay, is based on annual full-time equivalent students. Table II provides the basis of comparison between projected enrollments and capacity, where capacity is defined as both existing and funded.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## California State College—Bakersfield

The Trustees of the California State University and Colleges and the Coordinating Council for Higher Education advised the Legislature in 1965 of the need for the establishment of a California State College in Kern County. The college opened in September 1970 in facilities on its permanent campus and is currently master planned for an enrollment of 12,000 FTE students.

### MAJOR PROJECTS

Outdoor physical education facilities II .....	-	-	\$740,000 <sup>Cg</sup>
This development will afford the physical education program with a running track and a baseball field. This project is scheduled for completion in July 1978.			
Utilities 1977 .....	-	-	178,000 <sup>WCG</sup>
This project will provide essential utilities to the Fine Arts Building, and is scheduled for completion in June 1978.			
Initial corporation yard .....	-	-	20,000 <sup>Wg</sup>
A 14,000 GSF modular building complex and service yard scheduled for completion in 1978.			
Initial cafeteria .....	\$496 <sup>Cg</sup> 1,458,600 <sup>Cg</sup> 49,983 <sup>Cg</sup>	\$81,000 <sup>Eg</sup> 101,467 <sup>Cg</sup> 243,898 <sup>Cg</sup> 350,000 <sup>Eg</sup>	- - - -

## California State University—Fullerton

California State University, Fullerton is located on 238 acres in the City of Fullerton with a master planned enrollment of 20,000 FTE students to be contained within the existing site.

The university is within ten miles of 70 percent of the population of Orange County, its main service area.

## MAJOR PROJECTS

Science basement conversion .....		—	—	\$392,000 <sup>WCg</sup>
The Science Basement Conversion will modify approximately 18,000 ASF of vacant space made available by the moving of the Associated Student body offices and lounge activities to their new facility. The modifications will provide permanent General Administration facilities for the Student Services and Financial Aid functions. The conversion includes 15,000 ASF for administrative offices and program spaces, 2,500 ASF of rehabilitated service area, plus a fire corridor and other safety requirements. This project is scheduled for completion in December 1978.

## California State University—Hayward

California State University, Hayward offers courses in occupational and professional subjects, bachelor and master degree programs in various liberal art fields, and an elementary and secondary education credentials program. This university occupied its permanent 343-acre site in the fall of 1963. The current master plan calls for campus development on the existing acreage to accommodate an ultimate enrollment of 18,000 FTE students.

## California State University—Long Beach

California State University, Long Beach was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953 was authorized to offer lower division courses. It is now a multipurpose university offering instruction for undergraduate students and graduate students, through the master's degrees, in the liberal arts and applied science fields and in the professions, including the teaching profession.

In 1951, the university was permanently located on a 322-acre site donated by the City of Long Beach which is adequate to support the master plan of 25,000 FTE students.

## MAJOR PROJECTS

Science building addition .....	\$3,772,860 <sup>Cg</sup>	\$190,235 <sup>Cg</sup>	\$600,000 <sup>Eg</sup>
	102,591 <sup>CEg</sup>	20,296 <sup>CEg</sup>	—

**California State University—Los Angeles**

California State University, Los Angeles established in 1947, offers courses in business, education, fine arts, applied arts, music, social sciences, physical education, natural sciences, engineering and special education. The university moved to its present 165-acre site in 1956 to accommodate the increase in student enrollments, and is master planned for an enrollment of 25,000 FTE students.

**MAJOR PROJECTS**

Site Development 1977/1978 .....	-	\$170,000 <sup>Wg</sup>	\$3,017,000 <sup>Cg</sup>
This project will provide adequate street access improvements to serve the campus from the south and north. It also includes the relocation of utilities, provides walks, minimum street lighting, storm drainage, erosion control, and relocation of approximately 1,000,000 cubic yards of earth by a balance cut and fill. The project is scheduled for completion in October 1979. It is proposed that the funds appropriated will be replaced by moneys received from the sale of land authorized by Chapter 23 and Chapter 1256, Statutes of 1976. (Ventura site).

**California State University—Northridge**

California State University, Northridge became a separate state college July 1, 1958. This university offers degrees at both the bachelor and master levels in business, liberal arts, science and engineering and also offers a credential program in education. The campus occupies about 353 acres, and is currently master planned for an enrollment of 25,000 FTE students.

**MAJOR PROJECTS**

Site Development 1978 .....	-	-	\$29,000 <sup>PWg</sup>
The project will provide for the development of Darby Avenue from Vincennes Street to Halsted Street, Etiwanda Avenue from Vincennes to Halsted, and the east side of Lindley Avenue from Devonshire extending for a distance of 900 feet south. This street development is part of the state's share included in the street agreement between the City of Los Angeles and the state. This project is scheduled for completion in March 1979.

**California State University—Sacramento**

California State University, Sacramento, was established in 1947. The university offers courses leading to bachelor's degrees in business, engineering, government services, laboratory technology, nursing, social service, and teacher education. Master's degree programs are available in business administration, public administration, applied life science, social work, engineering, applied mathematics, education, and psychology. In addition, the university offers preprofessional curriculum preparatory to graduate study in law, medicine, dentistry, and others, and also has an elementary and secondary education credential program. The university is currently master planned for an enrollment of 25,000 FTE students.

## California State College—San Bernardino

California State College, San Bernardino is scheduled to be a fully accredited state college with its programs designed to meet the needs of the service area consisting primarily of San Bernardino and Riverside Counties. The college first opened in the fall of 1965, in its initial complement of facilities, on the permanent site of 430 acres. The campus is currently master planned for an enrollment of 12,000 FTE students.

## MAJOR PROJECTS

Utilities 1977.....		—	—	\$156,000 <sup>WCg</sup>

## San Diego State University

San Diego State University is located on a 271-acre site that will become the population center of metropolitan San Diego. The university offers 66 approved bachelor degree majors, 56 master degree majors, and three joint doctorates. A master plan figure of 25,000 FTE students has been set for the campus.

## MAJOR PROJECTS

Art classroom building.....		-\$254,838 <sup>Cg</sup>	—	\$510,000 <sup>Eg</sup>
		-199,568 <sup>Cg</sup>	\$337,642 <sup>Cg</sup>	—
		481,574 <sup>Cf</sup>	—	—
This is the initial and only phase of equipment. This facility will provide art laboratory capacity for 271 FTE students. The project contains 58,291 assignable square feet and a gross area of 79,500 square feet. This project is scheduled for completion in March 1977.

**San Francisco State University**

San Francisco State University, established in 1899, is a multipurpose co-educational institution which offers a full range of degree and credential programs at the baccalaureate and master's degree level.

The university moved to its present 102-acre site near Lake Merced in 1954. The current master planned enrollment figure is 20,000 FTE.

**MAJOR PROJECTS**

Administration building addition .....		-\$434,208 <sup>Cg</sup>	\$31,332 <sup>Cg</sup>	\$92,000 <sup>Eg</sup>
		607,400 <sup>Cf</sup>	52,200 <sup>Eg</sup>	—
		—	265,800 <sup>Ef</sup>	—
This will provide the second and final phase of equipment for this building. This 68,900 ASF building, together with the old administration building, provides the General Administration space needs for a campus enrollment of approximately 18,000 FTE students. The building is scheduled for completion in October 1976.				
Outdoor physical education facilities .....		—	—	13,000 <sup>PWg</sup>
This project will develop the existing site as an outdoor instructional area and will be completed in July 1979.				
Life science building .....		97,685 <sup>Eg</sup>	—	—

**San Jose State University**

San Jose State University was established in 1857. It is an accredited university which provides both undergraduate and graduate instruction in liberal arts and sciences, applied fields and in the professions. The University is located on a 137-acre site in the City of San Jose and is currently master planned for an enrollment of 25,000 FTE students.

**MAJOR PROJECTS**

Library .....		\$150,000 <sup>Pg</sup>	—	\$376,000 <sup>Wg</sup>
This project, together with the existing library, will provide library space needs for a campus size of 20,200 FTE. The total reader station capacity will be increased to 4,000, and the bound volume capacity will be increased to 808,000 volumes. The building is scoped for an assignable area of 125,265 square feet and a gross area of approximately 179,000. The project is scheduled for completion in September 1980.				
Science 2, II .....		172,380 <sup>Eg</sup>	\$27,620 <sup>Eg</sup>	—
		38,508 <sup>Eg</sup>	423,000 <sup>Eg</sup>	—
Corporation yard .....		—	64,000 <sup>Cg</sup>	500,000 <sup>Cg</sup>
		—	—	570,000 <sup>Cg</sup>
This project will provide on the main campus site approximately 24,000 ASF of permanent Corporation Yard facilities. The present Corporation Yard is located in the central core of the campus. Originally, it was planned to move the Corporation Yard function to an old warehouse building owned by the state, located 1.7 miles south of the main campus. From an economic standpoint, it proves to be more economical to sell the old warehouse (estimated value \$650,000) and build the permanent Corporation Yard facility on the main campus rather than remodel the old warehouse and operate from the remote location. Legislation has been enacted to sell the old warehouse and earmark the proceeds from the sale toward construction of this project. The project is scheduled for completion in September 1978.				
Home economics building .....		34,868 <sup>Eg</sup>	38,132 <sup>Eg</sup>	—

## California Polytechnic State University—San Luis Obispo

California Polytechnic State University, San Luis Obispo, provides accredited educational programs with emphasis on the applied fields of agriculture, engineering, business, and home economics, together with the closely related supporting fields of physical sciences, natural sciences, and mathematics. A program of required general education courses combines with the college's occupationally centered instruction to prepare graduates for citizenship, leadership, and constructive community living.

The university is located just outside San Luis Obispo at the foot of the Santa Lucia mountain range, 12 miles from the Pacific Ocean. The campus has been gradually augmented to its present 5,099 acres of which 374 acres compose the main campus and the balance is agricultural land. This campus is currently master planned for an enrollment of 15,000 FTE students.

## California State Polytechnic University—Pomona

California State Polytechnic University, Pomona provides accredited educational programs at the university level in agriculture, arts, business, engineering, science, and in the preparation of elementary and secondary teachers.

The Pomona campus, originally founded by W. W. Kellogg as an Arabian horse ranch in 1925, was given to the State of California in 1949 for use by the California State Polytechnic College. Academic instruction began on the 1,098-acre campus in 1956, including 619 acres for agriculture. A master plan to accommodate 20,000 FTE students has been approved.

## MAJOR PROJECTS

Science building .....	\$472,581 <sup>Eg</sup>	\$27,419 <sup>Eg</sup>	\$354,000 <sup>Eg</sup>

## CALIFORNIA MARITIME ACADEMY

The California Maritime Academy was established in 1929 to educate officers of the United States Merchant Marine. Subsequently the program has been broadened, but it is still directed toward providing well-trained, college-educated officers for the maritime industry.

The four-year program of the Academy, which the student attends for 11 months of each year, includes an annual three-month dockside exercise and cruise aboard the training ship, Golden Bear. The students operate the ship under the supervision of the licensed merchant marine officers who comprise the majority of the faculty. These cruises enable midshipmen to meet minimum U. S. Coast Guard regulations for time required at sea, and actual ship handling is learned under operating conditions.

The California Maritime Academy is under the direction of a Board of Governors appointed by the Governor, and the board adopted the following statement as the goal of the Academy:

"... To provide instruction in the nautical sciences, marine engineering and related fields, including all those necessary to provide the highest quality officer for the American Merchant Marine and California industries and licensing therein."

Inherent in the goal of the Academy are the following objectives:

1. To educate each midshipman in an accredited college program in nautical science, marine engineering and related fields.
2. To train each midshipman in the skills and knowledge essential to licensing in the American Merchant Marine.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Instruction .....	\$736,006	\$812,501	\$916,378
II. Academic support .....	455,337	486,022	493,779
III. Student services .....	584,545	860,910	1,031,697
IV. Institutional support .....	997,248	1,102,445	1,059,165
TOTALS, PROGRAMS .....	\$2,773,136	\$3,261,878	\$3,501,019
Reimbursements .....	-622,394	-801,904	-984,578
NET TOTALS, PROGRAMS .....	\$2,150,742	\$2,459,974	\$2,516,441
General Fund .....	1,798,547	2,072,056	2,113,035
Federal funds <sup>1</sup> .....	352,195	387,918	403,406
Personnel years .....	104	110.7	121.2
Enrollment .....	349	414	468
Graduates .....	99	9 <sup>1</sup>	108
Gross cost per student .....	\$7,946	\$7,880	\$7,480
General Fund cost per student .....	\$5,153	\$5,005	\$4,515
Annual student tuition and medical fees <sup>2</sup> .....	\$480	\$480	\$480
Annual student load (semester units) <sup>3</sup> .....	45	45	45

<sup>1</sup> Interim class, transition to four-year program.

<sup>2</sup> Annual cost of tuition and fees for three full semesters. Room and board costs are \$1,650 for the 11-month, three-semester, school year; out-of-state tuition costs are \$930 per year; student activity fees are \$50 per year.

<sup>3</sup> This is the average load for the school year (three semesters).

### I. INSTRUCTION

#### Program Objectives and Description

The instruction program provides general education classes and specialized courses to prepare students for careers as licensed officers in the merchant marine and the maritime industry. The curriculum provides for specialization in either nautical industrial technology or marine engineering technology. A full list of options in related fields will be available in 1977-78 covering: Marine Transportation, Marine Business Management, Maritime Specialties, Instrumentation and Automation, Ocean Technology, Ship Construction Technology and Nuclear Technology. Satisfactory completion of the academic program and successful performance on the U.S. Coast Guard license examination enables a student to graduate from the four-year program with a Bachelor of Science degree in one of these specialties. Graduates are eligible for reserve commissions in the U.S. Navy or U.S. Coast Guard and, after passing U.S. Coast Guard examinations, are licensed as third mates or third assistant engineers in the merchant marine.

The Academy has been granted "candidate" status for academic accreditation by the Western Association of Schools and Colleges and "candidate" status for professional accreditation by the Engineers' Council for Professional Development and the National Association of Industrial Technology. A combined final accreditation review was conducted on October 13-15, 1976. *Three additional instructors are proposed for 1977-78 to meet the needs of expanding enrollment.*

b. Adult maritime education .....	1.8	2	2	42,000	55,677	70,486

#### a. Undergraduate Education

Undergraduate Education is described in the program objective and description above.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	28.8	32.3	35.3	\$694,006	\$756,824	\$845,892

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## CALIFORNIA MARITIME ACADEMY—Continued

## b. Adult Maritime Education

The Adult Maritime Education program provides a service to the members of the maritime industry and related businesses. Vocational courses are provided in specialized subjects not available in private or community colleges. Support for this program is generated mainly through fees paid by enrollees and available federal funds (approximately 90% for 1977-78). These sources of funds will eventually eliminate the need for any General Fund commitment for this program.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	1.8	2	2	\$42,000	\$55,677	\$70,486

## II. ACADEMIC SUPPORT

## Program Objectives and Description

To provide professional admissions and registration services in support of the Academy's instructional program. Support services also include operation of the library and routine maintenance of the training ship in port and at sea. A staff of skilled technical personnel instruct and assist midshipmen in performing the tasks required to operate and maintain the ship.

## Authority

Education Code Sections 70000, 70020-70026, 70033, 70050-70065.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	14.1	15	15	\$455,337	\$486,022	\$493,779
<i>General Fund</i> .....				332,396	326,469	334,226
<i>Federal funds</i> <sup>1</sup> .....				75,000	75,000	75,000
<i>Reimbursements</i> .....				47,941	84,553	84,553

## Program Elements

a. Library.....	2.8	3	3	\$72,439	\$72,394	\$74,401
b. Ship operations.....	11.3	12	12	\$382,898	\$413,628	\$419,378

## a. Library

The library develops, obtains and makes available to students and faculty the bibliographical and informational resources necessary to carry out the primary function of instruction. The library is being expanded to meet the needs of increased enrollment and a broadened curriculum.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	2.8	3	3	\$72,439	\$72,394	\$74,401

## b. Ship Operations

Ship operations provides the basis for practical seamanship, navigation and marine engineering instruction to all students. This includes daily operation and maintenance of the training ship, waterfront facilities, and all assigned small craft. An annual training-at-sea trimester is normally conducted in the months of January, February and March to provide the practical shipboard training necessary to meet Coast Guard licensing requirements. Annual shipyard overhaul and repair of the vessel is paid by the U.S. Maritime Administration (MARAD) and is not included in this budget.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	11.3	12	12	\$382,898	\$413,628	\$419,378

## III. STUDENT SERVICES

## Program Objectives and Description

Included in this program are financial aid, health support, housing, and food. These are needed to support students who are required to live on campus. The Academy's daily routine provides residence facilities and meals for the midshipmen on nearly a year-round basis. This continuing requirement is interrupted four times during the year: Christmas recess (two weeks); sea-training trimester (12 weeks); spring recess (one week); and summer recess (three weeks). During 1977-78, third-class midshipmen will remain on campus during the sea training trimester to receive additional academic instruction. *An admissions officer, a placement officer, a student affairs officer and two cooks are proposed for 1977-78 due to increased workload resulting from the Academy's shift to a four-year institution with an increase in enrollment.*

## Authority

Education Code Sections 70025, 70026.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

b. Student support (housing and food).....	17.7	20	22	390,136	553,156	619,179
c. Health service.....	1	1	1	19,195	20,230	20,230

## a. Financial Aid

Financial Aid includes financial counseling services, analyses of financial need, and administration, disbursement and collection of scholarships and loans to students.

## CALIFORNIA MARITIME ACADEMY—Continued

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	1	1	4	\$175,214	\$287,524	\$392,288

## b. Student Support

This program element provides professional guidance and counseling services, leadership training and practical management experience, food services for year-round operation for all students.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	17.7	20	22	\$390,136	\$553,156	\$619,179

## c. Health Service

This program element provides dispensary-type, outpatient medical services for all students. Costs are offset by student fees.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	1	1	1	\$19,195	\$20,230	\$20,230

## IV. INSTITUTIONAL SUPPORT

## Program Objectives and Description

The institution requires executive management to direct the activities of the various departments. The administrative staff and plant operation personnel provide the necessary ancillary services in support of the training program provided for midshipmen. The 67-acre campus contains three classroom buildings, residence hall, dining hall, gymnasium, seamanship building, library and administration building, which require continuous maintenance and upkeep. In addition, the following facilities will become operational late in 1976-77: new residence hall, faculty office building, and an auditorium/lecture hall. *A supervising janitor and 1.5 janitors are proposed for 1977-78.*

# CALIFORNIA MARITIME ACADEMY—Capital Outlay

## STATE BUILDING PROGRAM EXPENDITURES

Actual  
1975-76Estimated  
1976-77Proposed  
1977-78

The California Maritime Academy was established in 1929 and is located on 67 acres adjacent to the north end of the Carquinez Bridge in Vallejo. In 1974, the Board of Governors developed an Academic Master Plan for the conversion to a four-year curriculum and achievement of full academic accreditation. Implementation of the Academic Plan required new physical facilities. A physical development plan was adopted by the Board of Governors and the Legislature appropriated \$5.7 million in the 1975-76 fiscal year to complete the most critical portion of the capital improvement program. The projects are under construction and are scheduled for occupancy between June and September 1977. The construction program proposed for 1977-78 consists of six major projects; corporation yard phase II; site development—roads, walks, parking and area lighting; welding laboratory facilities; addition and alteration to kitchen and dining area; repairs to wharf and boathouse; and marine science laboratory alterations. Also included are two minor projects totaling \$77,400 to correct deficiencies and improve the physical plant.

## MAJOR PROJECTS

Residence halls .....	\$2,894,834	\$330,000 Cg	—
Electrical distribution system .....	373,050	6,000 Cg	—
Faculty office addition .....	401,025	11,422 Cg	—
Administration addition .....	125,300	—	—
Physical education facility .....	288,610	—	—
Commissary remodel .....	50,100	—	—
Library addition .....	208,850	250 Cg	—
Corporation yard, phase I .....	105,700	—	—
Auditorium-lecture hall .....	762,150	850 Cg	—
Mechanical utilities system .....	14,700	208,000 WCg	—
Corporation yard, phase II .....	—	15,000 PWg	\$237,000 CEg
This project will provide 4500 square feet of space to house multi-trade, paint shop, groundskeeper shop, office space for building and grounds, locker, toilet and shower facilities for the maintenance department.			
Site development—roads, walks, area and street lighting .....	2,920	4,480 Pg	53,000 PWg
This project will provide perimeter road for vehicular traffic, walks in critical areas, reasonable area and street lighting for night activities and campus security and parking for 250 spaces.			
Welding laboratory facility .....	—	6,500 Pg	227,800 WCEg
This project will provide 3800 ASF of space to house arc welding, gas welding, metal shop, bathrooms and shower facilities, tool room and storage area.			
Addition and alterations to kitchen and dining room .....	—	—	32,500 PWg
This project will modify the existing storage area and enlarge the refrigerated storage capacity, add central air handling system, and new lighting in kitchen area.			
Wharf and boathouse .....	—	—	204,150 WCg
This project provides for preservation and repair of the pilings and dolphins to extend the life of the wharf and boathouse.			
Marine science laboratory alterations .....	—	—	8,700 Pg
This project will modify existing space to meet the needs of the radar laboratory facilities.			
Less unallocated reduction .....	—	—99,550	—
Totals, Major Projects .....	\$5,227,239	\$482,952	\$763,150

## MINOR PROJECTS

Alterations and improvements of projects of \$100,000 or less .....	*	*	\$77,400

# BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

The objectives of the Board of Governors of the California Community Colleges are:

1. To give direction, coordination, planning and leadership to California's Community Colleges in order to achieve systematic development toward their fullest potential.
2. To promote quality education in community colleges.
3. To improve district and campus programs through informational and technical services on a statewide basis, while recognizing the community oriented aspect of California's network of 104 community colleges.
4. To seek adequate financial support while ensuring the most prudent use of public funds.

The Board of Governors of the California Community Colleges has 15 members appointed to four-year terms by the Governor with the advice and consent of the Senate. The Board's headquarters is in Sacramento, headed by a chancellor appointed by the Board. The agency operates with administrative, professional and clerical staff and has small regional offices working under its occupational education unit in Los Angeles, Oakland and Sacramento.

The Board was established by Chapter 1549, Statutes of 1967, to provide statewide leadership to the public community college segment of California higher education.

## SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Executive.....	\$574,411	\$676,729	\$722,017
II. Programs and operations.....	10,388,732	14,815,671	17,388,585
III. Community college apportionments.....	405,393,623	501,876,256	540,755,115
<b>TOTALS, PROGRAMS</b> .....	<b>\$416,356,766</b>	<b>\$517,368,656</b>	<b>\$558,865,717</b>
Reimbursements.....	-1,224,065	-1,339,253	-1,364,991

Personnel years.....	123	128.3	128.3

## SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
I.	Increase funding for management information system .....	\$77,700
II.	Maintain 1976-77 number of entering EOPS students served and provide 6% inflation adjustment .....	2,499,130
II.	Staff increase to review recommendations of Regional Adult and Vocational Education Councils (Chapter 1269/75) .....	160,502
III.	Financial legislation (Chapter 323/76 and Chapter 275/76) .....	56,328,781

## I. EXECUTIVE

### Program Objectives and Description

The executive unit carries out the decisions of the Board of Governors, represents the interest of all California Community Colleges, and informs state and local government as well as the public about the status and goals of statewide planning.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	19.1	19.7	19.7	\$574,411	\$676,729	\$644,317
Workload and administrative adjustments .....	—	—	—	—	—	77,700
<b>Totals, Executive (General Fund)</b> .....	<b>19.1</b>	<b>19.7</b>	<b>19.7</b>	<b>\$574,411</b>	<b>\$676,729</b>	<b>\$722,017</b>

### Program Elements

a. Chancellor's office.....	6.3	5.9	5.9	\$177,604	\$182,066	\$184,179
b. Board of Governors .....	—	—	—	35,683	37,283	39,648
c. Analytical studies .....	7.4	7.8	7.8	197,311	269,299	304,983
d. Government, district and public affairs .....	5.4	6	6	163,813	188,081	193,207

### a. Chancellor's Office

The chancellor represents California Community Colleges in nationwide communications of higher education, reports to the Board of Governors and directs programs and staff operations.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	6.3	5.9	5.9	\$177,604	\$182,066	\$184,179

### b. Board of Governors

The board establishes policy direction for the Chancellor and his staff, the 70 Community College districts and the 104 colleges they maintain. The board's primary headquarters is in Sacramento, but its meetings are held on a rotating schedule at other locations in the State.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	—	—	—	\$35,683	\$37,283	\$39,648

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

## c. Analytical Studies

The major purpose of this office is to collect and analyze data, to develop a central information system necessary for fiscal and program decisions, and to coordinate the development of a statewide educational plan. To provide for further development of the management information system, \$77,700 is proposed in the budget year.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	7.4	7.8	7.8	\$197,311	\$269,299	\$304,983

## d. Government, District and Public Affairs

This program maintains relationships with state and local governments, monitors legislative orders and publishes public information.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	5.4	6	6	\$163,813	\$188,081	\$193,207

## II. PROGRAMS AND OPERATIONS

## Program Objectives and Description

The Programs and Operations function concerns the development, implementation, and coordination of policies and procedures necessary to fulfill the goals established by the Board of Governors.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	103.9	101.1	101.1	\$10,388,732	\$14,576,813	\$14,650,099

e. (1) Student personnel services .....	7	7.8	7.8	209,001	249,477	260,496
e. (2) Extended opportunity programs and services (EOPS) .....	—	—	—	7,654,879	11,484,027	13,983,157
f. Occupational education.....	33.8	35	35	1,028,732	1,218,053	1,239,613
g. Regional adult and vocational education councils .....	1.5	5	5	46,998	161,701	160,502
h. Legislative mandates .....	—	—	—	—	5,000	—

## a. Administrative and Fiscal Services

This program element provides all necessary management and staff services for the chancellor's office and administers community college basic aid and equalization apportionments. Local plans are reviewed, coordinated and recommended to the Board of Governors. In addition, district claims for reimbursement from the Community College Construction Program Fund are reviewed and processed for payment.

Chapter 940, Statutes of 1973, transferred the responsibility for community college apportionments from the State Department of Education to the Board of Governors of the California Community Colleges.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78 <sup>1</sup>
Expenditures.....	23.5	23.8	23.8	\$511,988	\$561,090	\$573,720

## b. Credentials

Administrators and teachers in California Community Colleges are required to obtain teaching credentials. The credentials office administers this program including application review, processing, revoking and reinstatement of credentials. A fee of \$15 is collected per application. The fees received are to be used only to reimburse the operating costs of this element. The Chancellor's Office is recommending that the Board of Governors sponsor legislation changing the requirements of checking fingerprint identification and information records. This would permit the redirection of funds and result in a reduction in both clerical and analyst backlog.

Output	1975-76	1976-77	1977-78
Applications received.....	26,191	31,314	32,429
Clerical backlog at beginning of year .....	5,609	6,177	15,491
Analyst backlog at beginning of year .....	5,642	4,016	10,330
Applications processed by clerks .....	25,623	22,000	22,000
Applications processed by analysts .....	27,817	25,000	25,000
Clerical backlog at end of year.....	6,177	15,491	25,920
Analyst backlog at end of year.....	4,016	10,330	17,759

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	18.7	16	16	\$392,861	\$469,703	\$486,425

## BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

## c. Academic Affairs

This element concerns the approval of educational master plans and programs for community colleges and the provision of guidance to colleges in developing and implementing quality instructional programs to meet the wide range of needs of students and communities throughout the state. Academic affairs also coordinates with other sectors of California public higher education in the administration and transfer of community college students into four-year institutions, reviews and recommends on adult classes eligible for state apportionment, devises improved methods of instruction, and assists regional and state level planning by coordinating continuing education and special education programs. *In the current year, one professional and one half-time clerical positions were added administratively to cover workload increases authorized by Chapter 323, Statutes of 1976, and these positions are proposed for continuation in 1977-78.*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	8.5	10.4	10.4	\$237,215	\$328,963	\$340,519

## d. Facilities Planning

Facilities Planning maintains and annually updates five-year capital outlay programs for the 104 community colleges and 70 districts. Most of the work is mandated by law, with the facilities planning section reviewing and assisting in programming and planning construction projects.

This section also prepares annual capital outlay budgets for presentation to the Department of Finance and the Legislature, approves projects for state funding, reviews new campus site proposals, and annually updates facilities inventories for all community colleges.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	10.9	10.6	10.6	\$307,058	\$337,657	\$344,153

## e. (1) Student Personnel Services

Student Personnel Services has two major functions: to plan and direct staff efforts in developing and administering student personnel programs; and to supervise the use of state funds allocated to community colleges under Extended Opportunity Programs and Services (EOPS). The section evaluates EOPS project applications from districts and recommends on their approval to the Board of Governors, coordinates with districts and campuses on administration of EOPS, and reviews college EOPS three-year plans which are updated annually, as required by the Administrative Code.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
(1) Expenditures.....	7	7.8	7.8	\$209,001	\$249,477	\$260,496

## e. (2) Extended Opportunity Programs and Services

California Community Colleges, because of their open-door policy and their geographic accessibility, draw a large proportion of students who need the special services of programs for the disadvantaged. These include community college EOPS and college opportunity grants, federally-funded vocational education programs, work-study programs, educational opportunity grants, and locally-funded district programs for disadvantaged students.

Even though poverty is the outstanding problem of most disadvantaged students, grants alone are not the only solution. Campus-oriented services to students disadvantaged because of language, social and cultural backgrounds are also important.

In order to meet these ends, the objectives of EOPS are:

1. To identify disadvantaged community college students and, with necessary financial aid and services, to help them acquire the training and education they need to succeed in college and later as productive employees.
2. To help disadvantaged students reach full potential and build persistence and grade-point averages sufficiently to enable them to compete equally with others for jobs or transfer to four-year institutions.
3. To add to leadership skills of campus EOPS staff through in-service training.
4. To assess requirements for state funding of campus EOPS and recommend funding levels, to process allocations and monitor programs for maximum efficiency.

5. To assist campuses in coordinating their EOPS with federally-funded programs for disadvantaged students, with special emphasis on occupational education, to aid campuses in developing goals for EOPS projects, to evaluate strengths and weaknesses of such programs, to recommend on regulations, and to provide EOPS data to the Board of Governors, the Administration and Legislature.

*In 1976-77, a significant increase in program funding was provided which reflects the Governor's concern for increasing services to disadvantaged students. This resulted in a 50 percent increase in the number of students served in the current year. In order to serve the same number of entering students in 1977-78 as in 1976-77, \$2,125,945 in additional funding is proposed in the budget year. In addition for 1977-78, in recognition of the effects of inflation, the funds which go to students (dollars for financial aid) are proposed to be increased \$373,185 which will result in a change in the average grant from \$228 to \$242 (6%).*

Input	1975-76	1976-77	1977-78
(2) EOPS expenditures.....	\$7,654,879	\$11,484,027	\$13,983,157

## EOPS Budget Projections

	1975-76	1976-77	1977-78
Total number of students .....	27,149	40,724	48,679
Total EOPS dollars .....	\$7,654,879	\$11,484,027	\$13,983,157

Percent of total funds .....	0.7	0.6	0.6

## BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—Continued

## f. Occupational Education

The functions of the Occupational Education Program are to plan, coordinate and service occupational and technical programs in the colleges. Under state mandate the division also approves district and statewide plans and programs for community colleges. The staff assists districts with in-service training, maintains liaison with business and industry on training needed by job applicants coming from community colleges, produces publications dealing with curriculum material and conducts evaluations for improving occupational programs.

This division also recommends on allocation of federal funds to districts on an entitlement basis and provides services to representatives of the Board of Governors sitting on the Joint Committee on Vocational Education. This program is conducted in accordance with an interagency agreement with the State Department of Education, the prime contractor and recipient of Federal Vocational Education Act funds. *On July 1, 1976, one position was transferred administratively from the Department of Education to this program, and this position is proposed for continuation in 1977-78.*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	33.8	35	35	\$1,028,732	\$1,218,053	\$1,239,613

## g. Regional Adult and Vocational Education Councils

Chapter 1269, Statutes of 1975 (AB 1821), appropriated \$1,850,000 for 1975-76 and 1976-77 to support Regional Adult and Vocational Education Councils. Included in this appropriation were funds for administrative activities in the State Department of Education and the chancellor's office of the community colleges, \$375,000 and \$225,000 respectively. The primary responsibility of the regional councils will be to review and make recommendations on vocational and adult continuing education courses and to prevent unnecessary duplication of such courses within a region. The chancellor's office has been assisting in the formation of the councils. *Five positions have been established administratively in the chancellor's office and are proposed for continuation in 1977-78 to monitor and evaluate the activities and recommendations of the councils.*

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	1.5	5	5	\$46,998	\$161,701	\$160,502

## h. Legislative Mandates

Chapter 1252, Statutes of 1976, exempts retroactively to January 1, 1976, certain nonresident students from tuition fees. The appropriation of \$5,000 is to reimburse school districts for refunds made to these students.

Input	1975-76	1976-77	1977-78
Expenditures .....	—	\$5,000	—

## III. COMMUNITY COLLEGE APPORTIONMENTS

## Apportionments of State Aid

Enactment of SB 677 (Chapter 940, Statutes of 1973) transferred to the Board of Governors of the California Community Colleges, the responsibility for both the administration and apportionment of state aid to community college districts.

The program includes the preparation of reports and the collection of a wide range of data from California Community Colleges. The distribution of community college aid for 1975-76 is shown on page 903 in Figure 1.

The state participates with local jurisdictions in financing the operation of community colleges through several state subventions. The largest of these is made through transfers of funds from the General Fund to Section B of the State School Fund for apportionment to community college districts.

The major categories of the apportionment system are: (1) basic and equalization aid, and (2) special educational services. The apportionment of funds is based upon units of average daily attendance (ADA) of students in each community college district. Enactment of SB 1641 (Chapter 323, Statutes of 1976) replaced the State Foundation Program method of apportionment calculation which guaranteed each ADA a specified level of support for each of two types of students (regular and defined adult) with a procedure based on the prior year's statewide average State Aid Rate per ADA adjusted for inflation by 6 percent and equalized for relative wealth by the ratio of each district's assessed valuation per ADA divided into the statewide average wealth per ADA. Each ADA is still guaranteed an amount of state aid; however local districts are on tax rate control rather than revenue limits.

Other features of SB 1641 provide for a single student category for funding purposes by eliminating defined adults, a revised small district formula, and an additional \$4,000,000 of state aid for districts with a Demographic Factor greater than 1.0.

Enactment of AB 77 (Chapter 275, Statutes of 1976) reformed the funding procedures for handicapped students in community colleges and makes possible fuller utilization of state aid provided by statute.

As a result of Chapter 323, Statutes of 1976, Basic and Equalization Aid apportionments will increase by \$76 million in 1976-77 and by \$56 million in 1977-78.

## ADA by Fiscal Year

	1975-76		1976-77	1977-78
	Capped <sup>1</sup>	Reported		
Total ADA .....	722,326	768,902	793,600	824,100

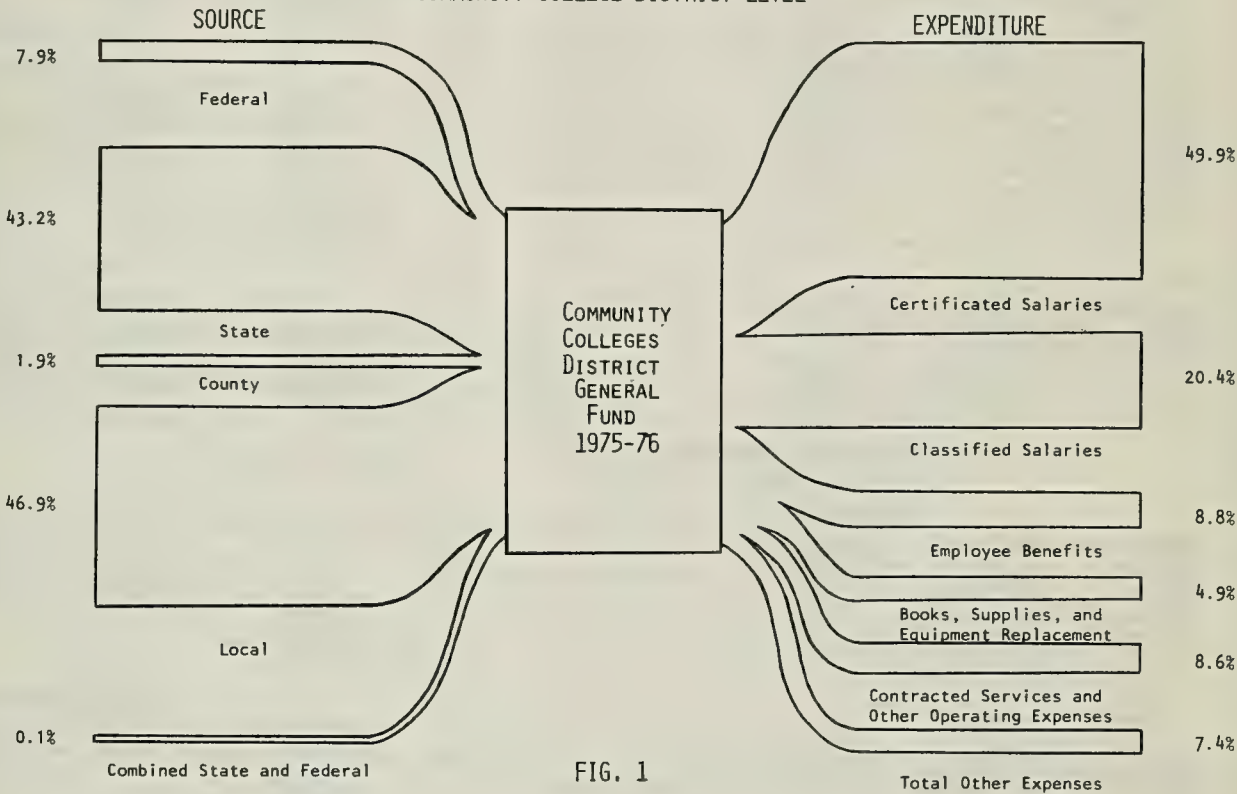

<sup>1</sup> Capped second principal apportionment ADA, adjusted for provisions of Item 350.1(d) of 1975-76 Budget Act.

## GENERAL ANALYSIS

There are 104 colleges in operation, administered by 70 separate governing districts, serving the entire State of California from Eureka and Weed in the north to Chula Vista and Imperial in the south.

California public community colleges by law have three principal purposes: (1) offering transfer courses; (2) providing vocational training; and (3) providing general education. Transfer courses are similar and equivalent to the standard lower division (freshman and sophomore) offerings of the public and private universities and colleges. In addition, each community college attempts to satisfy the needs particular to each community by offering vocational-technical programs.

In recognition of the continuing need for state support of the Community College Capital Outlay Programs, the Legislature enacted and the electorate approved State General Obligation Bond issues of \$50 million in 1965, \$65 million in 1968, and \$160 million in 1972. Because the bond funds that traditionally provided financing are exhausted and a proposed bond issue was defeated by the people, the 1975-76 and 1976-77 Budget Acts provided appropriations totaling \$62,164,700 from the Capital Outlay Fund for Public Higher Education.

Included in the 1977-78 budget are 27 districts with a proposed capital outlay program of \$51,917,588. Of this amount, a state appropriation of \$27,028,600 is to be provided from the Capital Outlay Fund for Public Higher Education. The remaining funds in the amount of \$24,888,988 are from district matching funds.

The following constitutes a breakdown of the anticipated \$27,028,600 of State matching funds for 65 projects. The types of projects included in the 1977-78 Capital Outlay Program are as follows:

## Site Development, Utilities and Physical Plant

Site Development projects totaling \$376,100, including off-site development, utilities, and physical plant facilities, are included for 2 districts.

## General Academic and Lecture Facilities

General academic and lecture facility projects totaling \$9,129,200 in 11 districts.

## Science and Vocational Technology Facilities

Science and vocational technology programs have been expanding significantly in all districts. Included in this proposed program are additional facilities for 16 districts, totaling \$12,278,800.

## Libraries and Resource Materials Centers

The funds for the construction of new, and the expansion of existing library and resource material centers in 6 districts total \$2,430,800.

## Remodeling Projects

Remodeling projects totaling \$2,813,700, are included for 14 districts.

STATE BUILDING PROGRAM EXPENDITURES		Actual 1975-76	Estimated 1976-77	Proposed 1977-78
<b>MAJOR PROJECTS</b>				
Allan Hancock Joint Community College District .....		\$952,400 <sup>g</sup>	\$200,200 <sup>g</sup>	—
Barstow Community College District .....		—	—	\$154,600 <sup>g</sup>
Barstow College:				
Auto service laboratory .....		—	—	154,600 <sup>gWCE</sup>
This project will provide a teaching laboratory and office for auto mechanics.				
The building will contain 5774 assignable square feet.				
Butte Community College District .....		52,625 <sup>a</sup>	—	—
Cabrillo Community College District .....		1,977,866 <sup>g</sup>	356,509 <sup>g</sup>	1,047,700 <sup>g</sup>
		66,100 <sup>a</sup>		
Cabrillo College:				
Music facilities .....		—	—	1,047,700 <sup>gWC</sup>
This project will provide classrooms, offices, teaching laboratories, and practice				
rooms for music. The building will contain 19,320 assignable square feet.				
Cerritos Community College District .....		—	1,464,100 <sup>g</sup>	54,900 <sup>g</sup>
Cerritos College:				
Remodel old paramedical areas .....		—	—	54,900 <sup>gE</sup>
This request will provide the initial and only phase of equipment for remodeled				
classrooms and laboratories, which were moved to the new paramedical				
building, into teaching laboratories for art, child development, home eco-				
nomics, communications, electronics, and photography. The remodeled				
area contains 12,655 assignable square feet.				
Chaffey Community College District .....		247,300 <sup>g</sup>	1,967,700 <sup>g</sup>	190,300 <sup>g</sup>
		—81,133 <sup>a</sup>	81,133 <sup>a</sup>	
Chaffey College:				
Vocational education building .....		—	—	190,300 <sup>gE</sup>
This request will provide the initial and only phase of equipment for classrooms,				
offices, and teaching laboratories for drafting, graphic arts, photography,				
television, and police and fire science. The building contains 19,211 assigna-				
ble square feet.				
Citrus Community College District .....		70,900 <sup>a</sup>	—	—
Coast Community College District .....		113,000 <sup>g</sup>	5,066,200 <sup>g</sup>	2,830,700 <sup>g</sup>
		47,700 <sup>a</sup>	26,200 <sup>a</sup>	—
Golden West College:				
Educational unit #1 .....		—	—	176,400 <sup>gE</sup>
This request will provide the initial and only phase of equipment for classrooms,				
offices, and teaching laboratories for art, photography, and police science.				
The building contains 22,568 assignable square feet.				
Health science addition #1 .....		—	—	55,000 <sup>gE</sup>
This request will provide the initial and only phase of equipment for classrooms,				
offices, and teaching laboratories for nursing. The building contains 7854				
assignable square feet.				
Technology addition #2 .....		—	—	884,400 <sup>gWC</sup>
This project will provide a classroom, offices, and teaching laboratories for auto				
mechanics, auto body and fender, and manufacturing technology. The				
building will contain 20,697 assignable square feet.				
Educational unit #2A .....		—	—	1,449,500 <sup>gWC</sup>
This project will provide classrooms, offices, and teaching laboratories for social				
sciences and includes two one hundred and forty seat lecture halls. The				
building will contain 16,960 assignable square feet.				
Orange Coast College:				
Business educational addition .....		—	—	45,700 <sup>gE</sup>
This request will provide the initial and only phase of equipment for teaching				
laboratories and offices for business management and marketing and in-				
cludes 1,648 assignable square feet of remodeling in the existing building.				
The addition contains 4,730 assignable square feet.				
Chemistry building .....		—	—	219,700 <sup>gE</sup>
This request will provide the initial and only phase of equipment for classrooms,				
offices, and teaching laboratories for chemistry. The building contains 21,-				
790 assignable square feet.				
Compton Community College District .....		—	—	51,700 <sup>g</sup>
Compton College:				
Remodel classrooms .....		—	—	51,700 <sup>gWC</sup>
This project will provide remodeling of existing classrooms into a study skills				
center. The remodeling will consist of 3,722 assignable square feet.

Lassen Community College District .....		66,850 <sup>g</sup> -5,178 <sup>a</sup>	3,191,250 <sup>g</sup>	54,500 <sup>g</sup>
Lassen College:				
Remodel old science laboratories .....		-	-	54,500 <sup>gE</sup>
This request will provide the initial and only phase of equipment for the conversion of science laboratories in a relocatable building to permanent teaching laboratories for construction trades and small engine repair. The remodeled area contains 3,406 assignable square feet.				
Los Angeles Community College District.....		89,400 <sup>g</sup> 246,516 <sup>a</sup>	1,125,100 <sup>g</sup>	925,500 <sup>g</sup>
East Los Angeles College:				
Vocational building .....		-	-	67,800 <sup>gW</sup>
This project will provide classrooms, offices, and teaching laboratories for police science, auto mechanics, commercial art, data processing, electronics, engineering, journalism, photography, business administration, and radio broadcasting. The building will contain 57,528 assignable square feet.				
Los Angeles City College:				
Fire and safety remodel.....		-	-	248,600 <sup>gWC</sup>
This project will provide the remodeling of nine buildings to comply with the Uniform Building Code and California Administrative Code Title 19, Public Safety. It will consist of new fire sprinkler systems, one-hour rated doors, fusible link fire damper louvers, emergency exit lighting systems, and related repairs and patching.				
Los Angeles Harbor College:				
Nurses training building .....		-	-	323,600 <sup>gC</sup>
This project will provide classrooms, offices, teaching laboratories, and support areas for nursing. The building will contain 14,871 assignable square feet.				
Los Angeles Pierce College:				
Library building .....		-	-	285,500 <sup>gWC</sup>
This project will provide additional general library space including study, stack, and service areas. The addition will contain 13,008 assignable square feet.				
Los Rios Community College District .....		-528,630 <sup>a</sup>	-	80,100 <sup>g</sup>
Cosumnes River College:				
Conversion of business to science.....		-	-	80,100 <sup>gCE</sup>
This project will provide conversion of two temporary business laboratories into biology and chemistry laboratories. The conversion will provide 2,475 assignable square feet.				
Marin Community College District .....		201,400 <sup>g</sup> 219,638 <sup>a</sup>	-	614,600 <sup>g</sup>
College of Marin:				
Landscape management facility .....		-	-	134,900 <sup>gWCE</sup>
This project will provide a greenhouse, lath house, and head house for ornamental horticulture. The buildings will contain 4,255 assignable square feet.				
Removal of architectural barriers.....		-	-	69,900 <sup>gWC</sup>
This project will provide an elevator and connecting walkways between two upper levels of the art facility, stair lifts in the fine arts facility, an exterior ramp to eleven classrooms and laboratories.				
Indian Valley Colleges:				
Science technology classroom and laboratory addition .....		-	-	409,800 <sup>gWCE</sup>
This project will provide classrooms, and teaching laboratories for physical sciences and auto body shop. The addition will contain 8,452 assignable square feet.

Palomar College:			
Art and music building addition .....	-	-	431,700 <sup>gWC</sup>
This project will provide teaching laboratories for art and music, and music practice rooms. The addition will contain 7,224 assignable square feet.			
Industrial technology building .....	-	-	258,400 <sup>gE</sup>
This request will provide the initial and only phase of equipment for offices and teaching laboratories for auto technology, metal trades, and building trades. The building contains 25,134 assignable square feet.			
Life and earth science building.....	-	-	40,300 <sup>gE</sup>
This request will provide the initial and only phase of equipment for classrooms, offices, and teaching laboratories for biology and geology. The building contains 6,159 assignable square feet.			
Library building .....	-	-	91,200 <sup>gW</sup>
This project will provide library study, stack, carrel, and service areas, offices, and audio-visual production, repair, recording, service, and storage areas. The building will contain 37,597 assignable square feet.			
Pasadena Area Community College District .....	213,146 <sup>g</sup> 250,616 <sup>a</sup> 1,633,430 <sup>g</sup> -137,067 <sup>a</sup>	-	-
Peralta Community College District .....		1,672,435 <sup>g</sup>	901,900 <sup>g</sup>
College of Alameda:			
Airport facility addition .....	-	-	33,500 <sup>gE</sup>
This request will provide the initial and only phase of equipment for a classroom, office, and teaching laboratories for aeronautics. The building contains 14,162 assignable square feet.			
Laney College:			
Conversion of laboratories A202 and F254 .....	-	-	74,800 <sup>gWC</sup>
This project will provide the conversion of two replaced art teaching laboratories to teaching laboratories for applied arts and business. The conversion will consist of 4,172 assignable square feet.			
Merritt College:			
Remodel old library .....	-	-	39,900 <sup>gE</sup>
This request will provide the initial and only phase of equipment for the conversion of the old temporary library into a seminar room, offices, and teaching laboratories for home economics, tutoring, and career education. The remodeled area contains 10,530 assignable square feet.			
Horticulture building .....	-	-	753,700 <sup>gWC</sup>
This project will provide a greenhouse, lathhouse, headhouse, storage, offices, and teaching laboratories for horticulture. The buildings will contain 16,251 assignable square feet.			
Redwoods Joint Community College District .....	-	747,300 <sup>g</sup>	26,700 <sup>g</sup>
College of the Redwoods:			
Sewer interceptor .....	-	-	26,700 <sup>gC</sup>
This project will provide an alternative means of sanitary sewer disposal which includes a pumping station and six inch diameter pipe. This will achieve compliance with State of California Water Resources Control Board policy of May 4, 1974. The pumping station will contain 717 gross square feet.

STUDENT AID COMMISSION

The Student Aid Commission, formerly known as the State Scholarship and Loan Commission, is composed of twelve members who are appointed by the Governor and confirmed by the Senate. Terms are for four years except for two student members whose terms are for two years. The Commission administers four active programs of student financial assistance.

Specific program responsibilities include:

1. A grant program designed (a.) to enable needy students to attend the California college of their choice and to encourage increased enrollment in private institutions; (b.) to increase the availability of education in California colleges for disadvantaged students; and (c.) to provide grants for needy students to train in critical skilled occupations.

2. A fellowship program for needy graduate and professional students.
3. A college education aid program for needy children of law enforcement officers killed or permanently disabled in line of duty.
4. A grant program to prepare bilingual elementary and secondary classroom teachers.

The Commission is also responsible for (1) collections under the State Guaranteed Loan Program, (2) providing grants for supervised clinical training to U.S. citizens who are graduates of foreign medical schools, (3) research to consolidate information on student aid, (4) a statewide program providing information dissemination about student financial aid, (5) reporting to the Legislature, the Governor, and postsecondary education institutions concerning certain aspects of student financial aid in California.

SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Cal Grant Program:

SIGNIFICANT PROGRAM CHANGES

Program	Description	Awards	Dollars
Ia. Cal Grant—Scholarships—statutory expansion.....		3,911	\$3,229,868
Ia. Cal Grant—Scholarships—increased average amount per award and additional administrative costs .....		-	2,624,342
Ib. Cal Grant—College Opportunity Grants—statutory expansion .....		3,863	4,241,047
Ib. Cal Grant—College Opportunity Grants—increased average amount per award .....		-	1,288,322
Ic. Cal Grant—Occupational Education and Training Grants—statutory expansion .....		354	387,984
Ic. Cal Grant—Occupational Education and Training Grants—increased average amount per award, and additional administrative costs .....		-	266,114
III. Establish Bilingual Teacher Development Grant Program (Chapter 978/1976) .....		-	350,000
VI. Supervised Clinical Training Grant Program—Chapter 985/1976 .....		10	100,000

Along with the change in name, the enactment of Chapter 1270, Statutes of 1975 (AB 1031) added the following responsibilities to the Commission's duties:

1. Report every two years on the impact and effectiveness of state-funded programs.
2. Collect and disseminate data regarding financial resources and needs of students and potential students, and the scope and impact of state, federal, and institutional programs.
3. Report on the aggregate financial needs of students and the degree to which current programs meet those needs, and also report on criteria utilized in distributing funds.
4. Develop and make available a single common application form and a single common financial statement to be used for public student aid funds administered by the Commission and public institutions; also approve supplemental forms used by the public institutions.
5. Award grants to part-time students on a full-time equivalency basis.
6. Permit use of grants at more than 500 postsecondary institutions, compared with approximately 240 previously.
7. Develop and administer a student financial aid information dissemination program.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

Average .....	\$10,000	\$10,000	\$10,000

## I. CAL GRANT PROGRAM

## a. Scholarships

This program assists academically able, financially needy students to complete four years of college. It also assists students who wish to attend independent colleges but are not financially able to do so. The funds are distributed directly to schools in the names of the students. Scholarships cover tuition and fees only up to \$2,700.

The average state scholarship is estimated at \$1,233 for 1977-78. The scholarships are coordinated with other awards, including Federal Basic Educational Opportunity Grants; Federal State Student Incentive Grant funds of \$5,274,710 are included in the budget.

Chapter 1270 Statutes of 1975 increased the number of new awards to a total of 14,900 and the maximum award from \$2,500 to \$2,700.

The 1977-78 budget includes additional funds for increased average awards (from the 1976-77 budgeted amount of \$1,172 to \$1,233 per award). This increase is provided to accommodate fees which are being increased at some institutions and the selection by students of colleges which have higher tuition charges. In addition, three additional positions are included to handle increased workload.

**b. College Opportunity Grants**

Over the years, the number of disadvantaged students in higher education has been disproportionately low. Cal Grant College Opportunity Grants program assists disadvantaged students who have a potential for college success and community leadership. Selection is made on the basis of need, grades, and student and school recommendations. Grants include funds for tuition (after the first year) and living allowances (subsistence). Federal State Student Incentive Grant funds of \$3,863,186 are included in the budget.

Chapter 343 Statutes of 1976 increased the number of college opportunity grants to provide 6,825 new grants annually with a maximum grant of \$3,600.

The 1977-78 budget includes additional funds for increased average awards (from \$1,098 to \$1,175 per award). This increase is provided to accommodate a shift in the number of students attending more costly institutions and to provide a 6 percent inflation adjustment for the subsistence portion of the award.

c. Occupational Education and Training Grants

This Cal Grant program is designed to provide skilled workers for critical occupations by supplying postsecondary occupational education aid to needy and talented students. Grants up to \$2,000 for tuition and \$500 for related training costs may be awarded. Selection is made on the basis of need, grades, recommendations, and demonstrated skill. The budget includes Federal-State Student Incentive Grant funds of \$481,523.

Chapter 983 Statutes of 1976 increased the number of new award by 362 for a total of 1,337 new awards annually, beginning in 1976-77. The 1977-78 budget includes additional funds for the increased number of new awards, the additional awards which will be continued for a second year in 1977-78, and for increased average awards (from \$1,096 to \$1,218 per award). The increased average amount per award is provided to accommodate a 6-percent inflation adjustment and the cost of the greater number of grant recipients who attend proprietary schools which traditionally charge higher tuition/fees. In addition, an additional 0.3 position is proposed to handle increased workload.

## II. GRADUATE FELLOWSHIP PROGRAM

This program, established to assist needy graduate and professional students, emphasizes fields where there are manpower shortages. Chapter 375 Statutes of 1974 requires that consideration be given to academically able students who are disadvantaged and that the parents' income be a factor in determining need. As a result the program has been successful in identifying and assisting able students with financial need most of whom come from disadvantaged backgrounds. Fellowships are coordinated with awards made by colleges and private groups.

## III. BILINGUAL TEACHER DEVELOPMENT GRANT PROGRAM

Chapter 978, Statutes of 1976, provided funds for a bilingual teacher development program to be administered by the Student Aid Commission after consultation with the Commission for Teacher Preparation and Licensing. Grants may be used for tuition, fees, and subsistence, and are renewable for a total period not to exceed three academic years.

## Authority

Education Code Section 10104.

## Program Requirements

	75-76	76-77	77-78	1975-76	1976-77	1977-78

## IV. LAW ENFORCEMENT PERSONNEL DEPENDENTS PROGRAM

This program provides college grants to needy dependent children of law enforcement officers killed or permanently disabled in the line of duty. Awards in amounts not to exceed \$1,500 per year cover the costs of tuition and living expenses.

## Authority

Labor Code Section 4709.

## Program Requirements

	75-76	76-77	77-78	1975-76	1976-77	1977-78

## V. MEDICAL STUDENT CONTRACT PROGRAM

This program was designed to encourage private colleges and universities to expand their enrollment of medical students and thus increase the supply of physicians. An opinion issued by the Legislative Counsel indicated that state payments to medical schools under this program were unconstitutional. As a result, the unencumbered balance of funds appropriated by Chapter 1112, Statutes of 1973 were reverted by the Legislature effective June 30, 1976.

## Program Requirements

## VI. SUPERVISED CLINICAL TRAINING PROGRAM

This program is designed to provide supervised clinical training to U.S. citizens who are graduates of foreign medical schools. Funds are awarded directly to public medical schools and, through students, to independent colleges' medical schools for students participating in clinical training programs. This program was modified by passage of Chapter 985 Statutes of 1976 to include the participation of independent colleges' medical schools and the number of grants was increased from 30 to 50 per year.

## Authority

## VII. REAL ESTATE SCHOLARSHIP PROGRAM

Through the California State University and Colleges, the Commission grants assistance to students pursuing real estate careers. The program is financed from interest earned on a \$200,000 endowment from the Real Estate Fund. The California State University and Colleges system selects students and the Student Aid Commission administers the awards within broad guidelines provided in the Business and Professions Code. Legislative authority for this program expired December 31, 1975.

## VIII. GUARANTEED LOAN PROGRAM

The federal government has had direct control over the Guaranteed Loan Program since November 1967, leaving the State with the single responsibility of providing administrative services for collecting outstanding loans made before that date. Collection activities are performed by contract with a private collection agency and are funded from the reserve created by previous collections.

## IX. STUDENT FINANCIAL AID INFORMATION PROGRAM

Chapter 1270, Statutes of 1975 assigned a new function to the Commission directing it to disseminate information about all institutional, state, and federal programs to potential applicants, with the primary focus on potential applicants with the greatest financial need. An additional \$40,000 and two new positions are proposed for this purpose in 1977-78.

## X. RESEARCH AND REPORT PROGRAM

a. The Research component furnishes the Governor, the Legislature and others with specific information and data on student aid. Primary areas of research involve the different types of student financial aid programs, educational opportunities for disadvantaged students, and patterns of payment of college costs.

b. The Report component collects and disseminates various data concerning student financial aid including reporting to the Legislature on or before January 1, 1978, and every two years thereafter, on the impact and effectiveness of state-funded programs. Reports will also be developed on the criteria utilized in distributing available student aid funds. In addition to the Legislature, this report will be made available to the Governor, postsecondary educational institutions, and the California Post-secondary Education Commission. The budget includes \$25,000 for contract services in 1977-78 for reporting activities.

HIGHER EDUCATION STUDENT ASSISTANCE

The State of California plays a significant role in directing assistance to students who have the desire to continue their education beyond high school but who, without financial assistance, would find it difficult or impossible to continue. Through the state's many programs, which complement and supplement other resources, assistance is provided to students who attend private as well as public institutions at both graduate and undergraduate levels.

- The various programs through which California provides higher education student assistance include:
- University of California:
  - Educational Opportunity Program
  - Loans, including fee and tuition waivers
  - Presidential Work-Study Program

Board of Governors of the California Community Colleges:
  - Extended Opportunity Program and Services

Board of Trustees of the State University and Colleges:
  - Educational Opportunity Program
  - Fee and tuition waivers
  - Work-Study Program

Department of Veterans Affairs:
  - Educational Assistance Program

- Student Aid Commission:
  - State Scholarship Program
  - College Opportunity Grant Program
  - Graduate Fellowship Program
  - Occupational Training Grant Program
  - Educational Assistance to Dependents of Deceased or Disabled Peace Officers

In addition, the federal government is providing assistance for a variety of educational assistance programs in all segments of higher education, including private institutions.

Financial assistance is usually provided to individual students through "packages" of assistance, put together at the campus level. The Student Aid Commission and individual campuses coordinate awards to individual students to the extent possible to assure efficient utilization of funds. The assistance package is made up of a combination of grants, loans, work-study, and other aids appropriate to the individual's needs.

Highlights of Program

The State of California continues to make rapid advances in the scope and magnitude of its financial assistance opportunities to needy students. State programs provide a balanced diversity of financial aid programs to meet the special needs of different groups.

Cal Grant (a)—State Scholarships

This component of the Cal Grant Program assists academically able, financially needy students to complete four years of college at institutions of their choice. The program indirectly assists independent colleges by diverting students from state-supported institutions. Awards may be used for tuition and fees only. The average state scholarship is budgeted at \$1,233 for 1977-78.

Cal Grant (b)—College Opportunity Grants (COG)

The College Opportunity Grant component of the Cal Grant Program is targeted to meet the needs of low-income disadvantaged students who have demonstrated a strong academic record while in high school. A living allowance assists a COG student in meeting the costs of living away from home. A COG student who attended a community college may, in his or her last two years of undergraduate study, receive additional support for tuition costs at any accredited four-year college in California.

Cal Grant (c)—Occupational Education and Training Grants (OETG)

Occupational Education and Training Grants are unique in that they assist students preparing for vocational or occupational careers. Awards are made to students electing public, private nonprofit and proprietary institutions alike. Students are enrolled in a wide variety of courses of study including, for example, such fields as surgical technician, correctional officer, and secretary.

Graduate Fellowships

The Graduate Fellowship Program provides tuition grants for disadvantaged and talented graduate students. Students who are chosen as graduate fellows may use their fellowships at any accredited school in California.

Educational Opportunity Programs (EOP)

While the state has emphasized freedom of student choice in its financial aid programs by leaving to the student the option of which institution to attend, the state has also provided assistance to students through institution-based programs. The various opportunity programs permit campuses of the three public segments and Hastings College of Law to recruit, counsel, and otherwise assist specially selected low-income disadvantaged students.

Federal Programs

In addition to the state and institutionally funded programs, California students also participate in the various federal student aid programs. These programs play a significant role in extending educational opportunities to Californians. The newest of these programs provides Basic Educational Opportunity Grants (BEOG) to financially needy students and has substantially increased the amounts of financial aid to Californians. All potentially eligible students applying for state financial aid are required to apply for BEOG. The amount of BEOG received is taken into account in "packaging" financial aid for the student. BEOG thus provides the state with the flexibility to allocate funds to more students or to increase the total financial aid package that a student receives.

EDUCATIONAL OPPORTUNITY PROGRAMS

Prior to the 1960's, California's higher education systems served, in disproportionate numbers, a racially and economically stratified segment of the population. During the early part of the decade a white student was twice as likely to become a college freshman as was a member of a racial or ethnic minority.

Throughout the 1960's, individual colleges responded to this situation with localized programs for minority students. This tendency was strengthened by the decisions of the University of California and the California State University and Colleges to begin admitting a limited number of students who showed considerable promise but did not qualify for admission under normal standards. Special efforts were needed to finance these students, to integrate them into the campus, and to alleviate the deficiencies in educational preparation which precluded their regular admission. By 1968 both the university and the state university and colleges had begun substantial Educational Opportunity Programs, and in 1969 the Legislature formally authorized state-funded programs at CSUC (S.B. 1072, Chapter 1336) and the community colleges (S.B. 164, Chapter 1579).

Between 1969-70 and 1973-74 (the latest year for which figures are available) minority enrollment in the public segments increased from 11.6 percent to 21.6 percent. This increase is not wholly attributable to EOP, and reductions in EOP funding would not necessarily result in proportionate declines in minority enrollments. Yet, Educational Opportunity Programs clearly have been major contributors to these changes. In 1976-77, a significant increase in program funding was made which reflects the Governor's concern for increasing services to disadvantaged students. This resulted in a 50 percent increase in the number of students served.

HIGHER EDUCATION STUDENT ASSISTANCE—*Continued*

EOP programs in each of the segments share common elements: recruitment, admissions assistance, orientation, financial aid, tutoring, counseling, and other services.

The following tables contain further data on the CSUC, Community College and Hastings programs.

# GENERAL GOVERNMENT

FAIR POLITICAL PRACTICES COMMISSION

Program Objectives and Description

The Fair Political Practices Commission has primary responsibility for the impartial, effective administration and implementation of the Political Reform Act of 1974. To fulfill this responsibility the Commission adopts, amends and rescinds rules and regulations to carry out the purposes and provisions of the Act; issues opinions to persons who request them with respect to their duties under the Act; prescribes forms for reports, statements, notices, and other documents under the Act; prepares and publishes manuals and instructions to facilitate compliance with and enforcement of the Act; explains the duties of persons and committees under the Act; provides assistance to agencies and public officials in administering the provisions of the Act; investigates possible violations of the Act; conducts hearings and applies sanctions provided by the Act; provides technical assistance to State and local agencies in the preparation of Conflict of Interest Codes; reviews and approves the codes of State agencies, county boards of supervisors, city councils, and all local government agencies with jurisdiction in more than one county.

In accordance with the Political Reform Act of 1974, Section 83122 of the Government Code, the statutory minimum budget of the Commission is adjusted annually by the cost of living change during the previous calendar year. This is determined from the Consumer Price Index published by the United States Bureau of Labor Statistics (Section 82001, Government Code).

All unexpended balances of the Commission's budget at the end of the fiscal year revert to the General Fund. The savings reverted in the 1975-76 fiscal year was \$44,706.

In 1977-78, the Commission is proposing an Accounting Administrator I and an Accountant I position for needed accounting services to be funded by a transfer of funds from the Operating Expense category. A Clerk Typist is proposed in 1977-78 for ongoing workload mandated by AB 809 (Chapter 129/76) which appropriated \$10,000 for this purpose for 1976-77. The continuation of the \$10,000 in 1977-78 requires an appropriation item in the 1977-78 Budget Act.

## POLITICAL REFORM ACT OF 1974

### Program Objectives and Description

Chapter 1075, Statutes of 1976, requires the Department of Finance, in preparing the state budget and the Budget Bill submitted to the Legislature, to include in the budget item dealing with the support of the Political Reform Act of 1974 (proposition nine): (1) the additional amounts to be appropriated to other agencies to carry out their duties under the act, which amounts shall be in augmentation of the support items of such agencies; (2) the additional amounts required to be appropriated by the Legislature to the Fair Political Practices Commission to carry out its duties; and (3) in parentheses, for informational purposes to show the continuing appropriation of \$1,000,000 adjusted for cost-of-living changes made to the Commission by the Political Reform Act during each fiscal year.

The Political Reform Act expenditure detail for each affected agency will be found under their respective program budgets as shown in the following table.

## AGRICULTURAL LABOR RELATIONS BOARD

The objective of the Agricultural Labor Relations Board, which was created by the Agricultural Labor Relations Act of 1975 (Chapter 1), is to ensure peace in the agricultural fields of California by bringing stability in labor relations through the guarantee of secret ballot elections to determine collective bargaining representation and the identification and elimination of unfair labor practices by employers and unions. The ALRB is patterned after the National Labor Relations Board and is divided into two major programs: (1) Board Administration of the Agricultural Labor Relations Act and (2) General Counsel Administration of the Agricultural Labor Relations Act.

Due to lack of precedent in the area of agriculture labor relations and the higher than anticipated number of elections and unfair labor practice charges, the 1975/76 budget of \$1.3 million was insufficient. The only other similar program, the National Labor Relations Board, held 35 elections its first year while the ALRB held 429 its first five months of operation. Objections to elections were initially estimated at 30 percent, whereas over 80 percent of the elections had objections filed. An emergency loan of \$1,250,000 allowed the board to continue full operation only until February 6, 1976, at which time the regional offices were closed and most of the staff laid off. An additional \$130,000 emergency fund allocation was provided to allow the board to close down in an orderly manner. On April 1, all remaining funds were expended or committed and with no additional funds available, the last few staff members were laid off and the board ceased all functions. Due to the unanticipated cessation of activities and to assure orderly operation in 1976/77, the board had a staged startup and did not begin full operation until December of 1976. Therefore, the first full year of operation of the ALRB will be the 1977/78 fiscal year, and the budget is significantly different from that originally approved for the 1976/77 fiscal year. The original 1976/77 budget was developed after less than three months of experience and before some major program areas, such as unfair labor practice hearings, had really been started. The result was that when these estimates were reanalyzed during the close down period and workload standards developed and applied to them, it was found that some programs were significantly under budgeted and others over budgeted. Therefore, within the limits of the original budget the various programs were adjusted based on an expected full year's operation. However, the necessity to delay full operation for several months and the carry-over of a substantial workload from the prior year required further revisions to the 1976/77 budget. It is this revised program which is presented here as the 1976/77 budget. The 1977/78 proposal was developed by applying the workload standards developed for the revised 1976/77 budget and applied to workload levels projected for the full year.

Since almost all work of the ALRB is reactive and dependent upon the number of representation petitions and unfair labor practice charges filed, the number of elections objected to, the willingness of parties to settle unfair labor practice charges and complaints, the number of hearings necessary, and the number of appeals to the board from these hearings, and since in almost all cases the board has no discretion but to respond to these requests for elections, objections, changes, requests for hearings, and appeals, workload cannot as yet be projected with the accuracy desirable. Until such time as some experience has been gained by both the ALRB and the farm workers, growers, and unions, the demands upon the agency may vary considerably from what is projected. (See Exhibit I, page 932-3, for an explanation of the Board's operation.)

# FAIR LABOR PRACTICE CHARGES

# AGRICULTURAL LABOR RELATIONS BOARD—Continued

## I. BOARD ADMINISTRATION

### Program Objectives and Description

The objective of the Board Administration program is to ensure that all parties concerned with agricultural labor are guaranteed their full rights under the ALRA and other applicable statutes. To accomplish this, the board establishes policies and procedures for all activities related to the conduct of elections, the identification and resolution of unfair labor practices and the conduct of hearings on elections and unfair labor practices. It also conducts and/or reviews these hearings on elections, determines whether the results of such elections should be certified, and adjudicates complaints issued in unfair labor practices.

The State of California has over 250,000 farm workers working either permanently or intermittently on approximately 60,000 farms, 30,000 of which employ 50 or more people at some time of the year. The initial years of implementation of the ALRA will see a large continuing education process of all aspects and effects of the ALRA on the part of the board, unions, growers, farm workers and the general public. This educational process will focus on the areas of public involvement in determining the policy and procedures and through the review of the conduct of elections and complaints of unfair labor practices. *Until a body of decision in these areas is established to adequately define what does and does not constitute unfair labor practices and proper elections, a large volume of cases can be expected.*

#### a. Policies and Procedures

Board Administration is responsible for the overall policy direction of the agency. This involves the conduct of public meetings at which policy regarding the organization and operations of the agency is discussed and decisions made. Such policy decisions require input from the general counsel, executive secretary, chief administrative officer, the board's own legal staff, and comments from growers, labor unions and the general public as well.

The establishment of procedures for the agency involves the development and promulgation of regulations required to implement, interpret, and make specific, provisions of the Agricultural Labor Relations Act. This process involves the conduct of public hearings throughout the state to facilitate public comment on the regulations, analysis of regulations by board members and their staff, the development of recommendations for board discussion, and the final adoption of regulations under procedures set forth in the Government Code. Because the act has been in effect for a short period of time, the board's regulations and their impact on the program area must be reviewed and evaluated on an ongoing basis in order to assure accomplishment of the purposes of the act.

### Output

Output consists of the rules and regulations needed to guide and direct all parties in the conduct of fair agricultural labor relations.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	2.1	2.8	2	\$76,802	\$100,033	\$75,212

#### b. Hearings and Board Review

The primary role of the board is to exercise the adjudicatory functions of the agency. The Agricultural Labor Relations Act assigns the board the function of hearing objections to election cases, challenges and complaints of unfair labor practices.

Hearings are conducted by the board or its agents to determine whether particular union representation elections are to be certified, and must be held in all cases where a substantive objection has been made. There are several possible bases for an objection to an election case; and the board rules on the merits of objections and if the facts of the case warrant decertification or certification of elections. In 1975/76 objections were made in over 80 percent of the elections held. In order to refine the process so that certification or decertification is not unduly delayed, the executive secretary's office will screen all objections to assure that hearings are limited to only those points and issues which are pertinent to the case and which have not previously been held to be nonobjectionable. The board acts as an appellate body to which any of the parties involved may appeal the decision of a hearing officer and the board must consider all appeals.

Hearings are also conducted on charges of unfair labor practices. The Agricultural Labor Relations Act defines unfair labor practices and authorizes the board, if the preponderance of the evidence taken warrants such a decision, to issue orders to prevent or remedy such practices. The board acts as a court of appeals for unfair labor practice cases brought to it by either the parties in the dispute or the general counsel, and must consider all cases appealed to it. The board is empowered to hear the disputes out of which unfair labor practices arise, decide on what constitutes a fair adjustment of the dispute, and seek compliance with its decisions. In these unfair labor practice cases, the board has the power to petition the courts for appropriate temporary relief or restraining orders, and for enforcement of its decisions.

The general ministerial responsibilities of the board include overall calendar control which in turn includes setting and coordinating the hearing dates for all regional offices, selecting and notifying the hearing officer, determining the need for selecting and notifying the interpreter, assisting with site procurement, and answering all inquiries pertaining to all of the above responsibilities.

The board has established the internal administrative structure to receive, log, and act, in a timely manner, upon all appeals, motions and requests made by the parties in the cases.

Since the work of this program is at the end of the process which begins with the filing of an election petition or unfair labor practice charge and had just begun when the original 1976-77 proposal was developed, it did not anticipate the total requirements of the work involved and was, therefore, significantly under budgeted. A portion of this deficiency was eliminated by the reanalysis of all programs and the transfer of funds from other programs.

## AGRICULTURAL LABOR RELATIONS BOARD—Continued

Due to the staged startup of the agency in 1976/77, it is anticipated that the number of hearings generated during the year will be less than planned. However, since the 1976/77 revised budget was based on a shorter average hearing length than had been realized and since there is a sizeable hearing workload carried over from 1975/76 due to the early shutdown of operations, it is anticipated that all budgeted funds, plus savings in other areas, will be needed for the hearing workload in 1976/77. Even then, it is projected that there will be a backlog of 44 unfair labor practice hearings at the end of 1976/77.

In order to eliminate this backlog and to have sufficient resources in 1977/78 so that additional backlogs do not occur, this program is proposing a one time increase of 2.8 positions to hear these backlog cases and an increase of 7.2 positions to hear cases on an ongoing basis. Also, this program contains funds to increase the staff of the Board members by 10.2 positions in order that they have sufficient staff to properly handle analysis and preparation of decisions on the large volume of cases expected to be appealed to them.

In addition, the 1977/78 budget proposes to add 5.5 positions to this program to review and make recommendations to the Board on petitions to extend certification. The ALRA provides that when a union is certified, based on a secret ballot election, as the sole bargaining agent of the employees, no further election can be held for one year after certification. The Act further provides that if, upon petition to the Board, the Board finds that the employer has, during the year of certification, refused to bargain in good faith, it can extend certification for an additional year. This additional staff will review the petition and the facts in each case, including, if necessary, holding a hearing, and make a recommendation to the Board.

**II. GENERAL COUNSEL ADMINISTRATION****Program Objectives and Description**

The objectives of the General Counsel Administration are: to provide fair, secret ballot elections, to identify and bring resolution or prosecution in unfair labor practices, and to defend the board in all court cases resulting from challenges to the act, or policies and procedures and decisions of the board, and to enforce decisions of the board. The general counsel is responsible for implementing the provisions of the act and rules and regulations of the board in the conduct of elections, challenges to ballots, objections to elections, and investigation, issuance of complaints and prosecution before the board in unfair labor practice charges. He is also responsible for representing the board in all court cases in which it is involved. The immediate staff of the general counsel are primarily responsible, with assistance from the regional offices, for this latter activity while the staff of the regional offices have primary responsibility, under the direction and coordination of the general counsel, for the activities related to elections and unfair labor practices.

**a. Representation Cases**

One means of bringing peace and stability in labor relations is to allow employees the right to organize and bargain collectively. In order to assure that workers may exercise this right if they so choose, free, fair secret ballot elections must be available to them. Under this program the ALRB provides these elections.

Upon the filing of a petition for election in a regional office, the petition is investigated and, if appropriate, election arrangements must be made and the election conducted within seven days of the date of filing. An investigation is conducted to determine whether the petition meets all the requirements of the act and the board's rules and regulations. If the petition meets all requirements of sufficiency and if there is reasonable cause to believe that a bona fide question of representation exists, arrangements must be made with the participating labor organization(s) and with the employer to conduct an election. If no choice on the ballot receives a majority of the ballots cast, a runoff election is conducted. If the election cannot be certified, another election may be held.

Additional elements may be required in the investigation of petitions during the seven days subsequent to filing including determining whether a valid election was conducted among the employees of the employer within the twelve months immediately preceding filing, whether a labor organization is currently certified as the exclusive collective bargaining representative of the employees affected, and whether the petition is barred by an existing collective bargaining agreement negotiated by a certified labor organization and an employer. In addition to the filing of petitions for certification by labor organizations, the statute also permits the filing of petitions for decertification by an agricultural employee or a group of agricultural employees. The same additional elements may also be required in the investigation of such petitions during the seven days subsequent to filing.

## AGRICULTURAL LABOR RELATIONS BOARD—Continued

During an election, a board agent or an observer of any party may challenge the eligibility of any person to cast a ballot. The ballots of challenged voters are set aside and if upon completion of the election, the tally of ballots discloses that the challenged ballots are sufficient in number to affect the results of the election, an investigation may be conducted to determine the challenged voters' eligibility and a report issued containing recommendations and conclusions. In the alternative, a hearing may be held on some or all of the challenged ballots.

During the five months of operation in 1975-76, the ALRB conducted almost twelve times as many representation elections as did the National Labor Relations Board in its first year of operation. Due to the delayed startup, it is anticipated that the workload for 1976-77 will be significantly less than that originally projected, and, therefore, the budget year shows a significant increase. However, this proposed program is essentially level with the reanalyzed program estimate for a full 1976/77 year and some 25 percent less than that originally budgeted for 1976/77.

Output	1975-76	1976-77	1977-78
Elections held .....	414	600	1,000
Elections objected to and/or in which challenges are determinative.....	311	360	600

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	20.5	40.8	59.1	\$952,377	\$1,014,598	\$1,614,586

### b. Unfair Labor Practices

An unfair labor practice charge may be filed by an individual, an employer, or a labor organization alleging that an agricultural employer or a labor organization is engaging in an unfair labor practice in violation of Section 1153, 1154 or 1155 of the act. The charge is filed in a regional office and a copy is served on the charged party. The charge is then assigned to a board agent in the regional office to conduct an investigation of the charge. Initially, declarations are taken from the charging party's witnesses and where it appears that there is evidence of a violation, the charged party is requested to provide witnesses relevant to the investigation. After sworn declarations have been taken from all relevant witnesses, the regional office determines whether the investigation has established sufficient evidence to warrant issuance of a complaint. If the determination is made to issue a complaint, the charged party is contacted and requested to enter into a settlement agreement to resolve the alleged unfair labor practices. In the absence of settlement, the matter is set for hearing before an administrative law officer. An attorney in the regional office then prepares the appropriate witnesses for trial and litigates the case. These hearings have ranged from one day to over two weeks in duration. A legal brief is ordinarily written by the trial attorney or an attorney in the general counsel's office and submitted to the administrative law officer after the close of the hearing. Exceptions to the administrative law officer's decision may be taken by filing with the board. In this circumstance, another legal brief, arguing the points on review by the board, is prepared by the trial attorney or an attorney in the general counsel's office.

At the time the ALRB ceased operations in February 1976, some 271 unfair labor practice charges were under investigation. These charges, plus the 140 that were filed during the February 1976 to November 1976 period prior to reinstituting full operations, will have to be completed in 1976/77. For this reason, the anticipated workload for the operational portion of 1976/77 is similar to that projected for the full 1977/78 year.

The program level for the 1977/78 year is proposed at some 4.9 positions higher than that estimated in the reanalyzed 1976/77 budget due to the increased need to have additional legal staff to try the additional unfair labor practice cases proposed in the Hearing and Board Review program. However, this level is still some 16 positions, or 18 percent, less than the level originally budgeted in 1976/77.

Output	1975-76	1976-77	1977-78
Unfair labor practice charges filed.....	958	1,182 <sup>1</sup>	1,150
Withdrawn, settled, dismissed, or combined.....	352	638	621

<sup>1</sup> Included in this amount are 356 charges carried over from 1975-76.

<sup>2</sup> This figure includes 86 hearings backlogged from 1975-76.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	11.2	78.4	79.4	\$644,841	\$2,013,395	\$2,050,468

### c. Court Litigation

ALRB court litigation falls into three categories:

1. Suits against the Agency. This litigation involves suits against the agency by employers and labor organizations seeking to enjoin the agency from conducting elections, counting ballots, proceeding with unfair labor practice trials and attempting to obtain judicial review of a regional director's showing of interest determination or bargaining unit determination. These suits are in the nature of petitions for declaratory and injunctive relief, writs of mandate, and writs of prohibition and usually necessitate the agency appearing on a few hours notice to defend against the issuance of a temporary restraining order and then perhaps a week later appearing in an order to show cause hearing on a request for a preliminary injunction. These suits have also resulted in appellate litigation where it has been necessary to seek extraordinary appellate review in the appropriate District Court of Appeals or the California Supreme Court in order to stay the effect of an adverse ruling in a superior court.

2. Petitions for Injunctive Relief filed by the Agency. Section 1160.4 of the act provides that the agency may seek injunctive relief to enjoin the commission of an unfair labor practice after a complaint has been issued. This provision is discretionary and is only utilized in the instance where the alleged unfair labor practices are extremely serious, involve acts or threats of violence, or involve the denial of access to a labor organization during an election campaign.

Section 1160.6 requires the agency to seek injunctive relief whenever there is reasonable cause to believe there is a violation of Sections 1154(d) (1), (2) or (3), 1154(g) or 1155.

3. Enforcement of ALRB Decisions. Section 1160.8 of the act provides for judicial review of board orders in unfair labor practice decisions. In those cases where a respondent seeks judicial review in the appropriate court of appeals, attorneys in the general counsel's office appear on behalf of the board and defend its decisions. If the respondent has not filed a petition for review but refuses to comply with the board's order, the agency will seek enforcement of the board's order in the appropriate superior court.

This program also shows an increase between 1976/77 and 1977/78 due to the fact that full operation did not begin in 1976/77 until after almost one-half the year had elapsed. However, the 1977/78 program is some ten percent less than that originally budgeted in 1976/77.

## EDUCATIONAL EMPLOYMENT RELATIONS BOARD

The Educational Employment Relations Board was created by Chapter 961 of the Statutes of 1975. The Board is charged with the direct supervision and regulation of the meeting and negotiating process between California's public school employers and employees.

The EERB has a constituency which includes over 450,000 employees, 1,100 school districts, and 5.9 million students in grades K-14. The EERB serves as an administrative, regulatory, and quasi-judicial body. The Board has five basic functions established by statute: (1) to determine and implement, through secret ballot elections, the free democratic choice by employees as to whether they wish to be represented by an employee organization for the purpose of negotiating and, if so, which one; (2) to prevent and remedy unlawful acts, defined in the Act as unfair practices, by either employers or employee organizations; (3) to oversee and establish procedures whereby negotiations between employers and employee organizations result in agreement; (4) to assure that the public is afforded sufficient information and time to register its opinion regarding negotiations; and (5) to monitor the financial activities of employee organizations not required to report their transactions under the Federal Labor-Management Disclosure Act of 1959.

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
I. Certification elections .....		-10.5	-\$105,000

### I. BOARD OPERATIONS

#### Program Objectives and Description

The Educational Employment Relations Board is a quasi-judicial body empowered to settle disputes arising under the Educational Employment Relations Act. The Board is responsible for the general policy direction of the agency, the promulgation of regulations, and the conduct of hearings, decisions, and appeals arising from representation and unfair labor practice matters. *As the Board shifts its emphasis from promulgating regulations to conducting hearings, more resources will be needed for production of transcripts. This has necessitated budgeting an additional \$140,000 for transcript reproduction in 1977-78.*

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs .....	11.4	20	20	\$296,968	\$629,160	\$754,010

### II. ELECTIONS ADMINISTRATION

#### Program Objectives and Description

To arrange for and supervise representation and organizational security elections conducted by means of secret ballot elections, and certify the results. The staff of the regional offices have primary responsibility, under the direction and coordination of the Executive Director, for the activities related to elections.

Upon the filing of a Notice of Employer Decision in a Regional Office, an investigation is conducted to determine whether all requirements of the Act and the Board's rules and regulations have been met. If the notice meets all requirements of sufficiency and no unit dispute exists, arrangements are made with the participating employee organization(s) and with the employer to conduct the election.

In disputed cases, once the Board has determined appropriate units, the appropriate Regional Director will be directed to conduct elections.

During an election, a Board agent or an observer of any party may challenge the eligibility of any person to cast a ballot. The ballots of challenged voters are set aside and if upon completion of the election, the tally of ballots discloses that the challenged ballots are sufficient in number to affect the results of the election, a hearing will be held on the challenged ballots. At such hearings, the hearing officer, parties, or the Board may call, examine, and cross-examine witnesses and introduce into the record documentary and pertinent evidence. A transcribed record is made of such testimony and evidence.

*Increased experience of the election process by all parties concerned will result in increased efficiency thereby permitting a reduction in the number of election officers needed in 1977-78.*

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs .....	-	36.2	43.2	-	\$1,041,109	\$1,140,187
Workload adjustments .....	-	-	-10.5	-	-	-105,000
<b>Totals, Election Administration .....</b>	<b>-</b>	<b>36.2</b>	<b>32.7</b>	<b>-</b>	<b>\$1,041,109</b>	<b>\$1,035,187</b>

### III. GENERAL COUNSEL

The objectives of this element are to hold formal hearings in disputed cases, to provide resolution of unfair labor practice charges, to defend the Board in all court cases resulting from challenges to the Act or policies, and to seek enforcement of orders of the Board.

Where a dispute exists as to the appropriate unit for collective negotiating purposes in a school district, staff of the General Counsel's office conducts the necessary hearing. A transcribed record is made of the testimony and evidence. At the close of the hearing, the record is transferred to the Board in Sacramento.

An unfair practice charge may be filed by an employee, an employer, or an employee organization alleging that an employer or an employee organization is engaging in an unfair practice in violation of Sections 3543-3543.7 of the Act. The charge is then assigned to an attorney in the General Counsel's office. Efforts are made to obtain settlements through an informal conference. In the absence of such a settlement, the matter is set for hearing. After the close of the hearing, the attorney in the General Counsel's office who conducted the hearing will draft a proposed decision. If this is not appealed to the Board on a timely basis, it will become the order of the Board.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	-	22	23.7	-	\$800,642	\$831,216

## IV. IMPASSE PROCEEDINGS

## Program Objectives and Description

To provide mediators and fact-finders who will assist the parties in the resolution of impasses arising from contract negotiations between public school employers and public school employees under the Act.

Either a public school employer or the exclusive representative may declare that an impasse has been reached between the parties on matters within the scope of negotiations and may request the Board to appoint a mediator. If the Board determines that an impasse exists, a mediator must be appointed within five working days after receipt of a request. The cost of the mediator is borne by the EERB.

If the mediator cannot effect settlement of the controversy within 15 days after appointment and declares that fact-finding is appropriate, either party may request that their differences be submitted to a tripartite fact-finding panel. In such cases, each party shall select a person to serve as its member of the panel. The Board shall select a person to chair the fact-finding panel. The costs of the person chairing the fact-finding panel is borne by the EERB.

## DEPARTMENT OF FINANCE

By statute the director serves as the Governor's chief fiscal policy advisor with emphasis on the financial integrity of the state and maintenance of a fiscally sound and responsible Administration.

The objectives of the Department of Finance are:

1. To assist the Governor in the development and enactment of the annual financial plan.
2. To assess and optimize the efficiency and effectiveness of resource utilization for state-administered and state-financed programs.
3. To provide economic, financial, and demographic information.

### I. PREPARATION AND ENACTMENT OF THE ANNUAL FINANCIAL PLAN

#### Program Objectives and Description

The Department of Finance develops and assists the Governor in the enactment of the annual financial plan for the effective allocation of the State's resources.

Program budget units act as the focal point to generate expenditure planning estimates; make recommendations for use in the executive decision process; analyze, review, and coordinate budget submissions to ensure compatibility with the Governor's policies; compile the Governor's Budget and Budget Bill and publish the Governor's Budget; supply information to the Legislature on items in the Budget Bill and on the fiscal impact of other legislation; provide estimates of revenues and expenditures and special studies for use by the executive branch; assist the Legislature in its review of legislation; and compile a summary of the annual financial plan as enacted.

Two positions are requested for the Health and Welfare assignment to meet increased workload and to address critical issues.

Three clerical positions established during the current year and reported to the Legislature are proposed for the budget year to improve efficiency and reduce the costs of printing the Governor's Budget and Legislative Change Book.

#### Authority

Executive distribution .....	2.1	2.9	2.9	48,400	76,390	81,419

#### a. Development of the Annual Financial Plan

The Expenditure Planning Estimate is developed by the Department of Finance to provide those in the executive branch with fiscal, economic, and demographic data for the past, current, and proposed fiscal year so that alternatives may be weighed, priorities established and resources allocated prior to the actual preparation of the Governor's Budget. The allocation planning takes into consideration the revenues and expenditures necessary to maintain currently authorized program levels on a sound financial basis.

The plan must be adjusted to reflect the impact of legislation in the current year, economic conditions, and the distribution of resources that have previously been authorized by the Legislature without specific departmental designation. With these considerations in view, the Department of Finance prepares an expenditure planning estimate for each department of state government. Each department then compares its budget plan with the planning estimate.

A department which wishes to change its program or level of support must initiate a decision document to secure the reaction and approval of the appropriate agency secretary, the Department of Finance and the Governor.

The Department of Finance reviews and coordinates budget submissions from each of the state departments to verify that the decisions already made have been reflected and that the budget proposals are consistent with the statutes and the Governor's policies. Problems which become apparent at this stage are analyzed and resolved or referred to the Administration for decision.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DEPARTMENT OF FINANCE—*Continued*

The Department of Finance enters changes in the plan to reflect the adjusted expenditure projections for both the current and budget years. If a gap exists between available revenue resources and expenditure requirements, the Department of Finance recommends alternatives for additional revenue sources and/or expenditure reductions.

In addition to review and coordination of the annual financial plan for all state agencies, the Department of Finance provides state agencies with information which pertains to state funding of local costs incurred for program mandates occurring through enactment of legislation or executive regulations.

The fiscal impact of legislation to be proposed in support of the Governor's annual financial plan must be analyzed and recommendations prepared.

**Output**

The Governor's Budget, Budget Bill, and proposals for special legislation prepared in accordance with the Governor's policy.

Information services to the Governor and the Legislature and to other levels of government.

Revenue estimates and forecasts of the economic pattern anticipated during the period covered by the Budget and the translation of these into revenue under current tax laws.

Current and long-range population estimates of the state and its counties.

An analysis of the population composition.

Current and long-range estimates of enrollments in higher education institutions, and primary and secondary schools.

Revenue-related and demographic estimates for agency workload and caseload projections.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	40.1	41.1	41.1	\$924,203	\$1,037,887	\$1,161,304

**b. Legislative Process**

Representatives of the Department of Finance, agencies, and departments appear before fiscal and revenue and taxation committees of the Legislature to present the Governor's program. The staff provides additional information requested by legislators or legislative committees and the public to explain the Administration's programs.

Bills introduced in the Legislature are reviewed for fiscal and program implications and analyses of these bills, including local mandated cost estimates, with recommendations, are submitted to the Governor's legislative assistant. Representatives of the Department of Finance appear before fiscal and revenue committees of the Legislature while they are considering bills. Data and information regarding the legislation are presented and assistance is provided in the preparation.

New or proposed expansion of existing programs are analyzed to ascertain additional costs mandated on local government and appropriate criteria are developed for reimbursement of those costs by the State Controller's Office.

At the time of budget enactment, revenue estimates are prepared to reflect the latest economic forecasts and recent legislation. This information is related to anticipated expenditures in order that a balanced budget may be developed. The staff brings fiscal and program implications of enrolled bills to the attention of the Governor.

**Output**

Weekly Change Books, and Final Change Book.

Analyses and recommendations on bills, constitutional amendments, and resolutions.

Appearances before legislative committees.

'Summary of Revised Revenues and Authorized Expenditures Including Financial Legislation,' summarizing the annual financial plan.

Annual report on chaptered legislation with state mandated local program implications pursuant to Chapter 486, Statutes of 1975.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	48.4	42.4	44.4	\$1,115,499	\$1,116,877	\$1,251,484

**II. SUPPORT AND DIRECTION OF THE ANNUAL FINANCIAL PLAN****Program Objectives and Description**

State programs must be administered in accordance with the authorized annual financial plan. Controls are placed upon appropriation items in the Budget Act and other statutes which may require specific action by the Department of Finance.

All situations which require a variation from the approved financial plan must be examined carefully to ascertain the effects on programs and the financial position of the state. If justified and within approved policy and legislative intent, revisions may be allowed to the extent permitted by law. Some situations, by legal definition or because of importance, are reported to appropriate legislative committees for their consideration.

The cash condition of the General Fund reflecting the proposed annual financial plan is a major consideration in the budgeting process. Expenditure and revenue programs must be matched to assure sufficient cash for current operations and year-end cash balance. Cash flow statements are required and are essential to the needs of management. The amounts and sources of borrowable resources must be known in the event temporary loans are needed. Refer to the budget for payment of interest on General Fund loans for cash flow statements.

*One position has been established for the current year in the Personnel Unit to provide assistance to the Employment Development Department in administering the Comprehensive Employment Training Act. The position is fully reimbursed.*

**Output**

Revisions to the approved programs are reviewed and acted upon.

Estimated cash flow statements reporting the timing and amounts of receipts, disbursements, ending balances and borrowable resources.

Comparative statements of cash flow reporting actuals with previous estimates and the amounts and reasons for differences.

**Authority**

Government Code Sections 11700, et seq.; 13000, et seq.; 16480.1-16480.8.

## III. ASSESSMENT AND OPTIMIZATION OF STATE-ADMINISTERED AND STATE-FINANCED PROGRAMS

## Program Objectives and Description

With the large number of continuing programs, the Department of Finance has initiated a systematic review process to evaluate the efficiency and effectiveness of state-administered and state-financed programs, including statewide EDP. This review is made to ascertain the need for changes in program or the level of support and to propose workable alternatives which can more effectively satisfy identified needs.

Review and evaluation includes the accounting systems necessary to provide accurate and timely recording and reporting of financial transactions. It is essential that the programs of the state are administered with reliability and integrity. The accounting systems to give this assurance must receive the necessary maintenance and improvement effort.

Executive distribution .....	4	5.6	5.6	92,190	147,512	157,223

## a. Program Analysis, Organizational and Financial Management Studies, and Follow-up Activities

Program analysis looks critically at state programs, policies, resources, organization and management, and suggests ways of improving productivity, efficiency and effectiveness. Analyses are made to help the Director of Finance, the Governor, agency secretaries, department directors, and the Legislature in allocating resources, formulating policies, and making decisions. Two positions established in the current year and reported to the Legislature are proposed in the budget year to provide assistance to other departments on a reimbursed basis in the development of accounting systems and procedures. Two additional positions are requested for the budget year to establish a cash management analytical unit within accounting systems to maximize General Fund interest income and reduce the costs of cash management and related financial services.

## Output

Increased effectiveness and efficiency of state programs and supporting data collection systems, or assurance that current conditions are acceptable.  
Improved allocation of state resources to programs.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	83	84.8	86.8	\$1,912,942	\$2,394,032	\$2,489,902

## b. Fiscal Management Audits

Audits of various state agencies and state-administered or supported programs are made as

1. *Financial and Compliance* which determines:

- whether financial operations are properly conducted,
- whether the financial reports of an audited agency are presented fairly, and
- whether the agency has complied with applicable laws and regulations.

2. *Economy and Efficiency*, which determines whether the agency is managing or utilizing its resources in an economical and efficient manner, and the causes of inefficiency or uneconomical practices. Staff availability and priorities determine the extent to which this element is included in an audit.

3. Identification of existing or potential problem areas in organizational and program operations.

Currently these audits, plus special audits and investigations as assigned, are made in accordance with an annual work plan based on statutory requirements, judgment as to the magnitude or degree of risk associated with the department or program, and priorities of the Governor, Agency Secretaries, and the Director of Finance. Consideration is given to work done by other auditors, such as the Auditor General, departmental internal audit staffs and federal audit agencies.

A further significant function is the supervision of annual audits of K-14 school districts made by independent public accountants. This is done by prescribing the content of reports on these audits, review of reports issued for compliance with prescribed content, and publication of audit guidelines to assist independent public accountants in conducting these audits. Also, on a selective basis, audits are made of apportionments of state funds to school districts.

Results of the audits are communicated to departments, Agency Secretaries, the Director of Finance and the Legislature through interim management letters or final reports.

Ten positions established in the current year and reported to the Legislature are proposed in the budget year to continue the federally required auditing of Office of Criminal Justice Planning grants. The positions are fully reimbursed by the Office of Criminal Justice Planning.

Twelve new positions are proposed in the budget year for the auditing of state agencies and state-financed programs. The positions will be used to increase the level of auditing to a more current cycle and expand audit coverage to include greater emphasis on efficiencies and economies of operations.

## DEPARTMENT OF FINANCE—Continued

## Output

The number and timeliness of audits made.  
 Dollar magnitude of the expenditures audited.  
 Number of recommendations generated.  
 Percentage of recommendations implemented.  
 To the extent possible and appropriate, dollar values are assigned to recommendations

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	61.2	72.8	84.8	\$1,635,676	\$2,141,254	\$2,564,034

## c. Data Processing Management Office

The State Data Processing Management Office monitors the acquisition and utilization of state electronic data processing resources—equipment, personnel, and data systems, whether through lease, purchase or contract. Excluded from control are the State Legislature, University of California, State Compensation Insurance Fund, and the Community Colleges.

*One position is requested in the budget year to assist in and coordinate activities related to the development and monitoring of procurement activities for four major computer replacement projects.*

## Output

Coordinated plans for information systems and EDP facilities.  
 Procurement and contracting procedures for EDP resources.  
 Management and development plans for EDP personnel.  
 Equipment management systems for inventory, maintenance and utilization.  
 A manual of statewide EDP policies, procedures and standards.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	11.5	12	13	\$265,046	\$316,097	\$366,453

## IV. DEVELOPMENT OF SUPPORTIVE DATA

## Program Objectives and Description

The Department of Finance provides a centralized source for official relevant data and analyses for economic, revenue, tax, and demographic information and data required by the Administration, the Legislature, and state agencies and requested or purchased by county and local government, the federal government, academic institutions, school districts, and private firms.

Data processing systems are used to assist the budget staff in the preparation and administration of the Governor's Budget. The computer system provides information on the budget and enrolled bills having financial implications.

## Authority

Government Code Sections 13073, et seq., and Revenue and Taxation Code Sections 2227, et seq.; and 11005.6.

Executive distribution .....	1	1.4	1.4	23,188	36,632	38,420

## a. Economic Research

The Economic Research Unit prepares economic forecasts to provide the basis for revenue estimates. Reports and reviews of the national and California economies are prepared so that all branches of state government may be kept currently informed of changes in the economic situation or outlook in both the national and California economies. Economic advice and technical assistance are provided as requested by state agencies, the Administration, and the Legislature. The unit also prepares the *Economic Report of the Governor*, *California Statistical Abstract*, and *Economic Indicators*.

Collection of data for research requires cooperation with government and private research groups to facilitate the exchange of information and analyses. New or extended research methodologies are developed to improve forecasts and analytic procedures.

*One new position is proposed for the budget year to meet the increased demands for economic analyses and forecasts.*

## Output

Development of basic economic data.  
 Economic analyses and estimates.  
 Statistical compilations.  
 Special studies.  
 Economic reports and reviews.  
 Technical assistance.

Input	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	4.4	4.4	5.4	\$101,449	\$115,859	\$143,556

DEPARTMENT OF FINANCE—*Continued*

## b. Revenue Estimating and Tax Research

The Financial Research Unit maintains a basic and applied research function to support the revenue estimates required in preparation of the state financial plan, the analysis of financial legislation, and the evaluation of any financial developments of importance to the state. In addition, major studies, task forces, and special requests or projects initiated by the Administration, the Legislature, or state agencies require specific research into state revenue sources, including the use of samples and surveys.

The objectives of the Financial Research Unit also require cooperation with various state agencies, local governments, private consultants, firms, research groups, and comparable revenue units in other states to develop data and improve estimating methodologies.

Research projects also provide the basis for policy recommendations for the Administration. These may involve tax programs, the impact of various tax changes and the long-term projection of potential revenue sources.

New or extended research methodologies are developed to improve forecasts and analytical procedures.

One position established in the current year and reported to the Legislature is proposed in the budget to meet increased workload required in the analyses of proposed legislation, constitutional initiatives, and budget requirements associated with the new renters relief program for senior citizens established by Chapter 1060, Statutes of 1976. The position will also be used to strengthen the research and computer application capability needed in this activity.

## Output

Development of revenue estimates for the Governor's Budget.

Monthly analyses of the revenue situation on an accrual basis.

Special studies.

Statistical analyses.

Long-term projections used to support policy recommendations or analyses as requested.

Technical assistance.

## Input

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	8.5	9.5	9.5	\$195,651	\$224,055	\$264,181

## c. Demographic Research

Demographic data and analyses are required for research and planning purposes by users in state agencies, county and local governments, the federal government, academic institutions and school districts, and private firms. This unit provides the single source for official data.

The Population Research Unit carries out a basic and applied research function directed primarily at the production of population figures which underlie the caseload estimates of virtually all state agencies. This responsibility enables the unit to provide special aid to all levels of government and to the private sector, and in turn, to secure information from all levels of government and from the private sector in the development of its estimates and projections. Provides annual estimates of city-county population for local tax limitations.

Three positions established in the current year are proposed for the budget year to prepare community college district population projections as a result of Chapter 341, Statutes of 1976.

## Output

Analyses and projections of enrollments in public schools, colleges, and universities.

Development of basic data and statistical compilations.

Local (city and county) population estimates for tax distribution, tax rate limitation, special survey design, and supervision.

Design and testing of methods of research and data collection. The federal-state cooperative program on methodology for local estimates is an example.

Publish annual estimates of state population and its composition.

Preparation of short—and long—range population projections.

Advisory services to state agencies, other levels of government, and the business community.

## Input

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures.....	17.9	20.9	19.9	\$571,593	\$587,188	\$634,073

## d. Computer Support

The computer support operation assists the budget staff and departments in the preparation, enactment and direction of the annual financial plan through the use of data processing systems. Legislative action on the Budget Bill and other enrolled bills with a financial impact are maintained by the computer system in order to maintain current information on the fiscal impact of this type of legislation. These computer files are available to the Legislature and its staff.

There are currently six subsystems: (1) budget posting—summary schedule generation, (2) appropriation control accounting, (3) Schedule 10 generation, (4) budget changes and enactment, (5) budget planning, and (6) financial legislation.

## Output

Budget summary Schedules 3, 6, 7, and 8.

Supplemental schedules of appropriations—Schedule 10.

Lists of legislative and executive changes to Assembly and Senate Budget Bills.

Final list of changes to the Governor's Budget.

Financial Legislation Report.

Planning Estimate Report

Special reports and analyses using the appropriation data base which reflects planned, authorized, and past-year actual expenditures by category or project within each appropriation. In addition, the data base reflects all appropriation adjustment, e.g., budget revisions and executive orders starting with the 1973-74 fiscal year.

## Input

Expenditures.....	6.8	6.8	6.8	\$156,522	\$178,901	\$188,524

## DEPARTMENT OF FINANCE—Continued

## V. EXECUTIVE

## Program Objectives and Description

The Director of Finance provides active leadership in maintaining a fiscally sound state government. The Director serves as the Governor's chief fiscal policy advisor to provide guidance on matters of financial policy. He also serves as a member on many boards and commissions as required by law, including the Franchise Tax Board, the Pooled Money Investment Board, the State Lands Commission, the Housing Bond Credit Committee, and the State Public Works Board. The Director and his staff provide executive leadership and policy direction required for the successful achievement of department program objectives.

## Authority

Government Code Sections 13000, et seq.

# COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

## Program Objectives and Description

The Commission on California State Government Organization and Economy was created by the 1961 Legislature and has responsibility for submitting reports of its findings and recommendations to the Legislature and to the Governor. The Commission is composed of two Senators, two Assemblymen and nine citizen members, five of whom are appointed by the Governor, with two each appointed by the Speaker of the Assembly and the Senate Rules Committee. The professional staff of the Commission consists of an Executive Officer, a secretary, and consulting staff retained for each project.

To secure assistance for the Governor and the Legislature in promoting economy, efficiency, and improved service in the transaction of the public business in the various departments, agencies, and instrumentalities of the executive branch of state government.

To make the operation of all state departments, agencies and instrumentalities, and all expenditures of public funds, more directly responsive to the wishes of the people as expressed by their elected representatives.

In the 1976-77 fiscal year, the Commission completed its work on the review of the Administration of State Health Programs and conducted a series of public hearings on that report. It commenced organizational/management studies of the Department of Motor Vehicles and Department of Transportation, in addition to studying the question of the State's withdrawal from the social security system. Analysis was also commenced of the unused school sites of the State's elementary and high school districts. Hearings and recommendations were also made to the Governor and Legislature regarding the Governor's Reorganization Plan # 1 of 1976. *The 1977-78 budget proposes one new position, a Junior Staff Analyst, and a small temporary help blanket to help meet increasing workloads to be funded within existing resources.*

## **COMMISSION ON INTERSTATE COOPERATION**

### **Program Objectives and Description**

The objectives of the commission are to carry forward the participation of this state as a member of the Council of State Governments, both regionally and nationally; to confer with officers of other states and of the federal government; to formulate proposals for cooperation between the state and other states and with the federal government; and to organize and maintain governmental machinery for such purposes.

The Legislature eliminated total direct funding for the Council of State Governments in the 1975 budget bill. The amount budgeted for 1976-77 and proposed for 1977-78 is the difference between the total assessment of the Council and the amount of the National Governor's Conference which is budgeted in the Governor's Office in the same manner as the Legislature has included the amount for the National Conference on State Legislators in the budget of the Senate.

### **Authority**

Government Code Sections 8000-8013 inclusive. ,

## **SUMMARY BY OBJECT RECONCILIATION WITH APPROPRIATIONS STATE OPERATIONS General Fund**

## CALIFORNIA ARTS COUNCIL

## Program Objectives and Description

The Arts Council, established by Chapter 1192, Statutes of 1975, consists of nine members appointed by the Governor with the advice and consent of the Senate. Members are compensated at the rate of \$100 per meeting and are reimbursed for necessary traveling and other expenses incurred while performing official duties.

The Council's goals are as follows:

## SHORT-RANGE GOALS

- (1) To nurture and support the many sprouts of creativity struggling throughout the State.
- (2) To recognize and foster diversity of form and expression.
- (3) To employ artists in their own communities and facilitate mutual exposure for the benefit of both.
- (4) To insure equitable distribution of the State's arts resources.
- (5) To serve as a center for gathering data about the needs and desires of citizens within the State, and to give information and assistance to artists, arts organizations, and the public; so as to get them all together.

## LONG-RANGE GOALS

- (1) To ultimately make the arts and creativity an integral, accepted part of daily life throughout the State—neighborhood by neighborhood, with all their local desires, diversities, and styles.
  - (2) To deepen the sense of beauty and complexity of the land of the State of California, and encourage expression that draws from and clarifies the actual places we live, to the end of a better life for both people and Redwoods.
  - (3) To achieve viable economic niches for people involved in creative activity.
  - (4) Through the above, to maintain habitat for the great labor-intensive art forms that have come to us from the past, and to stimulate creative innovation and the search for new forms.
  - (5) To ultimately have a society so deeply dyed with art, craft, and style as to render an Arts Council unnecessary.
- In the budget year, an increase of \$2,438,964 is proposed for the support of the Council's grant program. Included are eight proposed new positions, a reduction of one existing clerical and a related increase of \$51,347 in operating expenses. In addition, \$3,000 for unanticipated grant contract processing fees is proposed.*

## CALIFORNIA ARTS COMMISSION

## Program Objectives and Description

The purpose of the Commission is to provide support funding for the arts, through grant awards of state and federal funds on a matching basis to generate additional funds from nonstate sources.

Funding categories reflected requests from arts organizations for support of new and ongoing programs.

Research and technical assistance were also provided for communities through maintaining a support base of information and reference sources.

The California Arts Commission was terminated December 31, 1975 and the Arts Council replaced it on January 1, 1976.

# CALIFORNIA PUBLIC BROADCASTING COMMISSION

## Program Objectives and Description

The California Public Broadcasting Commission was created in 1975 by Chapter 1227 as an independent agency of state government with a mandate to develop and support a statewide policy to foster the growth and development of public radio and television services to the people of California. Nine of its eleven members are appointed from the general public by the Governor, Senate Rules Committee, and the Speaker of the Assembly; the Superintendent of Public Instruction and the Director of the California Postsecondary Education Commission serve as ex officio members.

The commission's activities include (a) making grants to public broadcasting stations for improvement of operations and facilities, (b) providing interconnection service for California public radio and television stations, (c) making grants for the development, production, and acquisition of public broadcast programming, and (d) conducting research and demonstration activities relating to public broadcasting. As set forth in statute, the commission, in fulfilling its responsibilities, works closely with its radio, television, and instructional advisory committees and must utilize existing public broadcasting facilities to the maximum feasible extent. The statute further stipulates that "all decisions affecting the content and scheduling of such service are the sole responsibility of each licensee and shall be free from improper interference."

During the 1976-77 year the commission's first priority for program funding is in the area of statewide public affairs programming designed to allow Californians to receive fresh, in-depth information on major public policy issues. *For the 1977-78 budget year the commission proposes to expand and improve this service to include non-political public affairs programming, cultural programming, and instructional programming. Grants to public broadcasting stations are being augmented by \$430,112 in 1977-78 for these purposes.*

## COMMISSION FOR ECONOMIC DEVELOPMENT

### Program Objectives and Description

The Commission was created by Chapter 1230, Statutes of 1971. This law, which went into effect March 4, 1972, provides that the Commission shall consist of 17 members. These include the Lieutenant Governor, who serves as chairman; 10 Governor's appointees, of which only six can belong to the same political party; three Senators appointed by the Senate Rules Committee; and three Assemblymen appointed by the Speaker. Chapter 253, Statutes of 1975, changed the expiration date on the life of the Commission from January 1, 1976 to June 30, 1977. The Commission is sponsoring legislation in the 1977-78 regular session to repeal the expiration date. The enabling legislation specifically provides that the Commission shall: (1) make recommendations concerning legislation affecting the economic development of the State, (2) consider programs to further the economic development of the State, study laws and programs of other states relating to economic development and confer with governmental officials and representatives of business and industry and any other persons or organizations interested in the promotion of economic development, (3) appoint advisory committees.

The Commission is currently engaged in research programs designed to generate programs of legislation to benefit the California economy.

The Commission is also engaged in a study of the economic impact of the business inventory tax on existing businesses in California and with respect to California's ability to attract business from other states and nations.

The Commission staff continues to answer many inquiries from firms outside of California requesting information about the state and its economic environment.

*The proposed 1977-78 budget is contingent upon the Legislature giving statutory authority to extend the June 30, 1977 expiration date of the Commission.*

## MILITARY DEPARTMENT

The Military Department provides a military organization trained and equipped to support the Constitution and to protect life and property during periods of civil emergency and natural disaster; and furnishes trained units for federal mobilization and for state missions as required by the Military and Veterans Code or as directed by the Governor.

The Department is organized into a command element, a special staff and a joint staff in order to accomplish the command and management responsibilities of the Commanding General. Staff activities serve both the Army and Air National Guard and include personnel, recruiting, information and administrative services, training, logistics, and resource management. The California Cadet Corps, although funded separately, is assigned to the Army National Guard staff training element for general supervision. The Department is organized in general accordance with Department of the Army and Department of the Air Force staffing patterns.

Full-time personnel of the Department are state active duty, state civil service or federal civil service employees.

### I. ARMY NATIONAL GUARD

#### Program Objectives and Description

The objective of this program is to manage Army National Guard units, personnel, supplies and equipment so as to maximize the readiness of those forces when required for federal missions in the military defense of the United States or for state missions in support of civil authority.

The Army National Guard consists of 181 company-size units allotted to the state by the Department of the Army. The Military Department, in turn, stations those units at locations deemed best suited to insure their readiness and availability to perform state and federal missions. The current authorized strength of the Army National Guard is 21,000 officer and enlisted personnel. *One custodial position is proposed in 1977-78 for new facilities at Palmdale. Eight firemen and four support personnel, administratively established in prior years, are proposed to be continued at Army facilities based upon support from federal funds.*

#### a. Training

California Army National Guard units utilize training programs established by the Department of the Army, and train under the general supervision of Active Army personnel. Units are inspected frequently by National Guard and Active Army officers to assure attainment and maintenance of readiness objectives. Complementing unit training, more than \$2,000,000 in federal funds are available in fiscal year 1976-77 to support the attendance of California Army National Guard personnel at federal military schools, and an equal amount is expected to be available for that purpose in fiscal year 1977-78.

#### b. Logistics

Over one-half of the federal funds provided to support the Army National Guard are to provide the supplies, equipment and maintenance support required for training and operations conducted in furtherance of readiness objectives. Camp San Luis Obispo is a state-owned installation which serves as the primary logistical base for receipt, storage and distribution of federal supplies and equipment. Camp San Luis Obispo, together with Camp Roberts and Fort Irwin are major outdoor training areas that are utilized year-round by the National Guard, Army Reserve and Active Army forces. Camp Roberts and Fort Irwin are federal installations licensed to and operated by the Military Department with 100 percent federal funding support. Fiscal year 1977-78 federal funding will approximate \$3,750,000.

Army National Guard units, and their supplies and equipment, are housed in 118 training bases (armories). Local maintenance support is provided

## MILITARY DEPARTMENT—Continued

at 39 organizational maintenance shops, with higher echelon maintenance accomplished at seven support facilities. Over 90 percent of the state funds provided are directed toward logistical activities.

### c. Command Support

This element provides command direction and policy guidance for the program. Primary activities include the issuance of directives and coordination of training and logistics; supervision of training and determination of readiness levels; and contingency planning and operational control over elements ordered into state service during emergencies.

### d. Personnel

This element establishes standards for administrative and military personnel practices. It develops policies, procedures and standards for management of personnel and other records. It administers military personnel systems, including procurement, assignment, payment, promotion, retention, separation and retirement of Army National Guard personnel.

## II. AIR NATIONAL GUARD

### Program Objectives and Description

The objective of this program is to manage personnel and other resources so as to maximize the readiness of trained and equipped air forces when required for federal or state missions.

The ANG consists of an air defense unit at Fresno, a tactical airlift unit at Van Nuys, an air rescue and recovery unit at Hayward, and a tactical air support unit at Ontario. Additionally, communications units are located at North Highlands, Van Nuys, Hayward, Compton, Costa Mesa, and Los Angeles. All of these units are allotted to the state by the Department of the Air Force. The authorized strength of the California Air National Guard is 5,270. *One maintenance mechanic for Sepulveda and one building maintenance worker for Ontario are proposed effective July 1, 1977, for workload. Fifteen security guards, administratively established in prior years, are proposed to be continued based upon support from federal funds.*

### a. Training

Plans are developed and maintained for employment of ANG forces in support of state government during emergencies and federal mobilization in accordance with national war plans. Support plans include airlift, communications and other specialized support. Operations is responsible for the control and management of resources committed to these missions and the implementation of training and flying schedules. Training is conducted utilizing USAF technical schools and on-the-job training. Maintenance of skills is accomplished by correspondence courses and actual job experience. Each individual performs training a minimum of 63 days per year and proficiency is assured through periodic individual and unit testing conducted by regular Air Force advisors.

### b. Logistics

The federal government provides virtually all supplies, equipment, transportation, subsistence and support services necessary for training, deployment and commitment of the ANG. Major tasks are procurement, issuance and control of repair parts, administrative supplies, uniforms, fuels, meals, ammunition, mobilization stock-piles, housekeeping and the highly technical maintenance of over \$216,000,000 worth of aircraft, 765 wheeled vehicles, and modern mobile radio, teletype, and radio relay equipment. The State of California operates and maintains nine ANG facilities under a contract with federal reimbursement for a major portion of the costs. The federal government also provides funds for major and minor capital outlay, repair projects and runway crash fire protection. Construction activities are administered by the Military Department with federal funds totaling \$23,209,114 since 1946.

### c. Personnel

This element develops and implements personnel policies and systems, and accomplishes the procurement, selection, appointment, enlistment, commissioning, assignment, classification, reporting, promotion evaluation, separation, and discharge of Air National Guard personnel; establishes criteria and procedures for maintenance of personnel records; and provides services including the development and publication of policies concerning correspondence, records, files, reports, libraries, processing of security clearances, and the safeguarding of classified information.

### d. Command Support

This element performs all functions of command to insure achievement of program objectives. Primary tasks include development of long-range plans and programs concerning state military requirements, determination of current requirements, and analysis of current operational capabilities of 45 California Air National Guard organizations.

## MILITARY DEPARTMENT—Continued

## III. OFFICE OF THE COMMANDING GENERAL

## Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services prerequisite to successful accomplishment of department objectives. The Commanding General exercises direct command over the State Military Forces until such time as those forces have been mobilized under federal authority.

A chaplain position is proposed to provide centralized guidance for a statewide human relations effort. A policy and liaison officer is proposed to ensure the viability of the statewide recruitment and retention effort through better community relations. A machine operator is proposed on the basis of reproduction workload requirements. In addition, twenty-five positions that were administratively continued from previous years for the California Specialized Training Institute are proposed for permanent establishment with the expectation of continued federal support.

## a. Command Management

This element determines overall department policies, exercises general guidance and direction over department activities, and provides administrative services, to include recruiting and retention, publication and distribution of publications, personnel services for all full-time state and federal employees in the department, maintenance of all official records required for state purposes, legal and inspector general services, procurement of supplies and services, public information, data processing, property accounting, and fiscal accounting and control.

## b. Military Support to Civil Authority

This element develops the policies, plans and procedures that will assure the timely, orderly and effective response of State Military Forces when called into state service by the Governor due to domestic emergency or disaster, or when called or ordered into federal service.

Resource data, capabilities of military forces and policies and procedures governing the employment of military personnel and other resources in support of civil authority are continuously reviewed. Liaison and coordination is maintained with federal, state and local agencies to assure mutual understanding and unity of purpose and action when State Military Forces are called upon to support the emergency needs of civil authority. A special force, consisting of approximately 1,000 Army and Air National Guard personnel was established in fiscal year 1975-76 to provide the initial response in any emergency. Army National Guard military police personnel and Air National Guard security personnel provide the nucleus of the force. Members of the force are required to undergo the course of instruction established by POST for peace officers.

The California Specialized Training Institute, located at Camp San Luis Obispo and operated by the department, provides training to civilian and military personnel in civil emergency management operations, officer survival and internal security, and school security.

## IV. MILITARY RETIREMENT

## Program Objectives and Description

This program provides retirement benefits, similar to those provided by the federal military services, to persons who entered state active duty prior to 1 October 1961 and have served 20 or more years, at least 10 of which have been on state active duty. All other state employees are covered by the Public Employees' Retirement System. Currently, there are 45 retirees receiving benefits under the Military Retirement Program, and no new retirees are budgeted for 1977-78.

## MILITARY DEPARTMENT—Continued

## V. CALIFORNIA CADET CORPS

## Program Objectives and Description

This educational program is specifically designed to develop in the youth of the state qualities of leadership, patriotism and citizenship. An expansion authorized for fiscal year 1976-77 provided for an increase in the number of participating junior and senior high schools from 68 to 102 and enrollment from 3,200 to 4,800 cadets, concentrating the expansion on those intermediate and secondary level schools having high minority enrollment. The program is available to young women as well as young men. *The addition of 0.3 captain coordinator personnel years is proposed to provide program continuity throughout the year including summer activities, and 0.5 warehouseman personnel years is proposed on the basis of increased procurement workload related to the 1976-77 program expansion.*

## PUBLIC UTILITIES COMMISSION

The objectives of the Public Utilities Commission are:

1. To provide the public with the lowest reasonable rates for services by utilities, transportation, and warehouse companies.
2. To make certain that utilities and transportation companies render adequate service and have sufficient facilities to meet the needs of the public.
3. To ensure that the public has stable, efficient utilities and transportation services by controlling and limiting entry into the field to those applicants with financial responsibility and demonstrated capability to render adequate service.
4. To promote public safety and accident reduction by establishing and enforcing safety regulations for utility and transportation companies, as well as for railroad highway grade crossings.
5. To determine the just compensation for the acquisition of utility or transportation company property by political subdivisions.

## SUMMARY OF PROGRAM REQUIREMENTS

## I. REGULATION OF UTILITIES

## Program Objectives and Description

Utilities in California have been granted exceptional powers and privileges by the State, including exclusive service areas, which preclude customers from obtaining service from others. State regulation is necessary to protect the public interest and ensure fair and impartial rates as well as adequate service facilities rendered by stable, financially responsible companies. Regulatory controls have also been established to promote the safety of employees, customers, and the public at large.

The objective is to provide the public with adequate and safe utility services at the lowest reasonable rates.

Contained within the General Fund appropriation for 1976-77 is an increased authorized expenditure level of \$950,000, with a corresponding decrease in authorized transportation rate fund expenditures. This shift is also reflected in the 1977-78 fiscal year.

The Commission is proposing to create a central consumer Relations Branch to service the Utilities and Transportation Divisions by providing a more efficient and timely methodology in processing consumer complaints and inquiries. To accomplish this and to meet increased workload, five positions are proposed for 1977-78. A Hearing Examiner and temporary help support is proposed based on projected workload increases resulting from new rate cases.

## Authority

California Constitution, Articles XI and XII; Public Utilities Code, Division I, Regulation of Utilities.

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78

a. Regulation of rates .....	253.2	294.2	294.5	\$6,125,038	\$7,620,487	\$8,024,061
b. Service and facilities .....	60.7	74	72.4	1,542,018	1,900,668	1,899,775
c. Certification .....	30.6	44	34.9	776,935	1,129,096	939,960
d. Safety .....	9.3	10.7	10.7	220,790	276,682	280,514

## a. Regulation of Rates

The Commission's responsibility for the establishment and maintenance of reasonable rates for utility service is accomplished by making intensive studies of cost of service, cost of plant, earnings, and financial analysis which are entered into evidence at public hearings. Similar studies are made to form the basis for negotiated rate settlements and reductions. The Commission's attorney represents the people of the State of California and the Commission in all proceedings involving any questions under the Public Utilities Act and any order or act of the Commission. The Commission participates in rate and certification proceedings before federal regulatory commissions and in the courts.

In the budget year, \$228,085 from the General Fund is proposed to implement Chapter 763/76 (SB 2008) creating an Energy Supply Team. Future support commencing in the 1978-79 fiscal year is to be derived from contracts with other state agencies for representing them before Federal proceedings. In addition, \$100,000 in 1977-78 is proposed to continue research in the fields of petroleum energy regulation and energy supply and development. Continuation of future funding in this area is to be reviewed on an annual basis.

## PUBLIC UTILITIES COMMISSION—Continued

Output	1975-76	1976-77	1977-78
Rate cases decided .....	83	93	108
Resolutions issued .....	851	950	1,060
Advice letters processed .....	1,833	2,083	2,333
Inquiries and complaints processed (rates) .....	27,500	28,000	29,200
Electric energy adjustment filings completed .....	36	44	44

Hydraulic offset rate increase filings processed .....	45	45	51
<b>Input</b>	<b>75-76</b>	<b>76-77</b>	<b>77-78</b>
Expenditures .....	253.2	294.2	294.5
	1975-76	1976-77	1977-78
	\$6,125,038	\$7,620,487	\$8,024,061

## b. Service and Facilities

Utility services are regulated through Commission orders issued as a result of investigations, studies, and public hearings related to the adequacy of service and facilities. A large part of new facilities are financed through the issuance of stocks or bonds which require Commission authorization prior to issuance.

The number of customers is a reasonable measure of the output of this element. With a continual growth in the general population and the number of customers in the State, the number of service connections and the related activities of maintaining adequate service and facilities will also continue to expand. *One-time funding of \$35,000 in 1977-78 is proposed to complete and monitor the end-use priorities program which was developed pursuant to Chapter 757/76 (SB 1625).*

Output	1975-76	1976-77	1977-78
All utility customers (millions) .....	23.2	23.9	24.5
Gas utility customers (millions) .....	6.49	6.62	6.76
Electric utility customers (millions) .....	6.49	6.67	6.85
Water supply and service investigations completed .....	50	75	75
Inquiries and complaints processed (service) .....	14,800	15,000	15,800
<b>Input</b>	<b>75-76</b>	<b>76-77</b>	<b>77-78</b>
Expenditures .....	60.7	74	72.4
	1975-76	1976-77	1977-78
	\$1,542,018	\$1,900,668	\$1,899,775

## c. Certification

Before utilities can exercise any rights or privileges of franchise, they must obtain certification that public convenience and necessity require their exercise of these rights.

New or existing entities file applications for certification of public convenience and necessity to construct or extend facilities to areas not previously served. The processing of the applications involves studies and investigations covering financing programs, operations, and reasonableness of initial rates.

The number of decisions issued gives a reasonable measure of output and shows how utility service is being reviewed for the benefit of the consuming public in California.

Output	1975-76	1976-77	1977-78
Decisions issued .....	73	81	88
Proceedings completed, environmental impact .....	7	9	9
Out-of-state gas supply projects completed .....	-	3	1
Ex parte decision drafts completed (hydraulic) .....	20	20	20
<b>Input</b>	<b>75-76</b>	<b>76-77</b>	<b>77-78</b>
Expenditures .....	30.6	44	34.9
	1975-76	1976-77	1977-78
	\$776,935	\$1,129,096	\$939,960

## d. Safety

The safety element of the Commission's regulation of utilities program is divided into two components: gas safety and electric safety.

In its endeavor to meet the objectives of this element, the Commission establishes minimum standards for the construction, operation and maintenance of utility plants to promote the health and safety of employees and the public.

Accident reports and other utility reports are made to ensure that these standards are maintained. This is accomplished through field investigations, tests of utility plants, and examination of methods of construction, operating procedures, and maintenance; and public hearings where appropriate.

Output	1975-76	1976-77	1977-78
<b>Gas Safety:</b>			
Number of accident reports prepared .....	275	275	275

	\$220,790	\$276,682	\$280,514

## PUBLIC UTILITIES COMMISSION—Continued

## II. REGULATION OF TRANSPORTATION

## Program Objectives and Description

State regulation has been necessary to provide the general public with a stable, efficient, and dependable transportation and warehouse system, at a reasonable rate. This regulation ensures freedom from destructive rate wars, financially irresponsible operations, curtailment of service, and inadequate routing and scheduling. In addition, this regulatory program provides that safety standards are met in railroad and other transportation and warehousing operations, as well as at railroad highway grade crossings.

## Authority

California Constitution, Articles IV and XII; Public Utilities Code, Division 2.

e. Just compensation .....	—	—	—	—	—	—

## a. Regulation of Rates

Appropriate charges to the public for transportation and warehouse services are accomplished through the establishment and maintenance of minimum rate tariffs for for-hire carriers of freight and by requiring common carriers and warehousemen to construct and file with the Commission their schedule of rates and charges in accordance with the rules established by General Orders of the Commission. The Commission holds public hearings at which studies of costs, revenues and expenses are received in evidence to assist the Commission in determining the reasonableness of the rates the public is required to pay.

The Commission's attorney represents the people of the State of California and the Commission in all proceedings involving any questions under the Public Utilities Act and any order or act of the Commission. The Commission participates in rate cases before the Interstate Commerce Commission and rate violation and other enforcement cases in the courts.

## Output

	1975-76	1976-77	1977-78
Formal proceedings completed .....	489	500	520
Special tariff docket filings processed (property) .....	276	280	285

## Input

	75-76	76-77	77-78	1975-76	1976-77	1977-78
Expenditures .....	281	258.9	259.3	\$6,552,928	\$6,709,011	\$6,869,659

## b. Service and Facilities

Formal proceedings are filed requesting changes in the level of service of all classes of transportation companies. Special studies are made in connection with these proposed changes. The studies test the economic justification or reasonableness of the proposed service change. The studies include investigations, reports, and testimony at Public Utilities Commission hearings on adequacy of bus services; and review and hearings on proposals of railroads to discontinue passenger trains before the Public Utilities Commission and Interstate Commerce Commission.

The control and supervision of financing practices of carriers are essential because of the effect of such practices on capital costs and the availability of capital funds, both important elements in providing adequate service at reasonable costs to the customers. Commission authorization is required for security issuance and such related matters as transfers of utility properties, mergers, and consolidations for the purpose of assuring sound, well-balanced financing and capital structures.

## Output

	1975-76	1976-77	1977-78
Formal proceedings completed .....	13	16	18
Informal complaints processed (passenger) .....	420	460	500

Expenditures .....	16.1	14.9	14.9	\$413,316	\$385,039	\$391,678

## c. Licensing

Carriers must obtain a certificate for authority to operate as a for-hire carrier or warehouseman in California. Before obtaining authority to operate, they must establish ability and reasonable financial responsibility. All for-hire carriers must deposit public liability and property damage insurance with the Commission. Interstate motor carriers are required to register their interstate operating authority with the Commission.

After issuance, carriers' certificates and permits are subject to suspension, reinstatement or revocation for failure to comply with statutes and Commission orders. Activities related to carrier licensing are analyses of applications for financial responsibility, insurance coverage, and nature and scope of proposed operations; hearings related to certificate applications; and enforcement of licensing requirements.

## PUBLIC UTILITIES COMMISSION—Continued

Applications to operate as a public utility carrier are analyzed to determine compliance with the Commission's procedural requirements, reviewing draft decisions by the examiners, preparing operating authorities in appendix form and monitoring the mandatory requirements contained in the decisions that issue from these proceedings.

## Output

## d. Safety

The safety element in the regulation of transportation program is divided into two components: railroad safety and grade crossing safety.

The railroad safety component is concerned with promoting the adoption and enforcement by railroads and rapid transit systems of safe and efficient operations and maintenance practices and facilities, and the compliance by such carriers with Commission and special orders and State law principally for the promotion of efficiency and safety of operating and nonoperating employees and the public. The grade crossing safety component involves requiring installation of automatic protection devices or the construction of overpass or underpass structures to promote safety at railroad-highway grade crossings.

In the railroad safety component of the safety element, accidents are investigated and causes analyzed for corrective action by the railroads in an accident prevention program. Inspections and surveys involving safety, health and comfort of employees, passengers, customers, and the public are made. These cover railroad rolling stock, main track areas and industrial track areas, repairs, maintenance and operation, and building and bridge construction.

In the grade crossing component, the Commission promotes or orders the installation of automatic protection devices, or underpasses, or overpasses at dangerous railroad-highway crossings. Inspections are made of crossings to determine accident potential and whether cities or counties and the railroads should be required to install automatic protection devices or whether existing protection, if any, should be improved. In addition, complaints from the public regarding unsafe conditions at grade crossings are investigated by this activity. Investigations are conducted of accidents at railroad crossings and for the authorization of new crossings and spur tracks or alterations of existing crossings. Studies are made of the need for the construction of grade separation structures. As vehicular traffic increases with the growth of California, there will be a greater need for improved grade crossing protection and for grade separations to replace grade crossings that have reached their limit capacity to handle the vehicular traffic interspersed with delays caused by train movements. *Four BART consultants are proposed to continue in 1977-78 to be funded from reimbursements. The need for the continuation of these positions will be reviewed on an annual basis.*

Totals .....	48.6	44.9	44.9	\$1,179,722	\$1,166,786	\$1,205,890

## e. Just Compensation

The Public Utilities Code provides that upon petition of a political subdivision, the Commission shall determine the just compensation for the acquisition of a transportation company's property. The need would arise should a political subdivision desire to acquire a transportation company's property but be unable to negotiate compensation with them. Upon receipt of such a request, the program involves valuation, depreciation, appraisal, and financial studies of transportation company property, and placing such studies in evidence through testimony and exhibit at public hearings. After the hearing, the Commission finds and fixes a single sum to be paid for the properties. If the Commission finds that severance damages should be paid, the just compensation for such damages is found and stated separately.

## Output

No work is planned in this element until a political subdivision of the State makes a formal request for such services.

*To meet anticipated workload increases in 1977-78, one EDP position is proposed in the Data Processing Branch.*

## COMMISSION ON THE STATUS OF WOMEN

## Program Objectives and Description

The Commission on the Status of Women works toward maximum participation of women in California society.

The Commission was originally created by Chapter 1378 of 1965, continued by Chapter 854 of 1967, and by Chapter 721 of 1969. Chapter 541 of 1971 continued the Commission without a termination date, extended its areas of concern, and added action projects and consultive functions to its mandate.

The Commission examines all bills introduced into the Legislature which affect women's rights, maintains an information center on current needs of women, with its resources available to government agencies and private groups and individuals, and gives consultive assistance to organizations working on local levels to assist women. Emphasis is on legislation, education, employment and counseling.

Legislation provides for a 17-member commission, consisting of the Superintendent of Public Instruction, the Chief of the Division of Industrial Welfare, three Members of the Assembly and one public member appointed by the Speaker of the Assembly, one public member and three members of the Senate appointed by the Senate Committee on Rules, and seven public members appointed by the Governor. Chapter 382 of 1973 provided for staggered four-year terms for public members, commencing July 1, 1974.

In the current year, an Office of Criminal Justice Planning grant will finance 2.3 administratively established positions. Approximately 0.4 of these positions will continue in the budget year to the August 31, 1977 grant termination date.

Additionally, \$13,500 is available in the current year for operating expenses from an Intergovernmental Personnel Act grant for continuation of a recruitment program involving local Status of Women Commissions.

In the budget year, \$11,340 is proposed for training workshops to develop job finding skills for minority women. In addition, \$5,100 is proposed to fund consultants and operating expense to assist in the development of legislation of concern to women. Reimbursements have been increased by \$9,200 in 1977-78 for the support of legal information workshops.

## INTERGOVERNMENTAL BOARD ON ELECTRONIC DATA PROCESSING

## Program Objectives and Description

The primary objectives of the Board are to: (1) facilitate the establishment of efficient, cost-effective, practical systems for intergovernmental flow of information required to conduct government business, (2) see that development and implementation of needed systems is undertaken, (3) see that there is true coordination with all levels, and (4) see that the methods used achieve an integration of the best design ideas available from every level and incorporate the best features from currently operating systems, systems under development and implementation, and systems in the design phase.

In the current and budget year to more effectively meet their objectives, the Board is proposing to convert a secretary I and temporary help funds to a senior stenographer and a staff services analyst.

## NATIVE AMERICAN HERITAGE COMMISSION

## Program Objectives and Description

The Native American Heritage Commission was created by Chapter 1332 (AB 4339) Statutes of 1976. The nine members of the Commission will be appointed by the Governor with the advice and consent of the Senate. The amount of \$33,000 was appropriated for half year 1976-77 costs and \$66,000 is proposed for full year support for 1977-78.

The specific powers and duties of the Commission include identifying and cataloging places of special religious or social significance to Native Americans; making recommendations to the Legislature relative to the protection and preservation of and access to sacred places; making recommendations to the Department of Parks and Recreation and the California Arts Council relative to Indian matters; bringing action to prevent severe or irreparable damage to sacred or sanctified places; assisting Native Americans in obtaining access to sacred places, and; to assist state agencies in any negotiations with agencies of the Federal Government for protection of Native American sacred places located on federal lands.

## Authority

## AMERICAN REVOLUTION BICENTENNIAL COMMISSION OF CALIFORNIA

The American Revolution Bicentennial Commission of California was created in 1967 by Chapter 1425, Statutes of 1967 (Senate Bill 1327). The purpose of the commission is the planning and coordinating in this state of the commemoration of the "epochal period of approximately 1765-1783."

Program Requirements	75-76	76-77	77-78	1975-76	1976-77	1977-78
American Revolution Bicentennial Commission	5.1	1.7	-	\$414,470	\$124,030	-

Federal funds <sup>f</sup>				344,931	85,000	-

### Program Objectives and Description

The commission shall provide for, assist, sponsor and promote projects and programs commemorating the bicentennial of the American Revolution and the events which preceded the years of actual hostilities.

One of four actions may be taken by the commission on projects submitted for consideration: sponsorship, endorsement, approval, or recognition—each carrying with it certain specifics as set forth in the pamphlet on *Purposes and Procedures*.

Projects must conform to one or more of three themes selected by the national American Revolution Bicentennial Commission: Heritage '76, Festival USA, Horizons '76.

The commission operates without the appropriation of state funds for its purposes. Expenditures are to be financed from donations, gifts, grants from private and other public agencies, and from the sale of medallions and other commemorative items.

The Federal government is no longer providing grants for the support of state bicentennial commissions, nor is it known what other funds may be available for the sponsorship of bicentennial projects. Therefore, no funds are included in the 1977-78 fiscal year for the Commission.

# MOTION PICTURE DEVELOPMENT COUNCIL

## Program Objectives and Description

The objective of the council is to prepare and implement a program to promote the production of motion picture films, and other motion picture and television film products within the State of California.

The council will:

1. Prepare and distribute appropriate promotional materials pointing out desirable locations within the State of California for the production of motion pictures.

2. Prepare and distribute appropriate promotional materials which illustrate and stress the advantages and possibilities of filming within the State of California those scenes and/or films which are ostensibly set elsewhere.

3. Assist film companies in securing permits for location filming, and offer other appropriate services connected with motion picture production.

4. Under the provisions of the law appointing the Motion Picture Development Council the sole permit-granting authority for commercial filmmaking use of state-owned or state-operated properties, develop the mechanisms for granting such permits, and implement this program.

5. Facilitate cooperation from local government, state and federal government agencies and private sector groups in the location and production of motion pictures in the State of California.

The Motion Picture Development Council will perform these duties as an economic development office of state government.

The council was established in the Governor's Office as of January 1, 1976. Current year funding is being provided for by the 1976-77 Budget Act, which appropriated \$70,700 from the General Fund.

Ch. 1395/76 provides the Motion Picture Development Council with the authority to establish fees for the use of state-owned property for the purpose of making commercial motion pictures. These revenues are to be used as reimbursement to operating departments for their actual additional costs and for support of the council.

The council's total 1977-78 funding is proposed from the General Fund until such time as actual fee revenues available to the council can be determined.

## CALIFORNIA HORSE RACING BOARD

### Program Objectives and Description

The purpose of the board is to regulate pari-mutuel wagering for the protection of the betting public; the promotion of the horse racing and raising industries; and, the maximization of tax revenues for the State of California.

In 1933 the electors of the State of California adopted a constitutional amendment which created the California Horse Racing Board. It further provided for the regulation and the safeguarding of horse racing and wagering so as to assure the State of California an income from racing and to guarantee to the public an honest and correct return on monies wagered.

The Constitution, as amended, empowers the 3-member Board, appointed by the Governor, complete jurisdiction and supervision over all horse racing activities in California. The law delegates to the board wide discretion in rulemaking powers and pursuant to these powers the board adopts rules establishing the authority of the stewards but making the stewards strictly and completely responsible to the board for all their actions.

The board also supervises all race meetings in the state where pari-mutuel wagering is conducted. Principal activities of the board are directed toward:

- Protection of the betting public;
- Licensing of racing associations;
- Sanctioning of every person who participates in any phase of horseracing;
- Designating racing days and charity days;
- Acting as a quasi-judicial body in matters pertaining to horseracing meets;
- Collecting the state's lawful share of revenue derived from horseracing meets;
- Enforcing laws, rules and regulations pertaining to horseracing in California.

The state's revenue from horseracing is principally derived from fees based upon a percentage of the pari-mutuel wagering pools, breakage and unclaimed tickets. Additional revenue is derived from licenses issued to horse owners, trainers, jockeys, grooms and others, and from fines and miscellaneous sources. The present tax rates range from 5.50 percent to 7.45 percent on the total amount wagered at the race tracks.

Estimated revenues for the 1977-78 fiscal year will amount to \$110,000,000 of which approximately \$12,500,000 is appropriated for the Fair and Exposition Fund and the remaining balance of \$96,700,000 is transferred to the General Fund.

Chapter 1148, Statutes of 1976, created the California Standardbred Sires Stakes Program to be administered by a Standardbred Sires Stakes Committee and the Horse Racing Board. One position is being added to provide clerical support to this committee.

A one-time allocation of \$29,900 has been included in the 1977-78 budget to fund the expenses of relocating the board headquarters from Los Angeles to Sacramento.

### Authority

Section 19b of Article IV of the State Constitution and Sections 19400 through 19664 of the Business and Professions Code.

PROGRAM REQUIREMENTS	75-76	76-77	77-78	1975-76	1976-77	1977-78
Continuing program costs.....	27.5	28.7	29.2	\$638,945	\$718,853	\$807,168

Fair and exposition fund .....				638,945	693,853	757,168

### Program Elements

a. Licensing .....	9	9.2	9.2	\$139,395	\$142,604	\$158,700
b. Enforcement .....	10.5	11	11	299,592	316,249	342,343
c. California standardbred sires stakes program .....	-	0.5	1	-	25,000	50,000
d. Administration (undistributed) .....	8	8	8	199,958	235,000	256,125

### Output

Primarily, the workload of the board is determined by the number of racetracks operating and the number of racing days allocated. This is directly related to the Horse Racing Law, Chapter 4, Division 8, Business and Professions Code. The projected workload is shown in the following tables:

	74-75	75-76	76-77	77-78
Number of nights .....	410	410	416	420
Number of days .....	491	458	494	495
Totals .....	901	868 <sup>1</sup>	910	915
Number of occupational licenses issued .....	17,834	17,922	18,500	19,000
Collection of fees .....	402,000	446,560 <sup>2</sup>	470,000	500,000
Disciplinary hearings:				
Ejected patron cases .....	66	56	60	60
Licensee penalty cases .....	67	65	70	70
Totals .....	133	121	130	130

<sup>1</sup> Decrease due to work stoppages during the 1975-76 F.Y.

<sup>2</sup> Due to work stoppage, approximately \$10,000 was not received in license fee revenue.

#### a. Licensing

It is essential, in order to protect both the public and the industry, that the board be aware of every individual participating in horseracing. The licensing of each participant establishes such a control.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$139,395	\$142,604	\$158,700
Personnel years .....	9	9.2	9.2

#### b. Enforcement

Strict compliance with the detailed rules is required in order to establish a preventive control and a protection to the betting public and the state's interest.

Racetrack investigators, who represent the California Horse Racing Board, inspect racing operations for compliance with the rules and regulations of the board, seek the ejection of undesirables from racing enclosures, and keep the board informed of all racing matters.

## CALIFORNIA HORSE RACING BOARD—Continued

Input	1975-76	1976-77	1977-78
Expenditures .....	\$299,592	\$316,249	\$342,343
Personnel years .....	10.5	11	11

## c. California Standardbred Sires Stakes Program

Chapter 1148, Statutes of 1976 provided for the establishment of a standardbred sires stakes program to encourage breeding of horses in California. This is to be accomplished through increased purses and special races supported by an additional one percent takeout and distribution of breakage from harness racing meets. A five member committee, appointed by the board chairman, advises the board on the administration of this program. One position is being added to provide clerical support for the committee.

Input	1975-76	1976-77	1977-78
Expenditures .....	—	\$25,000	\$50,000
Personnel years .....	—	0.5	1

## d. Administration

Administration includes the California Horse Racing Board, which consists of three members appointed by the Governor for four-year terms, and the administrative staff which is responsible to the board for budgeting and accounting, supervising the licensing and enforcement activities of the board, and administering the increasing number of appeals.

Input	1975-76	1976-77	1977-78
Expenditures .....	\$199,958	\$235,000	\$256,125
Personnel years .....	8	8	8

## BOARD OF OSTEOPATHIC EXAMINERS

### Program Objectives and Description

In today's medical environment it is imperative that all health professionals be adequately trained and meet the minimum standards and qualifications established by state law. The Board of Osteopathic Examiners sets and enforces standards for licensure for Osteopathic Physicians and Surgeons, conducts examinations and investigations, and initiates disciplinary proceedings in the event violations of the Osteopathic Initiative Act are confirmed.

The board has been an independent agency since December 15, 1975, when the board voluntarily separated from the Department of Consumer Affairs. The board is cognizant of the rising cost in future investigation and other areas of board activity. Consequently the board increased the osteopathic licensing fee from \$65 per year to \$150 per year commencing with the 1977 licensing year. Authority for this increase is derived from Sections 2458 and 2496 of the Business and Professions Code.

As of August 10, 1976, the Board will no longer be represented by the Attorney General, and will contract separately for its legal services. In an effort to maintain the high standards of the profession, the Board is introducing an ongoing investigative and inspection program. During 1976-77, the Board will incur extraordinary costs in its license revocation program.

PROGRAM REQUIREMENTS	75-76	76-77	77-78	1975-76	1976-77	1977-78
Board of Osteopathic Examiners (Contingent Fund of the Board of Osteopathic Examiners)	3.1	3.2	3.2	\$111,404	\$171,520	\$157,595

### Authority

Osteopathic Initiative Act.

### Output

Activity in all components continues on a gradual increase. All applications processed and examinations given are by reciprocal agreement:

	1975-76	1976-77	1977-78
Licenses	940	1,020	1,150
Applications:

## BOARD OF CHIROPRACTIC EXAMINERS

The Board of Chiropractic Examiners was established by the Chiropractic Act of California, an initiative measure passed by the voters in 1922. The Act mandated the Board with the primary responsibility of assuring the consumers of California that providers of chiropractic services are adequately trained and have met the minimum standards of performance for each treatment. Through licensure, continuing education, and disciplinary processes, the Board insures that recognized standards of treatment and practice are maintained by licensees, approves and regulates eleven (11) chiropractic schools in the U.S. and Canada, reviews complaints and investigates possible violations of the Chiropractic Act, and polices unlicensed activity.

Effective March 1, 1976, the Board withdrew from the Department of Consumer Affairs and became an independent agency under the direct supervision of the Governor's Office.

*The Board is retaining a private attorney to seek a clarification of the "scope of practice" in 1976-77.*

### PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
Board of Chiropractic Examiners.....	\$193,522	\$239,041	232,283

BOARD OF PILOT COMMISSIONERS FOR THE BAYS OF SAN FRANCISCO,  
SAN PABLO, AND SUISUN

This board licenses persons qualified to pilot vessels on San Francisco, San Pablo, and Suisun Bay, and implements rates for their services based upon recommendations of the Pilotage Rate Committee. The Pilotage Rate Committee's function is to conduct public hearings upon the petition of any party directly affected by pilotage rates and upon conclusion of such public hearings to furnish the Legislature copies of their findings and recommendations for final determination by the Legislature.

**SANTA MONICA MOUNTAINS COMPREHENSIVE PLANNING COMMISSION**

**Program Objectives and Description**

The Santa Monica Mountains Comprehensive Planning Commission was created by Chapter 1327 (AB 163), Statutes of 1976. The commission consists of the following fourteen members: The Director of the Office of Planning and Research, one member of the Board of Supervisors of Los Angeles County, one member of the Board of Supervisors of Ventura County, one authorized representation of the Mayor of the City of Los Angeles, one member of the Los Angeles City Council, one elected representative from the City of Thousand Oaks, eight members of the public, four of whom and the Executive Director shall be appointed by the Governor, two by the Committee on Rules of the Senate and two by the Speaker of the Assembly.

The specific duties of the commission include making a detailed study of all the characteristics of the zone which are specified in the final report of the Ventura-Los Angeles Mountain and Coastal Study Commission, including a study of land capabilities and the private and public short- and long-term costs and benefits related to probable and possible changes in the density or intensity of use of land within the zone. Upon the basis of such studies, the commission shall prepare a comprehensive and specific plan, which is capable of implementation, for the conservation and development of the zone. The regional plan shall include the following elements: a land use plan; a transportation plan; a conservation plan; a recreation plan; a public services and facilities plan and an economic element.

**Authority**

# CALIFORNIA INFORMATION SYSTEMS IMPLEMENTATION COMMITTEE

## Program Objectives and Description

The state has established policies regarding electronic data-processing which to be effective must be expeditiously implemented.

The committee's objective is the formulation of recommendations regarding appropriate legislative and executive actions in order to expeditiously implement the state's electronic data-processing policies.

The committee consists of the Secretary of Business and Transportation, Secretary of Health and Welfare, Chairman and Vice Chairman of Assembly Committee on Ways and Means, and Chairman and Vice Chairman of Senate Committee on Finance, Director of General Services, Chairman and Vice Chairman of the Joint Legislative Budget Committee, and Chairman and Vice Chairman of the Joint Legislative Audit Committee.

In its role as a focal point, the committee reviews electronic data-processing policies set forth in Article 1 of Chapter 7 and Chapter 8 of the Government Code and makes recommendations for appropriate change.

The committee develops procedures for the implementation of policies for protecting the privacy and confidentiality of records and the rights and privacy of the individual as established by law.

The committee reports to the Legislature and Governor each year the recommendations made and procedures adopted for implementing the conclusions derived by the committee. *Having no funds budgeted in the past for clerical help or space, funds are proposed for 500 hours of clerical help for 1977-78 and facilities rent for 1976-77 and 1977-78*

## COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING

The objectives of the Commission on Peace Officer Standards and Training are to raise and maintain the level of competence of California peace officers and to provide such other services to local law enforcement as are authorized by law. To accomplish this, the Commission establishes minimum standards of physical, mental, and moral fitness for the recruitment, selection, and training of peace officers. The Commission on Peace Officer Standards and Training apportions revenue received from assessments on criminal and traffic fines to local law enforcement agencies to reimburse them for a portion of the cost of training peace officers. *Effective December 1976, the commission reorganized to provide better functional relationships and more efficient services. The changes are explained in the program narratives.*

### I. STANDARDS AND TRAINING

#### Program Objectives and Description

Consultants coordinate efforts to increase the effectiveness of law enforcement personnel by developing education and training courses to meet needs identified through planning; by providing quality control and adequate scheduling of such courses; to assist police agencies to meet training requirements and to develop balanced training and career development programs; and to render other related miscellaneous services to enforcement agencies and training institutions.

#### Education and Training

Education and training courses are organized at local community colleges, four-year colleges, universities, police academies, and other institutions to meet the needs of peace officers. Courses offered are categorized as recruit officer, supervisory, middle management, advanced officer, executive development, and a wide variety of technical and special courses.

Consultants from this division establish the basic criteria that must be met for each of these courses before Commission certification. Advice and assistance is given to local educators and police trainers in preparing these courses and training plans.

Periodic field inspections are made to insure that instructors, coordinators, and trainers are adhering to established course outlines and are meeting all instructional standards. Failure to meet the educational and training standards may be cause for revocation of course certification. Implementation assistance is provided to local agencies to obtain the best results from available training programs.

#### Authority

Section 13503, Penal Code.

#### Personnel Standards

Inspections are conducted to determine if law enforcement agencies receiving state aid are adhering to adopted standards for selection and training and implementation assistance is provided in raising the level of competency through the selection and training process.

The procedures used by a jurisdiction to select and train law enforcement personnel are audited and a counseling service to improve the methods employed in this administrative process is provided. If the result of the inspection reveals operational or structural defects, a program is provided to insure compliance. Those police personnel in departments selected to conduct background investigations of newly recruited officers are counseled and trained as necessary. Implementation of the Minority Recruitment Program has been functionally integrated as part of the field services provided by the Standards and Training Division. Results of the recently completed Crime Prevention programs are also being integrated.

#### Authority

Section 13512, Penal Code.

## COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING—Continued

## II. LAW ENFORCEMENT MANAGEMENT SERVICES

## Program Objectives and Description

The objectives of the Law Enforcement Management Services Division are to solve specific administrative or operational problems related to management or operational techniques and procedures of local law enforcement agencies. Three major counseling services are provided to local jurisdictions upon request:

1. Special surveys consisting of the review and analysis of specified topics.
2. Selected studies and special services which provide limited and specified counseling services.
3. Staff assistance to insure prompt and effective implementation of survey recommendations.

The conduct of these counseling services usually includes the preparation of a written analysis of problems and recommendations for problem solution. Surveys are normally handled by POST staff members. However, in some instances, analysis of unusual problems or implementation of survey recommendations may entail the temporary employment of special consultants. The results of the recently completed Crime Prevention Programs are being integrated into the counseling services provided.

There is a continuing need for research into management problems confronting local law enforcement agencies. This research is necessary so that law enforcement can more effectively carry out its responsibility for maintenance of public order and protection of life and property. The quality and effectiveness of law enforcement service is directly related to the effectiveness of management. Many departments have turned to POST as a resource center for guidance and assistance in resolving specific police management problems.

In concert with other POST divisions, Law Enforcement Management Services Division provides management research assistance and develops and implements workable solutions to selected research projects identified by local law enforcement and POST.

Law Enforcement Management Services Division issues written publications dealing with the "how to" aspects of problem solution involving the most pressing police management questions or problems.

The division has established and maintains a resource library. This facility provides vital information regarding all aspects of law enforcement and serves as an up-to-date resource center for POST personnel and local law enforcement agencies. As a result of the reorganization the division was retitled from *Administrative Counseling to Law Enforcement Management Services* and absorbed the Center for Police Management and Library functions which were formerly a part of the disbanded Technical Services Division.

## III. ADMINISTRATION

## Program Objectives and Description

The administration of a statewide program involving over 600 city and county jurisdictions and state agencies and the allocation of over \$8,000,000 in reimbursements to local governments requires competent management.

The administration provides direction and control over the local assistance program so that the Commission's overall objectives may be realized in the most efficient and economical manner possible.

The Commission's policies are executed by a permanent professional and clerical staff which operates under the direction of an executive director. Special programs may be executed by temporary or special staff under contract. As a result of the reorganization, the executive office staff provides research assistance to other organizational elements, managers selected activities, formulates directives, researches legislatively mandated programs and provides staff services.

As officers complete certified courses, claims are submitted to POST by the employing jurisdiction for reimbursement of the money expended in training the officers. Upon receipt, the claim is checked to insure that the course is certified in the amount and for the number of hours claimed, and for arithmetical accuracy. Correct and valid claims are forwarded to the Controller for payment. Various statistical reports are also prepared for management use and for the Commission.

Applications by officers for professional law enforcement certificates, accompanied by college transcripts, certificates of course completion, and other supporting documents are reviewed to determine eligibility for a certificate and level of proficiency of each applicant. An appropriate certificate is completed and mailed to each qualified applicant.

*An Accounting Officer position is proposed in lieu of contract services formerly provided by the Department of Justice.*

## COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING—Continued

## IV. ASSISTANCE TO CITIES AND COUNTIES

## Program Objectives and Description

The enforcement of laws and the protection of life and property without infringement on individual liberties is one of modern government's most pressing problems. Carefully selected, highly trained and properly motivated peace officers are important factors in the solution of this problem. To encourage and assist local law enforcement agencies to meet and maintain minimum standards in the selection and training of law enforcement officers, financial assistance is given to those cities and counties which qualify for state aid for peace officer training. Each jurisdiction participating in the program is reimbursed from the Peace Officers' Training Fund in proportion to the number of officers who qualify for training reimbursement.

## Authority

Chapter 1305, Statutes of 1968, Sections 13500 to 13523, Penal Code.

## OFFICE OF CRIMINAL JUSTICE PLANNING

The Office of Criminal Justice Planning provides staff support to the California Council on Criminal Justice; coordinates planning efforts by private, state and local agencies in the criminal justice system; and administers federally-funded grants to those agencies in accordance with the plans they develop under federal and state guidelines.

The California Council on Criminal Justice has responsibility for setting broad policies and priorities for effective use of available grant funds to aid in the control and prevention of crime. That responsibility includes the review and approval of the annual comprehensive state plan as well as review and approval of grants funded under that plan. Twenty-one regional planning units coordinate planning activities, review and recommend proposals and monitor grant activities within their jurisdictions.

*In the current year an Emergency Fund appropriation of \$30,121 will be made to provide the required state match for Part JJ federal funds within OCJP.*

### I. PLANNING AND OPERATIONS

#### Program Description

This program contains the functions of planning, evaluation, monitoring and technical assistance. Planning entails analysis of crime, the criminal justice system and related data to determine how grant funds can most effectively be used to deal with the problems that exist. This takes the form of an annual criminal justice plan as required by the Law Enforcement Assistance Administration. Evaluation entails a systematic analysis of grant programs and projects to determine if the activity funded had a casual relationship to reducing or controlling crime. Conclusive evaluations indicate what is effective or ineffective in the control and prevention of crime and what should be encouraged or discouraged in subsequent years. Monitoring informs the office of whether a project is performing in accordance with its contractual obligations. Technical assistance is the staff help provided by OCJP to grantees on carrying out projects and encouraging the use of methods which have proved successful.

Products from these efforts include a State Criminal Justice Plan, program evaluation reports, project monitoring reports and an implemented technical assistance plan.

*Program redirection has resulted in a net increase of one position in the budget year.*

### II. ADMINISTRATION

#### Program Description

This program provides executive leadership and basic management services—council liaison, personnel, accounting, business services, budgeting, grant processing and fiscal monitoring as well as technical guidance on legal, fiscal and affirmative action questions. The federally-mandated audit function is being performed under interagency agreement by the Department of Finance.

*Positions have been included in the current (1 temporary help) and budget years (2.5) for clerical workload relief.*

### III. STATE AND PRIVATE AGENCY AWARDS

#### Program Description

The Omnibus Crime Control and Safe Streets Act, as amended in 1976, sets the maximum percentage of the block grant funds available which may be awarded to state agencies and private organizations. For Fiscal Year 1976-77 the maximum was 26.6 percent. Notification of this "variable pass-through" percentage is usually distributed to all states in August or September of the fiscal year affected.

Beginning in the 1976-77 fiscal year, match funds for state agency awards were appropriated for allocation by the Department of Finance to OCJP.

State matching funds for prior years deobligated block grant funds are provided in this program, and the match will be appropriated in a separate budget act item departmental budget.

## IV. LOCAL PROJECT AWARDS

## Program Description

The Omnibus Crime Control and Safe Streets Act, as amended in 1976 provides a minimum percentage of the total block grant awarded to California which must be made available to units of local government or to combinations of local government. The minimum pass-through for 1976-77 was 73.4% based on the direct expenditures (excluding federal and state funds) by local governments on the criminal justice system during Fiscal Year 1974-75. The allocation to local units of government exceeds the minimum for the current year.

A total of \$2,787,788 Part JJ federal funds have been dedicated in the current and budget years to help offset some of the cost of local jurisdictions for implementing AB 3121 (Deinstitutionalization of juvenile offenders).

## Program Requirements

	1975-76	1976-77	1977-78

## CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION

The California Crime Technological Research Foundation is a state agency and functioned as a nonprofit organization serving to foster the application of science and technology to the various components within the criminal justice field. Guiding CCTRF is a 20-member board of directors who represent law enforcement, corrections, judiciary, education, and research and technology disciplines. The members of the board are appointed by the Governor, with the advice and consent of the Senate.

The foundation's goals are to stimulate, encourage, conduct, evaluate, and sponsor research and development in the field of scientific and technological aids for the prevention and detection of crime, the apprehension and treatment of criminals, and the improvement of the administration of criminal justice in California.

General Fund support of CCTRF was discontinued in the current year, and as necessary, functions of the Foundation will be transferred to appropriate state agencies.

## SUMMARY OF PROGRAM REQUIREMENTS

## I. CONDUCT AND SPONSOR RESEARCH IN THE CRIMINAL JUSTICE FIELD

## Program Objectives and Description

The foundation has been directed to improve the administration of criminal justice and to assist criminal justice in determining the kind and quality of scientific, technological, and management processes needed to improve the effectiveness of criminal justice operations; to sponsor and conduct conferences and studies, collect and disseminate information and issue periodic reports relating to scientific and technological research.

## Authority

California Penal Code, Sections 14000-14017.

## Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs .....	\$354,769	—	—
Federal funds .....	334,193	—	—
Reimbursements .....	20,576	—	—

## Program Elements

	1975-76	1976-77	1977-78
a. Interstate organized crime control index .....	\$210,497	—	—
b. Other federal projects .....	123,696	—	—
c. Criminal justice research information system .....	20,576	—	—

For the list of standard (lettered) footnotes, see the end of the Governor's budget.

CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION—*Continued*

## a. Interstate Organized Crime Control Index

The project expands the development of the Interstate Organized Crime Index (IOCI) based on the results of the prototype demonstration and testing mode while the system undergoes an extensive independent evaluation, to include system design, hardware selection, software needs, organization structure, etc., and the feasibility of interfacing with a national law enforcement telecommunications system, while maintaining the IOCI requirements for security and privacy.

Input	1975-76	1976-77	1977-78
Expenditures:			
IOCI.....	\$210,497	-	-

## b. Other Federal Projects

The Law Enforcement Assistance Administration (LEAA), CCTRF's federal cognizant agency, awards funds for projects pertaining to criminal justice activities. CCTRF has received funding for projects that involve conferences and studies to collect and disseminate information relating to the scientific and technological research, preparing prescriptive program handbooks, implementation of effective building or building related codes, develop a digital facsimile transmission device for the transmission of fingerprints, and conduct training courses for the creation and operation of crime analysis units.

Input	1975-76	1976-77	1977-78
Expenditures:			
Fingerprint digital facsimile transmission device.....	\$26,806	-	-
Crime analysis unit training course.....	96,890	-	-
Total.....	\$123,696	-	-

## c. Criminal Justice Research Information System

Criminal justice research is being conducted throughout the nation by various entities. A centralized systematic library of easily retrievable and analyzable data of these research efforts does not exist.

The CIRIS project objectives are to develop a system that can quickly inform users of research efforts in any criminal justice areas, eliminate duplicate research efforts, direct attention to areas in need of research, and coordinate those parties interested in similar research efforts.

Input	1975-76	1976-77	1977-78
Expenditures.....	\$20,576	-	-

## II. DEVELOP WAYS AND MEANS FOR REDUCING OR PREVENTING CRIME AND CRIMINAL ACTS

## Program Objectives and Description

The objective of this program is to assist criminal justice agencies throughout the state and nation in finding new technological processes and equipment to improve the effectiveness of criminal justice operations and reduce crime and criminal acts.

## Authority

Penal Code, Section 14000.

Program Requirements	1975-76	1976-77	1977-78
Continuing program costs ( <i>Reimbursements</i> ).....	\$177,068	-	-
Input			
Expenditures:			
Nondestructive test systems for building security codes.....	\$53,339	-	-
Personal safety alarm.....	22,744	-	-
Technological approach to building security.....	28,839	-	-
Operational support of CCTRF.....	52,246	-	-
Other projects.....	19,900	-	-
Total.....	\$177,068	-	-

## III. ADMINISTRATIVE SUPPORT FOR THE CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION

## Program Objectives and Description

The executive director and his staff represent the foundation in meetings with national, state and local governing bodies, and various organizations concerned with the problems of crime, delinquency and improving the criminal justice system. This staff works with the foundation to identify areas in the criminal justice system where research and development are required. Staff also initiate work in the areas of foundation interests and catalyze other organizations in conducting programs in areas of mutual interest. Additionally, they function as liaison between the foundation and other concerned agencies.

## Authority

Penal Code Section 14002.

Program Requirements	1975-76	1976-77	1977-78
Continuing program costs ( <i>General Fund</i> ).....	\$138,203	-	-

## STATE PUBLIC DEFENDER

### Program Objectives and Description

Chapter 1125, Statutes of 1975, authorized the appointment of a State Public Defender who may employ such deputies and others as necessary to effectively represent those entitled to representation at public expense. During the current year, the State Public Defender has established offices in Sacramento, San Francisco, and Los Angeles and contracted with Appellate Defenders, Inc., a nonprofit San Diego corporation, to provide a statewide capability to represent indigents in the state and federal appellate courts.

The primary objectives of the State Public Defender are to represent any person who is not financially able to employ counsel in the following matters:

- (a) An appeal, petition for hearing or rehearing to an appellate court or petition for certiorari to the United States Supreme Court or a petition for executive clemency from a judgement relating to criminal or juvenile court proceedings;
- (b) Petitions for an extraordinary writ or action for relief to a final judgement of conviction or wardship;
- (c) Proceedings after a judgement of death;
- (d) Proceedings in which an inmate of a state prison is charged with an offense where the County Public Defender has declined to represent the inmate;
- (e) Any proceeding where a person is entitled to representation at public expense.

The enabling legislation specifically provides that the State Public Defender shall: (1) employ such deputies and other employees and establish and operate such offices as he may need for the proper performance of his duties, (2) contract with county public defenders, private attorneys, and nonprofit corporations, (3) enter into reciprocal or mutual assistance agreements with the board of supervisors of one or more counties to provide for exchange of personnel, (4) formulate plans for representation of indigents in the Supreme Court and in each appellate district, and (5) represent any person who is not financially able to employ counsel in any proceeding where a person is entitled to representation at public expense.

Staff for the office continues to be budgeted on a workload factor of 40 units per attorney per year.

*An increased appellate workload and new legislation account for the proposal of 37 new legal positions and 20 supporting clerical positions. Twenty-two and one-half of the proposed legal positions are to meet the added caseload which the district courts of appeal and the Supreme Court have estimated will be assigned to this office. Fourteen and one-half of the proposed legal positions are for the workload imposed upon the office by Chapter 1239, Statutes of 1976 which made it mandatory for the State Public Defender to represent state prison inmates when the county public defender has refused because of a conflict of interest or other legal reasons.*

## ASSISTANCE TO COUNTIES FOR PUBLIC DEFENDERS

## Program Objectives and Description

Section 987.6 of the Penal Code provides that the State shall pay to the counties an amount not to exceed 10 percent of the amount actually expended by counties in providing legal assistance to indigents charged with violation of state criminal law or involuntarily detained under the Lanterman-Petris-Short Act, Division 5 of the Welfare and Institutions Code. The subvention in the amount of \$775,000 represents the traditional level of state assistance to counties for public defenders.

# SUBVENTION FOR GUARDIANSHIP/CONSERVATORSHIP PROCEEDINGS

## Program Objectives and Description

The purpose of this budget is to provide for state reimbursement of the costs to counties resulting from the enactment into law of AB 1417 (Chapter 1357, Statutes of 1976).

Chapter 1357, Statutes of 1976 substantially revised the law regarding procedures for creation of the relationship of guardian and ward and the establishment of conservatorships in instances where an adult person by reason of advanced age, illness, injury, mental weakness, intemperance, addiction to drugs or other disability or other cause is unable to properly care for himself or his property.

This budget contains \$600,000 in allowance for those provisions of Chapter 1357, Statutes of 1976 which require:

1. Court appointment of legal counsel for indigent adult developmentally disabled persons for whom guardianship or conservatorship is sought.
2. Court appointment of legal counsel for indigent adult developmentally disabled persons who wish to petition the court for termination of guardianship or conservatorship proceedings, for restoration to capacity or for removal of an existing guardian or conservator.
3. Court appointment of an investigator to interview a proposed ward or conservatee who is unable to attend a court hearing where the determination of the need to appoint a guardian or conservator is made.
4. A court investigator to review each guardianship or conservatorship one year after its initiation and biennially thereafter.

Chapter 1357, Statutes of 1976 becomes effective on July 1, 1977.

## PAYMENTS TO COUNTIES FOR COSTS OF HOMICIDE TRIALS

Section 4700.2 of the Penal Code provides that the state shall reimburse counties for the costs of trials relating to escape or conspiracy in a case where one or more objectives of the conspiracy is an escape from the custody of the Department of Corrections. The section originally applied to trials based upon indictments filed between November 1, 1970 and June 30, 1971. Recent legislation (Chapter 455, Statutes of 1976) included indictments filed from October 6, 1972 through October 6, 1973, and appropriated \$225,000 in the current year pursuant to Section 4700.2 of the Penal Code.

The 1975-76 budget reflects legislation (Chapter 254, Statutes of 1975) which reimbursed Marin County for costs incurred pursuant to Penal Code Section 4700.2. In addition, \$32,201 of the 1975-76 deficiency amount was appropriated to Marin and Santa Clara Counties for costs incurred pursuant to Penal Code Section 4700.2. No further expenditures are anticipated pursuant to this section in the budget year.

Sections 15201 through 15203 of the Government Code provide that the state shall reimburse the costs incurred by counties for homicide trials where the cost is in excess of the amount of money derived by the county from a tax of five cents (\$0.05) on each one hundred dollars (\$100) on the property assessed for purposes of taxation within the county.

These payments are in addition to those payable for court costs and county charges under Sections 4700 and 4700.5 of the Penal Code, in connection with trials of inmates charged with commission of a crime while incarcerated in a state institution or prison under the jurisdiction of the Department of Corrections.

## ADMINISTRATION AND PAYMENT OF TORT LIABILITY CLAIMS

### Program Objectives and Description

Chapter 1681, Statutes of 1963, established legislation governing the liability and nonliability of the state for tort actions of its officers and employees. This act also established rules governing the extent of duty of the state to pay judgments and to indemnify its employees.

The state, in general, has assumed liability for all losses up to \$2 million and has purchased insurance covering losses from \$2 to \$50 million.

This budget provides for the administration of the program and for payment of claims against all General Fund agencies except the University of California, and a small number of agencies with unique liability problems which are covered under insurance policies. General Fund expenditures are proposed for awards and settlements, insurance for tort and aircraft settlements for amounts from \$2 to \$50 million, insurance for aircraft liability losses up to \$2 million and administrative costs in the Department of Justice and the Board of Control. The amount of settlement and awards varies, sometimes significantly, from year to year depending upon the cases in litigation and the amounts estimated to be awarded in each instance. The budget request is expected to cover those expenses which can reasonably be anticipated.

Additional funds are appropriated by special legislation and expended by the Department of Justice for tort defense and claims payments and are included in this presentation for comparison purposes.

*Recent information provided by the Department of General Services' Insurance Office indicates that insurance coverage below \$5,000,000 is no longer available and that premiums for coverage between \$5,000,000 and \$50,000,000 will be substantially increased, as reflected below.*

*An emergency Fund allocation in 1976-77 of \$40,000 is planned to continue coverage pending review of the program by the Legislature.*

*Legislation will be proposed in 1977 to provide for payment of the significantly higher premium rates if it is deemed appropriate to continue coverage.*

# INDEMNIFICATION OF PRIVATE CITIZENS

## Program Objectives and Description

This program indemnifies those citizens who are injured and suffer financial hardship as a result of a crime of violence, or who sustain damage or injury in performing acts which benefit the public.

The victim of a crime of violence, a citizen performing an act beneficial to the public, his family, or any person dependent upon the victim or citizen for support may file a claim with the State Board of Control. Eligibility for an award is determined by the Board of Control after an investigation of the claim by the Attorney General. Awards may not exceed \$23,500 for each claimant, including a maximum of \$10,000 for loss of earnings, \$10,000 for medical expenses, and \$3,000 for rehabilitation services and attorneys' fees up to ten percent of the award or \$500, whichever is less.

## Authority

Government Code, Sections 13959-13974.

## TAX RELIEF

A significant portion of the state's annual budgeted expenditures are allocated for tax relief. Tax relief programs were initiated in the late 1960's as a response to the growing concern with the burden of taxes on certain groups of taxpayers. In an effort to mitigate the impact of property taxes, the Constitution was amended to provide homeowners a partial exemption against the value of their residences. In response to assertions that the property tax on inventories was stifling economic activity, businesses were given a partial exemption for inventories. The state provided subventions in the amount of actual property tax revenue loss to reimburse cities, counties, school districts, and other local taxing jurisdictions for these programs. In 1967 the Senior Citizens' Property Tax Assistance Program was established to provide direct assistance to low income elderly homeowners based on the income and property tax of a claimant. In 1972 the state began to partially reimburse cities, counties, and school districts for revenue losses due to Williamson Act contract assessed value reductions.

Chapter 1406, Statutes of 1972 (SB 90) provided substantial increases in the two major tax relief programs, Homeowners' Property Tax Relief and Personal Property Tax Relief, and added: (1) the Renters' Tax Relief Program, that provided an income tax credit or refund to qualified renters based on income; and, (2) reimbursements to local jurisdictions for any future sales or property tax exemptions.

A new program, Senior Citizen Renters' Tax Assistance, was established in Chapter 1060, Statutes of 1976. Effective starting 1977-78, this program will provide low-income elderly renters a cash payment based on the claimant's income and a statutory equivalent for property taxes paid.

Today the state is the major local property taxpayer in California. Payments for the Homeowners' Tax Relief Program and Personal Property Tax Relief total approximately 11.1% of local property tax revenue in 1976-77.

### SUMMARY OF PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
I. Senior Citizens' Property Tax Assistance.....	\$51,149,098	\$52,500,000	\$78,000,000

<b>TOTALS, PROGRAMS (General Fund).....</b>	<b>\$1,306,206,007</b>	<b>\$1,367,167,000</b>	<b>\$1,497,686,500</b>

### I. SENIOR CITIZENS PROPERTY TAX ASSISTANCE

The state provides financial assistance through a system of direct reimbursements for portions of property taxes paid by low-income California residents 62 years of age and older who own and occupy their own homes. The percentage of assistance is inversely related to household income. Assistance for the years 1975-76 and 1976-77 is granted to senior citizens having total household income of \$10,000 or less. The level of assistance ranges from 4 to 96 percent of the amount of property taxes paid on the first \$7,500 of assessed value.

The budget year program costs include the effects of Chapter 161, Statutes of 1976 and Chapter 1060, Statutes of 1976. Chapter 161 liberalized the assistance schedule and increased the assistance range. Chapter 1060 substantially expanded assistance levels by providing for 96 percent assistance at \$3,000 income to 4 percent assistance at incomes of \$12,000. Chapter 1060 also increased the maximum assessed value on which assistance is calculated to \$8,500 from \$7,500.

#### Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs.....	\$51,149,098	\$52,500,000	\$78,000,000

### II. SENIOR CITIZEN RENTERS' TAX ASSISTANCE

Chapter 1060, Statutes of 1976, established an assistance program for low-income renters who are at least 62 years old. Assistance is based on a percentage assistance schedule and a \$220 property tax equivalent. Assistance ranges from 96 percent (or \$211) for incomes at or below \$1,400 to 4 percent (or \$9) at incomes of \$5,000. The definition of household income is the same as under the Senior Citizens' Program for homeowners. Rented premises are defined as premises rented and occupied by the claimant as the principal place of residence during the fiscal year for which assistance is claimed. There are proration provisions for individuals renting less than a full year; and if a claimant owns a home part of a year and rents part of that year, he can file for either senior citizen assistance programs, but not both. The program will be administered by the Franchise Tax Board.

Budget year estimates are based on an average payment of almost \$100 for approximately 200,000 claimants.

#### Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs.....	—	—	\$20,000,000

### III. PERSONAL PROPERTY TAX RELIEF

The state provides reimbursement to local governments for the property tax revenues lost as a result of the partial exemption of business inventories and livestock as well as special reimbursements for motion picture films and wine and brandy. Chapter 1406, Statutes of 1972, increased the exemption from 30 percent to 45 percent in 1973-74 and up to 50 percent in 1974-75 and thereafter.

Current year costs include payments resulting from exemptions made on imported inventory previously exempt under an interpretation of the United States Constitution. In January 1976, the United States Supreme Court ruling in *Michelin Tire Corp. v. Wages* overturned a 19th Century decision dealing with the immunity of imports from taxation. The Court held that nondiscriminatory property taxes were allowed on imported goods no longer in transit. For 1976-77 and subsequent years, this imported property is taxable by counties and therefore is allowed the business inventory exemption.

Chapter 335, Statutes of 1976, held that counties may not levy assessments for prior years on import personal property exempt prior to the Michelin decision, and further, if that prohibition is held invalid, the state would still not reimburse local governments for the income loss resulting from the business inventory exemption on Michelin-type escape assessments. Counties have, however, claimed reimbursement and a substantial amount is included in their 1976-77 claims. Current year costs assume that state audits of county claims will not be completed within the current year.

Despite the costs for current and prior year Michelin type property, 1976-77 costs are less than the current year budget allocation because of slower than anticipated growth of regular inventory assessed value.

Budget year estimates assume an inventory growth rate of approximately 11.2% which will be in line with economic trends of some inventory accumulation and moderate price increases. Budget year costs also include the third year effect of Chapter 1441, Statutes of 1974, which allows the inventory exemption on escape assessments made where the original omission was due to the assessee's error.

#### Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs.....	\$362,718,234	\$409,000,000	\$430,000,000

## TAX RELIEF—Continued

## IV. HOMEOWNERS' PROPERTY TAX RELIEF

In order to reduce the property tax burden, the California Constitution exempts homeowners from paying taxes on the first \$7,000 market value of their principal place of residence. Statutes require the homeowner to occupy the dwelling on the property tax lien date of March 1 if it is to be classified as the principal place of residence. The Constitution also requires the state to reimburse local governments for revenues lost due to the homeowners exemption.

For the current year, there will be program savings of approximately \$38 million. Savings result from: (1) a substantial decrease from 1975-76 in the property tax rate paid by homeowners; and (2) fewer than budgeted claimants. Although claimant levels did not reach the estimated level, the increase was still greater than indicated by increases in the housing stock and participation rate trends. This increase in claimants could be the effect of the elimination of annual filing as provided in Chapter 60, Statutes of 1974.

Last year, study was given to the existing state and local safeguards against erroneous receipt of the exemption. While some safeguards do exist, such as a social security numbers check to insure that one person cannot receive homeowner exemptions on two properties, the potential still remains for claimant abuses to occur, e.g., the exemption could continue when the owner has leased the residence or is deceased.

We are planning a study to determine the level of erroneous claims through a sampling procedure of representative counties.

Estimates of 1977-78 take into account the effects of Chapter 1060, Statutes of 1976, which extended the homeowners exemption to public assistance recipients. Claimants could file late for 80% of the exemption for the 1976-77 year. Budget estimates assume that state reimbursements to local governments for those late filings will be incurred in the 1977-78 year along with reimbursements for full exemptions received by public assistance recipients for the 1977-78 year.

## Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs .....	\$756,465,009	\$760,000,000	\$818,000,000

## V. SUBVENTIONS FOR OPEN SPACE

Article XIII, Section 8 of the California Constitution permits land under enforceable restrictions for open space uses to be assessed at other than market value based on its restricted use. The state provides financial assistance to cities, counties, and school districts to partially defray the loss of property tax revenues. The program is administered by the Department of Conservation.

Payments for school districts are based on a revenue loss formula calculation. For 1975-76 and 1976-77, payments to cities and counties are based on the lesser of a dollar amount per acre (dependent on soil type and location, whether urban prime, other prime or nonprime) and a computed revenue difference method. For 1975-76, total claims for cities, counties and school districts totalled approximately \$17.9 million, or \$1.9 million above the budgeted amount. The deficiency occurred because claims for school districts exceeded the budget estimate. Under existing law, subventions were made on a pro rata basis with first priority given to school districts. Current law provides that 1975-76 open space subventions could not exceed 115 percent of the 1974-75 amount, or a total of approximately \$16,500,000.

A deficiency appropriation of \$2.5 million is proposed in the current year. This amount reflects: (1) \$2 million additional school district subventions and (2) \$500,000 to reflect the maximum amount allowable under current law to correct the 1975-76 deficiency.

Budget year totals are composed of approximately \$7 million for school districts and \$14 million for cities and counties. The estimate for cities and counties includes the effect of Chapter 658, Statutes of 1976, which revised the acreage amount schedule and deleted the revenue difference calculation provisions.

## Program Requirements

	1975-76	1976-77	1977-78
Continuing program requirements .....	\$16,000,000	\$19,500,000	\$21,000,000

## VI. PAYMENTS TO LOCAL GOVERNMENT FOR SALES AND PROPERTY TAX REVENUE LOSS

Chapter 1406, Statutes of 1972, as amended by Chapter 358, Statutes of 1973, provided for state reimbursement of local property and/or sales and use tax revenue losses resulting from statutes enacted after January 1, 1973. This represented an attempt to eliminate the future erosion of the local government tax base in light of the property tax rate limitations imposed on local government by those statutes.

An allocation from the Emergency Fund is proposed for 1976-77 in the amount of \$60,000 because of higher than estimated claims for Chapter 1467, Statutes of 1974. Expenditures for 1977-78 result from the enactment of the following statutes:

(1) Chapter 16, Statutes of 1973 (Blind veterans) .....	\$55,000
(2) Chapter 1165, Statutes of 1973 (Wildlife habitat contracts) .....	80,000
(3) Chapter 1169, Statutes of 1973 (Aircraft assessment) .....	3,200,000
(4) Chapter 456, Statutes of 1974 (Business records) .....	14,500
(5) Chapter 1010, Statutes of 1974 (Camp trailers) .....	37,000
(6) Chapter 1405, Statutes of 1974 (Cargo containers) .....	1,800,000
(7) Chapter 1467, Statutes of 1974 (Documented vessels) .....	500,000
Totals, Expenditures .....	\$5,686,500

## Program Requirements

	1975-76	1976-77	1977-78
Continuing program costs .....	\$4,808,665	\$5,167,000	\$5,686,500

## VII. RENTERS' TAX RELIEF

Chapter 1406, Statutes of 1972, established the program to provide tax relief to qualified renters. For taxable years beginning January 1, 1973, renters received an amount from \$25 to \$45 depending on their adjusted gross income, with maximum relief at incomes of \$8,000 or more. For taxable years beginning January 1, 1976, Chapter 99, Statutes of 1976, modified the relief scale to a flat \$37 regardless of the amount of a renters' adjusted gross income.

This program is administered through the Personal Income Tax Program, with the Renters' Credit being claimed as a refundable tax credit. The Personal Income Tax Account is reimbursed for revenue loss due to the Renters' Tax Relief Program.

## SHARED REVENUES

The primary objectives of the Shared Revenue program are to maintain the fiscal strength of the various governmental entities throughout the State as well as to prevent an increase in the tax burden of their citizens.

This is accomplished by the apportionment of special moneys collected by the State to local government on the basis of statutory formulas.

## FEDERAL REVENUE SHARING

The State and Local Fiscal Assistance Act of 1972 (General Revenue Sharing) was enacted in 1972 with an appropriation of approximately \$30.2 billion for distribution to state and local governments over the five-year period January 1, 1972 to December 31, 1976. The Act was designed to give state and local governments financial aid which could be expended on local priorities.

State and Local Fiscal Amendments of 1976 (enacted October 13, 1976) provide funding of \$25.5 billion for the period from January 1, 1977 through September 30, 1980. No substantive changes were made to the allocation formula.

The allocation of General Revenue Sharing among the recipient state governments for each entitlement period is made according to statutory formulas using data on population, general tax effort, income tax collections and income.

Federal revenue sharing receipts and interest earned thereon are required by the federal statute to be deposited in a trust fund and expended in accordance with state laws. These funds are reserved until appropriated by the Legislature. Amendments of 1976 require recipient governments to hold public hearings on proposed uses of funds. For 1977-78, \$215,000,000 is proposed to be expended for public schools (K-12 and community colleges).

During 1976-77, the State will receive the last quarterly payment of Entitlement Period 6, the two payments of Entitlement Period 7, and the first quarterly payment of Entitlement Period 8. During 1977-78 the last two payments of Entitlement Period 8 and the first two payments of Entitlement Period 9 will be received.

# Debt Service BOND INTEREST AND REDEMPTION—*Continued*

In addition to the above issues, there are other State of California general obligation bonds. The State School Building Aid Program appears functionally under the education section of the budget. The California Water Resources Development Bond Fund Program, the San Francisco Harbor Improvement Bond Financial Program, the Small Craft Harbor Improvement Bond Financial Program, the Veterans Farm and Home Building Fund of 1943 Program, and the Housing Finance Bond Law of 1975 are public service enterprises which have their own revenues to finance their respective debt service expenditures.

**PAYMENT OF INTEREST ON GENERAL FUND LOANS**

Due to monthly fluctuations in receipts and disbursements, temporary loans are occasionally required to provide cash in the General Fund when disbursements exceed collected revenues and any cash balance from the previous month. Such loans are made under the provisions of Government Code Section 16310.

The General Fund's need for temporary loans is also increased by the temporary loans which it must make to other funds, mainly under the provisions of Government Code Section 16351. The 1975-76 fiscal year ended with \$36.5 million loaned to the Social Welfare Federal Fund (for the Federal Government's share of the advance to counties for the Assistance to Families with Dependent Children Program) and \$46.7 million loaned to the Health Care Deposit Fund (for amounts owed by the Federal Government and counties for the Medi-Cal Program). The \$36.5 million was repaid in early July and the \$46.7 million was repaid in full by the end of November, 1976. During the 1976-77 fiscal year, a total of \$100 million has been authorized as a loan to the Health Care Deposit Fund to be withdrawn as needed. The 1976-77 fiscal year will end with estimated loans outstanding of \$38.3 million to the Social Welfare Federal Fund and \$29 million to the Health Care Deposit Fund. Similarly, the 1977-78 fiscal year will end with estimated loans outstanding of \$39.3 million to the Social Welfare Federal Fund and \$24 million to the Health Care Deposit Fund.

Included in this presentation are statements of cash flow and statement of accounts payable and receivable for the past year, the current year, and the budget year, as required by Government Code Sections 12020 and 12021. Neither the cash receipts nor cash disbursements agree with the revenues and expenditures presented elsewhere in the budget because for cash flow purposes, it is necessary to adjust the budget data for cash collected by the agency but not yet received by the State Controller and for the net accrued revenues and expenditures included in the budget. For the 1975-76 and the first five months of the 1976-77 fiscal years, actual data have been obtained from the monthly cash condition reports compiled by the State Controller's office. The receipts and disbursements for the last seven months of 1976-77 and the 1977-78 fiscal year are estimated by projecting monthly receipt and disbursement patterns adjusted to reflect the various changes in statutes and administrative actions not included in these monthly patterns. The 1977-78 fiscal year estimated cash flow takes into consideration the revenue and expenditure measures reflected in this budget. Any changes made subsequent to the budget as presented or statutes enacted which change revenues or expenditures will have an effect on the estimated cash flow and any interest cost.

The borrowing capacity from special funds included in the cash flow statements has been estimated as of the end of each month. The normal cash flow for the funds available for borrowing has been considered but still remain subject to large fluctuations.

## WORKING CAPITAL ADVANCES

## STATE CLEAN WATER GRANTS ADMINISTRATION REVOLVING FUND

Chapter 804, Statutes of 1974, established the State Clean Water Grants Administration Revolving Fund and provided for a loan from the General Fund of up to \$1,500,000. This fund enables the State Water Resources Control Board to expedite its review of grants for the construction of municipal sewage treatment and water reclamation facilities thus avoiding increased construction costs resulting from inflation.

Revenues from grant processing fees will be sufficient to repay the \$220,000 loan from the General Fund during the 1977-78 fiscal year.

## COOPERATIVE PERSONNEL SERVICES REVOLVING FUND

Chapter 838, Statutes of 1973, established the State Personnel Board Cooperative Personnel Services Revolving Fund and transferred to the revolving fund \$125,000 from the General Fund. Repayments are made to the General Fund pursuant to mutually agreeable conditions of the Department of Finance and the State Personnel Board.

## COUNTY FORMATION REVOLVING FUND

Chapter 1247, Statutes of 1975, established the County Formation Revolving Fund and transferred to the revolving fund \$100,000 from the General Fund.

The fund authorizes the State Controller to make loans to a County Formation Review Commission. Previous legislation established a uniform procedure for the formation, consolidation and boundary alteration for counties. This fund is established to permit the Commission to borrow money from the State to meet its expenses.

Repayment with interest is due the fund within one year of the date on which the issues of county formation is voted on by the people.

## REPAYMENT OF LOANS UNDER COMPLETED PROGRAMS

This budget involves only the repayment of loans under programs for which the disbursement authority has expired. Therefore, it reflects only negative expenditures representing the annual repayments by each borrowing jurisdiction.

### EARTHQUAKE DAMAGE REPAIR

The repayment of principal of a loan to repair earthquake damage to the Eureka City Hall building in accordance with the requirements of Chapter 21, Statutes of 1952, Second Extraordinary Session, as amended by Chapter 1777, Statutes of 1953, continues until completely repaid in the 1978-79 fiscal year to the General Fund.

## HEALTH BENEFITS FOR ANNUITANTS

### Program Objectives and Description

The purpose of this program is to provide health protection for retired employees.

This program began on January 1, 1962, with the enabling legislation providing an employer contribution of \$5 per month toward the cost of the basic health plan. Since then, major medical plans, Medicare and plans supplementing Medicare have been developed.

Chapter 188, Statutes of 1976 (SB 1450), effective May 28, 1976, increased the employer's share of premiums for State employees and annuitants to \$29 per month for a single enrollee, \$49 per month for self and one family member and \$60 per month for self and two or more family members.

The 1977-78 Fiscal Year reflects an anticipated 10 percent increase in the cost of premiums and an increase to 4.25% from 3.25% of total premiums for contributions to the State Employees' Contingency Reserve Fund.

### Authority

Title 2, Division 5, Part 5, Government Code.

### Program Requirements

	1975-76	1976-77	1977-78
Health protection for annuitants	\$10,985,127	\$14,837,305	\$18,410,319

### Output

The cost for annuitants' benefits is based on the following average number of annuitants covered from each retirement system:

Retirement System	Number of annuitants			Cost by system		
	75-76	76-77	77-78	1975-76	1976-77	1977-78

# OFFICE OF EMERGENCY SERVICES—NATURAL DISASTER ASSISTANCE

## Program Objectives and Description

The objectives of the program are to provide aid to local agencies for repair and restoration of public real property in stricken areas in time of disaster and to provide assurance that public roadways will be maintained or restored in the event that damage occurs from natural disasters.

Chapter 290, Statutes of 1974, the Natural Disaster Assistance Act, placed the administration of the act with the Director of the Office of Emergency Services and created the Natural Disaster Assistance Fund, to be the single fund from which moneys will be appropriated to local agencies for repair of damage caused by natural disasters.

## Authority

Item 446.7, Budget Act of 1958; Chapter 20, Statutes of 1965; Chapter 27, Statutes of 1965 as amended by Chapter 131, Statutes of 1966 and Chapter 8, Statutes of 1967; Chapter 52, Statutes 1969; Chapter 10, Statutes 1970; Chapter 8, Statutes 1971; Chapter 1284, Statutes 1972; Chapter 624, Statutes 1973; and Chapter 290, Statutes of 1974.

## REFUNDS OF TAXES, LICENSES, AND OTHER FEES

### Program Objectives and Description

This program exists for the purpose of refunding the licenses, taxes and other fees erroneously collected and paid into the general fund for which no other specific provision of the law exists. Funds are also available for payment of prior judgments, liens or encumbrances as provided in Government Code Section 12516, and to cover refunds of taxes in special situations confronting the Franchise Tax Board in which a court of record orders the refund of taxes collected, withheld or transmitted from persons subject to trial and for which no other provision for refund is made by law.

Funds are appropriated each year to provide for expeditious refunds of noncontroversial amounts paid and deposited in the General Fund. This avoids the necessity of filing claims with the Board of Control and inserting items in a claims bill.

### Program Requirements

	1975-76	1976-77	1977-78
Refunds of Taxes, Licenses, and Other Fees ( <i>General Fund</i> ).....	\$946	\$30,000	\$30,000

## LEGISLATIVE CLAIMS

## Program Objectives and Description

Otherwise known as the 'omnibus claims bill,' this program includes all claims approved by the Board of Control and referred to the Legislature for payment. The program provides an equitable procedure for the payment of the following categories of claims:

(a) For which no appropriation has been made or for which no fund is available but the settlement of which has been provided for by statute or constitutional provision.

(b) For which the appropriation made or fund designated is exhausted.

(c) For which settlement is not otherwise provided for by statute or constitutional provision

The provision which directed the State Board of Control to submit special appropriation measures on a quarterly basis (Chapter 622, Statutes of 1974) has been amended by Chapter 182, Statutes of 1976 to require such measures to be submitted at least twice during each calendar year.

Current year estimated expenditures reflect Chapter 381 and Chapter 703, Statutes of 1976 appropriation amounts. Two remaining legislative claims bills will be submitted during the current year which are not included herein.

AUGMENTATION FOR EMPLOYEE COMPENSATION

Program Objectives and Description

Within existing appropriations, the objectives of the augmentations for salary increase and employee benefits are to:

(a) Maintain salary and benefit equity for state employees when compared to prevailing compensation practices in other public employment and private industry.

(b) To continue the total equivalent compensation approach toward adjusting salaries and benefits for employees as initiated in 1974. Final recommendations will be submitted to the Legislature subsequent to meet and confer proceedings with recognized state employee organizations pursuant to Section 3525-3536 of the Government Code.

SUMMARY OF PROGRAM REQUIREMENTS :

SIGNIFICANT PROGRAM CHANGES

I. 1977-78 Employee Compensation Program .....	-	-	\$235,800,000
--	---	---	---------------

I. 1977-78 Employee Compensation Program

Included in the 1977-78 budget are funds which will provide increases of approximately 7.5 percent for state employees' compensation. These funds are summarized as follows:

A. Unallocated compensation .....	\$162,700,000
B. Price increase on health benefits included in base budgets .....	8,400,000
C. Increase in State's contribution to the Public Employees' Retirement System for state employees .....	22,200,000
D. Annual merit salary adjustment for those employees not at the maximum of their range .....	42,500,000
Total .....	\$235,800,000

\$235.8 million is provided for increased compensation (salary adjustments, increased cost of health insurance premiums, etc.) to be finally determined during a meet and confer process to take place early in 1977 and subject to appropriation by the Legislature.

\$162.7 million which represents a 5 percent increase is included for improvement in total equivalent compensation except for the California State University and Colleges academic staff which warrants a 2.2 percent compensation increase according to the California Postsecondary Education Commission's study.

Approximately \$8.4 million is included in various departments' budget for anticipated increases in health benefit insurance premiums. This represents approximately a 10 percent increase and will be available together with the \$162.7 million.

\$22.2 million is provided throughout the individual budgets to provide a 1 percent increase in the State's contribution to the Public Employees' Retirement System (PERS). This increase is the third of five 1 percent increases necessary to make the system for miscellaneous state employees actuarially sound.

Approximately \$42.5 million is provided for merit salary increases for those employees not at the maximum of their salary range and who are performing satisfactorily. Approximately 40 percent of the state employees are eligible to receive the merit salary adjustment and these funds are reflected in each department's budget.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

AUGMENTATION FOR EMPLOYEE COMPENSATION—*Continued*

## II. Salary Increase—1975-76 and 1976-77

The Budget Act of 1976 included funds for a \$70 pay increase for all state employees regardless of their position or level. This approach recognized the severe impact of inflation particularly on those in the lower paid classifications.

The Budget Act of 1975 included appropriations to provide an overall average increase of 7.5 percent. The Act specified that part of the average increase was to be one-time bonus of \$400 to full-time employees in classes whose maximum salary level was at or below \$753 per month after the percentage salary increase was adopted by the salary setting authorities.

## A. Civil Service and Related Classifications

## General Description

The Budget Act of 1975 provided an overall average increase of 7.5 percent, which included the \$400 bonus to lower paid employees. For 1976-77 funds were budgeted in an amount equivalent to provide an increase of \$70 per month for all employees except the Highway Patrolmen series in the Highway Patrol which received \$120 a month in consideration of special legislation concerning their salaries.

Funds for compensation increases in 1977-78 are provided under the 1977-78 employee compensation program displayed in Part I of this budget.

## Input

## Expenditures:

Civil Service and Related	1975-76	1976-77	1977-78
Totals.....	\$88,838,580	\$128,833,650	-

## B. University of California

## General Description

The Budget Act of 1975 provided an overall increase of 7.5 percent, which included the \$400 bonus to lower-paid employees. For 1976-77, funds were budgeted in an amount equivalent to provide an increase of \$70 per month. Funds for compensation increases in 1977-78 are provided under the 1977-78 employee compensation program displayed in Part I of this Budget.

## Expenditures and Allocations:

	1975-76	1976-77	1977-78
Totals.....	\$34,899,632	\$29,668,299	-

## C. The California State University and Colleges

## General Description

The Budget Act of 1975 provided for an overall increase of 7.5 percent which included the \$400 bonus to the lower-paid employees. For 1976-77, funds were budgeted in an amount equivalent to provide an increase of \$70 per month.

Funds for compensation increases in 1977-78 are provided under the 1977-78 employee compensation program displayed in Part I of this Budget.

## Input

## Expenditures and Allocations:

	1975-76	1976-77	1977-78
Totals.....	\$32,744,309	\$28,215,043	-

## D. Judicial

## General Description

Statutory salary provisions for judges and justices of courts of record are included in Government Code Sections 68200 to 68203 inclusive as amended by Chapter 1183, Statutes of 1976. Chapter 1183 provides for a modification of the previous program. Chapter 1183 establishes judges' salaries at the level effective September 1, 1975. Future salary increases for judges will be based upon changes in the Consumer Price Increase but is limited to increases of five percent, effective July 1, 1978. Therefore no funds are included for judges and justices of courts of record for the 1977-78 fiscal year.

The 1976-77 program anticipated an allocation of \$279,258 from the Emergency Fund.

Under Government Code Section 18004, salary adjustment for employees of the courts are approved by the Chairman of the Judicial Council. Salary adjustments for these employees are generally consistent with adjustments granted to civil service employees, and are budgeted with civil service increases. Funds for compensation increases in 1977-78 are provided under the 1977-78 employee compensation program displayed in Part I of this Budget.

California CIP percent change .....	12.3420%	8.5374%	-

## Input

## Expenditures and Allocations:

Statutory .....	1975-76	1976-77	1977-78
	\$2,045,005	\$2,021,316	-

## E. Hastings College of the Law

The Budget Act of 1975 provided an overall increase of 7.5 percent, which included the \$400 bonus to the lower-paid employees.

The Budget Act of 1976 provided an amount which provided an increase of \$70 per month. Salary increase funds for Hastings are budgeted with civil service increases.

Funds for compensation increases in 1977-78 are provided under the 1977-78 employee compensation program displayed in Part I of this Budget.

## III. EMPLOYEE BENEFITS AND SPECIAL ADJUSTMENTS

The Budget Act of 1974 contained the first funds to implement a Total Equivalent Compensation (TEC) approach toward adjusting salaries and benefits for state employees. In 1975-76, this program was continued and increased to a total of \$99.6 million. An additional \$52.6 million was provided for the TEC program in 1976-77.

A total of \$235.8 million is provided in the 1977-78 Governor's Budget for employees' benefits and special salary adjustments. \$73.1 million of these funds are included in base budgets. The remainder of these funds will be allocated to the departments and agencies including the University of California and the California State University and Colleges during the 1977-78 fiscal year.

## AUGMENTATION FOR EMPLOYEE COMPENSATION—Continued

## IV. DEPOOL PUBLIC EMPLOYEES' RETIREMENT FUND

The enactment of Chapter 1399 of the Statutes of 1974 required that the pooled assets and liabilities of the miscellaneous members of the Public Employees' Retirement System be separated or "depoled" within the PERS system. This was due to the passage of Chapter 374, Statutes of 1974, known as the Berryhill Bill which implemented the Total Equivalent Compensation (TEC) program. This legislation provided separate benefits and contribution rates for state miscellaneous members and consequently necessitated depooling of assets and liabilities from other members. The budget for 1975-76 provided \$6,000,000 in General Fund and \$4,000,000 Special Funds to cover the cost of depooling.

## RESERVE FOR CONTINGENCIES

Funds are required by various state agencies for unforeseen contingencies for which no appropriation or an insufficient appropriation has been made. Amounts as required are allocated to the various agencies by the Department of Finance based upon the determination of need. Loans are authorized to meet the needs of programs which would be curtailed due to delayed receipt of reimbursement or revenues and result in no cost to the General Fund.

## PROGRAM REQUIREMENTS

	1975-76	1976-77	1977-78
Unallocated balance ( <i>General Fund</i> ) .....	-	\$1,110,876	\$1,500,000

In the 1975-76 fiscal year, a deficiency appropriation was approved in the amount of \$30,520,089. A deficiency appropriation of \$2,000,000 will be submitted to finance required allocations in the 1976-77 fiscal year. This will leave \$1,110,876 in the 1976-77 fiscal year to meet unforeseen contingencies. This amount is reported as an expenditure in the 1976-77 fiscal year in this section of the budget. It is proposed that \$1,500,000 be appropriated for the 1977-78 fiscal year. The authorization to make temporary loans was continued at \$1,500,000 in the 1976-77 fiscal year. It is proposed that this authorization to make temporary loans be continued at \$1,500,000 for the 1977-78 fiscal year.

The detail below includes allocations and loans from the Emergency Fund. All of these allocations are shown as available funds in each agency budget.

## DETAIL OF ALLOCATIONS INCLUDED IN AGENCY BUDGETS

## STATE OPERATIONS

## Legislative/Judicial/Executive

	<i>General Emergencies</i>		<i>Loans</i>	
	1975-76	1976-77	1975-76	1976-77
Executive:				
Governor's Office:				
Worker's compensation benefits for Kirsten Hutcheson .....	\$46,000	-	-	-
Marcus Foster—reward for information leading to arrest and conviction of the assailants of the Oakland school superintendent .....	10,000	-	-	-
Office of Emergency Services:				
Increase costs as a result of centralizing micro-wave commission system and reassessing departments based on usage .....	-	\$101,058	-	-
Department of Justice:				
For Attorney General services for the Agricultural Labor Relations Board .....	49,911	-	-	-
State Controller:				
Increase in document processing time for payroll services and implementation of new payroll system .....	-	144,078	-	-
To cover additional claims for toll-free passage granted to funeral processions of Vietnam veterans .....	50	-	-	-
PIMS conversion, advertising for Unclaimed Property Program, overtime for making retroactive pay adjustments .....	474,266	-	-	-
Department of Justice:				
For an interagency agreement between the Department of Justice and the Office of Criminal Justice and Planning to implement federal regulations on privacy and security .....	-	40,000	-	-
Secretary of State:				
Additional security and examination of voting systems and devices .....	21,916	-	-	-
For partial financing of the implementation of the postcard voter registration program .....	100,000	-	-	-
Administrative costs of postcard voter registration program .....	-	-	\$92,000	-
To meet the costs of the purchase of ballot paper and cards for use in the June, 1976 statewide primary and local elections .....	-	-	125,000	-
To purchase ballot paper and cards for use in the November General Election .....	-	-	-	\$250,000
Agriculture and Services

## PROPOSED DEFICIENCY BILLS

In addition to the deficiencies funded from the Emergency Fund (Budget Act appropriation and as augmented by a deficiency bill), certain General Fund deficiencies are proposed to be funded from other special appropriation bills. The detail below represents a consolidated listing of all General Fund deficiency bills proposed for the 1976-77 fiscal year. This display is an informational display only; expenditures are reflected in departments' detail budgets and the above Emergency Fund amount shown for unforeseen contingencies.

## DETAIL OF GENERAL FUND CURRENT YEAR DEFICIENCIES

## STATE OPERATIONS

1976-77

## Agriculture and Services

Department of Veterans Affairs:	
To fund additional costs of compensation to employees for working on holidays due to change in State Personnel Board rules .....	\$45,153

## AUGMENTATIONS FOR PRICE INCREASES

The Legislature in 1976-77 appropriated \$19,440,000, to be allocated by Executive Order of the Department of Finance to provide for anticipated price increases which were identified too late to be included in individual departmental budgets.

In 1977-78, \$12,450,000 is being proposed for the same purpose to be allocated by Executive Order of the Department of Finance to fund anticipated price increases which have not been included in individual departmental budgets. Included in this item are increases in the costs of OASDI, workers' compensation, state retirement contributions and the costs of implementing new provisions for public access to records.

## UNALLOCATED CAPITAL OUTLAY

### Project Planning

Appropriations for project planning provide for allocations to agencies for the purpose of securing sound cost estimates for future projects. These allocations are included in this budget as expenditures. An appropriation of \$200,000 is proposed for project planning during the 1977-78 fiscal year.

### Increased Cost of Construction

Existing law provides specific appropriations for the Director of Finance to augment capital outlay projects upon approval of the State Public Works Board. These augmentations are made when a capital outlay project cannot be undertaken because the estimate exceeds the amount available, bids received are in excess of the estimate, or acquisition costs for real property are in excess of the appropriation. Savings from completed projects are transferred to these appropriations and are available by law for reallocation.

This Unallocated Capital Outlay Budget provides the summary presentation of the allocations made from the following specific appropriations:

- 16409 Government Code, General Fund
- Specified Budget Act Appropriations, Capital Outlay Fund for Public Higher Education
- 16354 Government Code, State Construction Program Fund

The expenditures from allocations are included in individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations is included here as an expenditure. For those allocations which are made from fund surpluses pursuant to Government Code Section 16352 rather than the specific appropriations cited above, the allocations are reflected only in the individual agency budgets.

Due to inactivity in the State Construction Program Fund (1966 and prior bond acts) it is proposed that Public Works Board approval will be requested during the 1976-77 fiscal year for reversion of balances in the State Construction Program Fund reserves for increased cost of construction. This reversion will be made under the provisions of Government Code Section 16351.5.

### Fund Conditions

Fund Condition Statements which are not identified to a particular program are also reflected in this budget.

Chapter 246, Statutes of 1975, provides for restoration or rehabilitation of the west wing of the State Capitol and appropriated the \$42,000,000 in the Capitol Improvement Fund for transfer to the Contingent Funds of the Senate and Assembly. This transfer is reflected in the 1975-76 fiscal year. Refer to the budget for the Legislature for the expenditure program.

### SUMMARY OF PROGRAM REQUIREMENTS

## STANDARD FOOTNOTES

### FUND TITLES, SOURCES OR DESCRIPTIONS

#### (STATE OPERATIONS, LOCAL ASSISTANCE AND CAPITAL OUTLAY)

<sup>a</sup> From State Construction Program Fund unless otherwise indicated.

<sup>b</sup> From General Fund unless otherwise indicated.

<sup>c</sup> Selected Bond Fund expenditures that are included in overall expenditure totals. These bond funds include:

- California Water Resources Development Bond Fund
- Central Valley Water Project Construction Fund
- Health Science Facilities Construction Program Fund
- Recreation and Fish and Wildlife Enhancement Fund
- State Beach, Park, Recreational and Historical Facilities Fund
- State Beach, Park, Recreational and Historical Facilities Fund of 1974
- State Clean Water Fund
- State Construction Program Fund
- California Safe Drinking Water Fund
- State Urban and Coastal Park Fund
- California Coastal Conservancy

<sup>d</sup> Bond Fund expenditures from other than selected bond funds are not included in overall expenditure totals.

<sup>e</sup> Non-Governmental Cost Fund revenues and expenditures are not included in budget totals.

<sup>f</sup> Federal Funds and expenditures therefrom are not included in budget totals.

<sup>g</sup> From Capital Outlay Fund for Public Higher Education, unless otherwise indicated.

<sup>h</sup> Chapter 1, Statutes of 1971 (First Extraordinary Session), Capital Outlay Fund for Public Higher Education.

<sup>i</sup> Non-State Funds and expenditures therefrom are not included in budget totals.

<sup>j</sup> Departmental costs relating to budget year salary increase and employee benefits proposals had not been determined when this fund condition statement was prepared. Therefore, the budget year amount shown for surplus available for appropriation has not been adjusted for such potential expenditures.

### PURPOSE OF EXPENDITURE

#### (CAPITAL OUTLAY)

<sup>A</sup> Acquisition

<sup>C</sup> Construction

<sup>E</sup> Equipment

<sup>L</sup> Lease Purchase

9. Statement of Bonded Debt.....	B-41

## CLASSIFICATION OF FUNDS IN THE STATE TREASURY

Revenues and expenditures in the program budget and the summary schedules reflect the activities of many separate funds. Schedules 4 and 5 provide a complete list of these funds. The Index lists those funds for which Fund Conditions are included in the budget and references the page number. General Fund and Special Fund expenditures represent the cost of government and are included in budget totals; and along with selected Bond Funds, are included in the overall expenditure totals.

**GENERAL FUND**—Used to account for all revenues and activities financed therefrom which are not required by law to be accounted by any other fund. Most state expenditures are financed from the General Fund. Normally, the only difference between the General Fund and the other governmental cost funds is the restriction placed on the use of revenues of the other governmental cost funds.

*General Fund Special Accounts*—Legislatively created accounts or dedicated revenues within the General Fund. Moneys credited to such accounts may be used only for the purposes specified in the legislation. Revenues and expenditures are included in the General Fund totals in Schedules 3 and 7, but are shown separately in total in Schedule 1 and in detail in Schedule 4. These special accounts are excluded from the General Fund Unrestricted revenues, expenditures, reserves and surplus.

**SPECIAL FUNDS**—Consists of governmental cost funds used to account for taxes and revenues which are restricted by law for particular functions or activities of government. The funds included in these classifications are primarily for the regulation of businesses, professions and vocations; transportation; law enforcement and capital outlay.

**OTHER FUNDS**—See Schedule 5 for a list of funds which do not represent a cost of government. Expenditures from these funds are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues. Included are receipts from the Federal Government, funds created for accounting purposes, receipts from sale of lands, or moneys held in trust. These funds are segregated into the following classifications:

*Working Capital and Revolving Funds*—Funds created to finance internal service activities rendered by a state agency to other state agencies or to local governments for which charges are made at cost. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

*Public Service Enterprise Funds*—Self-supporting activities operated by the State for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues.

*Bond Funds*—Used to account for the receipt and disbursement of proceeds from the sale of bonds and to finance projects for which the bonds were authorized. Expenditures are considered a cost of government at the time interest payments are made and as the bonds are redeemed.

*Retirement Funds*—Moneys held in trust by the State for retirement benefit payments.

*Trust and Agency Funds*—Funds holding moneys in trust pending disbursements to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their sources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

**SELECTED BOND FUNDS**—Included in the overall expenditure totals of Schedules 1, 3 and 7 for budget purposes are expenditures from the following funds:

- California Water Resources Development Bond Fund.
- Central Valley Water Project Construction Fund.
- Health Science Facilities Construction Program Fund.
- Recreation and Fish and Wildlife Enhancement Fund.
- State Beach, Park, Recreational and Historical Facilities Fund (of 1964).
- State Beach, Park, Recreational and Historical Facilities Fund (of 1974).
- State Clean Water (Bond) Fund.
- State Construction Program Fund.
- California Safe Drinking Water Fund.
- State Urban and Coastal Park Fund.
